Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: RECOMMENDATION (22 CCR 66262.34(a)(4)): Documented records demonstrating the facility has provided hazardous waste training was reviewed at the time of inspection. As a large quantity generator (LQG) of hazardous waste there are additional documented requirements that must be followed pursuant to 22 CCR 66262.34(a)(4). Some of these include: 1. The job title for each position at the facility related to hazardous waste management 2. Name of the employee filling each job 3. A written job description for each position 4. Duties of facility personnel assigned to each position Guidance on the LQG training requirements was emailed to Carissa Summers on April 13, 2022. The site walk through was conducted with facility representative Carissa Summers and EMD specialist Gloria Romero on April 12, 2022. The inspection report was emailed to Carissa Summers on April 13, 2022 at the following email address: carissa.summers@greenwaste.com

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 07/27/2022. OBSERVATION: The chemical description pages submitted on CERS July 2, 2021 have the following deficiencies: 1. Dow Frost - A chemical description page was submitted for Dow Frost, however production supervisor stated that Dow Frost is no longer a hazardous material stored at the facility. 2. Morlina Oil - Chemical description pages were submitted for Morlina Oil 220, however this line of lubricant was not observed and other lines of lubricants are being handled/stored at the facility instead. CORRECTIVE ACTION: Revise the hazardous materials chemical description pages to accurately reflect what is currently handled and stored at the facility and submit electronically in the California Environmental Reporting System (CERS). Notify me when they are available for review.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or

LIQUI BOX CORP (Continued) **S106800731**

disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 11/29/2018. OBSERVATION: Observed one 30 gallon steel drum of used aerosols and one 30 gallon steel drum of used fluorescent light bulbs located in the Grinding Room and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of all of the hazardous waste streams listed above and submit a copy of the manifest/receipt to this department.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-07-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility will be submitting a new HMBP to reflect recent/upcoming changes to the location where hazardous materials are stored.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 522354
Site Name: Skypack Corp
Violation Date: 08-09-2023
Citation: Un-Specified
Violation Description: Business Plan Program - Administration/Documentation - General Local Ordinance
Violation Notes: SCC Section 6.96.030 - Failure to obtain and/or maintain an active permit for hazardous materials storage/handling. OBSERVATION: The facility does not have a current permit for hazardous materials storage/handling. At the time of inspection, facility did not have a current permit and had a balance due of $972.40. CORRECTIVE ACTION: Immediately pay all permit fees to this department to obtain a new or renewed hazardous materials storage permit and maintain that permit as active as long as the facility is in operation and continues to store/handle hazardous materials.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

City:	SACRAMENTO
State:	CA
County:	SACRAMENTO
Object ID:	4996
USACE Division:	spd
USACE District:	spk
Status:	Properties without projects
Current Owner:	Not reported

EMS Map Link:

Eligibility:	Eligible
Has Projects:	no
NPL Status:	Not on the NPL
Project Required:	no
Feature Description:	The Site Was Established On 29 June 1936 As Sacramento Air Depot And Was Renamed Mcclellan Field In 1940. Mcclellan Field Became Mcclellan Air Force Base On 2 February 1948. Mcclellan Air Force Base Continued Operation Until Closure Under The Base Realignment And Closure Program On July 13, 2001. The Site Is Still Largely Owned By The Air Force Real Property Agency And Is Used As A Business Park. Because The Installation Was Active Until 2001, It Is Not An Eligible Property Under The Fuds Program. The Electronic Records System For Fuds Notes That The Findings And Determination Of Eligibility (Fde) Was Completed In 1994 And Lists The Property As Fuds Eligible. There Are No Copies Of The Fde In The Paper Files. There Are No Records Indicating That An Inventory Project Report (Inpr) Was Prepared For The Sacramento Air Depot.

Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 12/21/2017. OBSERVATION: As demonstrated by the number and type of hazardous waste violations observed at the time of inspection, personnel are not adequately trained to perform their duties in a way that ensures the facility's compliance with the requirements of this chapter. During the time of the inspection multiple quarts of motor oil that were partially full were observed in the trash in the automotive shop area. CORRECTIVE ACTION: Conduct training with applicable personnel and document it according to the requirements of 22 CCR 15 66265.16(d). Submit a copy of the documentation to this department.
Violation Division:	Sacramento County Env Management Department

Citation: 40 CFR 1 265.201(c)(5) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(5)
Violation Description: Failure to conduct weekly inspections of the construction materials, fixtures, and surrounding areas of the hazardous waste tanks.
Violation Notes: Returned to compliance on 09/24/2014. OBSERVATION: Weekly hazardous waste tank inspections for the used oil tank have not been conducted. CORRECTIVE ACTION: Conduct weekly inspections of the hazardous waste tank according to the requirements identified above and submit a copy of the documentation to this department.

Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 09/08/2021. OBSERVATION: The site map submitted on July 8, 2021 on the California Environmental Reporting System (CERS) does not indicate the current configuration of tanks with the addition of the heated liquid asphalt tank installed in 2020. CORRECTIVE ACTION: Review and revise the site map and submit electronically in CERS. Notify me when it is available for review.

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 09/11/2021. OBSERVATION: Five gallon containers of Latex-ite Color Grade Driveway Filler located outside in the SE corner of the property were observed opened to allow the product to dry for disposal to trash. Manager Tino Villanueva stated that these containers were received from a sister facility and that bacterial growth spoiled the product making it become off specification. Mr. Villanueva stated that this is not a normal occurrence, but that this occurs periodically. Approximately nine pallets of five gallon containers were observed and a proper waste determination was not made. CORRECTIVE ACTION: Immediately cease the activity of leaving the Latex-ite Color Grade Driveway Filler containers open to dry. Submit documentation to this department demonstrating that the waste has been properly characterized to determine if it is a hazardous waste prior to allowing the product to dry. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement [Truncated]

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	OBSERVATION: The hazardous material employee training program is implemented but not properly documented. All employee hazardous materials training must be properly documented. CORRECTIVE ACTION: Conduct annual hazardous materials employee training and have employees in attendance print and sign their name and job description on a training record. Send the copy of the training record to this department when complete. NOTE: Conduct this training annually. Keep all copies of employee training records on site for three years.

Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 10/13/2021. OBSERVATION: The hazardous materials inventory submitted July 8, 2021 on CERS does not accurately reflect what was observed at the time of inspection. The following deficiencies were observed: 1. Chemical inventory pages were submitted on July 8, 2021 for Benaqua and Foam Control Agent, however these lines of products are no longer used. These chemical inventory pages should be deleted. 2. A reportable quantity of AD-here LOF 65-00 located in the main warehouse was observed at the time of inspection, however a hazardous materials inventory has not been submitted in CERS. 3. The liquid asphalt 6000 gallon tank located in the main warehouse was observed at the time of inspection, however a hazardous materials inventory has not been submitted in CERS. CORRECTIVE ACTION: Revise and/or complete hazardous materials inventory pages for all hazardous materials stored in reportable quantities (55 gallons for

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 07/19/2018. OBSERVATION: Metal fines generated from metal grinding machinery is being recycled as scrap metal. Finely divided metal less than 100 microns in size does not meet the definition of scrap metal. CORRECTIVE ACTION: Immediately stop recycling finely divided metal. Submit documentation to this department demonstrating that the finely divided metal has been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit manifests documenting proper disposal and a statement demonstrating how you will manage it in the future. Keep the test results, waste analyses, or other determinations at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal. OBSERVATION: Sludge waste from the cabinet parts washer was observed in a orange five gallon bucket next to the unit. It could not be determined how sludge waste from the cabinet parts washer is being disposed of. Waste manifests [Truncated]

Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 07/19/2018. OBSERVATION: Metal fines were observed accumulating on the floor around and on the metal fabricating equipment throughout the shop. Blast media waste was observed accumulating on the floor around the sand blaster and on top red tarping material inside a tote adjacent to the sand blasting unit. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating the spills have been properly removed and managed.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 07/31/2017. OBSERVATION: An Emergency Response Plan and procedures has not been submitted to this department. CORRECTIVE ACTION: See corrective action for Q343.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	65734
Site Name:	SCHATZ & KRUM
Violation Date:	03-21-2017
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and type of hazardous waste violations observed at the time of inspection. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have been properly trained.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: OBSERVATION: Annual employee training in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan has not been provided and / or documented and training records maintained for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all applicable employees in safety procedures in the event of a release or threatened release of a hazardous material and release reporting procedures. Submit documentation to the unified program agency demonstrating appropriate personnel have received training and maintain ongoing annual training records for a minimum of three years.

Violation Date: 03-21-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 07/19/2018. OBSERVATION: Metal fines generated from metal grinding machinery is being recycled as scrap metal. Finely divided metal less than 100microns in size does not meet the definition of scrap metal. CORRECTIVE ACTION: Immediately stop recycling finely divided metal. Submit documentation to this department demonstrating that the finely divided metal has been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit manifests documenting proper disposal and a statement demonstrating how you will manage it in the future. Keep the test results, waste analyses, or other determinations at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal. OBSERVATION: Sludge waste from the cabinet parts washer was observed accumulating in containers near the unit. Per Conversation with Stuart Krum no changes have been made to this process. Waste manifests demonstrating proper disposal were [Truncated]

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	OBSERVATION: Observed one 110 gallon plastic container of used coolant located in the back of the shop without a legible start accumulation date and the most recent manifest available was for June 12, 2018. CORRECTIVE ACTION: Dispose of waste coolant and submit a copy of the manifest/receipt to this department.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 565963
Site Name: Green Evolution Recycling LLC
Violation Date: 09-18-2014
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 09/23/2014. OBSERVATION: The facility has not submitted a Hazardous Materials Inventory Chemical Description pages for Oxygen and Acetylene to this department. Also, the Chemical Location, Hazardous Material Type, and Annual Waste Amounts need to be updated for existing inventory pages. CORRECTIVE ACTION: Add Oxygen and Acetylene chemical description pages. Revise and submit the existing Hazardous Materials Inventory Chemical Description pages for all materials listed above electronically in this department's e-Reporting Portal or in the California Environmental Reporting System. Notify me when it is available for review.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 565963
Site Name: Green Evolution Recycling LLC
Violation Date: 05-31-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 06/02/2017. OBSERVATION: Observed one five gallon plastic bucket of used oil located in the mechanics shop that was open. CORRECTIVE ACTION: Submit photos to this department demonstrating that the container listed above has been properly closed.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 06/02/2017. OBSERVATION: Annual training documentation for all applicable employees was conducted on April 13, 2016. Hazardous Communications training is required on an annual basis. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	565963
Site Name:	Green Evolution Recycling LLC
Violation Date:	09-18-2014
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 09/23/2014. OBSERVATION: The emergency response plan and procedures submitted to this department did not include the name of the nearest medical facility/hospital and phone number and locations were not listed for the emergency equipment. CORRECTIVE ACTION: Revise the emergency response plan and procedures to include all required content and submit electronically in this department's e-Reporting Portal or in the California Environmental Reporting System. Notify me when it is available for review.

Violation Source:	CERS,
Site ID:	565963
Site Name:	Green Evolution Recycling LLC
Violation Date:	03-11-2021
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 04/02/2021. OBSERVATION: Employee training in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan was not available for review at the time of inspection. CORRECTIVE ACTION: Establish an employee training program containing provisions to ensure initial and annual training for all applicable employees in safety procedures in the event of a release or threatened release of a hazardous material and release reporting procedures. Submit documentation to this department demonstrating appropriate personnel have received training and maintain ongoing annual training records for a minimum of three years.

Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-11-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: This inspection report was emailed to managing director David Lee (david@greenevolutionrecycling.com) on March 11, 2021. No hazardous waste violations were observed at the time of inspection. The facility utilizes a maintenance contractor for machinery maintenance. No used oils have been generated since the facility started operations in the summer of 2020, however it was discussed that the facility will need to manage used oil and other hazardous wastes appropriately. Guidance on the management of hazardous wastes was emailed to facility on March 11, 2021.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

SMURFIT STONE CORP (Continued) **S104654828**

dischargers having waste storage systems with land disposal such as dairy waste ponds.

Address: 8455 24TH AVE
City,State,Zip: SACRAMENTO, CA 95826
Site ID: 164835
CERS ID: 824779
CERS Description: Industrial Facility Storm Water

Violations:

Site ID: 164835
Site Name: Universal Service Recycling Inc
Violation Date: 03-01-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 03/11/2019. OBSERVATION: The annotated site map submitted to this department does not include the locations of the bailer, the shear machine, and the Acculoader machine all that contain belly tanks with hydraulic oil. CORRECTIVE ACTION: Revise the annotated Site Map to include all required content and submit electronically in the California Environmental Reporting System.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 164835
Site Name: Universal Service Recycling Inc
Violation Date: 05-24-2023
Citation: HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)
Violation Description: Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.
Violation Notes: Returned to compliance on 05/30/2023. OBSERVATION: The Abroveground Petroleum Storage Act (APSA) submittal element in the California Environmental Reporting System (CERS) was last submitted on March 30, 2022. The annual Hazardous Materials Business Plan (HMBP) submittal was made on February 28, 2023, however the APSA submittal element was not included. CORRECTIVE ACTION: Complete and submit the APSA submittal element electronically in CERS. Ensure the 5-year review date is updated in the APSA Facility Information page. Notify me when the submittal is available for review.
Violation Division: Sacramento County Env Management Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 164835
Site Name: Universal Service Recycling Inc
Violation Date: 03-01-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 03/05/2019. OBSERVATION: Observed one 55 gallon steel drum of waste oily solids/ absorbent located in the hazardous waste storage area that was open during the time of the

MARKEL BROS. PLUMBING (Continued) **U001615785**

	inspection. CORRECTIVE ACTION: Submit photos to this department demonstrating that the container listed above has been properly closed.

Citation: 22 CCR 16 66266.81(a)(4)(B) - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.81(a)(4)(B)
Violation Description: Failure to retain for at least three years a legible copy of each manifest or bill of lading which identifies spent lead-acid storage batteries shipped to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components.
Violation Notes: Returned to compliance on 11/17/2016. OBSERVATION: Bills of lading for spent lead acid batteries recording the shipments off site were not retained at the facility for the past three years. CORRECTIVE ACTION: Obtain copies of all bills of lading for lead-acid batteries recording shipments off site over the past three years. Submit copies of the bills of lading for the past year to this department.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/11/2019. OBSERVATION: Chemical inventory information for all reportable hazardous materials on site at or above reportable quantities have not been completed and electronically submitted to this department. Observed one 55 gallon steel drum of waste oily absorbent located in the hazardous waste storage area that was not reported on the hazardous materials business plan. Observed one 400 gallon belly tank of hydraulic oil, one 600 gallon belly tank of hydraulic oil, and one 400 gallon belly tank of hydraulic oil located in various machines throughout the facility that were not reported on the hazardous materials business plan. CORRECTIVE ACTION: Complete the chemical inventory information for all reportable hazardous materials at or above reportable quantities and submit electronically in the California Environmental Reporting System.

WMUDS/SWAT:

Edit Date:	19960719
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.
Primary Waste:	SLDWST
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported

L AND D LANDFILL COMPANY (Continued) **S101175508**

Violation Source: CERS,

Site ID: 698806
Site Name: L & D LANDFILL LIMITED PARTNERSHIP
Violation Date: 11-17-2022
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 12/06/2022. OBSERVATION: Two 55 gallon containers of waste solvent and two 55 gallon containers of waste antifreeze located in the containment basin were observed without accumulation start dates and a manifest/receipt demonstrating disposal within the past 180 days was not available for review at the time of inspection. CORRECTIVE ACTION: Properly dispose of the waste solvent and waste antifreeze containers and submit a copy of the manifest/receipt to this department.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 698806
Site Name: L & D LANDFILL LIMITED PARTNERSHIP

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 12/21/2022. OBSERVATION: The Hazardous

L AND D LANDFILL COMPANY (Continued) **S101175508**

Materials Inventory submitted in the California Environmental Reporting System (CERS) on March 10, 2022 had the following deficiencies: 1. A reportable quantity of transmission fluid and gear oil was observed at the time of inspection, however hazardous materials inventory pages were not submitted on CERS. 2. Antifreeze: Four 55 gallon containers (220 gallons total) were observed, however a max daily amount of 110 gallons was reported on CERS. 3. Motor oil: A 275 gallon tote was observed, however a max daily amount of 165 gallons was reported on CERS. Two separate hazardous materials inventory pages were submitted for motor oil. Consolidate the motor oil information into one inventory page. 4. Waste antifreeze: Two 55 gallon containers were observed, however a max daily amount of 110 gallons was reported on CERS. 5. Waste solvent: Two 55 gallon containers were observed, however a max daily amount of 55 gallons was reported on CERS. 6. [Truncated]

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 12/23/2022. OBSERVATION: The following waste streams were observed and proper hazardous waste determinations have not been made: 1. The facility uses a metal saw in the tool storage area and performs repairs of metal trash bins east of the flare pad. These activities generate metal fines from the cutting and grinding of steel. The metal fines are currently disposed of to the trash as stated by landfill manager Milton Mastin. 2. Waste paints and coatings picked from customer loads are staged in a shipping container north of the picking line. The facility periodically sorts through the containers to determine the contents and disposes of containers that are empty or dried. It was unclear at the time of inspection how containers with paint or coatings are managed for proper disposal. 3. Propane tanks and compressed gas cylinders picked from customer loads are staged in a shipping container north of the picking line. It was unclear at the time of inspection how compressed gas [Truncated]

WMUDS/SWAT:

Edit Date:	19940413
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.
Primary Waste:	SLDWST
Primary Waste Type:	Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Base Meridian:	MD
NPID:	Not reported
Tonnage:	51
Regional Board ID:	Not reported
Municipal Solid Waste:	False
Superorder:	False
Open To Public:	False
Waste List:	True
Agency Type:	Private
Agency Name:	WEST COAST BUILDING WRECKING
Agency Department:	Not reported
Agency Address:	4600 POWER INN RD.
Agency City,St,Zip:	SACRAMENTO CA 95626
Agency Contact:	Not reported
Agency Telephone:	9166861700

Land Owner City,St,Zip:	ELK GROVE, CA 95624
Land Owner Contact:	Not reported
Land Owner Phone:	9166857340
Region:	5S
Facility Type:	Solid Waste Site-Class III - Landfills for non hazardous solid wastes.
Facility Description:	Not reported
Facility Telephone:	Not reported
SWAT Facility Name:	DIXON PIT LANDFILL

L AND D LANDFILL COMPANY (Continued) **S101310646**

Primary SIC: 4953
Secondary SIC: Not reported
Comments: Not reported
Last Facility Editors: ARVSVMSVM
Waste Discharge System: True
Solid Waste Assessment Test Program: True
Toxic Pits Cleanup Act Program: False
Resource Conservation Recovery Act: False
Department of Defence: False
Solid Waste Assessment Test Program: WEST COAST BLDG & WRECKING CO
Threat to Water Quality: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Sub Chapter 15: True
Regional Board Project Officer: JDM
Number of WMUDS at Facility: 1
Section Range: 07N06E30
RCRA Facility: No
Waste Discharge Requirements: A
Self-Monitoring Rept. Frequency: Quarterly Submittal
Waste Discharge System ID: 5A340302001
Solid Waste Information ID: 34-AA-0007

WDS:
Name: L AND D LANDFILL COMPANY
Address: 8635 FRUITRIDGE RD
City: SACRAMENTO
Facility ID: Sacramento River 340308001
Facility Type: Solid Waste Site-Class III - Landfills for non hazardous solid wastes.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: Not reported

Violation Date: 07-11-2014
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 07/24/2014. OBSERVATION: A 5 gallon container of Metal Particulates located in the maintenance area was observed without an accumulation start date and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Locate a disposal receipt demonstrating disposal within the past 180 days or properly dispose of the Metal Particulates and submit a copy of the manifest/receipt to this department.

CAPITAL CORRUGATED (Continued) **S101301003**

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 07/24/2014. OBSERVATION: The hazardous waste label on a 5 gallon container of Metal Particulates located in the maintenance area was observed without an accumulation start date. CORRECTIVE ACTION: Submit photos to this department demonstrating that the container listed above has been properly labeled.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	389320
Site Name:	CAPITAL CORRUGATED & CARTON, INC
Violation Date:	02-03-2022
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 02/11/2022. OBSERVATION: A proper waste determination has not been made on the following wastes observed during the inspection: 1. Nine 5 gallon containers of unidentifiable waste located in the main hazardous waste storage area that have no labels or lids 2. Four 5 gallon containers of waste ink located outside the ink room near the main hazardous waste storage area that have no lids or labels. Mr. Verduzco stated that he believed the waste ink containers were left open to dry for disposal. CORRECTIVE ACTION: Submit documentation to this department demonstrating that the wastes referenced above have been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,

Violation Date:	07-31-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	OBSERVATION: A white poly drum containing used press wash was observed without a lid. All containers of hazardous waste or hazardous materials must be kept closed when not in use. CORRECTIVE ACTION: Submit photos to this department demonstrating that the container listed above has been properly closed.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW

Violation Date:	07-11-2014
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..
Violation Notes:	Returned to compliance on 07/24/2014. OBSERVATION: The secondary containment pallet under the 55 gallon hazardous waste solvent petroleum distillates container in the offset printing area was observed holding a spill. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating the spill has been properly removed and managed.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	389320
Site Name:	CAPITAL CORRUGATED & CARTON, INC
Violation Date:	07-31-2017
Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Source: CERS,

Site ID: 389320
Site Name: CAPITAL CORRUGATED & CARTON, INC
Violation Date: 02-03-2022
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 02/11/2022. OBSERVATION: Several signed designated facility copies of uniform hazardous waste manifests were not available for review at the time of inspection. The facility was also only able to provide copies of uniform hazardous waste manifests dating back to the beginning of 2021. CORRECTIVE ACTION: Locate copies of uniform hazardous waste manifests dating back three years and ensure you have all signed designated facility copies. Submit a statement describing that all manifests have been reconciled. If a signed designated facility copy of a uniform hazardous waste manifest cannot be located you must submit an exception report to the state Department of Toxic Substances Control (DTSC).

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The facility disposes of used oil at the Sacramento City Transfer & Recyling Station. Only Conditionally Exempt Small Quantity Generators (CESQG) are allowed to self-haul their hazardous waste to a Household Hazardous Waste (HHW) facility. Discontinue this practice and use a licensed hazardous waste hauler to dispose of your used oil in the future.

Quarterly Update:	Update 6/19/23: Sacramento Army Depot had one unit that was RCRA permitted. A RCRA permit was issued for container storage unit located in building 412 (City of Sacramento Parcel/Area 2a) on 4/17/85. This permit was renewed on 8/15/92. The closure plan of the building 412 container storage unit was approved on 6/9/95. However, the closure of the unit was referred to DTSC Cleanup Program. The closure was completed under HSC Chapter 6.8. Building 412 unit was certified closed on 6/26/96 in a document titled Certification of Transferred Property and Remedial Action Certification Form. The Closure of this unit was confirmed again in a 11/2/1998 document titled Certification of Parcel 2A and California State University Sacramento Parcel. DTSC Cleanup project manager also confirmed that closure of former RCRA unit has been closed and no further action is

SACRAMENTO ARMY DEPOT (Continued) **1008188650**

required for this unit. Inactive Sacramento Army Depot (Depot) is an inactive military facility, purchased by the Army on November 1, 1946 and designated the Sacramento Signal Depot until 1962 when is was officially renamed the Sacramento Army Depot. The Depot occupied about 487 acres and was decommissioned as an active Army Facility in 1995. The last parcel of property was transferred in November 2005 to the City of Sacramento for civilian use. Past activities included metal plating and painting and other industrial operations that required waste disposal areas, underground storage tanks and materials and waste storage/handling areas. These operations generated hazardous and potentially hazardous waste including solvents, paints, paint strippers, corrosives, developer and fixers, Freon and other wastes. The estimated total quantity of these hazardous wastes averaged 27,000 gallons per year. In addition, approximately 2000 gallons of waste oil were generated per year. In late 1981, DTSC became involved in the site investigation, and the site was placed on the National Priorities List (NPL), effective August 21, 1987. The Depot contained seven (7) areas that required remediation: four (4) operable units (The South Post Groundwater, Tank 2, Oxidation Lagoons, and Burn Pits) and three (3) additional areas requiring remediation (Parking Lot 3 Groundwater, Battery Disposal Well, and Building 300 Burn Pits). Contaminants of concern included TCE, chloroform, carbon tetrachloride, PCE, DCE, and DCA, and health-based cleanup levels were specified in the 1995 ROD. The Site Mitigation and Brownfields Reuse Program (SMBRP) has been involved in clean-up activities from the beginning and has retained DTSC's role in the remaining groundwater remedy operation, maintenance, and monitoring programs. In 2003, the Northern California Permitting and Corrective Action Branch (NCPCAB) commenced a RCRA/CERCLA Interface evaluation. However, before its completion, the Interface evaluation was dropped. At this point, the SMBRP is still the lead DTSC program involved in the remaining Depot clean-up activities.

Comments: Not reported

Completed Area Name: AREA 2
Completed Sub Area Name: SOUTH POST BURN PITS
Completed Document Type: * Remedial or Removal Design
Completed Date: 04/08/1994
Comments: DES - BURN - DTSC approved the 100 percent Phase I Design for the Burn Pits Soil Vapor Extraction system on April 8, 1994. Approximate cost = _____; funding = BRAC.

Completed Area Name: AREA 2
Completed Sub Area Name: SOUTH POST BURN PITS
Completed Document Type: Remedial Action Plan
Completed Date: 03/25/1993
Comments: ROD signed for burn pit OU. Preferred method for cleaning up the soil involves ventilation of the soil throughout throughout the area, excavation and stabilization of the soil from a portion of the area, and backfilling with the treated soil.

Completed Area Name: AREA 2
Completed Sub Area Name: OXIDATION LAGOON
Completed Document Type: Remedial Action Plan
Completed Date: 09/30/1992
Comments: RAP/ROD for Oxidation Lagoons.

Completed Area Name: AREA 2
Completed Sub Area Name: GW
Completed Document Type: Removal Action Completion Report
Completed Date: 02/28/1990
Comments: Removal Action: Onsite groundwater extraction & treatment.

Completed Area Name: AREA 2
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/30/1998
Comments: CERT - AREA2 -- Area 2 is approximately 40 acres in the western portion of the Former Sacramento Army Depot. 16 sites were remediated on Area 2 using various remediation techniques treating soil and groundwater contaminated with VOCs and metals. All soils sites were cleaned up to residential standards. RWQCB, DTSC, and USEPA have determined that the groundwater remedy was constructed and is operating properly, capturing the contaminated plume. Environmental restrictions preventing the use of underlying groundwater will be recorded with the deed upon transfer of the property.

Completed Date: 05/23/2006
Comments: Army will respond to our comments in the next Quarterly Report. DTSC has no further comments and this report is considered final. DTSC comment issues: parking lot 3 increasing VOC trends, non-agreement with recommendation of no futher action in the offsite area, and request for more data for review of discontinuation of sampling parameters. Status meeting scheduled for May 23, 2006.

Completed Area Name: PROJECT WIDE

SACRAMENTO ARMY DEPOT - AREA II (Continued) **S100925112**

Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/26/2006
Comments: DTSC issued comments on this report on 9/19/06. This report presents the results of the Spring Quarter 2006 groundwater-monitoring event at the Former Sacramento Army Depot as part of an ongoing sampling plan and quality assurance project plan. The report concludes that the TCE Plume Mass is stable and no longer moving further to the south as indicated by decreasing concentrations in groundwater samples collected from monitoring wells. Also noted in the report, extraction wells appear to have exerted an influence over the groundwater plume in the A/B zone and may even be pulling the plume back towards the on-site extraction wells.

Completed Area Name: AREA 1
Completed Sub Area Name: TANK 2
Completed Document Type: Remedial Action Completion Report
Completed Date: 04/30/1993
Comments: Tank 2 was a 1,000 gallon tank used to store waste solvents until 1980 when the tank was emptied. The tank was removed in 1986. An investigation revealed that the tank had leaked and contaminated the surrounding soil. The remedial action taken for this site was a Soil Vapor Extraction system to remove the remaining contamination from the soil. The two chemicals of greatest concentration were ethyl benzene and xylene. Remediation complete in 1994.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 06/30/2005
Comments: This is a quarterly report, the first version is considered final and if any changes need to be made they will be corrected in the next quarterly report. No final letter will be issued.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Five-Year Review Reports
Completed Date: 10/03/2008
Comments: The Five Year Review evaluated whether the soil consolidation and stabilization remedy for the South Post Burn Pits continues to be effective. It also evaluated whether the continuing extraction of chlorinated solvent contaminated ground water remedy is an effective approach to achieve ground water cleanup and control the extent of the area impacted. DTSC has been concerned about whether the extraction system is capturing all contaminated ground water at the southern end of the plume but accepted the final report because the US Army plans to install an additional extraction well at the

SACRAMENTO ARMY DEPOT - AREA II (Continued) **S100925112**

southern end of the plume in 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 03/18/2004
Comments: The FOST incorporated DTSC comments. This FOST transfers 48.21 acres including the stabilized mass. Attached to the FOST are the corresponding land use covenants (LUCs), that restrict groundwater use, disturbance of the stabilized mass cap and restricts residential use in buildings with lead based paint. The LUCs were recorded onl 4/12/2006.

Comments: These report comments will be addressed in the future optimization report

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 11/25/2008
Comments: DTSC's only comment was to update the recommendations section of the monitoring report to reflect the rationale and plan for the planned installation of an additional extraction well.

Completed Area Name: OFF-BASE GROUNDWATER
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan Amendment
Completed Date: 07/23/2008

SACRAMENTO ARMY DEPOT - AREA II (Continued) **S100925112**

Comments: This Work Plan describes the activities planned to be conducted to return ground water extraction well number 10 to efficient operation and increase the amount of ground water it extracts. This is a routine procedure. DTSC comments were adequately addressed. The draft version is considered the final version.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: South Post Burn Pit
Completed Document Type: Technical Workplan
Completed Date: 12/31/2013
Comments: Staff reviewed document and had no significant concerns. Key concern rleated to potential over emphasis/assumption of biological mediated attenuation versus abiotic mechanisms. Abiotic mechanisms likely dominate and could trigger need to conduct fate and transport modeling to quantify effectiveness.

Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/28/1996
Comments: This certification was completed for 485 acres of land, a portion of which was tranferred to the City of Sacramento and the U.S. Department of Health and Human Services. Area 1 The site included one RCRA Storage Area that was closed in accordance with State RCRA Closure Regulations,adn other areas closed under CERLCA. Remedial actions included Air Sparging/Soil venting from Freaon 113 area, removal of 19,000 cubic yards of debris adn moved to South Post burn pits from the Contrator's Spoil area, tank removal and soil vapor extraction from Tank 2 Area, soil removal of pesticides in Pesticide Area, excavation 100 cubic yards of soil from Battery Disposal Well, and no action at firefighter training area. Approximately 270,000 cubic yards of soil was treated and about 350 cubic yards of soil was treated. Expenditures were approximately $2,000,000; not including regulatory oversight charges incurred through DSMOA contract.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: CSU
Completed Document Type: Certification

SACRAMENTO ARMY DEPOT - AREA II (Continued) **S100925112**

Completed Date:	06/30/1998
Comments:	The portion of land that is referred to in this certification includes the following study areas identified under the Environmental Baseline survey including Areas 30, 31, 32, and 68 and areas 12, 28, 57-62, 74 and a portion of 75. Both parcels comprise an area of 24.15 acres. The land is proposed for transfer to the City of Sacramento (Parcel 2A) and the US Department of Education to the California State University Sacramento. Remedial actions for the CSUS Parcel included Tank 2 area (which is also included in the Certification for Area 1), parking Lot 2 groundwater, cyanide leach field soil, Freon 113 soil and groundwater, sanitary sewer system soil and groundwater, ASTs in Building 320, UST 300-5, 300-6, and 300-7. City of Sacramento Area 2A included RCRA Haz Waste Container Storage Areas in Buildings 412 and 415, Study area 28 in Building 300, Soil outside Building 300, parking lot #3 soil and groundwater, Freon 113 soil and groundwater, building 205 soil and building, and building 205 interior (Tank 200-2). Expenditures were reported as $14,000,000 from BRAC; not including regulatory oversight charges incurred through DSMOA contract.

Completed Date:	04/07/2010
Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction
Completed Date:	04/12/2006
Comments:	These landuse covenants restrict use of various portions of Parcel 2B because of lead-based paint and asbestos in soil, underlying groundwater contamination and the presence of the consolidated and stabilized waste mass. Total acres for reuse includes 0.58 acres for lead based paint, 6 acres for the stabilized mass and 48.2 acres for groundwater. The acreage of the stabilized mass is approximately 6 acres and the entire restricted area including the former oxidation lagoons and surrounding areas is 5.38 acres. The covenants were signed by the Army and DTSC and were recorded on April 12, 2006.

Comments: RAP/ROD for Oxidation Lagoons.

Completed Area Name: AREA 2
Completed Sub Area Name: GW
Completed Document Type: Removal Action Completion Report
Completed Date: 02/28/1990
Comments: Removal Action: Onsite groundwater extraction & treatment.

Completed Area Name: AREA 2
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/30/1998
Comments: CERT - AREA2 -- Area 2 is approximately 40 acres in the western portion of the Former Sacramento Army Depot. 16 sites were remediated on Area 2 using various remediation techniques treating soil and groundwater contaminated with VOCs and metals. All soils sites were cleaned up to residential standards. RWQCB, DTSC, and USEPA have determined that the groundwater remedy was constructed and is operating properly, capturing the contaminated plume. Environmental restrictions preventing the use of underlying groundwater will be recorded with the deed upon transfer of the property.

Background Info:	The former Sacramento Army Depot (SAAD) encompasses 485 acres and was established in 1946. The primary mission of the SAAD was rep air, modification and rebuilding of electronic, optical and commu nication equipment. Industrial activities included shelter repair , metal plating and treatment facility, painting, warehousing and shipping. Past disposal and storage areas at the site included s everal underground storage tanks (UST) and aboveground storage ta nks (AST), burn pits, unlined wastewater lagoons, a battery dispo sal area and pesticide mixing areas. The SAAD was decommissioned in 1991. Approx- imately 430 acres have been deeded to the City o f Sacramento or transferred to other Federal agencies as of early 2003. In December 1988, the U.S. Army, EPA and DTSC entered into a Federal Facilities Agreement (FAA) for SAAD. This agreement ad dressed seven areas of suspected contamination and the contaminat ed groundwater. Prior to remediation the soil and groundwater at SAAD was contaminated with heavy metals, trichloroethylene (TCE),

SACRAMENTO ARMY DEPOT - AREA II (Continued) **S100925112**

tetrachloroethylene (PCE), carbon tetrachloride (CCL4), pesticid
es, volatile organic compounds (VOCs) and polychlorinated bipheny
ls (PCBs). SAAD has been divided into 5 operable units (OU). **
* Operable Units/Site Descriptions *** Tank 2 OU contained a 1,
000 gallon underground storage tank used to store waste solvents.
The tank was removed in 1986, but contam ination remained in the
soil. The chemicals of concern for this OU is VOCs. South Post
Burn Pits OU consists of two trenches located in the southern ha
lf of the SAAD, which were used as incineration pits. After 1966,
the pits were filled to ground surface. The COCs for this OU are
: heavy metals, VOCs and polychlorinated biphenyls (PCBs). Base
wide OU consists of 45 soil areas of potential contamination and
the groundwater contamination. The soil sites located through out
the SAAD include Building 300 burn pits, freon spill area, contr
actors spoils area and battery disposal well. The groundwate cont
amination source areas are parking lot three and the south post a
rea. The COCs for this OU are heavy metals, VOCs and CCL4. Oxid
ation Lagoons OU encompasses 4 lagoons that received most of the
industrial and domestic wastewater generated at the Depot. The CO
C for this OU is heavy metals. Order -ISE-12/30/88: Order issue
d for Imminent and Substantial Endangerment by DTSC. FRIFS-TANK
2-8/13/91: Remedial Investigation Feasibility Study for the Tank
2 Area signed by all parties. FRIFS-POND-10/31/91: Remedial Inv
estigation Study for the Oxidation Ponds signed by all parties.
FRIFS-BURN-3/25/93: Remedial Investigation Study for the South P
ost Burn Pits signed by all parties. FRA-TANK2-4/30/93: Removal
Action agreed to in the Feasibility Study for Tank 2 has been pe
rformed. Tank has been removed and remediated.

Background Info:	Past activities at Sacramento Army Depot included electronic equi pment repair, the emergency manufacture of parts, shelter repair, metal plating and treatment, and painting. The metal plating an d painting operations were the primary on-site waste generating a ctivities. Three hundred eighteen acres of the four hundred and eighty five acres was transferred to the City of Sacramento on Ma rch 3, 1995. The portion of the facility transferred to the City required no action or no further action. The portion proposed fo r transfer to U.S. Department of Health and Human Services, appro ximately 28 acres, requires no further action.

Violations:
Site ID: 145089
Site Name: PROCTER & GAMBLE MFG COMPANY
Violation Date: 02-18-2025
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 03/25/2025. OBSERVATION: The facility performs routine exterior pressure washing of the process mats using clean water. The waste wash water is collected at the process mat and transferred to a Vertical Tank in the south central accumulation area

PROCTER & GAMBLE (Continued) **S100871352**

labeled as "Plant Waste Liquid". The Vertical Tank observed accumulating the waste wash water during the inspection was labeled as hazardous waste. HSE Manager Alfredo Nieto stated the facility labels the Vertical Tank as hazardous waste in the event the waste wash water is later determined to be hazardous, however the waste wash water may also potentially be managed as non-hazardous depending on the results of laboratory analysis as the container approaches capacity but no later than 90 days from the start of accumulation. The point-of-generation for the waste wash water is when the washing activity is completed and collected at the process mat and not after comingling different sources of plant waste wash water in the accumulation container. CORRECTIV

Violation Source: CERS,

Site ID: 145089
Site Name: PROCTER & GAMBLE MFG COMPANY
Violation Date: 04-16-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi

Violation Notes: OBSERVATION: The building 54A welding shop is no longer in use. A welding gas fume and dust filtration unit inside the shop has been out of service for greater than 90 days and the waste inside the unit has not been properly characterized to determine if it is hazardous. The copper chromite catalyst centrifuge parts were previously cleaned

PROCTER & GAMBLE (Continued) **S100871352**

outside in the mott filter area per facility personnel. A covered sink was observed with a layer of solidified material and the area has not been used for greater than 90 days. The waste inside the sink has not been properly characterized to determine if it is hazardous. Items in the flammable locker located in building Base M had containers that are rusted (e.g. herbicides) and appeared to be wastes. Procter & Gamble staff applied herbicides in the past, but now use a contractor for the facility weed control. A waste determination for these wastes has not been made. Water/methanol solutions are sent to the methanol dryer to [Truncated]

Violation Date: 04-16-2014
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department’s hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of

PROCTER & GAMBLE (Continued) **S100871352**

the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.

Violation Notes: OBSERVATION: Fatty esters are used in a recirculating parts washer unit used to clean centrifuge equipment contaminated with copper catalyst. Facility representative Alfredo Nieto stated that the fatty esters are eventually removed and disposed of as a hazardous waste or placed back into the ester making process. It was not clear how that determination is made. It is the Department of Toxic Substances Control and this department s interpretation that the cleaning of the centrifuge equipment is not part of the manufacturing process and does not meet the manufacturing process unit exemption. The facility was unable to demonstrate that the excluded recyclable materials requirements have been met in those instances where the fatty esters are placed back into the ester making process. CORRECTIVE ACTION: Submit documentation to this department demonstrating that the fatty esters is being managed pursuant to California Health and Safety Code 25143.2(b), (c), or (d) or submit a [Truncated]

Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: OBSERVATION: The building 54A welding shop is no longer in use. A welding gas fume and dust filtration unit inside the shop has been out of service for greater than 90 days and the waste inside the unit has not been properly characterized to determine if it is hazardous. The copper chromite catalyst centrifuge parts were previously cleaned outside in the mott filter area per facility personnel. A covered sink was observed with a layer of solidified material and the area has not been used for greater than 90 days. The waste inside the sink has not been properly characterized to determine if it is hazardous. Items in the flammable locker located in building Base M had containers that are rusted (e.g. herbicides) and appeared to be wastes. Procter & Gamble staff applied herbicides in the past, but now use a contractor for the facility weed control. A waste determination for these wastes has not been made. Water/methanol solutions are sent to the methanol dryer to [Truncated]

Violation Date: 02-18-2025
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 03/25/2025. OBSERVATION: The facility performs routine exterior pressure washing of the process mats using clean water. The waste wash water is collected at the process mat and transferred to a Vertical Tank in the south central accumulation area labeled as "Plant Waste Liquid". The Vertical Tank observed accumulating the waste wash water during the inspection was labeled as hazardous waste. HSE Manager Alfredo Nieto stated the facility labels the Vertical Tank as hazardous waste in the event the waste wash water is later determined to be hazardous, however the waste wash water may also potentially be managed as non-hazardous depending on the results of laboratory analysis as the container approaches capacity but no later than 90 days from the start of accumulation. The point-of-generation for the waste wash water is when the washing activity is completed and collected at the process mat and not after comingling different sources of plant waste wash water in the accumulation container. Violation Date: 04-16-2014
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.
Violation Notes: OBSERVATION: Fatty esters are used in a recirculating parts washer unit used to clean centrifuge equipment contaminated with copper catalyst. Facility representative Alfredo Nieto stated that the fatty esters are eventually removed and disposed of as a hazardous waste or placed back into the ester making process. It was not clear how that determination is made. It is the Department of Toxic Substances Control and this department s interpretation that the cleaning of the centrifuge equipment is not part of the manufacturing process and does not meet the manufacturing process unit exemption. The facility was unable to demonstrate that the excluded recyclable materials requirements have been met in those instances where the fatty esters are placed back into the ester making process. CORRECTIVE ACTION: Submit documentation to this department demonstrating that the fatty esters is being managed pursuant to California Health and Safety Code 25143.2(b), (c), or (d) or submit a [Truncated]

Violation Date: 04-16-2014
Citation: 22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193
Violation Description: Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements: 1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and 2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed. 3) Constructed of or lined with materials that are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation (including stresses from nearby vehicular traffic); 4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift; 5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours; 6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24

Violation Date: 08-22-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 09/27/2017. OBSERVATION: Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment. During the time of the inspection it was observed that that a valve from the "Ester Train" was not properly functioning and a spill of heavy cut esters was accumulated on the ground below the piping. CORRECTIVE ACTION: Submit photos to this department demonstrating that any spills have

PROCTER & GAMBLE (Continued) **S100871352**

been properly removed and managed.

Citation: 22 CCR 15 66265.196 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.196
Violation Description: Failure to properly respond to a spill/leak with the following requirements: a) General emergency procedures as required in section 66265.56. b) Cessation of use; prevention of flow or addition of wastes into the tank system or secondary containment system and inspect the system to determine the cause of the release. c) Removal of waste from tank system or secondary containment system: 1) If the release was from the tank system, the owner or operator shall, within 24 hours after detection of the leak or, if the owner or operator demonstrates that that is not possible, at the earliest practicable time remove as much of the waste as is necessary to prevent further release of hazardous waste to the environment and to allow inspection and repair of the tank system to be performed. 2) If the release was to a secondary containment system, all released materials shall be removed within 24 hours or in as timely a manner as is possible to prevent harm to human health and the environment. d) The owner or operator shall immediately conduct a visual inspection of the release and, based upon that inspection: 1) Prevent further migration of the leak or spill to soils or surface water; and 2) Remove, and properly dispose of, any visible contamination of the soil or surface water. e) Notifications, reports; 1) Any release to the environment, except as provided in subsection e)2) of this section, shall be reported within 24 hours of detection. 2) A leak or spill of hazardous waste is exempted from the requirements of subsection (e) of this section, but is not exempted from the requirements of section 66265.56, if it is: A) less than or equal to a quantity of one (1) pound, and B) Immediately contained and cleaned-up. 3) Within 30 days of detection of a release to the environment, a report containing the following information shall be submitted: A) Likely route of migration of the release; B) Characteristics of the surrounding soil (soil composition, geology, hydrogeology, climate); C) Results of any monitoring or sampling conduc

Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Description: Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment: 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order; 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design; 4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to maintain the following general tank operating requirements: a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: 1) Spill prevention controls (e.g., check valves, dry discount couplings); 2) Overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and 3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.

PROCTER & GAMBLE (Continued) **S100871352**

Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: OBSERVATION: The building 54A welding shop is no longer in use. A welding gas fume and dust filtration unit inside the shop has been out of service for greater than 90 days and the waste inside the unit has not been properly characterized to determine if it is hazardous. The copper chromite catalyst centrifuge parts were previously cleaned outside in the mott filter area per facility personnel. A covered sink was observed with a layer of solidified material and the area has not been used for greater than 90 days. The waste inside the sink has not been properly characterized to determine if it is hazardous. Items in the flammable locker located in building Base M had containers that are rusted (e.g. herbicides) and appeared to be wastes. Procter & Gamble staff applied herbicides in the past, but now use a contractor for the facility weed control. A waste determination for these wastes has not been made. Water/methanol solutions are sent to the methanol dryer to [Truncated]

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	02/27/1996
Comments:	DTSC's review of documents for past investigation and cleanup activities at the site combined with the sampling efforts made by the project proponent resulting in NFA constitutes a PEA equivalent activity. Reviewed Summary Report of soil sampling describing further efforts to characterize soils underneath concrete foundation of the former steel foundry structure. Composite samples also collected and analyzed in area historically used for stockpiling, refuge sand, and metal debris from steel casting operations. Results indicate no threat to human health or the environment. Therefore, site requires No Further Action. Acres of land returned/released for reuse: 4.0 acres Any land use allowed.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	02/27/1996
Comments:	DTSC's review of documents for past investigation and cleanup activities at the site combined with the sampling efforts made by the project proponent resulting in NFA constitutes a PEA equivalent activity. Reviewed Summary Report of soil sampling describing further efforts to characterize soils underneath concrete foundation of the former steel foundry structure. Composite samples also collected and analyzed in area historically used for stockpiling, refuge sand, and metal debris from steel casting operations. Results indicate no threat to human health or the environment. Therefore, site requires No Further Action. Acres of land returned/released for reuse: 4.0 acres Any land use allowed.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening

METALLOY STEEL FOUNDRY (Continued) **1000590620**

Completed Date: 06/29/1992
Comments: Site Screening completed June 29, 1992. County has indicate they are overseeing cleanup activities being conducted by RP

Completed Area Name: PROJECT WIDE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/02/2025

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Northeast Map:	50006306 CARMICHAEL, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

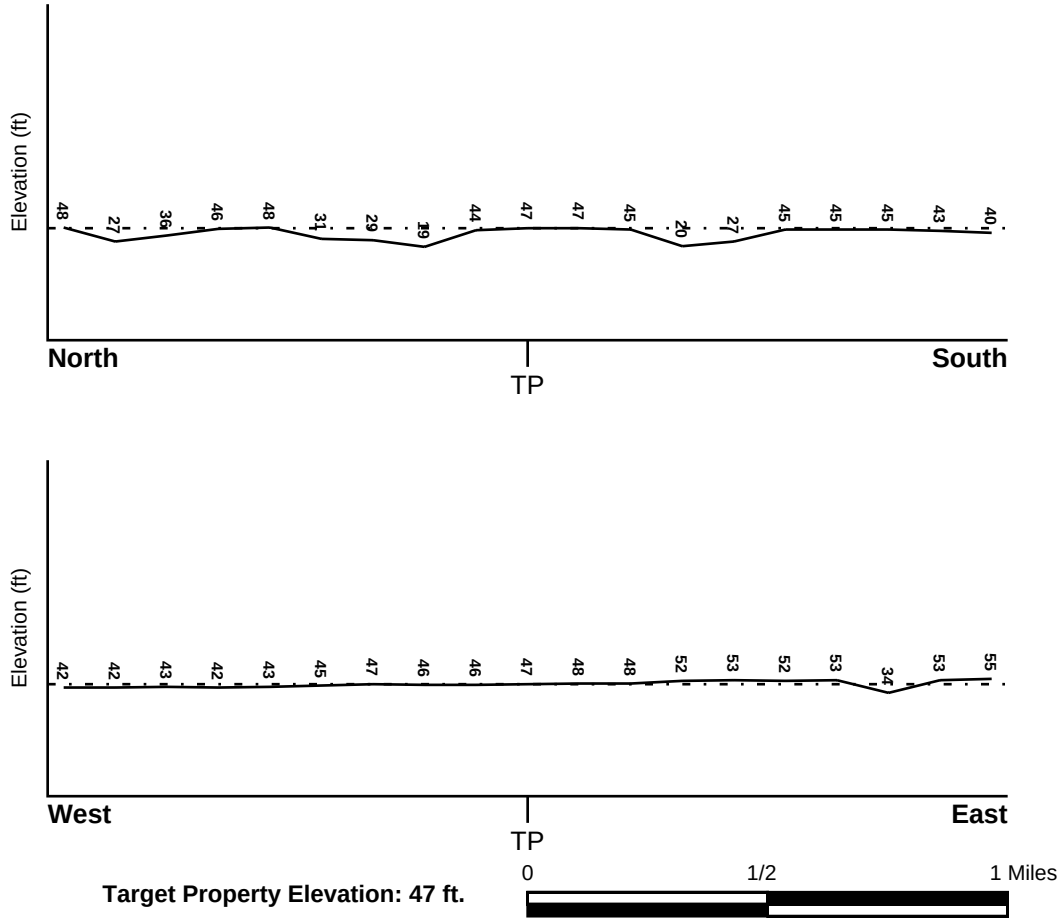
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06067C0195H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06067C0215H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SACRAMENTO EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SAN JOAQUIN

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1
2	22 inches	27 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1
3	27 inches	53 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	53 inches	59 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1

Soil Map ID: 2

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

Soil Map ID: 3

Soil Component Name: XERARENTS

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 4

Soil Component Name: PITS

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by BSK & Associates were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by BSK & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by EDR. The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

STANDARD ENVIRONMENTAL RECORDS	Default Area of Concern (Miles)*	property	1/10	> 1/10
Lists of Federal NPL (Superfund) sites	1.0	0	0	1
Lists of Federal Delisted NPL sites	1.0	0	0	0
Lists of Federal sites subject to CERCLA removals and CERCLA orders	0.5	0	0	1
Lists of Federal CERCLA sites with NFRAP	0.5	0	0	0
Lists of Federal RCRA facilities undergoing Corrective Action	1.0	0	0	1
Lists of Federal RCRA TSD facilities	0.5	0	0	1
Lists of Federal RCRA generators	0.25	0	0	3
Federal institutional controls / engineering controls registries	0.5	0	0	1
Federal ERNS list	0.001	0	0	-
Lists of state- and tribal (Superfund) equivalent sites	1.0	0	0	0
Lists of state- and tribal hazardous waste facilities	1.0	0	0	0
Lists of state and tribal landfills and solid waste disposal facilities	0.5	1	0	3
Lists of state and tribal leaking storage tanks	0.5	0	4	2
Lists of state and tribal registered storage tanks	0.25	0	1	0
State and tribal institutional control / engineering control registries	not searched	-	-	-
Lists of state and tribal voluntary cleanup sites	0.5	0	0	0
Lists of state and tribal brownfield sites	0.5	0	0	0

ADDITIONAL ENVIRONMENTAL RECORDS				
Local Brownfield lists	0.5	0	0	0
Local Lists of Landfill / Solid Waste Disposal Sites	0.5	0	0	0

APPENDIX B

Phase I Environmental Site Assessment Client Questionnaire
ASTM 1527-21: All Appropriate Inquiries

Property Location: 3901 Florin Perkins Road, Sacramento CA 95826
APN#: APN- 061-0150-042, 061-0150-049, 061-0150-045

1) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state, or local law?

No liens

2) Are you aware of any *Activity and Land Use Limitations* (AULs) such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

The proposed development is within 1000 ft of a landfill and midigation measures are required for underslab construction.

3) As the *user* of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? We are the lessor of the transfer station operator on parcel 042

4) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower price is because contamination is known or believed to be present at the *property*?

The property has been and will continue to be vested in the same family as for the past 165 years.

5) Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as the *user*:

a) Do you know the past uses of the *property*?

Yes, Transfer station current, landfill, gravel mining and farmland.

b) Do you know of specific chemicals that are present or once were present at the *property*?

No known chemicals.

c) Do you know of spills or other chemical releases that have taken place at the *property*?

No known spills and or releases

d) Do you know of any environmental cleanups that have taken place at the *property*?

Clean fill in areares of old landfill and closure of 3 cell units

6) As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*? No

Completed by:

Name: Mark Caso

Title: Manager of EPD & BBD Family Properties LP

Signature: Mark Caso Date: 7-29-25

Glossary of Terms:

Activity and Land Use Limitations: legal or physical restrictions or limitations on the use of, or access to, a site or facility; (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to the public health or the environment. These legal or physical restrictions, which may include institutional or *engineering controls*, are intended to prevent adverse impacts to individuals or populations which may be exposed to *hazardous substances* and *petroleum products* in the soil or groundwater on the *property*.

All Appropriate Inquiry: that inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with commercial or customary practice" as defined in CERCLA, 42 U.S.C. §9601 (35)(B), that will qualify a party to a *commercial real estate transaction* for one of threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C. §9601 (35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

Commercial Real Estate: any real *property* except a dwelling or *property* with no more than four dwelling units exclusively for residential use (except that a dwelling or *property* with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the building of such dwellings for profit). This term includes but is not limited to undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; *property* used for residential purposes that has more than four residential dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit.

Commercial Real Estate Transaction: a transfer of title to or possession of real *property* or the receipt of a security interest in real *property*, except that it does not include transfer of title to or possession of real *property* or the receipt of a security interest in real *property* with respect to an individual dwelling or building fewer than five dwelling units, nor does it include the purchase of a lot or lots to construct a dwelling for occupancy by a purchaser, but a *commercial real estate* transaction does include real *property* purchased or leased by persons or entities in the business of building or developing dwelling units.

Engineering Controls: physical modifications to a site or facility (for example: capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the property. Engineering controls are a type of activity and use limitation (AUL).

Environmental Professional: a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The person may be an independent contractor or an employee of the *user*.

Environmental Site Assessment (ESA): the process by which a person or entity seeks to determine if a particular parcel of real *property* (including improvements) is subject to *recognized environmental conditions*. At the option of the *user,* an ESA may include more inquiry than that constituting *all appropriate inquiry* or, if the *user* is not concerned about qualifying for the *LLPs*, less inquiry than that constituting *all appropriate inquiry*. An ESA is both different from and less rigorous than an environmental compliance audit.

Hazardous Substance: a substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any *hazardous waste* having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921), (but not including any waste the regulation of which under RCRA(42 U.S.C. §§6901 *et. seq*.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not

include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Hazardous Waste: any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste , at 42 U.S.C. §6903, as : "a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may – (A) cause, or increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

Institutional Controls: a legal or administrative restriction (for example, deed restrictions," restrictive covenants, easement or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to h*azardous substances* or *petroleum products* in the soil or ground water on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Occupants: those tenants, subtenants, or other persons or entities using the *property* or a portion of the *property*.

Owner: generally the fee owner of record of the property.

Petroleum Products: those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substance* under Subparagraphs (A) through (F) of 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Property: the real *property* that is the subject of the *environmental site assessment* described in this practice. Real *property* includes buildings and other fixtures and improvements located on the *property* and affixed to the land.

Reasonable Ascertainable: information that is (1) *publicly available,* (2) obtainable from its source within reasonable time and cost constraints, and (3) *practically reviewable*.

Recognized Environmental Conditions (RECs): the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with the laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not RECs.

User: the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A *user* may include, without limitation, a potential purchaser of the *property*, a potential tenant of the *property*, an owner of the *property*, a lender, or a *property* manager.

APPENDIX C

Photo 1: View of Subject Property looking northwest from southeast corner.

Photo 2: View of gas probe (GP-7S, GP-7M, GP-7D) in southeast corner of the Subject Property. Groundwater monitoring wells MW-H(S) and MW-H(D) are visible in background along with an associated drum. This drum is presumed to contain purgewater from the groundwater monitoring wells and qualifies as an **on-Subject Property REC.**

Environmental Due Diligence
Owner/Occupant Questionnaire

Please complete a response to each question to the best of your knowledge.

1. Information about the person completing the questionnaire form:

   Name: Mark Caso Date: 7-30-25

   - Telephone Number: 916-813-1265
   - Email: markcaso@msn.com
   - Address: 1312 Fitch Way, Sacramento CA 95864
   - What is your relationship to the site? Owner/Manager
   - What year did your first-*hand knowledge* of the site begin? 2000

2. Site Address and/or APN Number(s): 061-0150-014 061-0150-049 061-0150-045

3. Size of the site in acres: 113.24 ac

4. Site Ownership and Usage:

   - Site owner: EPD & BBD Family Properties LP
   - Site occupants and site use(s): Green Waste aka Zanker
   - When was the Site first occupied? 1860
   - What is the Site history and current use? The site was originally farmland, in the 1950/1960 it was mined for gravel. After the gravel mining ceased their was a landfill operation that operated from 1993 until 2005. In 2006 we entered into a landlease with Zanker and in 2011 was determined that Zanker would not continue as a landfill and they started operations as a transfer station which operates this way to present.
   - Previous site owners and occupants:
   - Date(s) of property transfers/lease: No previous owners or occupants known and no transfers known.

5. Site Features and Conditions:

   - Did the site ever have or currently have the following? (Please circle or highlight)

Underground storage fuel tanks	Above-ground storage tanks
Ponds, pits or lagoons	Septic tank
✓ Water wells or disposal wells	Wash rack area
Storm drains	Electric transformers
Stationary hydraulic lifts	✓ Fill material or imported soil
Pipelines	Rail line or rail spurs
Stained soils or sheen on water	Use of pesticides
Other:	

Environmental Due Diligence
Owner/Occupant Questionnaire

Please complete a response to each question to the best of your knowledge.

If so, please describe the nature of any releases including any hazardous substances.

6. To your knowledge are you aware of the following past or present conditions, if so please describe:

- Previous site activities or operations including manufacturing, dry cleaning, vehicle repair, photo-processing, junkyard or waste storage, recycling facility, painting facility or pest control facility, or other industrial or commercial operations that may store or dispose of waste:
  The site was a former landfill
- Previous environmental assessments or investigations, if so when?
  WDR Order number 95-196 and R5-2013-0042 1995 and 2013 respectivaly.
- Materials that contained lead based paint or asbestos or surveys conducted to determine the presence of these materials: No
- Waste generation or disposal on site and types of hazardous substances or petroleum:
  No known hazardous materials except for freon 11.
- Environmental liens against the property, if so please describe:
- Notice of violations for environmental concerns from a regulatory agency:
  In 2005 the California Attorney Generals office issued a collection notice of $250,000 to the original operator of the landfill.
- Other Information:

7. Utilities: Please describe the name of service providers for the following:

- Water supply Groundwater wells
- Gas and electricity SMUD
- Heating oil None
- Sanitary sewer disposal None
- Garbage disposal None
- Industrial wastewater disposal None
- Storm water disposal Onsite

NANCY C CLARK
LEGISLATIVE COUNSEL
SACRAMENTO OFFICE

c Sacramento Area

The decision to allow the Sacramento area to be graded under the Sacramento Area All decisions (including Sacramento) rendered in the Central Valley Area

The Central Valley Area is unique in that it is the only area in which the Board has been able to establish a system of graded decisions that can be applied to the Central Valley Area as a whole.

Section (a)(1) allows the Board to establish a graded system for the Central Valley Area. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(2) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(3) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(4) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(5) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(6) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(7) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(8) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(9) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(10) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(11) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(12) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(13) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(14) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(15) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(16) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(17) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(18) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(19) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(20) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(21) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(22) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(23) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(24) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(25) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(26) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(27) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(28) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(29) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(30) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(31) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(32) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(33) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(34) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(35) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(36) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(37) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(38) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(39) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(40) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(41) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(42) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(43) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(44) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(45) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(46) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(47) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(48) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(49) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(50) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(51) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(52) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(53) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(54) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(55) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(56) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(57) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(58) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(59) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(60) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(61) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(62) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(63) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(64) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(65) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(66) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(67) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(68) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(69) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(70) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(71) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(72) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(73) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(74) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(75) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(76) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(77) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(78) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(79) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(80) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(81) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(82) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(83) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(84) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(85) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(86) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(87) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(88) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(89) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(90) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(91) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(92) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(93) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(94) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(95) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(96) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(97) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(98) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(99) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(100) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(101) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(102) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(103) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(104) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(105) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(106) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(107) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(108) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(109) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(110) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(111) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(112) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(113) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(114) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(115) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(116) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(117) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(118) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(119) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(120) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(121) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(122) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(123) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(124) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(125) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(126) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(127) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(128) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(129) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(130) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(131) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(132) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(133) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(134) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(135) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(136) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(137) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(138) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(139) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(140) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(141) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(142) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(143) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(144) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(145) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(146) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(147) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(148) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(149) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(150) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(151) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(152) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(153) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(154) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(155) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(156) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(157) allows the Board to establish a graded system for the Central Valley Area if it finds that

LEGISLATIVE REVISOR
SACRAMENTO OFFICE

The Code Reviser shall arrange for the electronic publication of the California Code of Regulations in accordance with Section 11146.1(a)(2).

The Code Reviser shall arrange for the publication of the California Code of Regulations in accordance with Section 11146.1(a)(3).

Each day the Code Reviser is open for business, all electronic records of the Code Reviser shall be backed up. Each week, all electronic records of the Code Reviser shall be backed up to a secure, off-site location in accordance with Section 11146.1(a)(4).

Archives

The Code Reviser shall maintain archives of all electronic records of the California Code of Regulations in accordance with Section 11146.1(a)(5).

The Code Reviser shall collect and deposit annually, on the date specified by the State Archivist, all electronic records of the California Code of Regulations in accordance with Section 11146.1(a)(6).

The Code Reviser shall periodically collect and deposit, on the date specified by the State Archivist, all electronic records of the California Code of Regulations that have been superseded or repealed during the calendar year in accordance with Section 11146.1(a)(6).

The Code Reviser shall retain all records of the California Code of Regulations in accordance with Section 11146.1(a)(7).

The Code Reviser shall maintain a complete collection of all versions of the California Code of Regulations, including all records, documents, and data necessary to reconstruct the California Code of Regulations as it existed at any point in time, in accordance with Section 11146.1(c).

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

MONITORING AND REPORTING PROGRAM
FOR

NANCY CLARK AND
FAMILY TRUST
LARRY NISHLAND LLC
UNCLASSIFIED LAND LLC
CLASS AND CURRENT ACTION
SACRAMENTO COUNTY

This Monitoring and Reporting Program (MRP) is issued pursuant to California Water Code (CWC) section 13267 and 13383. This MRP is issued to Nancy Clark and Family Trust, Larry Nishland LLC, and Unclassified Land LLC (hereafter Discharger) as a result of the Discharger's proposed discharge of wastewater from its facility to waters of the state and waters of the United States. This MRP is issued to assure compliance with the requirements of Waste Discharge Requirements Order No. R5-2021-0000 (Order) or subsequent orders. This MRP requires the Discharger to conduct monitoring and reporting as specified below.

1. **MONITORING REQUIREMENTS**

The Discharger shall not implement any changes to this MRP unless and until a revised MRP is issued by the Central Valley Water Board or the Executive Officer. The Discharger shall comply with all applicable requirements of the Standard Provisions and Reporting Requirements for Waste Discharge Requirements (SPRR) dated September 1, 1994 and the Standard Provisions and Reporting Requirements for Waste Discharge Requirements (SPRR) dated August 1, 2017 (hereafter Standard Provisions). All monitoring shall be conducted in accordance with the Standard Provisions and Reporting Requirements (hereafter Standard Provisions) unless otherwise specified in this MRP. All monitoring shall be conducted in accordance with the Standard Provisions unless otherwise specified in this MRP. All monitoring shall be conducted in accordance with the Standard Provisions unless otherwise specified in this MRP. All monitoring shall be conducted in accordance with the Standard Provisions unless otherwise specified in this MRP.

The Discharger may propose alternative monitoring procedures for approval by the Executive Officer. All proposed alternative monitoring procedures shall be submitted to the Central Valley Water Board for review and approval. All approved alternative monitoring procedures shall be incorporated into this MRP.

The Discharger shall monitor the following:

Section	Monitoring Requirement
A.	Groundwater Monitoring
A.	Wastewater Monitoring
A.	Leachate See Monitoring
A.	Surface water Monitoring
A.	Facility Monitoring
A.	Additional Corrective Action Monitoring

CERTIFICATION

This Updated Final Closure and Post-Closure Maintenance Plan for the Florin-Perkins Landfill located in Sacramento County, California, was prepared under our direct supervision. We are California professionals. Curt Fujii is a Professional Engineer pursuant to Sections 6700 – 6799 of the California Business and Professions Code. Patrick Dunn is a Hydrogeologist pursuant to Section 7850 of the California Business and Professions Code.

We certify under penalty of law that we have personally examined and are familiar with the information submitted in this document. Based on our direct knowledge or inquiry of other individuals immediately responsible for obtaining information, we believe that the information is true, accurate and complete. We are aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

SECTION 0 – EXECUTIVE SUMMARY – UPDATED FINAL CLOSURE AND POST-CLOSURE MAINTENANCE PLAN

PURPOSE OF THIS PLAN

NV5 has prepared this Updated Final Closure and Post-Closure Maintenance Plan for the Florin Perkins Landfill to respond to Provision I.12 of Waste Discharge Requirements (WDR) Order No. R5-2013-0042.

The Central Valley Regional Water Quality Control Board (RWQCB) is requiring closure of the Florin Perkins Landfill (FPL) in Sacramento, California, under Corrective Action Specification C.2.b of the landfill's WDR Order No. R5-2013-0042. This specification requires the Discharger to "Close the landfill units, including install final cover and long term LFG controls to the extent necessary to remove LFG as a source of impacts to groundwater." In addition, Provision I.12 of the WDR requires the Discharger to submit an updated Final Closure and Post-Closure Maintenance Plan (FCPCMP) and an updated Landfill Gas Monitoring and Control Plan (LGMCP) to reflect the requirements of the WDR. Subsequent to WDR adoption, several events beyond the Discharger's control led to revisions to the following items:

- Closure Design
- LFG Control System Design
- Closure and LFG Control System Construction

On behalf of the Discharger, NV5 prepared two previous updates to the FCPCMP to reflect these unanticipated (beyond the Discharger's control) events and submitted them to the RWQCB. However, RWQCB personnel have directed the Discharger to submit an updated FCPCMP that reflects only the requirements of the WDR, and that does not attempt to reflect the unanticipated events (and the results of those events) for the following reasons:

- It is consistent with the WDR requirement.
- On behalf of the Discharger, NV5 has documented the unanticipated events and the resulting impacts on closure and LFG control to both the RWQCB and the Local Enforcement Agency (LEA) in other documents.
- If additional submittals (in addition to the documents mentioned above) are necessary, they can be amendments, or addenda, to this FCPCMP.

In particular, the FCPCMP implements and reflects the following components of the WDR:

- Section C – Corrective Action Specifications
- Section D – Storm Water Specifications
- Section E – Closure and Post-closure Specifications
- Section F – Construction Specifications

REGULATORY OVERSIGHT

The RWQCB is the lead agency for landfill closure, post-closure, and corrective action. In addition, the following agencies also regulate activities under their jurisdiction at the landfill:

- The LEA
- SMAQMD
- City of Sacramento

APPLICABLE REGULATIONS

Since the RWQCB is the lead agency for landfill closure, post-closure, and corrective action, this FCPCMP responds to Section 21769(c)(1) of Title 27, which states that the purpose of the FCPCMP is:

- To provide for review by the RWQCB, an accurate, detailed list and schedule of all actions necessary to close the landfill and to carry out post-closure maintenance in accordance with all applicable SWRCB-promulgated requirements of Title 27, Division 2, Subdivision 1; including, but not limited to, the closure and post-closure requirements under Subchapter 5 of Chapter 3 (Section 20950 et seq.).
- To provide for review by the RWQCB, an accurate estimate of the cost of achieving each action listed in the plan.
- To provide, upon the plan's approval by the RWQCB, an enforceable list and schedule of actions necessary for providing water quality protection at the land fill during the closure and post-closure maintenance periods.

In addition, since the RWQCB is the lead agency for landfill closure, post-closure, and corrective action, the following State Water Resources Control Board (SWRCB) sections of Title 27 of the California Code of Regulations (Title 27) present the requirements for this FCPCMP:

- 21769
- 21790
- 21800
- 21830

- 21132

Similarly, the following SWRCB sections of Title 27 present the requirements for landfill closure and post-closure maintenance:

- 20950
- 21090

NV5 has prepared a FCPCMP Index (Table 1 – *behind this Executive Summary in a JTD Index Format*) identifying the pages of the FCPCMP that respond to the above requirements.

This FCPCMP responds also to the following additional Title 27 sections:

- 20934
- 20937
- 21130
- 21135
- 21137
- 21170
- 21190(c)

CONTENTS OF THIS PLAN

To identify for RWQCB review the actions necessary for landfill closure, post-closure, and corrective action, this FCPCMP presents information on the following activities:

- Final cover construction.
- Final site grading, drainage and erosion control.
- Final cover vegetation.
- Additional closure activities such as document recording, disposition of on-site structures, and site security.
- Landfill gas control system construction. (Please refer to the LGMCP for more detailed information.)
- Post-closure monitoring and maintenance.

Please refer to the following Table 1, the FCPCMP Index, for more detailed information regarding the contents of this plan.

RELATED DOCUMENTS

The following documents present additional detailed information relevant to topics discussed in this FCPCMP and closure and post-closure maintenance of the site:

- Engineering Feasibility Study and Corrective Action Plan, DE Team, December 2011 – This plan presents the corrective action proposed to respond to the detected groundwater impacts at FPL. As noted above, this FCPCMP is being submitted under the Engineering Feasibility Study and Corrective Action Plan.
- Landfill Gas Monitoring and Control Plan, DE Team, June 2015 – This approved plan presents detailed information on the landfill gas control system described briefly in this FCPCMP.

1 INTRODUCTION

Florin-Perkins Landfill (FPL) is a 106-acre unclassified landfill, within a greater 210-acre site, in Sacramento, California. FPL is located east of Florin Perkins Road, south of Jackson Highway (State Route 16), and north of Fruitridge Road (Figure 1). The property address is 3901 or 4201 Florin Perkins Road, and the site lies within the Public Land Survey System (PLSS) Section 24, Township 8 North, Range 5 East, Mount Diablo Baseline and Meridian.

Multiple Family Trusts own FPL and retained Dunn Environmental, Inc. (DE), an NV5 Company, to prepare this Final Closure and Post-Closure Maintenance Plan (FCPCMP). DE affiliated with GeoChem Applications and Fujii Civil Engineering to prepare previous versions of this document, and the three firms constituted the "DE Team." NV5 has prepared this update of the document.

This FCPCMP will be reviewed and updated if/as necessary at least once every five years.

At its May 30, 2013, meeting, the RWQCB adopted Waste Discharge Requirements (WDR), and Monitoring and Reporting Program (MRP) No. R5-2013-0042 (Order) for FPL (Appendix A).

2 BACKGROUND AND REGULATORY STATUS

2.1 BACKGROUND

For a thorough description of the site location, setting, conditions (particularly the geologic setting and hydrogeologic conditions), and history, please refer to the Evaluation Monitoring Program Report (EMPR) prepared in 2011 by the DE Team. Figure 1 shows existing off-site structures within 1,000 feet of the site. The following summary presents information relevant to the FCPCMP.

- Mining for sand and gravel occurred at the site from the 1940s until the early 1990s.
- The 106-acre permitted landfill is contained within the areas excavated for sand and gravel mining.
- As noted in Finding 7 of the WDR, wastes were discharged to the following three unlined area fill cells: (1) North Fill Area (NFA); (2) East Fill Area (EFA); and (3) South Fill Area (SFA). In addition, Finding 7 of the WDR describes an additional area stating, "An additional area referred to as the Central Processing Area was used primarily for materials stockpiling and processing. In addition, a limited amount of inert material, primarily concrete, was historically buried in the Central Processing Area." The WDR does not require closure of this Central Processing Area. Refer to Figure 2 for a schematic of existing conditions.
- The three Fill Areas or Waste Management Units (Fill Areas) occupy approximately 47 acres.
- Open excavations (or pits) remain along the west and north sides of the site (basically along the frontages of Florin-Perkins Road and Jackson Road).
- Surrounding the landfill property boundary zoned uses with the City of Sacramento (City) and County of Sacramento (County) include residential properties to the north and northwest and light and heavy industrial zoned areas to the east, south, and west. Figure 1 shows structures within 1,000 feet of the facility boundary.

During July 2013, five interim passive landfill gas vents were installed on the SFA per WDR Provision I.8. Passive landfill gas vents were then operated for a continuous 11-day period from August 9 to 20, 2013. Landfill gas vents operated to complete source testing pursuant to Sacramento Metropolitan Air Quality Management District (SMAQMD) requirements.

SMAQMD evaluated the emissions from the vents using this initial source test data, submitted in the September 2013 Initial Source Test Report. The summary below presents SMAQMD's conclusions following this evaluation:

- The system meets the permit exemption level of less than 2 pounds in any 24-hour period of uncontrolled Volatile Organic Compounds (VOCs).
- The system meets the permit exemption level of a non-cancer Acute/Chronic Hazard Index of less than one for all cases.
- The system **exceeds** the permit exemption level of a Maximum Excess Cancer Risk of 0.1 in one million.

Therefore, SMAQMD required a permit for the landfill gas venting system. In addition, based on the cancer risk and due to the future addition of more vents, SMAQMD also required the venting system to incorporate Best Available Control Technology (BACT). BACT for this system will consist of activated carbon filtration. The very low flows observed during the initial source tests indicate that carbon canisters may reduce passive flows to a point at which measuring flow may not be possible. Therefore, to comply with the WDR and MRP monitoring requirements for the vents, the DE Team proposed to convert the passive vents to an active system. The active system consists of the vents connected by laterals and a header line to two carbon filtration canisters in series, with vacuum supplied by an electric blower. Since active landfill gas extraction, under a vacuum, will occur in the vents, one could call the vents "wells." However, to maintain consistency with the WDR, this document will continue to refer to them as "vents." The June 2015 Landfill Gas Monitoring and Control Plan (LGMCP) presents more detailed information on the LFG collection system.

2.2 REGULATORY STATUS UPDATES AND PERMIT PROGRESS

As noted above, the RWQCB regulates FPL through the WDR and MRP No. R5-2013-0042. Essentially, the WDR present requirements for closure and corrective action at the landfill. Previously, FPL operated under WDR Order No. 95-196 as an unclassified landfill.

The Sacramento County Local Enforcement Agency (LEA) issued an Exemption from the requirement to obtain a Solid Waste Facilities Permit (SWFP) to Florin-Perkins Landfill, Inc. in 1997. The LEA revised the Exemption in 2002 to include conditions and prohibitions based on regulations applicable at the time. In 2004, The LEA rescinded the Exemption and required Florin-Perkins Landfill, Inc. to obtain an SWFP as a Construction, Demolition and Inert (CDI) Waste Disposal Facility. Since the landfill is closing, an SWFP is not applicable.

3 CORRECTIVE ACTION

The DE Team proposed a Phased Corrective Action Plan (CAP) in the December 2011 Engineering Feasibility Study and Corrective Action Plan (EFS/CAP). The initial phases of the 2011 CAP consisted of closing the SFA and installing landfill gas vents.

3.1 SOURCE OF GROUNDWATER IMPACTS

As described in the 2011 EMPR, available data indicate that landfill gas migration, through a large unexcavated gravel deposit, from the SFA to groundwater, is clearly the primary source of the groundwater impacts detected at FPL.

3.2 PROPOSED CORRECTIVE ACTION AND LFG SCHEDULE CHANGE

Corrective Action Specification C.1 of the WDR requires that methane and other landfill gases be adequately vented, removed from waste management units, or otherwise controlled to prevent the danger of adverse health impacts, nuisance conditions, or the impairment of the beneficial uses of surface water or groundwater due to migration through the unsaturated zone.

Corrective Action Specification C.2 requires the discharger to implement the following corrective action measures to mitigate landfill gas (LFG) impacts at the site:

- Install interim LFG controls prior to closure.
- Close the landfill units, including installing final cover and long-term LFG controls to the extent necessary to remove LFG as a source of impacts to groundwater.
- Maintain the landfill cover, including interim and final cover in accordance with the FCPCMP to promote runoff and reduce infiltration.

Provision I.8 of the WDR implements the above requirements relative to LFG control by requiring the following activities described in the table below:

	Task	Due Date	
		South Fill Area	**North and East Fill Areas**
a	Submit report documenting installation of initial set of interim LFG vents per LGMCP	September 1, 2013	September 30, 2016
b	Obtain project permits and approvals, as required	July 31, 2014	October 31, 2016
c	Monitor existing vapor probes and interim vents per LGMCP and MRP	August 1, 2014 – July 31, 2015	November 1, 2016 – October 31, 2017
d	Submit plans for any additional vents and/or monitoring probes, as indicated by monitoring data	September 15, 2015	December 30, 2017
e	Complete installation of interim LFG vents and probes	July 15, 2016	February 1, 2018
f	Submit certification report for interim LFG controls	September 30, 2017	February 1, 2019

4 CLOSURE DESIGN

As per the WDR, the closure design for FPL encompasses the following items:

- Final Cover
- Grading, Drainage, and Erosion Control
- Slope Stability
- Landfill Gas Control
- Final Cover Vegetation
- On-Site Structures and Site Security

As noted in Section 2.1, FPL consists of three discrete fill areas. As requested by RWQCB personnel, the following sections discuss the closure design of each fill area and provide "place holders" in case addenda discussing specific fill areas are necessary in the future.

Section 7 discusses the phasing and schedule for the FPL closure and presents the schedule for submittal of detailed construction documents for each phase of closure. As presented in Section 7, the various design elements discussed below for each fill area are included in the various phases of closure.

4.1 SOUTH FILL AREA

4.1.1 FINAL COVER

As required by the WDR, the proposed final cover consists of the following components:

- A one-foot thick foundation layer; and
- Two feet of compacted soil with laboratory permeability no greater than 1×10^{-5} cm/sec. As described below, the top of this upper 2-foot layer will be seeded. Therefore, this upper two-foot layer will comply with the WDR requirement for a ½ foot vegetative cover layer over a 1½ foot engineered soil layer.

The upper 2-foot layer will comply with the following specifications:

- 90% relative compaction at +/- 1% of optimum moisture content (ASTM D6938, ASTM D2937, ASTM D1556 – four field density tests shall be performed per 1,000 cubic yards of material placed, with 10% of the required density tests by ASTM D1556.)
- Minimum 33% passing the #200 sieve.

- Minimum of 12% passing 5 microns.
- Laboratory permeability no greater than 1 x 10^{-5} cm/sec (as determined by test method ASTM D5084, or approved alternate.)

Laboratory testing on both potential on-site borrow soils and imported soils delivered to the nearby Jackson Road Landfill (JRL) indicates that both types of soils can satisfy the above specifications.

The 1-foot foundation layer material will comply with the requirements of 27 CCR Section 21090(a) (1), as applicable to an inert waste landfill such as FPL. This section identifies a variety of materials acceptable for use as foundation layer, including some materials that would not be appropriate for use at FPL, such as contaminated soil. Consistent with Section 21090(a)(1) and as per the WDR Section F. Construction Specifications, the following materials will be appropriate for use as foundation layer at FPL with a maximum size of three to four inches:

- Soil
- Inert Waste Materials (Note: Currently, FPL does not plan to accept inert debris, as defined in Section 17388(k) of Title 14, for use as foundation layer. If inert debris is accepted, FPL will comply with applicable portions of Title 14.)

The foundation layer soils will comply with the compaction specification, presented on page 12 of the *Qualitative Slope Stability Analysis Geotechnical Engineering Report,* prepared by Holdrege and Kull, dated December 27, 2011, and summarized as follows:

- 90% relative compaction at +/- 3% of optimum moisture content for coarse-grained soils, and 0% to 4% over optimum moisture content for fine-grained soils (CL or ML), as classified by the USCS.

The top of the 2-foot layer will be seeded to protect against erosion. This is consistent with the JRL closure, which recommends seeding of the 2-foot thick final cover.

The proposed final cover design is consistent with the WDR requirements and will provide an adequate barrier to infiltration of precipitation into the underlying wastes. The proposed final cover profile will protect water quality due to the minimization of leachate, which could transport waste constituents to groundwater, and the absence of water within the in-place wastes which will decrease the rate of landfill gas generation. (Detail 5 on Sheet D1.01 of the FLORIN PERKINS LANDFILL – LANDFILL CLOSURE PLAN – PHASE I (Phase I Landfill Closure Plans for FPL) presents the final cover profile.)

4.1.2 GRADING, DRAINAGE, AND EROSION CONTROL

SOUTH FILL AREA GRADING AND DRAINAGE

Except for minor quantities along the site property lines (i.e., there are likely small, narrow strips of land along Florin-Perkins Road and Jackson Road that likely drain to the roads, instead of into the pits) storm runoff at FPL currently flows to the pits excavated for sand and gravel mining. In these pits, the water either evaporates or percolates into the ground. Closure drainage facilities will maintain this condition. Therefore, FPL will continue to be a "zero-discharge" site retaining storm runoff on-site. (Appendix B presents the drainage calculations for the landfill closure. The information presented in Appendix B confirms that the capacity of the pits is sufficient to contain runoff, maintaining a "zero-discharge" status for the site. For example, the peak storage required in the north pit for a 100-year, 24-hour storm is 18 acre-feet. The capacity of the north pit is 83 acre-feet, more than four times the capacity required for a 100-year, 24-hour storm. The capacities of the other two pits exceed the required capacity for a 100-year, 24-hour storm by even greater margins.)

A review of the 1954 United States Geological Survey (USGS) Sacramento East, California 15-minute quadrangle topographic map indicates that "pre-landfill" drainage in the area of the landfill flowed generally south-southwest to Morrison Creek. As shown in Sheet C1.01 of the Phase I Landfill Closure Plans for FPL, the majority of the site now drains to the on-site pits as described above.

Sheets C1.02 – C1.04 and D1.01 of the Phase I Landfill Closure Plans for FPL show the final grading and drainage and associated details for the South Fill Area. Consistent with WDR Finding No. 55, final cover will be constructed with grades no flatter than 1 percent. As shown on Sheets C1.02 - C1.04, storm water on the top deck of this fill area will sheet flow to the north side of the SFA. At the top of slope along the north side of this fill area, three overside drains will convey runoff from the top deck area down the perimeter slope of the fill area to the flatter area outside the fill area footprint. There, the water will flow into the on-site pits that remain from the previous sand and gravel mining operations.

SOUTH FILL AREA EROSION CONTROL

As shown on Sheet D1.01 of the Phase I Landfill Closure Plans for FPL, standard corrugated metal pipe (CMP) will convey storm runoff down steeper slopes to prevent erosion. Appendix B confirms that 24-inch CMP has sufficient capacity for managing this runoff. (NOTE: Based solely on hydraulic properties, smaller pipes would be sufficient, but this FCPCMP proposes 24-inch pipes, as a minimum, due to maintenance considerations. Smaller diameter pipes are more prone to failure due to clogging.) In

addition, as shown on this drawing, fiber rolls installed on steeper perimeter slopes will also control erosion.

Prompt seeding of final cover will also provide significant erosion control. In addition, as shown on Sheet C1.02 and C1.03 of the Phase I Landfill Closure Plans for FPL, FPL will install erosion monuments consisting of wood posts set in final cover, flush with finished grade, to monitor for erosion during post-closure. Section 11.2, "Post-Closure Maintenance" discusses measures to repair erosion damage to final cover.

4.1.3 SLOPE STABILITY

27 CCR Section 21090(a) requires that designs having any slopes steeper than a horizontal-to-vertical ratio of 3:1, or having a geosynthetic component, shall have these aspects of their design specifically supported in the slope stability report required under section 21750(f) (5). There are no slopes steeper than 3:1 in the SFA, and the final cover does not include a geosynthetic component. Therefore, 27 CCR Section 21090(a) does not require a final cover stability analysis for the SFA. In addition, the SFA slopes are fairly low (less than 20 feet high). Therefore, there will be no stability concerns in this area.

4.1.4 LANDFILL GAS CONTROL

As noted in the EFS/CAP, and Section 4 above, LFG appears to be the primary transport mechanism for the detected impacts to groundwater at FPL. Therefore, LFG control will be the most effective groundwater corrective action, and closure will include construction of LFG control facilities.

The methane concentrations detected in wastes at FPL indicate that FPL does not generate sufficient methane to support a landfill gas flare. Therefore, passive venting was first considered. However, as described in other documents submitted to the RWQCB, the landfill gas extraction system was converted to an active system with activated carbon filtration. The LGMCP, included separately, describes the completed landfill gas extraction system for FPL. The LGMCP describes LFG monitoring at FPL also.

Installing LFG control complies with Title 27 requirements. In addition, as described in the LGMCP, FPL will monitor the performance of the venting system and report the monitoring results to appropriate regulatory agencies. Subject to agency review and approval, FPL will revise the LGMCP and the LFG control system if/as necessary to respond to monitoring results. For example, if the monitoring results indicate that additional LFG control facilities (e.g., additional vents/wells) are necessary to achieve Corrective Action objectives, or to respond to perimeter LFG migration, then FPL will

install additional phases (following agency review and approval of revisions to the LGMCP).

During cover construction, FPL will remove the manifold pipes (installed initially on the landfill surface) and cap the vents. Following final cover construction, FPL will reconnect the individual vents to the manifold that will convey the gas to the central blower.

This FCPCMP should note the following:

- There is likely to be a considerable time lag between installing LFG control facilities and observing resulting improvements in groundwater quality. That is, removing the source of the impacts in the landfilled wastes will not produce an immediate response in groundwater quality.
- As noted above, over time, monitoring results may indicate that additional LFG control facilities (or other modifications, i.e. blowers or additional vapor treatment) are necessary.

FPL will obtain all permits required to install the LFG vents and comply with all regulations applicable to the LFG venting, including a County well permit as necessary.

Figures 3 and 4, (taken from the LGMCP) present the layout of the potential landfill gas vents or wells and the LFG pipe collection system.

4.1.5 FINAL COVER VEGETATION

Final cover vegetation at FPL will consist of a low-growing native seed mix appropriate for the Central Valley climate, such as those available from Pacific Coast Seed in Livermore, California, and Peaceful Valley Farm & Garden Supply in Grass Valley, California.

4.1.6 ON-SITE STRUCTURES AND SITE SECURITY

There are no on-site structures in the SFA that FPL should remove or modify during closure.

An existing perimeter fence, combined with the presence of Zanker (Zanker Resource Management, LTD. – the operator of a recycling facility and transfer station on a portion of the site that was not used as a landfill) personnel at the transfer station and recycling facility, provide site security. These site security provisions will continue through closure and into post-closure.

4.2 EAST FILL AREA

NOTE: The FLORIN PERKINS LANDFILL – LANDFILL CLOSURE PLAN – PHASES II AND III, NORTH AND EAST FILL AREAS (Phases II and III Landfill Closure Plans for FPL) included behind the text of this FCPCMP are construction-level design drawings. They are intended to present the closure design for the NFA and EFA.

4.2.1 FINAL COVER

As required by the WDR, the proposed final cover in the East Fill Area will be the same as the final cover in the South fill Area.

4.2.2 EAST FILL AREA GRADING, DRAINAGE, AND EROSION CONTROL

GRADING AND DRAINAGE

Sheets C1.05 – C1.07 and D1.01 of the Phases II and III Landfill Closure Plans for FPL show the final grading and drainage and associated details for the EFA. Consistent with WDR Finding No. 55, final cover will be constructed with grades no flatter than 1 percent. As shown on these drawings, the EFA top deck drains generally to the northeast and south from a ridge line in the interior of the fill area. At the top of slope at the perimeter of this fill area, overside drains will convey runoff from the top deck area down the perimeter slope of the fill area to the flatter area outside the fill area footprint. There, the water will flow into the on-site pits that remain from the previous sand and gravel mining operations. Along the east side of this fill area, a ditch running along the base of the perimeter slope will intercept runoff from the slope before it can flow off-site and convey the runoff to the north pit. As shown on these drawings and Sheet D1.02 of the Phases II and III Landfill Closure Plans for FPL, the east slope of the EFA will be re-graded to provide adequate room for construction equipment to construct this ditch.

EROSION CONTROL

The discussion of erosion control presented above in Section 4.1.2 is also applicable to the EFA.

4.2.3 SLOPE STABILITY

As noted above, 27 CCR Section 21090(a) requires that designs having any slopes steeper than a horizontal-to-vertical ratio of 3:1, or having a geosynthetic component,

shall have these aspects of their design specifically supported in the slope stability report required under section 21750(f) (5). As discussed below, upon completion of closure, there will be no inert waste fill slopes steeper than 3:1 in the EFA, and the final cover does not include a geosynthetic component. Therefore, 27 CCR Section 21090(a) does not require a final cover stability analysis for this area.

Portions of the existing inert waste fill slopes in the East Fill Area are steeper than 3:1. Except for the very limited locations discussed below, these slopes will be re-graded to 3:1. (NOTE: *If slopes flatter than 3:1 are more cost effective, then the fill slopes will be re-graded to the flatter, more cost effective, slope.*) Detail 1 on Sheet D1.02 of the Phases II and III Landfill Closure Plans for FPL presents a typical section of the proposed re-grading. As shown on this section, re-grading will consist of excavating inert wastes in the upper portion of the slope and placing the excavated wastes in the lower portion of the slopes. This balancing of cut and fills will be the most cost-effective way to re-grade the existing inert waste fill slopes.

There are very limited locations in the EFA where site features, or topography, will prevent re-grading inert waste fill slopes to 3:1 as shown in Detail 1 on Sheet D1.02 fo the Phases II and III Landfill closure plans for FPL. Sheet C1.06 of the Phases II and III Landfill Closure Plans for FPL shows these locations. These locations are a small ravine in the north end of the EFA formed by an on-site road providing access to the bases of the SMUD towers.

Some of the inert waste fill slopes of the small ravine are steeper than 3:1; however, the ravine is too narrow to allow re-grading of the fill slopes as shown in the detail referenced above. To maintain the existing access to the electrical power transmission towers, in-place inert wastes will be re-graded as topography allows to create 3:1 slopes; and the existing access road will be re-graded as necessary. If necessary, excavated inert wastes will be placed within the existing waste fill top deck areas to promote drainage. (Alternatively, FPL may demonstrate through a stability analysis, the existing slopes meet Title 27 stability requirements.)

At the bases of the SMUD towers, small "fingers" of inert waste fill appear to extend partially around the native earth supporting the towers, at approximately the same slope as the native earth. The location of the towers prevents re-grading these inert waste fill slopes to a 3:1 slope (i.e., the towers are in the way of the necessary re-grading.) However, the topography of the bases of the towers suggests that the inert waste slopes are only a thin veneer of waste over native earth. These towers stand on what appears to be native earth that "pre-landfill" quarry operations left in place. Significant undermining of the towers would have been necessary to place significant quantities of inert waste in these slopes. Previous versions of the FCPCMP stated that clean closure of these areas was a potential closure mechanism. However, examining

excavations into these areas has indicated that clean closure is not feasible. Therefore, these areas will be closed by covering with final cover.

In addition, the "fingers" of inert wastes will be buttressed by constructing earth fill buttresses (with slopes no steeper than 3:1) against them (i.e., buttressing and final cover are the selected alternative to clean closure).

(Final cover (closure) construction on the EFA will include construction of any required earth/buttress fill features. Therefore, construction of these features will be completed with the final cover (closure) construction for each this area.)

4.2.4 LANDFILL GAS CONTROL

The discussion of landfill gas control presented above in Section 4.1.4 is also applicable to the EFA.

4.2.5 FINAL COVER VEGETATION

The discussion of final cover vegetation presented above in Section 4.1.5 is also applicable to the EFA.

4.2.6 ON-SITE STRUCTURES AND SITE SECURITY

The discussion of on-site structures and site security presented above in Section 4.1.6 is also applicable to the EFA.

4.3 NORTH FILL AREA

NOTE: The FLORIN PERKINS LANDFILL – LANDFILL CLOSURE PLAN – PHASES II AND III (Phases II and III Landfill Closure Plans for FPL) included in this FCPCMP are construction-level design drawings. They are intended to present the closure design for the NFA and EFA.

4.3.1 FINAL COVER

As required by the WDR, the proposed final cover in the North Fill Area will be the same as the final cover in the South fill Area.

4.3.2 GRADING, DRAINAGE, AND EROSION CONTROL

NORTH FILL AREA GRADING AND DRAINAGE

Sheets C1.02 – C1.04 and Sheet D1.01 of the Phases II and III Landfill Closure Plans for FPL show the final grading and drainage and associated details for the NFA. Consistent with WDR Finding No. 55, final cover will be constructed with grades no flatter than 1 percent. As shown on these drawings, the NFA top deck drains generally to the fill area perimeter from ridge lines, or high points, in the fill area. At the top of slope at the perimeter of this fill area, overside drains will convey runoff from the top deck area down the perimeter slope of the fill area to either the on-site pits that remain from the previous sand and gravel mining operations or to the flatter area outside the fill area footprint. There, the water will flow into the on-site pits.

EROSION CONTROL

The discussion of erosion control presented above in Section 4.1.2 is also applicable to the NFA.

4.3.3 NORTH FILL AREA SLOPE STABILITY

As noted above, 27 CCR Section 21090(a) requires that designs having any slopes steeper than a horizontal-to-vertical ratio of 3:1, or having a geosynthetic component, shall have these aspects of their design specifically supported in the slope stability report required under section 21750(f) (5). As discussed below, upon completion of closure, there will be no inert waste fill slopes steeper than 3:1 in the NFA, and the final cover does not include a geosynthetic component. Therefore, 27 CCR Section 21090(a) does not require a final cover stability analysis for this area.

Portions of the existing inert waste fill slopes in the North Fill Area are steeper than 3:1. These steeper slopes are located along the perimeter of the on-site pits. Except for the very limited locations discussed below, these slopes will be re-graded to 3:1. (NOTE: *If slopes flatter than 3:1 are more cost effective, then the fill slopes will be re-graded to the flatter, more cost effective, slope.*) Detail 1 on Sheet D1.01 of the Phases II and III Landfill Closure Plans for FPL presents a typical section of the proposed re-grading. As shown on this section, re-grading will consist of excavating inert wastes in the upper portion of the slope and placing the excavated wastes in the lower portion of the slopes. This balancing of cut and fills will be the most cost-effective way to re-grade the existing inert waste fill slopes.

There are very limited locations in the NFA where site features, or topography, will prevent re-grading inert waste fill slopes to 3:1. Sheet C1.03 of the Phases II and III Landfill Closure Plans for FPL shows these locations. These locations are at the bases of the SMUD towers.

At the bases of the SMUD towers, small "fingers" of inert waste fill appear to extend partially around the native earth supporting the towers, at approximately the same slope as the native earth. The location of the towers prevents re-grading these inert waste fill slopes to a 3:1 slope (i.e., the towers are in the way of the necessary re-grading.) However, the topography of the bases of the towers suggests that the inert waste slopes are only a thin veneer of waste over native earth. These towers stand on what appears to be native earth that "pre-landfill" quarry operations left in place. Significant undermining of the towers would have been necessary to place significant quantities of inert waste in these slopes. Previous versions of the FCPCMP stated that clean closure of these areas was a potential closure mechanism. However, examining excavations into these areas has indicated that clean closure is not feasible. Therefore, these areas will be closed by covering with final cover.

In addition, the "fingers" of inert wastes will be buttressed by constructing earth fill buttresses (with slopes no steeper than 3:1) against them (i.e., buttressing and final cover are the selected alternative to clean closure).

(Final cover (closure) construction on the NFA will include construction of any required earth/buttress fill features. Therefore, construction of these features will be completed with the final cover (closure) construction for this area.)

4.3.4 LANDFILL GAS CONTROL

The discussion of landfill gas control presented above in Section 4.1.4 is also applicable to the NFA.

4.3.5 FINAL COVER VEGETATION

The discussion of final cover vegetation presented above in Section 4.1.5 is also applicable to the NFA.

4.3.6 ON-SITE STRUCTURES AND SITE SECURITY

The discussion of on-site structures and site security presented above in Section 4.1.6 is also applicable to the EFA.

5 CONSTRUCTION CONSIDERATIONS

Several elements of closure construction will include components that merit special discussion. This FCPCMP describes these below.

5.1 FINAL COVER CONSTRUCTION

As discussed below, FPL will close in phases. The first phase will consist of closing the SFA. Closure of the NFA and EFA will occur later. During the periods between closure phases, FPL will stockpile soils for final cover construction at locations compatible with on-going transfer station and recycling facility operations. These stockpile locations may include filled areas within the North and East Units. (NOTE: Closure of the SFA will also include stockpiling soils for final cover on-site, most likely within this waste unit.)

In addition, FPL may conduct limited excavations within the existing pits to generate some of the soils needed for final cover. Laboratory test results indicate that on-site soils are suitable for final cover. However, FPL will limit on-site excavation to maintain separation between the bottom of the pits and groundwater. Potential sources of final cover soils are the same as the potential sources of earthen materials for engineered fills discussed below.

5.2 LANDFILL GAS CONTROL SYSTEM CONSTRUCTION

Constructing the active LFG vents will involve excavating in-place wastes. FPL will likely bury the excavated wastes within the Unit in a manner that does not interfere with drainage. For example, FPL will use the excavated wastes as fill material if additional fill is needed to achieve closure grades in a portion of the Fill Area. Alternatively, FPL may dispose of excavated wastes off-site.

Prior to final cover construction, FPL will cap existing gas vents/wells below grade to minimize damage during surface grading and cover placement.

6 CONSTRUCTION QUALITY ASSURANCE

Appendix C presents the CQA plan for closure of FPL. Implementing the CQA plan will monitor and document closure construction compliance with the closure construction documents. As described above, FPL will close in phases. Following completion of each phase of closure, FPL will submit a CQA report to the RWQCB for review and acceptance/approval. As required by the CQA Plan, a registered civil engineer or certified engineering geologist will be designated as the CQA Officer for the work. The CQA Officer will be in charge of implementing the CQA plan and issuing the CQA report.

7 CLOSURE PHASING AND SCHEDULE

7.1 OVERVIEW

The closure phasing and schedule for FPL will be consistent with Provisions 9 through 11 of the WDR. These provisions prioritize closure activities to facilitate corrective action and groundwater protection at the site. Sections 8.2, 8.3, and 8.4 below present information on required soil quantities for closure, closure phasing, and detailed schedule information for closure.

7.2 SOIL VOLUME AND STOCKPILING

The following summary presents the estimated quantity of soil required for each Fill Area. Please refer to Section 5.1 for a complete description of the proposed final cover profile.

SFA – Field investigations conducted during August through October 2011 indicate that there is existing cover soil on this Fill Area that may be suitable for use as part of the foundation. The contractor retained to construct final cover will clear, grub, and compact this existing soil if suitable, consistent with the compaction requirement for foundation layer material presented in Section 5.1. The estimated quantity of additional soil required for this Fill Area is 110,000 cubic yards.

EFA - Field investigations conducted during August through October 2011 indicate that there is existing cover soil on this Fill Area that may be suitable for use as part of the foundation layer. The contractor retained to construct final cover will clear, grub, and compact this existing soil if suitable, consistent with the compaction requirement for foundation layer material presented in Section 5.1. The estimated quantity of soil required for this Fill Area is 91,000 cubic yards.

NFA - Field investigations conducted during August and September 2011 indicate that there is very little soil in most places on this Fill Area. Therefore, an additional 3 feet of soil is required. The estimated quantity of additional soil required for this Fill Area is 130,000 cubic yards.

Buttress Fills - Buttress fills will be constructed only in very limited locations where site features or topography will prevent re-grading fill slopes to a 3:1 slope and where clean closure will be neither safe nor cost effective. Please refer to Section 5.3 for more information on this topic. The earth fill proposed for the ravine in the north end of the EFA (see Section 5.3.) will require approximately

9,000 cubic yards of soil. The schedule presented below reflects the assumption that closure of the EFA will include constructing this earth fill.

It is important to note that the quantities presented above are estimates, and many factors can affect the actual quantity of soil needed, such as expansion and losses during handling and construction (i.e., more soil is needed in the stockpile than what is needed for completion in-place because of losses during handling and construction). The estimates presented above include significant contingencies, based on experience. However, actual quantities required may differ.

The following conditions will constrain soil stockpiling operations:

- Soil stockpiling will occur only at the locations shown on Figure 2.
- The volume of soils accepted and used for closure shall be tracked and reported to the RWQCB and LEA annually by January 31 of each year. (As of the date of this FCPCMP, approximately 110,000 cubic yards of loose soil has been stockpiled at the site.)
- Gradation tests will be performed on stockpiled soils at a rate of one test every 10,000 cubic yards to check for compliance with specifications. Alternatively, visual classification by a Professional Geologist during routine monthly site visits, documented in writing to the RWQCB and LEA, will suffice to verify compliance with specifications.
- No soil or inert debris shall be accepted/accumulated by or for the landfill for any purpose other than for landfill closure activities as described in this FCPCMP without LEA approval, as required by Title 14, and solid waste permitting, as required by Title 14.
- The Soil Acceptance Criteria Protocol is attached to the CQA Plan, Appendix C. Both the LEA and the RWQCB have approved this protocol. Zanker has prepared this protocol, and it is specifically not a DE Team/NV5 professional work product. This protocol presents sampling and analysis procedures for off-site (imported) soil proposed for use as final cover. Soluble metal levels for imported final cover soils must not exceed background concentrations in groundwater as required by the RWQCB.

In addition, soil management operations may necessitate preparing stockpile areas by placing concrete rubble or similar materials in the stockpile areas to provide a suitable working surface.

7.3 CLOSURE PHASING

Consistent with Provisions 9, 10, and 11 of the WDR, closure of FPL will consist of the three phases described below (See Section 7.4 for the schedule details for closure.).

7.3.1 PHASE I

Closure Phase I will consist of the following activities:

- Stockpile cover soil for SFA final cover construction.
- Submit Phase I construction and design plans for review and approval.
- Construct/install the following closure design components (See Section 4.1) in the SFA:
    - Final cover.
    - Grading, drainage facilities, and erosion control.
    - Final cover vegetation.
- Submit Phase I Construction Report

No work is necessary in the SFA (Phase I) for slope stability, clean closure, on-site structure removal/modification, or site security.

7.3.2 PHASE II

Closure Phase II will consist of the following activities:

- SFA Phase II work:
    - Install long-term LFG controls in SFA.
    - Submit report documenting installation of long-term LFG controls in SFA. (NOTE: This completes SFA closure.)
- NFA and EFA Phase II work:
    - Stockpile cover soil for NFA and EFA final cover construction.
    - Submit Phase II construction and design plans for review and approval.
    - Construct/install the following closure design components (See Sections 4.2 and 4.3) in the NFA and EFA:
        - Final cover.
        - Grading, drainage facilities, and erosion control.
        - Final cover vegetation.
    - Submit Phase II Construction Report.

7.3.3 PHASE III

Closure Phase III will consist of the following activities, which will complete closure of the NFA and EFA:

- Install long-term LFG controls in NFA and EFA.
- Submit report documenting installation of long-term LFG controls in NFA and EFA.
- Submit Phase III construction and design plans for review and approval.
- Construct/install the following closure design components (See Sections 4.2 and 4.3) in the NFA and EFA:
    - Slope re-grading (slope stability).
        - Drainage and erosion control on re-graded slopes.
        - Vegetate re-graded slopes.
- Submit Phase III Construction Report.

No work is necessary in the NFA or EFA for on-site structure removal/modification, or site security

This will complete NFA closure, EFA closure, and closure of the entire FPL.

7.4 SCHEDULE DETAIL

The tables below present the closure schedule for FPL consistent with Provision 9, 10, and 11 of the WDR.

Phase I – SFA Closure (Provision 9 of the WDR)

	Task	Due Date
a	Stockpile cover soil	June 1, 2013 – June 15, 2016
b	Submit Phase I construction and design plans for review and approval	February 15, 2015
c	Begin final cover construction in SFA	June 15, 2015
d	Submit construction progress report showing at least 30,000 yd^3 of soil has been stockpiled per year	October 15, 2015
e	Complete final cover construction in SFA	October 15, 2015
f	Submit Phase I Construction Report	December 15, 2016

Phase II – SFA Long-Term LFG Controls and NFA and EFA Final Cover, Excluding Steep Side Slope Re-grading (Provision 10 of the WDR)

	Task	Due Date
a	Stockpile cover soil for the NFA and EFA	June 1, 2016 – June 15, 2022
b	Submit Phase II construction and design plans for review and approval	February 15, 2017
c	Begin installation of long-term LFG controls in SFA and cover construction at other units	June 15, 2017
d	Submit report documenting installation of long-term LFG controls in SFA	October 1, 2019
e	Submit progress reports for cover construction at the NFA and EFA showing that at least 30,000 yd^3 of soil has been stockpiled per year	November 15 each year of construction
f	Complete final cover construction on the NFA and EFA decks	October 15, 2020
g	Submit Phase II Construction Report	December 15, 2020

Phase III – NFA and EFA Closure Completion, Including Long-Term LFG Controls and Steep Side Slope Re-grading (Provision 11 of the WDR)

	Task	Due Date
a	Submit Phase III construction and design plans for review and approval	February 15, 2021
b	Begin installation of long-term LFG controls and side slope re-grading per Findings 61 and 56 of the WDR	June 15, 2021
c	Submit report documenting installation of long-term LFG controls at both units	October 15, 2021
d	Complete side slope re-grading per Finding 56 of the WDR	October 15, 2022
e	Submit Phase III Construction Report and landfill closure certification	December 15, 2022

8 SURVEYING MONUMENTS

As required by Section 20950(d), a Licensed Land Surveyor or a Registered Civil Engineer with surveying privileges will install two permanent monuments from which one can determine the location and elevation of wastes, containment structures, and monitoring facilities throughout the post-closure maintenance period. The closure of the SFA will include installation of monuments located such that they will serve for all three Fill Areas.

9 RECORDING

As required by Section 21170 of Title 27, following completion of closure, FPL will file a detailed description of the closed site, including a map, with the County Recorder, the LEA, and the local agency that has been selected to maintain the County Integrated Waste Management Plan. The description will include information required by this section of Title 27. The documents recorded to comply with this requirement will include a legal description of the property that will refer to recorded deeds, Tract Maps, Parcel Maps, or similar legal documents so that the information will be available to anyone considering purchasing the property.

10 POST-CLOSURE

The post-closure maintenance period will be consistent with 27 CCR Sections 20919, 20950(a)(2)(A) 2, and 21180(a).

As required by Title 27, post-closure monitoring and maintenance will continue for at least 30 years following closure of the entire landfill. In addition, post-closure monitoring and maintenance shall continue until the authorizing agency authorizes discontinuance.

10.1 RESPONSIBLE PARTY FOR POST-CLOSURE MONITORING AND MAINTENANCE

Ms. Nancy Cleavinger, as the representative of the multiple family trusts, will be responsible for post-closure monitoring and maintenance. Her contact information is shown below:

Ms. Nancy Cleavinger
5970 First Avenue
Sacramento, CA 95817
916-456-8770

In addition, the multiple family trusts may engage various consultants or other vendors to perform specific post-closure monitoring and maintenance activities. As authorized by the multiple family trusts, these consultants or vendors will contact the RWQCB and LEA to identify themselves as performing the applicable activities and provide the RWQCB and LEA with their contact information.

10.2 POST-CLOSURE LAND USE

Post-closure land use of the 106-acre permitted landfill area will consist of passive open space land uses and continued operation of the transfer station and recycling facility. Essentially, the closed Fill Areas will function as vacant open space.

Transfer station and recycling facility operations may include such ancillary activities as using inert debris to construct all-weather surfaces in the Central Processing Area for storage of front-loader bins and roll-off boxes. However, transfer station and recycling facility operations will not include any activities that will impact the final cover or other closure features negatively.

Land development will not occur within 1,000 feet of the waste footprint without RWQCB approval of a revision of the post-closure monitoring and maintenance plan identifying the proposed development. The revision will also be submitted to the LEA, SMAQMD, and the local planning department as required by Section 21190(c) of

Title 27. In addition, as required by Section 21190(c) of Title 27, the LEA shall review and approve proposed post-closure land uses if the project involves structures within 1,000 feet of the disposal area, structures on top of waste, modification of the low permeability layer, or irrigation over waste.

10.3 POST-CLOSURE MAINTENANCE

Final cover post-closure monitoring and maintenance will include observations for the following conditions monthly during the wet season (October 15 through April 15) and quarterly during the dry season (April 16 through October 14):

- Evidence of ponded water
- Evidence of erosion
- Evidence of day lighted refuse

If any of the above conditions are observed, the final cover will be repaired within 30 days, taking weather and soil moisture constraints into consideration. (e.g., to avoid further damage to final cover, repairs may be delayed beyond the 30-day period if such damage is likely due to conditions such as wet weather or saturated final cover.)

If final cover grades are 3 percent or steeper, FPL will inspect the completed final cover and drainage facilities annually, prior to the rainy season, and repair any damage noted prior to the start of winter rains.

FPL will repair ponding, erosion, or similar damage to final cover using appropriately sized construction equipment. Repairs will likely consist of one or more of the following activities:

- Filling with additional soil
- Scarifying
- Re-compacting
- Re-grading
- Re-seeding

FPL will perform any necessary re-seeding consistent with the discussion in Section 4.1.5.

Five years after completion of final cover construction in each fill area, a report will be submitted to the RWQCB with a copy to the LEA. The report will present a summary and evaluation of grading of the final cover and discuss the need, if any, to re-grade the surface of the fill area to maintain proper drainage.

Since the final cover for FPL consists entirely of soil and does not include a flexible membrane liner, the final cover inspection and maintenance procedures described above will meet the objectives of a periodic leak search.

The DE Team has contacted the City of Sacramento Fire Department to request guidance regarding appropriate fire prevention procedures for large non-irrigated open space areas for existing and final cover. The following procedures incorporate recommendations from the City Fire Department:

- Firebreaks will be constructed around the site perimeter at least 150 feet wide utilizing an agricultural disc by June 1 of each year.
- Vegetation growing in the on-site dirt roads will be knocked down, or cleared, with a tractor towing a box grader/box scraper or other appropriate equipment when firebreaks are constructed (i.e., by June 1 of each year). (As noted in Section 4.1.5, the final cover will be vegetated with a low-growing native seed mix. Therefore, problems associated with excessively tall vegetation should be minor.)
- Routine maintenance will include clearing weeds around monitoring locations and landfill gas vents for a radius of at least 10 feet, using hand or battery operated tools, to reduce the chance of fire damage and to maintain access. In addition, monitoring locations will be marked with stakes (or reinforcing bars or similar materials) and flagging. This work will be completed by June 1 of each year.
- Fire extinguishers will be required in all vehicles used by contractors or agents of FPL.

Repairs and maintenance of the CMP drainage pipes will likely consist of adjustment, repairs, and/or replacement of pipe and fittings.

The groundwater and LFG monitoring/control systems will be operated, inspected, and maintained throughout the post closure maintenance period. Scheduled inspections will occur concurrently with the monitoring program as detailed in Section 10.4 below and within the ECAMP and LGMCP. Adjustments in the monitoring points and/or monitoring frequency may be proposed by FPL during the post-closure maintenance period as such adjustments are appropriate for the data collected. Semi-annual monitoring for groundwater and quarterly monitoring for gas at a minimum has been approved for the site. Monthly monitoring of the LFG control system will be completed per SMAQMD requirements.

During the post closure maintenance period, decommissioning, replacing, or abandoning selected groundwater monitoring wells, LFG vents/wells, and LFG monitoring probes and/or installing new ones may become necessary. Well

abandonment and installations will be completed in accordance with State of California Department of Water Resources Standards. Abandonment of groundwater monitoring will include overdrilling each installation to depth and pressure grouting. Abandonment or replacement of LFG probes and wells will include overdrilling, backfilling with soil, and constructing final cover to cap the wells. Proposed abandonment procedures will be submitted to the RWQCB and LEA for approval. The County well program will also be contacted for permits approval and participation during the installation inspections.

Post-closure activities will also include protection and maintenance of the survey monuments described in Section 8.

10.4 POST CLOSURE MONITORING

10.4.1 GROUNDWATER MONITORING AND CORRECTIVE ACTION

The WDR Closure and Post-Closure Specifications E.16 requires that the post closure maintenance period continues until the RWQCB determines that wastes remaining in the Fill Areas no longer pose a threat to water quality. The monitoring requirements for groundwater, unsaturated zone, leachate seeps, and surface water were provided in the 2013 MRP. Plan updates will be completed as warranted.

10.4.2 LANDFILL GAS MONITORING AND CONTROL

The LGMCP, provided separately, presents the post-closure landfill gas monitoring plan. (NOTE: The DE Team has prepared the LGMCP as a stand-alone document that may be revised as needed). The LGMCP also presents activities necessary for Corrective Action as presented in the EFS/CAP. The LGMCP describes the existing gas probe monitoring network, the active gas vent/corrective action monitoring network, and sampling procedures for soil gas sampling to be used at the FPL site. As described in the LGMCP, reporting will comply with the requirements of Sections 20934 and 20937 of Title 27.

Operations and maintenance of the LFG extraction system will follow the Operations and Maintenance Manual to be provided by the contractor selected to install the system. The LFG Control System will be monitored monthly, at a minimum. Operations and maintenance of this system will include the following activities:

- Monthly visual observations of the laterals and headers to check for differential settlement that might lead to condensate blockages.
- Routine monitoring of LFG at the well heads as described in the LGMCP.

- Routine inspections/observations of the electric motor consistent with the manufacturer's recommendations.
- Routine inspections/observations of the blower consistent with the manufacturer's recommendations.
- Routine maintenance of the carbon filtration assembly as described in the LGMCP.
- Routine inspections/observations of other system components consistent with the manufacturer's recommendations.
- Routine monitoring of influent and effluent at the carbon canisters as required by the Permit to Operate issued by SMAQMD following construction of the system.
- Any additional monitoring and testing that SCAQMD will require.

The landfill owner will comply with 27 CCR Section 20937 requirements in the event that LFG monitoring results indicate concentrations of methane or trace gasses in excess of the compliance requirements specified in Section 20921(a).

10.5 EMERGENCY RESPONSE PLAN

The Emergency Response Plan for the landfill is included in Appendix D.

10.6 FIVE-YEAR SETTLEMENT MONITORING

As required by 27 Section 21090(e)(2) and several sections of the MRP, FPL will produce and submit to the RWQCB and LEA an iso-settlement map showing any settlement of the final cover surface relative to the baseline topographic map prepared at completion of closure of each Fill Area. Consistent with the requirements of Section 21090(e)(2) and Section B.6 of the MRP, FPL will begin producing these maps every five years, with the first map due by June 30, 2017. FPL will provide copies of these maps to the LEA and CalRecycle.

11 COST ESTIMATES

As requested by RWQCB personnel, NV5 has prepared updated closure and post-closure cost estimates to present post-WDR, February, 2014 estimates.

This FCPCMP includes cost estimates prepared consistent with the requirements of Sections 21815, 21820, and 21840 of Title 27. As required by Section 21815, these estimates incorporate the following components:

- Compliance with Sections 1770, 1773, and 1773.1 of the Labor Code (i.e., compliance with prevailing wage requirements)
- California Department of Transportation (Caltrans) *Labor Surcharge and Equipment Rental Rates*
- Caltrans "Force Account Payment" included in section 9-1.04 of the *Caltrans Standard Specifications* (2010 - NOTE: Title 27 refers to section 9-1.03 of a previous version of the *Standard Specifications*. Section 9-1.04 of the 2010 *Standard Specifications* presents the appropriate language.)

The estimated costs for individual items presented below are rounded to the nearest hundred dollars.

11.1 CLOSURE COST ESTIMATE

Appendix E presents the closure cost estimate. As shown in this appendix, the estimated closure cost is $2,491,350.52. This cost consists of the following components:

Construction Documents	$25,000
Final Cover (Including CQA)	$1,298,628.42
Re-Grade Slopes	$345,829.18
Drainage and Erosion Control Facilities	$89,213.11
Landfill Gas Collection System	$419, 700.00
Subtotal	$2,169,370.72
20% Contingency	$433,874.14
TOTAL	$2,603,244.86

There is no cost for the following items:

- Structure Removal – Not necessary
- Security – Already in place
- Groundwater and Landfill Gas Monitoring Systems – Already in place

- Leachate Control Facilities – Not necessary due to no liner

11.2 POST-CLOSURE COST ESTIMATE

Appendix E presents the post-closure cost estimate. As shown in this appendix, the estimated post-closure cost consists of the flowing items:

Site Security	$1,808.05 per year
Final Cover Maintenance	$5,478.32 per year
Vegetative Cover Maintenance	$1,408.05 per year
Environmental Monitoring and LFG System O&M	$68,690.00 per year
Drainage and Erosion Control System Maintenance	$1,963.20 per year
Total Annual Cost	$ 79,347.62
Total Cost for 30 Years	$ 2,380,428.73

GENERAL NOTES

1. THE CONTRACTOR SHALL NOTIFY THE CONSTRUCTION MANAGER IMMEDIATELY REGARDING ANY DISCREPANCIES OR AMBIGUITIES WHICH MAY EXIST IN THE PLANS OR SPECIFICATIONS. CONSTRUCTION MANAGER'S INTERPRETATION OR CORRECTION THEREOF SHALL BE CONCLUSIVE.

2. WHERE THE PLANS OR SPECIFICATIONS DESCRIBE PORTIONS OF THE WORK IN GENERAL TERMS BUT NOT IN COMPLETE DETAIL, IT IS UNDERSTOOD THAT ONLY THE BEST GENERAL PRACTICE IS TO PREVAIL AND THAT ONLY MATERIALS AND WORKMANSHIP OF THE FIRST QUALITY ARE TO BE USED.

3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL REQUIRED PERMITS AND LICENSES AND PAYING ALL ASSOCIATED FEES REQUIRED FOR THE CONSTRUCTION AND COMPLETION OF THE PROJECT.

4. THE CONTRACTOR SHALL EXERCISE DUE CAUTION AND SHALL CAREFULLY PRESERVE BENCH MARKS AND SURVEY REFERENCE POINTS, AND SHALL BEAR ALL EXPENSES FOR REPLACEMENT.

5. THE CONTRACTOR SHALL VERIFY THE EXISTENCE AND LOCATION OF EXISTING UTILITIES WITH LANDFILL OPERATIONS STAFF. IT SHALL BE THE CONTRACTOR'S SOLE RESPONSIBILITY TO PROTECT ALL EXISTING UTILITIES SO THAT NO DAMAGE RESULTS DURING THE PERFORMANCE OF THIS CONTRACT WORK.

6. PRIOR TO COMMENCING WORK, IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO FIELD LOCATE ALL AFFECTED UNDERGROUND UTILITIES MAIN AND SERVICE LINES. THE CONTRACTOR SHALL NOTIFY THE MEMBERS OF THE UNDERGROUND SERVICE ALERT (U.S.A.) 48 HOURS IN ADVANCE OF PERFORMING EXCAVATION WORK BY CALLING THE TOLL–FREE NUMBER (800) 227–2600.

7. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROTECTING EXISTING IMPROVEMENTS FROM DAMAGE. THE COST OF REPLACING EXISTING IMPROVEMENTS SHALL BE INCLUDED IN THE CONTRACT BID PRICES.

8. PRIOR TO BEGINNING WORK, CONTACT CAL–OSHA AT (916) 263–2800 FOR PERMIT REQUIREMENTS.

9. CONTRACTOR AGREES THAT IT SHALL ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THIS PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY; THAT THIS REQUIREMENT SHALL APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS; AND THAT THE CONTRACTOR SHALL DEFEND, INDEMNIFY AND HOLD THE OWNER AND CONSTRUCTION MANAGER HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT.

10. EXCAVATIONS OF 5 FEET OR MORE IN DEPTH WILL REQUIRE AN EXCAVATION PERMIT FROM THE STATE OF CALIFORNIA DEPARTMENT OF INDUSTRIAL SAFETY. FOR TRENCHES 5 FEET OR MORE IN DEPTH, THE CONTRACTOR SHALL COMPLY WITH SECTION 5–1.02A OF THE CALTRANS STANDARDS, CHAPTER 9 OF THE STATE OF CALIFORNIA LABOR CODE, AND APPLICABLE LOCAL CODES OR ORDINANCES.

11. WHENEVER PAVEMENT IS BROKEN OR CUT IN THE INSTALLATION OF THE WORK COVERED BY THESE SPECIFICATIONS, THE CONTRACTOR SHALL REPLACE THE PAVEMENT, AFTER PROPER BACKFILLING, WITH PAVEMENT MATERIALS EQUAL TO OR BETTER THAN THE MATERIALS USED IN THE ORIGINAL PAVING. THE FINISHED PAVEMENT SHALL BE SUBJECT TO THE APPROVAL OF THE CONSTRUCTION MANAGER.

12. THE CONTRACTOR'S ATTENTION IS DIRECTED TO: SECTION 1540 (A) (1) OF THE CONSTRUCTION SAFETY ORDERS (TITLE 8 CALIFORNIA ADMINISTRATION CODE SECTION 1540), ISSUED BY THE OCCUPATIONAL SAFETY AND HEALTH STANDARDS BOARD PURSUANT TO THE CALIFORNIA OCCUPATIONS SAFETY AND HEALTH ACT OF 1973, AS AMENDED, WHICH STATES: (A) "PRIOR TO OPENING AN EXCAVATION, THE CONTRACTOR SHALL DETERMINE WHETHER UNDERGROUND INSTALLATIONS; I.E., SEWER, WATER, FUEL, ELECTRIC LINES, ETC., WILL BE ENCOUNTERED AND IF SO, WHERE SUCH UNDERGROUND INSTALLATIONS ARE LOCATED. WHEN THE EXCAVATION APPROACHES THE LOCATION OF SUCH UNDERGROUND INSTALLATION, THE EXACT LOCATION SHALL BE DETERMINED BY CAREFUL PROBING OR HAND DIGGING; AND, WHEN IT IS UNCOVERED, ADEQUATE PROTECTION SHALL BE PROVIDED FOR THE EXISTING INSTALLATION BY THE CONTRACTOR.

13. APPROPRIATE DUST CONTROL SHALL BE PROVIDED, AT THE CONTRACTOR'S EXPENSE, TO MINIMIZE ANY DUST NUISANCE AS DIRECTED BY CONSTRUCTION MANAGER.

14. ALL DRAINAGE PATTERNS SHALL BE MAINTAINED AT ALL TIMES DURING AND AFTER CONSTRUCTION. THE CONTRACTOR SHALL RESTORE ALL EXISTING DRAINAGE PATTERNS AND FACILITIES TO PRECONSTRUCTION CONDITION OR BETTER. THE CONTRACT SHALL REPLACE IN KIND ANY SIGNS, MAILBOXES, ETC., DAMAGED BY CONSTRUCTION ACTIVITIES.

15. THE CONTRACTOR SHALL MAINTAIN NORMAL VEHICLE ACCESS PATHS WITHIN AND ADJACENT TO THE LIMITS OF WORK DURING CONSTRUCTION ACTIVITIES. DEVIATIONS OR IMPACTS TO NORMAL VEHICLE ACCESS PATHS WITHIN THE LIMITS OF WORK SHALL BE COORDINATED WITH THE CONSTRUCTION MANAGER AND SUBJECT TO APPROVAL OF OWNER.

16. THE WORK FOR THIS PROJECT CONSISTS OF THE FOLLOWING CLOSURE CONSTRUCTION ACTIVITIES AT THE FLORIN–PERKINS LANDFILL (FPL) IN SACRAMENTO, CALIFORNIA:

    - CONSTRUCTING A THREE–FOOT–THICK FINAL COVER ON THE SOUTH FILL AREA (SFA OR SOUTH UNIT).
    - CONSTRUCTING DRAINAGE FACILITIES.
    - COORDINATION WITH THE CONSTRUCTION OF LANDFILL GAS CONTROL FACILITIES FOR THE SFA.

17. CLOSURE CONSTRUCTION ACTIVITIES SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING DOCUMENTS, PROVIDED UPON REQUEST:

    - APPLICABLE REGULATIONS, SUCH AS TITLE 27 OF THE CALIFORNIA CODE OF REGULATIONS, WHICH ARE REFLECTED IN THE WASTE DISCHARGE REQUIREMENTS (WDR) – ORDER NO. R5–2013–0042 FOR THE FLORIN–PERKINS LANDFILL, UNCLASSIFIED LANDFILL UNITS, CLOSURE AND CORRECTIVE ACTION, SACRAMENTO COUNTY PREPARED BY THE CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD – CENTRAL VALLEY REGION.(HTTP://WWW.WATERBOARDS.CA.GOV/CENTRALVALLEY/BOARD_DECISIONS/ADOPTED_ORDERS/SACRAMENTO/R5–2013–0042.PDF)
    - CONSTRUCTION DRAWINGS PREPARED FOR THE CLOSURE CONSTRUCTION.
    - SPECIFICATIONS PREPARED FOR THE CLOSURE CONSTRUCTION.
    - THE MAY, 2012 CONSTRUCTION QUALITY ASSURANCE PLAN (CQA PLAN) FLORIN–PERKINS LANDFILL, PREPARED BY DUNN ENVIRONMENTAL TEAM, WHICH IS APPENDIX E OF THE UPDATED FINAL CLOSURE AND POST–CLOSURE MAINTENANCE PLAN, FEBRUARY 2015. (SEE CONTRACT DOCUMENTS – DIVISION C – ATTACHMENT #1.)
    - STANDARD SPECIFICATION, STATE OF CALIFORNIA, BUSINESS, TRANSPORTATION AND HOUSING AGENCY, DEPARTMENT OF TRANSPORTATION, 2010 PREPARED BY THE STATE OF CALIFORNIA DEPARTMENT OF TRANSPORTATION (STANDARD SPECIFICATIONS). THESE TECHNICAL SPECIFICATIONS REFER TO APPLICABLE SPECIFIC SECTIONS OF THE STANDARD SPECIFICATIONS. (HTTP://WWW.DOT.CA.GOV/HQ/ESC/OE/CONSTRUCTION_CONTRACT_STANDARDS/STD_SPECS/2010_STDSPECS/2010_STDSPECS.PDF)

    IN CASE OF CONFLICTS, OR INCONSISTENCIES, BETWEEN THE DOCUMENTS LISTED ABOVE, THE ENGINEER (AS IDENTIFIED IN THE CQA PLAN) SHALL HAVE SOLE AUTHORITY TO RESOLVE SUCH CONFLICTS, OR INCONSISTENCIES. IN GENERAL, THE WDR–SPECIFIC DOCUMENTS WILL TAKE PRECEDENCE OVER THE STANDARD SPECIFICATIONS.

CONSTRUCTION PERFORMANCE SPECIFICATION

1. SUBMITTALS

1.1. CONTRACTOR SHALL SUBMIT DESCRIPTIVE INFORMATION THAT WILL ENABLE THE CONSTRUCTION MANAGER TO DETERMINE WHETHER THE CONTRACTOR'S PROPOSED MATERIALS, EQUIPMENT, OR METHODS OF WORK ARE IN GENERAL CONFORMANCE TO THE DESIGN CONCEPT AND IN COMPLIANCE WITH THE PLANS AND SPECIFICATIONS.

1.2. SUBMITTAL REVIEW SHALL BE ONLY FOR GENERAL CONFORMANCE WITH THE DESIGN CONCEPT AND GENERAL COMPLIANCE WITH CONTRACT DOCUMENTS. IT SHALL NOT INCLUDE A REVIEW OF QUANTITIES, DIMENSIONS, WEIGHTS, GAGES, FABRICATION PROCESSES, OR CONSTRUCTION SAFETY PRECAUTIONS, ALL OF WHICH ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR. REVIEW OF A SPECIFIC ITEM SHALL NOT INDICATE ACCEPTANCE OF AN ASSEMBLY OF WHICH THE ITEM IS A COMPONENT. THE CONSTRUCTION MANAGER SHALL NOT BE REQUIRED TO REVIEW AND SHALL NOT BE RESPONSIBLE FOR ANY DEVIATIONS FROM THE CONTRACT DOCUMENTS NOT CLEARLY NOTED BY THE CONTRACTOR, NOR SHALL THE CONSTRUCTION MANAGER BE REQUIRED TO REVIEW PARTIAL SUBMISSIONS OR THOSE FOR WHICH SUBMISSIONS FOR CORRELATED ITEMS HAVE NOT BEEN RECEIVED.

1.3. CONTRACTOR SHALL BE RESPONSIBLE FOR THE ACCURACY AND COMPLETENESS OF THE INFORMATION CONTAINED IN EACH SUBMITTAL AND SHALL ASSURE THE MATERIAL, EQUIPMENT, OR METHOD OF WORK SHALL BE DESCRIBED IN THE SUBMITTAL. THE CONTRACTOR SHALL VERIFY THAT ALL FEATURES AND OF ALL PRODUCTS CONFORM THE REQUIREMENTS OF THE CONTRACT DOCUMENTS.

1.4. IMMEDIATELY FOLLOWING AWARD OF CONTRACT, THE CONTRACTOR SHALL REVIEW THE PLANS AND SPECIFICATIONS AND SHALL PREPARE A LIST OF ALL SUBMITTALS ANTICIPATED ON THE PROJECT AND SHALL SUBMIT THE LIST TO THE CONSTRUCTION MANAGER. ITEMS NOT ON THE LIST BUT REQUIRING REVIEW SHALL BE ADDED TO THE LIST AS REQUESTED BY THE CONSTRUCTION MANAGER AT ANY TIME DURING CONSTRUCTION.

1.5. SUBMITTALS SHALL BE SEQUENTIALLY NUMBERED. SIX (6) COPIES OF ALL SUBMITTED INFORMATION SHALL BE DELIVERED OR MAILED TO:

NV5, INC.
2525 NATOMAS PARK DRIVE, SUITE 300
SACRAMENTO, CA 95833
FAX: (916) 641–9222
ATTN: JAY RADKE

1.6. UNLESS OTHERWISE SPECIFIED, WITHIN FOURTEEN (14) CALENDAR DAYS AFTER RECEIPT OF THE SUBMITTAL, THE SUBMITTAL SHALL BE REVIEWED AND THREE COPIES OF THE MARKED–UP REPRODUCIBLE SUBMITTAL SHALL BE RETURNED TO THE CONTRACTOR, INDICATING ONE OF THE FOLLOWING ACTIONS:

1.6.1. "NO EXCEPTION TAKEN" – THE CONTRACTOR MAY BEGIN TO IMPLEMENT THE WORK OR METHOD OR INCORPORATE THE MATERIALS OR EQUIPMENT COVERED BY THE SUBMITTAL.

1.6.2. "MAKE CORRECTIONS NOTED" – THE CONTRACTOR MAY BEGIN TO IMPLEMENT THE WORK OR METHOD OR INCORPORATE THE MATERIALS OR EQUIPMENT COVERED BY THE SUBMITTAL IN ACCORDANCE WITH THE NOTED CORRECTION.

1.6.3. "REVISE AND RESUBMIT" – THE SUBMITTAL CONTAINS INSUFFICIENT OR INACCURATE INFORMATION. CONTRACTOR SHALL NOT UNDERTAKE THE WORK COVERED BY THE SUBMITTAL. THE CONTRACTOR SHALL PROVIDE A REVISED SUBMITTAL THAT IS REVIEWED BY THE CONSTRUCTION MANAGER AND RETURNED AS "NO EXCEPTIONS TAKEN" OR "MAKE CORRECTIONS NOTED" PRIOR TO IMPLEMENTING THE WORK, METHOD, MATERIALS, OR EQUIPMENT COVERED BY THE SUBMITTAL.

1.6.4. "REJECTED" – THE SUBMITTAL IN NOT WITHIN GENERAL CONFORMANCE OR COMPLIANCE WITH THE PLANS AND SPECIFICATIONS. CONTRACTOR SHALL NOT UNDERTAKE THE WORK COVERED BY THE SUBMITTAL. THE CONTRACTOR SHALL PROVIDE A REVISED SUBMITTAL THAT IS REVIEWED BY THE CONSTRUCTION MANAGER AND RETURNED AS "NO EXCEPTIONS TAKEN" OR "MAKE CORRECTIONS NOTED" PRIOR TO IMPLEMENTING THE WORK, METHOD, MATERIALS, OR EQUIPMENT COVERED BY THE SUBMITTAL.

1.7. REVIEW OF DRAWINGS, METHODS OF WORK, OR INFORMATION REGARDING MATERIALS OR EQUIPMENT THE CONTRACTOR PROPOSES TO PROVIDE SHALL NOT RELIEVE THE CONTRACTOR OF HIS RESPONSIBILITY FOR ERRORS THEREIN AND SHALL NOT BE REGARDED AS AN ASSUMPTION OF RISKS OR LIABILITY BY THE RECEIVER, OR BY ANY OFFICER OR EMPLOYEE THEREOF, OR BY ANY ENGINEERING FIRM CONDUCTING SUCH REVIEW ON BEHALF OF THE RECEIVER, AND THE CONTRACTOR SHALL HAVE NO CLAIM UNDER THE CONTRACT ON ACCOUNT OF THE FAILURE, OR PARTIAL FAILURE, OF THE METHOD OF WORK, MATERIAL, OR EQUIPMENT SO REVIEWED. A MARK OF "NO EXCEPTIONS TAKEN" OR "MAKE CORRECTIONS NOTED" SHALL MEAN THAT THE RECEIVER HAS NO OBJECTION TO THE CONTRACTOR, UPON HIS OWN RESPONSIBILITY, USING THE PLAN OR METHOD OF WORK PROPOSED, OR PROVIDING THE MATERIALS OR EQUIPMENT PROPOSED.

2. EARTHWORK

2.1. GENERAL

EARTHWORK WILL CONSIST OF CONSTRUCTING FINAL COVER OVER THE SOUTH FILL AREA (SFA). EARTHWORK WILL COMPLY WITH THE FOLLOWING SECTIONS OF THE STANDARD SPECIFICATIONS, EXCEPT AS MODIFIED BY THESE TECHNICAL SPECIFICATIONS AND OTHER PROJECT–SPECIFIC DOCUMENTS IDENTIFIED IN GENERAL NOTE #17:

- SECTION 16, CLEARING AND GRUBBING
- SECTION 17, WATERING
- SECTION 19–1, EARTHWORK, GENERAL
- SECTION 19–5, COMPACTION
- SECTION 19–7, BORROW EXCAVATION
- SECTION 21, EROSION CONTROL
- SECTION 72, SLOPE PROTECTION

2.2 FINAL COVER

FINAL COVER SHALL BE CONSTRUCTED TO THE LINES AND GRADES SHOWN ON THE CONSTRUCTION DRAWINGS. THE FINAL COVER SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE FINAL CLOSURE AND POSTCLOSURE MAINTENANCE PLAN, AS FOLLOWS, FROM BOTTOM TO TOP:

a. FOUNDATION LAYER – ONE FOOT (12 INCHES) OF COMPACTED SOIL AND/OR INERT WASTE.
b. ENGINEERED SOIL LAYER – 1–1/2 FEET (18 INCHES) OF COMPACTED SOIL.
c. VEGETATIVE COVER – ½ FEET (6 INCHES) OF COMPACTED SOIL SEEDED WITH NATIVE GRASS MIX (SEE SECTION 5 – EROSION CONTROL FOR RECOMMENDED SEED MIX).

MINIMUM FINAL COVER THICKNESS SHALL BE 3 FEET, THIS IS A REGULATORY REQUIREMENT AND NO EXCEPTIONS WILL BE ALLOWED.

FINAL COVER SHALL COMPLY WITH THE REQUIREMENTS IN THE FOLLOWING TABLE:

COMPACTED FINAL COVER TESTING TYPE AND FREQUENCY

TEST DESCRIPTION	TEST DESIGNATION	MINIMUM TEST FREQUENCY	PASSING CRITERIA
MOISTURE–DENSITY RELATIONSHIP	ASTM D1557	ONE PER 5,000 CUBIC YARDS	NO TESTING CRITERIA (RESULTS USED TO EVALUATE RELATIVE COMPACTION)
IN–PLACE MOISTURE/DENSITY (NUCLEAR OR DRIVE RING)	ASTM D6938 ASTM D2937	FOUR (4) FIELD DENSITY TESTS SHALL BE PERFORMED FOR EACH 1,000 CUBIC YARDS OF MATERIAL PLACED	MINIMUM OF 90% FOR COMPACTION AND ±1% OF OPTIMUM MOISTURE CONTENT
IN–PLACE DENSITY AND MOISTURE CONTENT (SAND–CONE)	ASTM D1556	10% OF REQUIRED DENSITY TESTS	MINIMUM OF 90% FOR COMPACTION AND ±1% OF OPTIMUM MOISTURE CONTENT
LABORATORY PERMEABILITY	ASTM D5084 OR APPROVED METHOD	ONE PER 5,000 CUBIC YARDS PLACED	MAXIMUM OF 1.0X10–5 CM/SEC
ATTERBERG LIMITS	ASTM D4318	ONE PER 1,000 CUBIC YARDS PLACED	NONE REQUIRED
FULL GRAIN SIZE DISTRIBUTION	ASTM D422	ONE PER 1,000 CUBIC YARDS PLACED	MINIMUM OF 33% PASSING # 200 AND MINIMUM OF 12% PASSING 5–MICRON
STANDARD CLASSIFICATION	ASTM D4287	ONE PER 1,000 CUBIC YARDS PLACED	SEE ALTERNATIVE FINAL COVER EVALUATION REPORT, GLA 2012
VISUAL INSPECTION	ASTM D2488	DAILY OBSERVATIONS	NO OVERSIZE ROCKS (3–INCH MINUS) AND DELETERIOUS MATERIALS

IN PARTICULAR, FINAL COVER SOILS SHALL COMPLY WITH THE FOLLOWING REQUIREMENTS: THE UPPER TWO–FEET (ENGINEERED SOIL AND VEGETATIVE LAYERS) SHALL COMPLY WITH THE FOLLOWING SPECIFICATIONS:

- 90% RELATIVE COMPACTION AT +/– 1% OF OPTIMUM MOISTURE CONTENT (ASTM D6938, ASTM D2937, ASTM D1556 – FOUR FIELD DENSITY TESTS SHALL BE PERFORMED PER 1,000 CUBIC YARDS OF MATERIAL PLACED, WITH 10% OF THE REQUIRED DENSITY TESTS BY ASTM D1556.)
- LABORATORY PERMEABILITY NO GREATER THAN 1 X 10–5 CM/SEC (AS DETERMINED BY TEST METHOD ASTM D5084, OR APPROVED ALTERNATE.)
- SUFFICIENT CLAY AND/OR SILT CONTENT TO ALLOW COMPACTION TO THE PROJECT SPECIFICATIONS (E.G., CL, OR ML UNDER THE UNIFIED SOIL CLASSIFICATION SYSTEM)
- CLEAN SOIL ONLY.
- SPREAD AND COMPACT IN LIFTS NO GREATER THAN 8 INCHES THICK.
- 3/8–INCH MAXIMUM PARTICLE SIZE.
- MINIMUM 33% PASSING THE #200 SIEVE.
- MINIMUM OF 12% PASSING 5 MICRONS.

PERMEABILITY SAMPLES SHALL BE REMOLDED TO 90% OF RELATIVE MAXIMUM DENSITY AT 1% ABOVE OPTIMUM MOISTURE CONTENT AND TESTED AT LOW CONFINING PRESSURE (6–8 POUNDS PER SQUARE INCH).

THE FOUNDATION LAYER SOILS SHALL COMPLY WITH THE FOLLOWING SPECIFICATIONS:

- 90% RELATIVE COMPACTION AT +/– 3% OF OPTIMUM MOISTURE CONTENT FOR COARSE–GRAINED SOILS, AND 0% TO 4% OVER OPTIMUM MOISTURE CONTENT FOR FINE–GRAINED SOILS (CL OR ML), AS CLASSIFIED BY THE USCS.
- LABORATORY PERMEABILITY NO GREATER THAN 1 X 10–5 CM/SEC (AS DETERMINED BY TEST METHOD ASTM D5084, OR APPROVED ALTERNATE.) (SEE ABOVE FOR TEST CONDITIONS.)
- SUFFICIENT CLAY AND/OR SILT CONTENT TO ALLOW COMPACTION TO THE PROJECT SPECIFICATIONS (E.G., CL, OR ML UNDER THE UNIFIED SOIL CLASSIFICATION SYSTEM)
- WHEN COMPACTED, BE SUFFICIENTLY SMOOTH AND FREE OF ROCKS AND DEBRIS SO AS NOT TO IMPAIR THE OVERLYING LAYERS (E.G., ENGINEERED SOIL AND VEGETATIVE COVER LAYER).
- CLEAN SOIL, OR INERT WASTE.
- SPREAD AND COMPACT IN LIFTS NO GREATER THAN 8 INCHES THICK.
- 3 TO 4–INCH MAXIMUM PARTICLE SIZE. LARGER PARTICLES SHALL BE BEDDED IN SMALLER PARTICLES IN A MANNER THAT PREVENTS THE CREATION OF VOIDS WITHIN THE FOUNDATION LAYER.

3. DRAINAGE FACILITITES

DRAINAGE FACILITIES SHALL COMPLY WITH SECTION 69, OVERSIDE DRAINS, OF THE STANDARD SPECIFICATIONS.

4. LANDFILL GAS CONTROL FACILITIES

THE EXISTING LANDFILL GAS COLLECTION PIPING AND TREATMENT SYSTEM ARE ANTICIPATED TO BE CONSTRUCTED IN 2015, PRIOR TO THE LANDFILL CLOSURE COVER. THE CONTRACTOR SHALL VERIFY THE EXISTENCE OF PIPING AND EQUIPMENT PRIOR TO BEGINNING CONSTRUCTION OF LANDFILL CLOSURE COVER. CONTRACTOR SHALL COORDINATE WITH LANDFILL OWNER AND REMOVE & REPLACE LANDFILL GAS PIPING AS NECESSARY TO CONSTRUCT LANDFILL CLOSURE COVER.

5. EROSION CONTROL

EROSION CONTROL SHALL COMPLY WITH SECTION 21, EROSION CONTROL, OF THE STANDARD SPECIFICATIONS.

FIBER ROLLS SHALL BE CONSTRUCTED AT THE BASE OF THE SLOPES AND AT A MINIMUM OF 15 FOOT REGULAR INTERVALS ON THE SLOPE ALIGNING THE FIBER ROLLS WITH THE SLOPE CONTOURS.

THE FINAL COVER VEGETATION SHALL HYDROSEEDED USING A LOW–GROWING NATIVE SEED MIX APPROPRIATE FOR THE CENTRAL VALLEY CLIMATE, SUCH AS THOSE AVAILABLE FROM PACIFIC COAST SEED IN LIVERMORE, CALIFORNIA: AND PEACEFUL VALLEY FARM & GARDEN SUPPLY IN GRASS VALLEY, CALIFORNIA. THE SEED SHALL BE APPLIED PROMPTLY ONCE THE FINAL COVER GRADING IS COMPLETED.

EROSION CONTROL MONUMENTS CONSISTING OF 4 INCH X 4 INCH X 3 FEET WOOD POSTS SHALL BE SET IN FINAL COVER, FLUSH WITH FINISHED GRADE, FOR THE USE IN MONITORING FOR EROSION DURING POST–CLOSURE MAINTENANCE OPERATIONS.

6. OVERHEAD HIGH VOLTAGE TRANSMISSION POWER LINES

6.1. IN ORDER TO MAINTAIN ADEQUATE SUPPORT AND ACCESS TO WESTERN AREA POWER ASSOCIATION'S (WAPA'S) AND SACRAMENTO MUNICIPAL UTILITY DISTRICT'S (SMUD'S) STRUCTURES AND FOUNDATIONS, CONTRACTOR SHALL MAINTAIN A MINIMUM OFFSET RADIUS OF THIRTY (30) FEET FROM THE CENTER OF EACH TOWER.

6.2. EQUIPMENT USED WITHIN THE WAPA OR SMUD EASEMENT AREAS SHALL NOT EXCEED 15 FEET IN HEIGHT. ALL EQUIPMENT WITH A BOOM UTILIZED WITHIN THE EASEMENT AREAS SHALL BE EQUIPED WITH A MECHANICAL LOCKOUT TO ENSURE THAT ANY BOOM EXTENSION DOES NOT EXCEE OSHA AND CAL–OSHA SAFETY CLEARANCES BETWEEN THE HIGH VOLTAGE POWER LINES AND ANIMATE OR INANIMATE OBJECTS.

6.3. CONTRACTOR SHALL ABIDE AND COMPLY WITH THE NATIONAL ELECTRIC SAFETY CODE AND THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION STANDARDS THAT SHALL BE APPLIED FOR EQUIPMENT, ELECTRICAL, AND NON–ELECTRICAL WORKERS OPERATING AROUND ELECTRICAL POWER LINES.

6.4. NO TEMPORARY OR PERMANENT ABOVE GROUND STRUCTURES SHALL BE PLACED WITHIN WAPA'S OR SMUD'S EASEMENTS.

6.5. CONTRACTOR SHALL UTILIZE WATER TRUCKS WHILE EARTH MOVING EQUIPMENT IS IN USE TO PREVENT DUST CONTAMINATION OF THE TRANSMISSION LINE INSULATORS.

6.6. CONTRACTOR SHALL POST SIGNS "DANGER: OVERHEAD HIGH TRANSMISSION LINES" FOR WORKERS WORKING UNDER THE POWER LINES.

6.7. NO STORAGE, STAGING, OR MOUNDING OF MATERIALS SHALL BE CONDUCTED IN THE WAPA OR SMUD EASEMENTS.

6.8. NO VEHICLE OR EQUIPMENT FUELING SAHLL OCCUR WITHIN THE WAPA OR SMUD EASEMENTS.

6.9. ALL ABOVE GROUND METALLIC FACILITIES (I.E. FENCES, LIGHT STANDARDS, SIGNAL STANDARDS, ETC.) PROPOSED WITHIN THE WAPA OR SMUD EASEMENTS MUST BE PROPERLY GROUNDED. GROUNDING PLANS SHOULD BE STAMPED BY A CALIFORNIA LICENSED ELECTRICAL ENGINEER, MEET ALL NATIONAL ELECTRIC SAFETY CODE AND NATIONAL ELECTRIC CODE REQUIREMENTS, AND BE SUBMITTED TO SMUD FOR REVIEW.

FLORIN PERKINS LANDFILL - LANDFILL CLOSURE PLAN - PHASE I
SOUTH FILL AREA
GENERAL
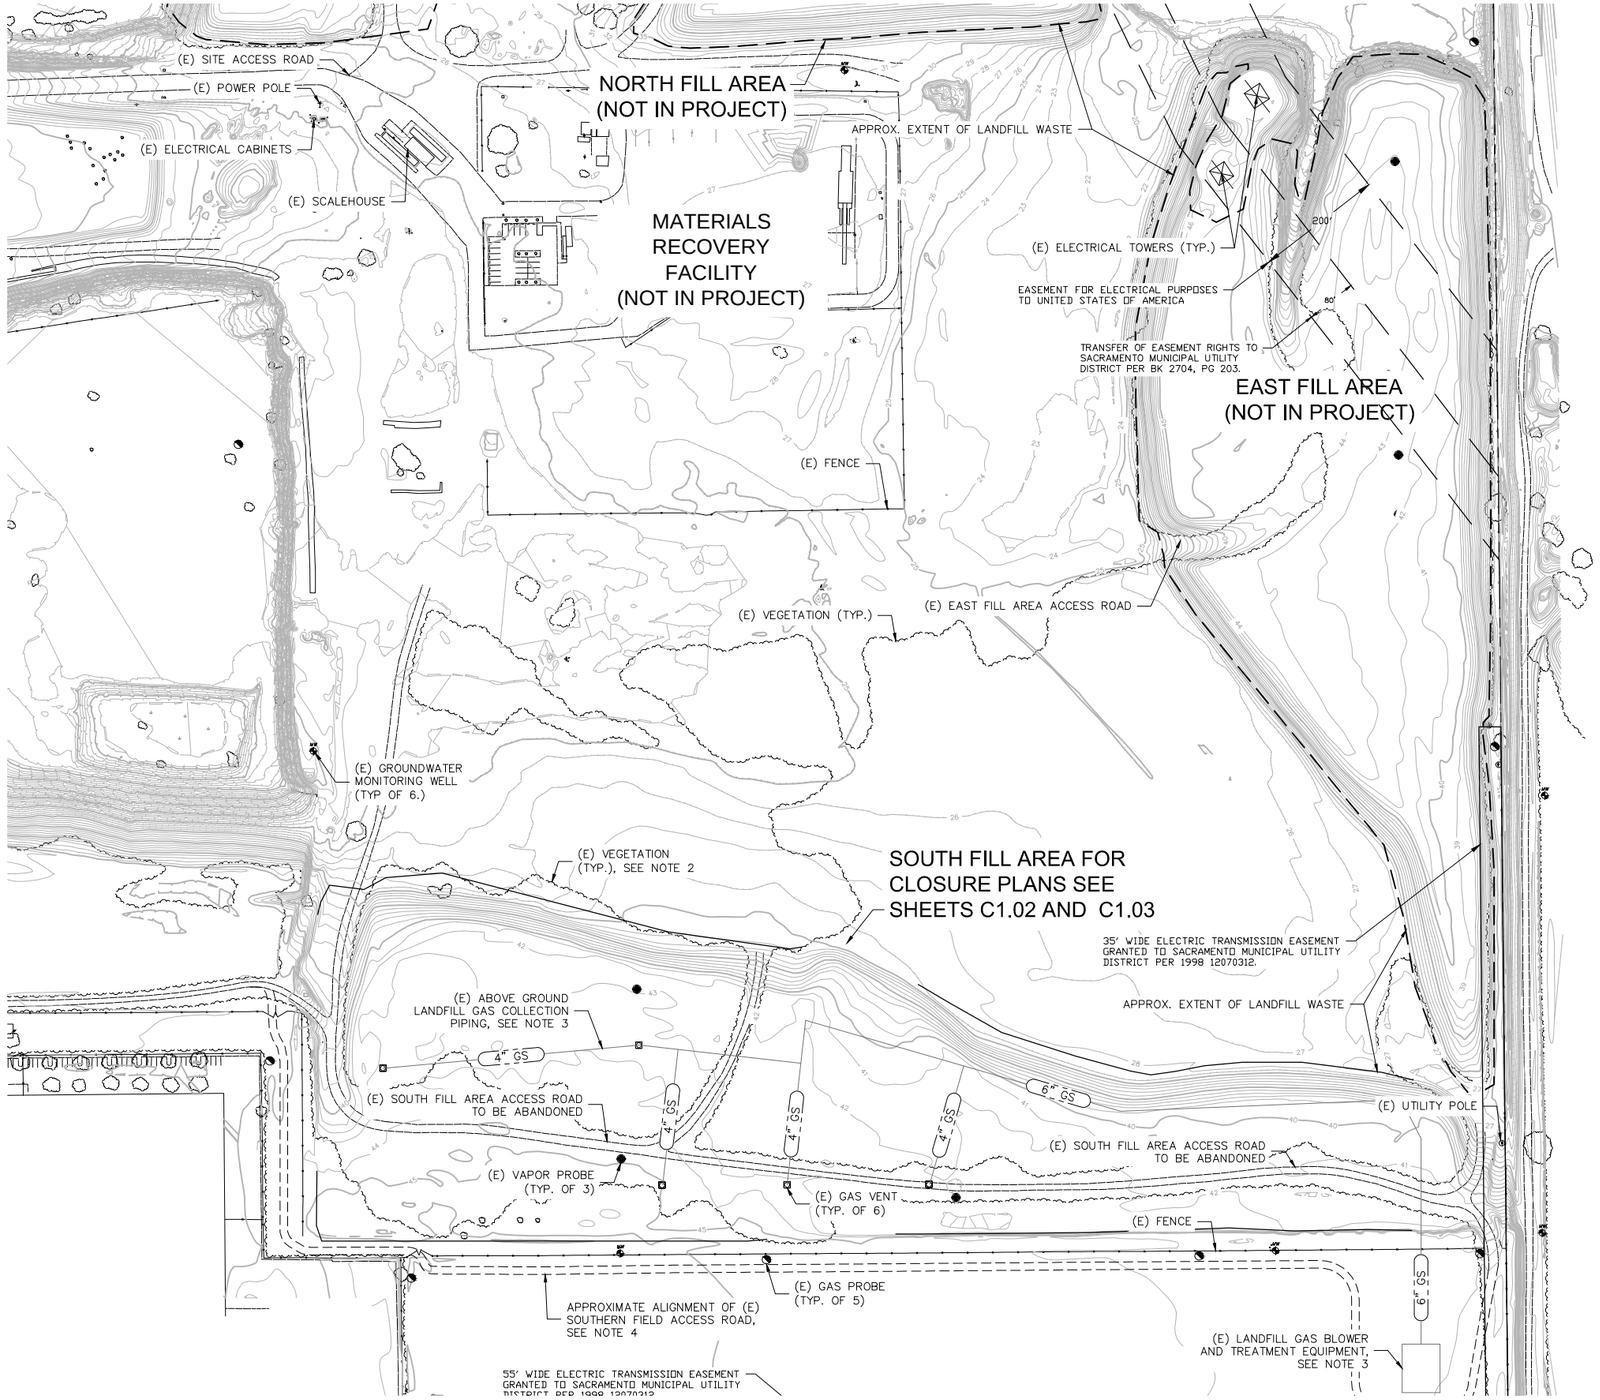
GENERAL ABBREVIATIONS AND SYMBOLS

PREPARED FOR: FLORIN PERKINS LANDFILL — DATE SUBMITTED: AUGUST 30, 2016

SHEET NUMBER G1.03 OF 8 SHEETS
SCALE VERTICAL: N/A HORIZONTAL: N/A
JOB NUMBER SAB115018

ALL XREFS: 22-34



NOTES:

1. CONTRACTOR SHALL FIELD VERIFY THE LOCATION OF ALL SITE FEATURES THAT MAY IMPACT CONSTRUCTION OF THE LANDFILL CLOSURE AS SHOWN ON SHEETS C1.02 AND C1.03. CONTRACTOR SHALL NOTIFY CONSTRUCTION MANAGER IMMEDIATELY, IN WRITING, IF SITE CONDITIONS EXIST THAT WILL IMPACT THE PROPOSED LANDFILL CLOSURE.
2. PRIOR TO CONSTRUCTION OF LANDFILL CLOSURE, CONTRACTOR SHALL CLEAR AND GRUB EXISTING VEGETATION FROM SOUTH FILL AREA. ORGANIC PLANT MATERIAL SHALL BE SEPARATED AND REMOVED FROM EXISTING SOIL OVER WASTE MATERIAL IN ORDER TO BE CONSIDERED SUITABLE AS FILL MATERIAL FOR LANDFILL CAP.
3. (E) LANDFILL GAS COLLECTION PIPING AND TREATMENT SYSTEM SHOWN ON THIS SHEET ARE ANTICIPATED TO BE CONSTRUCTED IN 2015, PRIOR TO THE LANDFILL CLOSURE. CONTRACTOR SHALL VERIFY THE EXISTENCE OF PIPING AND EQUIPMENT PRIOR TO BEGINNING CONSTRUCTION OF LANDFILL CLOSURE. CONTRACTOR SHALL COORDINATE WITH LANDFILL OWNER AND REMOVE AND REPLACE LANDFILL GAS PIPING AS NECESSARY TO CONSTRUCT LANDFILL CLOSURE.
4. (E) SOUTHERN FIELD ACCESS ROAD SHOWN ON THIS SHEET IS ANTICIPATED TO BE CONSTRUCTED IN 2015, PRIOR TO THE LANDFILL CLOSURE. CONTRACTOR SHALL VERIFY THE EXISTENCE OF THE ACCESS ROAD, AND COORDINATE WITH THE LANDFILL OWNER TO ENSURE ADEQUATE SITE ACCESS DURING AND AFTER CONSTRUCTION OF LANDFILL CLOSURE.

WARNING – SMUD 230KV ELECTRIC OVERHEAD LINES ARE LIVE –

ELECTROCUTION POTENTIAL. CONTRACTOR SHALL TAKE ALL APPROPRIATE SAFETY MEASURES WHEN WORKING NEAR OR UNDER THE LINES, INCLUDING PLACEMENT OF OSHA-REQUIRED WARNING SIGNAGE. ON-SITE SMUD INSPECTION REQUIRED WHEN WORKING WITHIN 25 FEET OF SMUD'S FACILITIES. CONTRACTOR SHALL CONTACT SMUD'S RICKY PLAZA AT (916) 732-5905 OR (916) 799-5733 TO SCHEDULE INSPECTION. 72-HOUR ADVANCE NOTICE IS REQUIRED. CONTRACTOR SHALL PROTECT SMUD FACILITIES DURING CONSTRUCITON AND NOTIFY SMUD IMMEDIATELY IF FACILITIES ARE DAMAGED. ANY DAMAGE TO EXISTING FACILITIES SHALL BE REPAIRED AT THE CONTRACTOR'S EXPENSE.

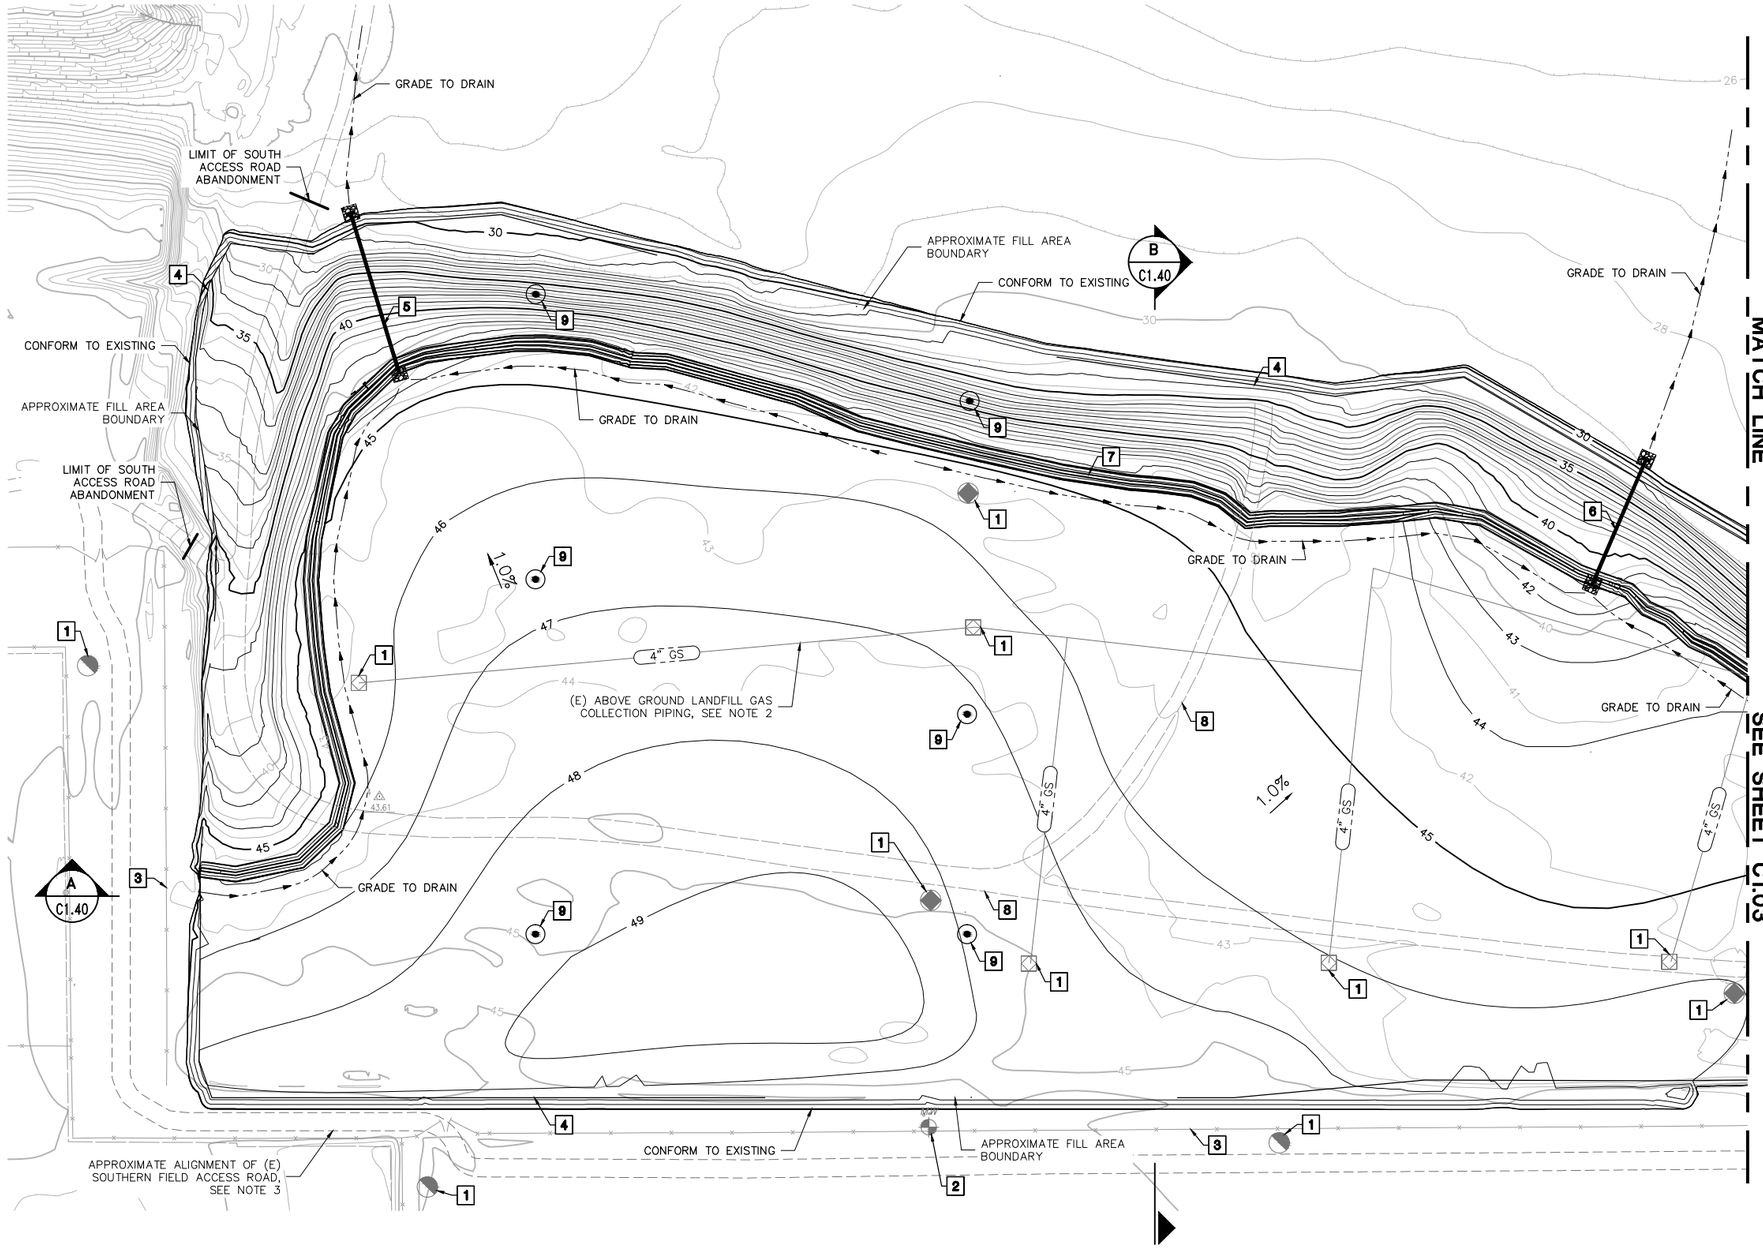
JOB NUMBER SAB115018

ALL XREFS: 22x34



PLAN
SCALE: 1"=50'

SHEET NOTES:

1. PROTECT EXISTING GAS VENTS, GAS PROBES, AND VAPOR PROBES IN PLACE.
2. PROTECT EXISTING GROUNDWATER MONITORING WELL IN PLACE
3. PROTECT EXISTING FENCE IN PLACE
4. CONSTRUCT LANDFILL CAP ABOVE LANDFILL UNIT PER DETAIL 5, SHEET D1.01. PROVIDE 3' MINIMUM COVER ABOVE INERT WASTE MATERIAL. SLOPE OF FINISH GRADE SHALL NOT EXCEED 3:1 IN ANY LOCATION. INSTALL FIBER ROLLS PER CALTRANS STD. DETAIL H51 (TYPE I) AT 15' ON CENTER WHERE FINISH SLOPE IS GREATER THAN 4:1.
5. CONSTRUCT 110 LF CMP DOWNDRAIN PER CALTRANS STD. DETAIL D87A, INLET AND OUTLET PER DETAILS 3 AND 4, SHEET D1.01. INV. AT TOP = 43.16, INV. AT BOTTOM = 27.70.
6. CONSTRUCT 90 LF CMP DOWNDRAIN PER CALTRANS STD. DETAIL D87A, INLET AND OUTLET PER DETAILS 3 AND 4, SHEET D1.01. INV. AT TOP = 40.87, INV. AT BOTTOM = 28.93.
7. CONSTRUCT 2' DIKE AT TOP OF BANK PER DETAIL 2, SHEET D1.01
8. ABANDON (E) SOUTH UNIT ACCESS ROAD IN PLACE
9. INSTALL EROSION MONUMENT PER DETAIL 1, SHEET D1.01

LEGEND:

—50— CONTOURS OF EXISTING GROUND ELEVATION

—50— CONTOURS OF PROPOSED GROUND ELEVATION, SEE NOTE 1

NOTES:

1. PROPOSED CONTOURS ARE DRAWN ASSUMING AN EXISTING SUITABLE MATERIAL COVER OF 0.5' ABOVE TOP OF EXISTING INERT WASTE FILL. CONTRACTOR SHALL VERIFY DEPTH OF EXISTING COVER AND ADJUST FINISH GRADES AS NECESSARY TO ENSURE A MINIMUM COVER OF 3.0' ABOVE TOP OF EXISTING INERT WASTE FILL AND ADEQUATE DRAINAGE.
2. (E) LANDFILL GAS COLLECTION PIPING AND TREATMENT SYSTEM SHOWN ON THIS SHEET ARE ANTICIPATED TO BE CONSTRUCTED IN 2015, PRIOR TO THE LANDFILL CLOSURE. CONTRACTOR SHALL VERIFY THE EXISTENCE OF PIPING AND EQUIPMENT PRIOR TO BEGINNING CONSTRUCTION OF LANDFILL CLOSURE. CONTRACTOR SHALL COORDINATE WITH LANDFILL OWNER AND REMOVE AND REPLACE LANDFILL GAS PIPING AS NECESSARY TO CONSTRUCT LANDFILL CLOSURE.
3. (E) SOUTHERN FIELD ACCESS ROAD SHOWN ON THIS SHEET IS ANTICIPATED TO BE CONSTRUCTED IN 2015, PRIOR TO THE LANDFILL CLOSURE. CONTRACTOR SHALL VERIFY THE EXISTENCE OF THE ACCESS ROAD, AND COORDINATE WITH THE LANDFILL OWNER TO ENSURE ADEQUATE SITE ACCESS DURING AND AFTER CONSTRUCTION OF LANDFILL CLOSURE.

VERTICAL: N/A
HORIZONTAL: N/A
JOB NUMBER **SAB115018**

GENERAL NOTES

1. THE CONTRACTOR SHALL NOTIFY THE CONSTRUCTION MANAGER IMMEDIATELY REGARDING ANY DISCREPANCIES OR AMBIGUITIES WHICH MAY EXIST IN THE PLANS OR SPECIFICATIONS. CONSTRUCTION MANAGER'S INTERPRETATION OR CORRECTION THEREOF SHALL BE CONCLUSIVE.

2. WHERE THE PLANS OR SPECIFICATIONS DESCRIBE PORTIONS OF THE WORK IN GENERAL TERMS BUT NOT IN COMPLETE DETAIL, IT IS UNDERSTOOD THAT ONLY THE BEST GENERAL PRACTICE IS TO PREVAIL AND THAT ONLY MATERIALS AND WORKMANSHIP OF THE FIRST QUALITY ARE TO BE USED.

3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL REQUIRED PERMITS AND LICENSES AND PAYING ALL ASSOCIATED FEES REQUIRED FOR THE CONSTRUCTION AND COMPLETION OF THE PROJECT.

4. THE CONTRACTOR SHALL EXERCISE DUE CAUTION AND SHALL CAREFULLY PRESERVE BENCH MARKS AND SURVEY REFERENCE POINTS, AND SHALL BEAR ALL EXPENSES FOR REPLACEMENT.

5. THE CONTRACTOR SHALL VERIFY THE EXISTENCE AND LOCATION OF EXISTING UTILITIES WITH LANDFILL OPERATIONS STAFF. IT SHALL BE THE CONTRACTOR'S SOLE RESPONSIBILITY TO PROTECT ALL EXISTING UTILITIES SO THAT NO DAMAGE RESULTS DURING THE PERFORMANCE OF THIS CONTRACT WORK.

6. PRIOR TO COMMENCING WORK, IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO FIELD LOCATE ALL AFFECTED UNDERGROUND UTILITIES MAIN AND SERVICE LINES. THE CONTRACTOR SHALL NOTIFY THE MEMBERS OF THE UNDERGROUND SERVICE ALERT (U.S.A.) 48 HOURS IN ADVANCE OF PERFORMING EXCAVATION WORK BY CALLING THE TOLL–FREE NUMBER (800) 227–2600.

7. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROTECTING EXISTING IMPROVEMENTS FROM DAMAGE. THE COST OF REPLACING EXISTING IMPROVEMENTS SHALL BE INCLUDED IN THE CONTRACT BID PRICES.

8. PRIOR TO BEGINNING WORK, CONTACT CAL–OSHA AT (916) 263–2800 FOR PERMIT REQUIREMENTS.

9. CONTRACTOR AGREES THAT IT SHALL ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THIS PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY; THAT THIS REQUIREMENT SHALL APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS; AND THAT THE CONTRACTOR SHALL DEFEND, INDEMNIFY AND HOLD THE OWNER AND CONSTRUCTION MANAGER HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT.

10. EXCAVATIONS OF 5 FEET OR MORE IN DEPTH WILL REQUIRE AN EXCAVATION PERMIT FROM THE STATE OF CALIFORNIA DEPARTMENT OF INDUSTRIAL SAFETY. FOR TRENCHES 5 FEET OR MORE IN DEPTH, THE CONTRACTOR SHALL COMPLY WITH SECTION 5–1.02A OF THE CALTRANS STANDARDS, CHAPTER 9 OF THE STATE OF CALIFORNIA LABOR CODE, AND APPLICABLE LOCAL CODES OR ORDINANCES.

11. WHENEVER PAVEMENT IS BROKEN OR CUT IN THE INSTALLATION OF THE WORK COVERED BY THESE SPECIFICATIONS, THE CONTRACTOR SHALL REPLACE THE PAVEMENT, AFTER PROPER BACKFILLING, WITH PAVEMENT MATERIALS EQUAL TO OR BETTER THAN THE MATERIALS USED IN THE ORIGINAL PAVING. THE FINISHED PAVEMENT SHALL BE SUBJECT TO THE APPROVAL OF THE CONSTRUCTION MANAGER.

12. THE CONTRACTOR'S ATTENTION IS DIRECTED TO: SECTION 1540 (A) (1) OF THE CONSTRUCTION SAFETY ORDERS (TITLE 8 CALIFORNIA ADMINISTRATION CODE SECTION 1540), ISSUED BY THE OCCUPATIONAL SAFETY AND HEALTH STANDARDS BOARD PURSUANT TO THE CALIFORNIA OCCUPATIONS SAFETY AND HEALTH ACT OF 1973, AS AMENDED, WHICH STATES: (A) "PRIOR TO OPENING AN EXCAVATION, THE CONTRACTOR SHALL DETERMINE WHETHER UNDERGROUND INSTALLATIONS; I.E., SEWER, WATER, FUEL, ELECTRIC LINES, ETC., WILL BE ENCOUNTERED AND IF SO, WHERE SUCH UNDERGROUND INSTALLATIONS ARE LOCATED. WHEN THE EXCAVATION APPROACHES THE LOCATION OF SUCH UNDERGROUND INSTALLATION, THE EXACT LOCATION SHALL BE DETERMINED BY CAREFUL PROBING OR HAND DIGGING; AND, WHEN IT IS UNCOVERED, ADEQUATE PROTECTION SHALL BE PROVIDED FOR THE EXISTING INSTALLATION BY THE CONTRACTOR.

13. APPROPRIATE DUST CONTROL SHALL BE PROVIDED, AT THE CONTRACTOR'S EXPENSE, TO MINIMIZE ANY DUST NUISANCE AS DIRECTED BY CONSTRUCTION MANAGER.

14. ALL DRAINAGE PATTERNS SHALL BE MAINTAINED AT ALL TIMES DURING AND AFTER CONSTRUCTION. THE CONTRACTOR SHALL RESTORE ALL EXISTING DRAINAGE PATTERNS AND FACILITIES TO PRECONSTRUCTION CONDITION OR BETTER. THE CONTRACT SHALL REPLACE IN KIND ANY SIGNS, MAILBOXES, ETC., DAMAGED BY CONSTRUCTION ACTIVITIES.

15. THE CONTRACTOR SHALL MAINTAIN NORMAL VEHICLE ACCESS PATHS WITHIN AND ADJACENT TO THE LIMITS OF WORK DURING CONSTRUCTION ACTIVITIES. DEVIATIONS OR IMPACTS TO NORMAL VEHICLE ACCESS PATHS WITHIN THE LIMITS OF WORK SHALL BE COORDINATED WITH THE CONSTRUCTION MANAGER AND SUBJECT TO APPROVAL OF OWNER.

16. THE WORK FOR THIS PROJECT CONSISTS OF THE FOLLOWING CLOSURE CONSTRUCTION ACTIVITIES AT THE FLORIN–PERKINS LANDFILL (FPL) IN SACRAMENTO, CALIFORNIA:

- CONSTRUCTING A THREE–FOOT–THICK FINAL COVER ON THE NORTH/EAST FILL AREA (NFA AND EFA OR NORTH UNIT AND EAST UNIT).
- CONSTRUCTING DRAINAGE FACILITIES.
- COORDINATION WITH THE CONSTRUCTION OF LANDFILL GAS CONTROL FACILITIES FOR THE NFA AND EFA.

17. CLOSURE CONSTRUCTION ACTIVITIES SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING DOCUMENTS, PROVIDED UPON REQUEST:

- APPLICABLE REGULATIONS, SUCH AS TITLE 27 OF THE CALIFORNIA CODE OF REGULATIONS, WHICH ARE REFLECTED IN THE WASTE DISCHARGE REQUIREMENTS (WDR) – ORDER NO. R5–2013–0042 FOR THE FLORIN–PERKINS LANDFILL, UNCLASSIFIED LANDFILL UNITS, CLOSURE AND CORRECTIVE ACTION, SACRAMENTO COUNTY PREPARED BY THE CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD – CENTRAL VALLEY REGION.(HTTP://WWW.WATERBOARDS.CA.GOV/CENTRALVALLEY/BOARD_DECISIONS/ADOPTED_ORDERS/SACRAMENTO/R5–2013–0042.PDF)
- CONSTRUCTION DRAWINGS PREPARED FOR THE CLOSURE CONSTRUCTION.
- SPECIFICATIONS PREPARED FOR THE CLOSURE CONSTRUCTION.
- THE MAY, 2012 CONSTRUCTION QUALITY ASSURANCE PLAN (CQA PLAN) FLORIN–PERKINS LANDFILL, PREPARED BY DUNN ENVIRONMENTAL TEAM, WHICH IS APPENDIX E OF THE UPDATED FINAL CLOSURE AND POST–CLOSURE MAINTENANCE PLAN, FEBRUARY 2015. (SEE CONTRACT DOCUMENTS – DIVISION C – ATTACHMENT #1.)
- STANDARD SPECIFICATION, STATE OF CALIFORNIA, BUSINESS, TRANSPORTATION AND HOUSING AGENCY, DEPARTMENT OF TRANSPORTATION, 2010 PREPARED BY THE STATE OF CALIFORNIA DEPARTMENT OF TRANSPORTATION (STANDARD SPECIFICATIONS). THESE TECHNICAL SPECIFICATIONS REFER TO APPLICABLE SPECIFIC SECTIONS OF THE STANDARD SPECIFICATIONS. (HTTP://WWW.DOT.CA.GOV/HQ/ESC/OE/CONSTRUCTION_CONTRACT_STANDARDS/STD_SPECS/2010_STDSPECS/2010_STDSPECS.PDF)

IN CASE OF CONFLICTS, OR INCONSISTENCIES, BETWEEN THE DOCUMENTS LISTED ABOVE, THE ENGINEER (AS IDENTIFIED IN THE CQA PLAN) SHALL HAVE SOLE AUTHORITY TO RESOLVE SUCH CONFLICTS, OR INCONSISTENCIES. IN GENERAL, THE WDR–SPECIFIC DOCUMENTS WILL TAKE PRECEDENCE OVER THE STANDARD SPECIFICATIONS.

CONSTRUCTION PERFORMANCE SPECIFICATION

1. SUBMITTALS

1.1. CONTRACTOR SHALL SUBMIT DESCRIPTIVE INFORMATION THAT WILL ENABLE THE CONSTRUCTION MANAGER TO DETERMINE WHETHER THE CONTRACTOR'S PROPOSED MATERIALS, EQUIPMENT, OR METHODS OF WORK ARE IN GENERAL CONFORMANCE TO THE DESIGN CONCEPT AND IN COMPLIANCE WITH THE PLANS AND SPECIFICATIONS.

1.2. SUBMITTAL REVIEW SHALL BE ONLY FOR GENERAL CONFORMANCE WITH THE DESIGN CONCEPT AND GENERAL COMPLIANCE WITH CONTRACT DOCUMENTS. IT SHALL NOT INCLUDE A REVIEW OF QUANTITIES, DIMENSIONS, WEIGHTS, GAGES, FABRICATION PROCESSES, OR CONSTRUCTION SAFETY PRECAUTIONS, ALL OF WHICH ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR. REVIEW OF A SPECIFIC ITEM SHALL NOT INDICATE ACCEPTANCE OF AN ASSEMBLY OF WHICH THE ITEM IS A COMPONENT. THE CONSTRUCTION MANAGER SHALL NOT BE REQUIRED TO REVIEW AND SHALL NOT BE RESPONSIBLE FOR ANY DEVIATIONS FROM THE CONTRACT DOCUMENTS NOT CLEARLY NOTED BY THE CONTRACTOR, NOR SHALL THE CONSTRUCTION MANAGER BE REQUIRED TO REVIEW PARTIAL SUBMISSIONS OR THOSE FOR WHICH SUBMISSIONS FOR CORRELATED ITEMS HAVE NOT BEEN RECEIVED.

1.3. CONTRACTOR SHALL BE RESPONSIBLE FOR THE ACCURACY AND COMPLETENESS OF THE INFORMATION CONTAINED IN EACH SUBMITTAL AND SHALL ASSURE THE MATERIAL, EQUIPMENT, OR METHOD OF WORK SHALL BE DESCRIBED IN THE SUBMITTAL. THE CONTRACTOR SHALL VERIFY THAT ALL FEATURES AND OF ALL PRODUCTS CONFORM THE REQUIREMENTS OF THE CONTRACT DOCUMENTS.

1.4. IMMEDIATELY FOLLOWING AWARD OF CONTRACT, THE CONTRACTOR SHALL REVIEW THE PLANS AND SPECIFICATIONS AND SHALL PREPARE A LIST OF ALL SUBMITTALS ANTICIPATED ON THE PROJECT AND SHALL SUBMIT THE LIST TO THE CONSTRUCTION MANAGER. ITEMS NOT ON THE LIST BUT REQUIRING REVIEW SHALL BE ADDED TO THE LIST AS REQUESTED BY THE CONSTRUCTION MANAGER AT ANY TIME DURING CONSTRUCTION.

1.5. SUBMITTALS SHALL BE SEQUENTIALLY NUMBERED. SIX (6) COPIES OF ALL SUBMITTED INFORMATION SHALL BE DELIVERED OR MAILED TO:

NV5, INC.
2525 NATOMAS PARK DRIVE, SUITE 300
SACRAMENTO, CA 95833
FAX: (916) 641–9222
ATTN: JAY RADKE

1.6. UNLESS OTHERWISE SPECIFIED, WITHIN FOURTEEN (14) CALENDAR DAYS AFTER RECEIPT OF THE SUBMITTAL, THE SUBMITTAL SHALL BE REVIEWED AND THREE COPIES OF THE MARKED–UP REPRODUCIBLE SUBMITTAL SHALL BE RETURNED TO THE CONTRACTOR, INDICATING ONE OF THE FOLLOWING ACTIONS:

1.6.1. "NO EXCEPTION TAKEN" – THE CONTRACTOR MAY BEGIN TO IMPLEMENT THE WORK OR METHOD OR INCORPORATE THE MATERIALS OR EQUIPMENT COVERED BY THE SUBMITTAL.

1.6.2. "MAKE CORRECTIONS NOTED" – THE CONTRACTOR MAY BEGIN TO IMPLEMENT THE WORK OR METHOD OR INCORPORATE THE MATERIALS OR EQUIPMENT COVERED BY THE SUBMITTAL IN ACCORDANCE WITH THE NOTED CORRECTION.

1.6.3. "REVISE AND RESUBMIT" – THE SUBMITTAL CONTAINS INSUFFICIENT OR INACCURATE INFORMATION. CONTRACTOR SHALL NOT UNDERTAKE THE WORK COVERED BY THE SUBMITTAL. THE CONTRACTOR SHALL PROVIDE A REVISED SUBMITTAL THAT IS REVIEWED BY THE CONSTRUCTION MANAGER AND RETURNED AS "NO EXCEPTIONS TAKEN" OR "MAKE CORRECTIONS NOTED" PRIOR TO IMPLEMENTING THE WORK, METHOD, MATERIALS, OR EQUIPMENT COVERED BY THE SUBMITTAL.

1.6.4. "REJECTED" – THE SUBMITTAL IN NOT WITHIN GENERAL CONFORMANCE OR COMPLIANCE WITH THE PLANS AND SPECIFICATIONS. CONTRACTOR SHALL NOT UNDERTAKE THE WORK COVERED BY THE SUBMITTAL. THE CONTRACTOR SHALL PROVIDE A REVISED SUBMITTAL THAT IS REVIEWED BY THE CONSTRUCTION MANAGER AND RETURNED AS "NO EXCEPTIONS TAKEN" OR "MAKE CORRECTIONS NOTED" PRIOR TO IMPLEMENTING THE WORK, METHOD, MATERIALS, OR EQUIPMENT COVERED BY THE SUBMITTAL.

1.7. REVIEW OF DRAWINGS, METHODS OF WORK, OR INFORMATION REGARDING MATERIALS OR EQUIPMENT THE CONTRACTOR PROPOSES TO PROVIDE SHALL NOT RELIEVE THE CONTRACTOR OF HIS RESPONSIBILITY FOR ERRORS THEREIN AND SHALL NOT BE REGARDED AS AN ASSUMPTION OF RISKS OR LIABILITY BY THE RECEIVER, OR BY ANY OFFICER OR EMPLOYEE THEREOF, OR BY ANY ENGINEERING FIRM CONDUCTING SUCH REVIEW ON BEHALF OF THE RECEIVER, AND THE CONTRACTOR SHALL HAVE NO CLAIM UNDER THE CONTRACT ON ACCOUNT OF THE FAILURE, OR PARTIAL FAILURE, OF THE METHOD OF WORK, MATERIAL, OR EQUIPMENT SO REVIEWED. A MARK OF "NO EXCEPTIONS TAKEN" OR "MAKE CORRECTIONS NOTED" SHALL MEAN THAT THE RECEIVER HAS NO OBJECTION TO THE CONTRACTOR, UPON HIS OWN RESPONSIBILITY, USING THE PLAN OR METHOD OF WORK PROPOSED, OR PROVIDING THE MATERIALS OR EQUIPMENT PROPOSED.

2. EARTHWORK

2.1. GENERAL

EARTHWORK WILL CONSIST OF CONSTRUCTING FINAL COVER OVER THE NORTH/EAST FILL AREA (NFA AND EFA). EARTHWORK WILL COMPLY WITH THE FOLLOWING SECTIONS OF THE STANDARD SPECIFICATIONS, EXCEPT AS MODIFIED BY THESE TECHNICAL SPECIFICATIONS AND OTHER PROJECT–SPECIFIC DOCUMENTS IDENTIFIED IN GENERAL NOTE #17:

- SECTION 16, CLEARING AND GRUBBING
- SECTION 17, WATERING
- SECTION 19–1, EARTHWORK, GENERAL
- SECTION 19–5, COMPACTION
- SECTION 19–7, BORROW EXCAVATION
- SECTION 21, EROSION CONTROL
- SECTION 72, SLOPE PROTECTION

2.2 FINAL COVER

FINAL COVER SHALL BE CONSTRUCTED TO THE LINES AND GRADES SHOWN ON THE CONSTRUCTION DRAWINGS. THE FINAL COVER SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE FINAL CLOSURE AND POSTCLOSURE MAINTENANCE PLAN, AS FOLLOWS, FROM BOTTOM TO TOP:

a. FOUNDATION LAYER – ONE FOOT (12 INCHES) OF COMPACTED SOIL AND/OR INERT WASTE.
b. ENGINEERED SOIL LAYER – 1–1/2 FEET (18 INCHES) OF COMPACTED SOIL.
c. VEGETATIVE COVER – ½ FEET (6 INCHES) OF COMPACTED SOIL SEEDED WITH NATIVE GRASS MIX (SEE SECTION 5 – EROSION CONTROL FOR RECOMMENDED SEED MIX).

MINIMUM FINAL COVER THICKNESS SHALL BE 3 FEET, THIS IS A REGULATORY REQUIREMENT AND NO EXCEPTIONS WILL BE ALLOWED.

FINAL COVER SHALL COMPLY WITH THE REQUIREMENTS IN THE FOLLOWING TABLE:

COMPACTED FINAL COVER TESTING TYPE AND FREQUENCY

TEST DESCRIPTION	TEST DESIGNATION	MINIMUM TEST FREQUENCY	PASSING CRITERIA
MOISTURE–DENSITY RELATIONSHIP	ASTM D1557	ONE PER 5,000 CUBIC YARDS	NO TESTING CRITERIA (RESULTS USED TO EVALUATE RELATIVE COMPACTION)
IN–PLACE MOISTURE/DENSITY (NUCLEAR OR DRIVE RING)	ASTM D6938 ASTM D2937	FOUR (4) FIELD DENSITY TESTS SHALL BE PERFORMED FOR EACH 1,000 CUBIC YARDS OF MATERIAL PLACED	MINIMUM OF 90% FOR COMPACTION AND ±1% OF OPTIMUM MOISTURE CONTENT
IN–PLACE DENSITY AND MOISTURE CONTENT (SAND–CONE)	ASTM D1556	10% OF REQUIRED DENSITY TESTS	MINIMUM OF 90% FOR COMPACTION AND ±1% OF OPTIMUM MOISTURE CONTENT
LABORATORY PERMEABILITY	ASTM D5084 OR APPROVED METHOD	ONE PER 5,000 CUBIC YARDS PLACED	MAXIMUM OF 1.0X10–5 CM/SEC
ATTERBERG LIMITS	ASTM D4318	ONE PER 1,000 CUBIC YARDS PLACED	NONE REQUIRED
FULL GRAIN SIZE DISTRIBUTION	ASTM D422	ONE PER 1,000 CUBIC YARDS PLACED	MINIMUM OF 33% PASSING # 200 AND MINIMUM OF 12% PASSING 5–MICRON
STANDARD CLASSIFICATION	ASTM D4287	ONE PER 1,000 CUBIC YARDS PLACED	SEE ALTERNATIVE FINAL COVER EVALUATION REPORT, GLA 2012
VISUAL INSPECTION	ASTM D2488	DAILY OBSERVATIONS	NO OVERSIZE ROCKS (3–INCH MINUS) AND DELETERIOUS MATERIALS

IN PARTICULAR, FINAL COVER SOILS SHALL COMPLY WITH THE FOLLOWING REQUIREMENTS: THE UPPER TWO–FEET (ENGINEERED SOIL AND VEGETATIVE LAYERS) SHALL COMPLY WITH THE FOLLOWING SPECIFICATIONS:

- 90% RELATIVE COMPACTION AT +/– 1% OF OPTIMUM MOISTURE CONTENT (ASTM D6938, ASTM D2937, ASTM D1556 – FOUR FIELD DENSITY TESTS SHALL BE PERFORMED PER 1,000 CUBIC YARDS OF MATERIAL PLACED, WITH 10% OF THE REQUIRED DENSITY TESTS BY ASTM D1556.)
- LABORATORY PERMEABILITY NO GREATER THAN 1 X 10–5 CM/SEC (AS DETERMINED BY TEST METHOD ASTM D5084, OR APPROVED ALTERNATE.)
- SUFFICIENT CLAY AND/OR SILT CONTENT TO ALLOW COMPACTION TO THE PROJECT SPECIFICATIONS (E.G., CL, OR ML UNDER THE UNIFIED SOIL CLASSIFICATION SYSTEM)
- CLEAN SOIL ONLY.
- SPREAD AND COMPACT IN LIFTS NO GREATER THAN 8 INCHES THICK.
- 3/8–INCH MAXIMUM PARTICLE SIZE.
- MINIMUM 33% PASSING THE #200 SIEVE.
- MINIMUM OF 12% PASSING 5 MICRONS.

PERMEABILITY SAMPLES SHALL BE REMOLDED TO 90% OF RELATIVE MAXIMUM DENSITY AT 1% ABOVE OPTIMUM MOISTURE CONTENT AND TESTED AT LOW CONFINING PRESSURE (6–8 POUNDS PER SQUARE INCH).

THE FOUNDATION LAYER SOILS SHALL COMPLY WITH THE FOLLOWING SPECIFICATIONS:

- 90% RELATIVE COMPACTION AT +/– 3% OF OPTIMUM MOISTURE CONTENT FOR COARSE–GRAINED SOILS, AND 0% TO 4% OVER OPTIMUM MOISTURE CONTENT FOR FINE–GRAINED SOILS (CL OR ML), AS CLASSIFIED BY THE USCS.
- LABORATORY PERMEABILITY NO GREATER THAN 1 X 10–5 CM/SEC (AS DETERMINED BY TEST METHOD ASTM D5084, OR APPROVED ALTERNATE.) (SEE ABOVE FOR TEST CONDITIONS.)
- SUFFICIENT CLAY AND/OR SILT CONTENT TO ALLOW COMPACTION TO THE PROJECT SPECIFICATIONS (E.G., CL, OR ML UNDER THE UNIFIED SOIL CLASSIFICATION SYSTEM)
- WHEN COMPACTED, BE SUFFICIENTLY SMOOTH AND FREE OF ROCKS AND DEBRIS SO AS NOT TO IMPAIR THE OVERLYING LAYERS (E.G., ENGINEERED SOIL AND VEGETATIVE COVER LAYER).
- CLEAN SOIL, OR INERT WASTE.
- SPREAD AND COMPACT IN LIFTS NO GREATER THAN 8 INCHES THICK.
- 3 TO 4–INCH MAXIMUM PARTICLE SIZE. LARGER PARTICLES SHALL BE BEDDED IN SMALLER PARTICLES IN A MANNER THAT PREVENTS THE CREATION OF VOIDS WITHIN THE FOUNDATION LAYER.

3. DRAINAGE FACILITITES

DRAINAGE FACILITIES SHALL COMPLY WITH SECTION 69, OVERSIDE DRAINS, OF THE STANDARD SPECIFICATIONS.

4. LANDFILL GAS CONTROL FACILITIES

THE EXISTING LANDFILL GAS COLLECTION PIPING AND TREATMENT SYSTEM ARE ANTICIPATED TO BE CONSTRUCTED IN 2015, PRIOR TO THE LANDFILL CLOSURE COVER. THE CONTRACTOR SHALL VERIFY THE EXISTENCE OF PIPING AND EQUIPMENT PRIOR TO BEGINNING CONSTRUCTION OF LANDFILL CLOSURE COVER. CONTRACTOR SHALL COORDINATE WITH LANDFILL OWNER AND REMOVE & REPLACE LANDFILL GAS PIPING AS NECESSARY TO CONSTRUCT LANDFILL CLOSURE COVER.

5. EROSION CONTROL

EROSION CONTROL SHALL COMPLY WITH SECTION 21, EROSION CONTROL, OF THE STANDARD SPECIFICATIONS.

FIBER ROLLS SHALL BE CONSTRUCTED AT THE BASE OF THE SLOPES AND AT A MINIMUM OF 15 FOOT REGULAR INTERVALS ON THE SLOPE ALIGNING THE FIBER ROLLS WITH THE SLOPE CONTOURS.

THE FINAL COVER VEGETATION SHALL HYDROSEEDED USING A LOW–GROWING NATIVE SEED MIX APPROPRIATE FOR THE CENTRAL VALLEY CLIMATE, SUCH AS THOSE AVAILABLE FROM PACIFIC COAST SEED IN LIVERMORE, CALIFORNIA: AND PEACEFUL VALLEY FARM & GARDEN SUPPLY IN GRASS VALLEY, CALIFORNIA. THE SEED SHALL BE APPLIED PROMPTLY ONCE THE FINAL COVER GRADING IS COMPLETED.

EROSION CONTROL MONUMENTS CONSISTING OF 4 INCH X 4 INCH X 3 FEET WOOD POSTS SHALL BE SET IN FINAL COVER, FLUSH WITH FINISHED GRADE, FOR THE USE IN MONITORING FOR EROSION DURING POST–CLOSURE MAINTENANCE OPERATIONS.

6. OVERHEAD HIGH VOLTAGE TRANSMISSION POWER LINES

6.1. IN ORDER TO MAINTAIN ADEQUATE SUPPORT AND ACCESS TO WESTERN AREA POWER ASSOCIATION'S (WAPA'S) AND SACRAMENTO MUNICIPAL UTILITY DISTRICT'S (SMUD'S) STRUCTURES AND FOUNDATIONS, CONTRACTOR SHALL MAINTAIN A MINIMUM OFFSET RADIUS OF THIRTY (30) FEET FROM THE CENTER OF EACH TOWER.

6.2. EQUIPMENT USED WITHIN THE WAPA OR SMUD EASEMENT AREAS SHALL NOT EXCEED 15 FEET IN HEIGHT. ALL EQUIPMENT WITH A BOOM UTILIZED WITHIN THE EASEMENT AREAS SHALL BE EQUIPED WITH A MECHANICAL LOCKOUT TO ENSURE THAT ANY BOOM EXTENSION DOES NOT EXCEE OSHA AND CAL–OSHA SAFETY CLEARANCES BETWEEN THE HIGH VOLTAGE POWER LINES AND ANIMATE OR INANIMATE OBJECTS.

6.3. CONTRACTOR SHALL ABIDE AND COMPLY WITH THE NATIONAL ELECTRIC SAFETY CODE AND THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION STANDARDS THAT SHALL BE APPLIED FOR EQUIPMENT, ELECTRICAL, AND NON–ELECTRICAL WORKERS OPERATING AROUND ELECTRICAL POWER LINES.

6.4. NO TEMPORARY OR PERMANENT ABOVE GROUND STRUCTURES SHALL BE PLACED WITHIN WAPA'S OR SMUD'S EASEMENTS.

6.5. CONTRACTOR SHALL UTILIZE WATER TRUCKS WHILE EARTH MOVING EQUIPMENT IS IN USE TO PREVENT DUST CONTAMINATION OF THE TRANSMISSION LINE INSULATORS.

6.6. CONTRACTOR SHALL POST SIGNS "DANGER: OVERHEAD HIGH TRANSMISSION LINES" FOR WORKERS WORKING UNDER THE POWER LINES.

6.7. NO STORAGE, STAGING, OR MOUNDING OF MATERIALS SHALL BE CONDUCTED IN THE WAPA OR SMUD EASEMENTS.

6.8. NO VEHICLE OR EQUIPMENT FUELING SAHLL OCCUR WITHIN THE WAPA OR SMUD EASEMENTS.

6.9. ALL ABOVE GROUND METALLIC FACILITIES (I.E. FENCES, LIGHT STANDARDS, SIGNAL STANDARDS, ETC.) PROPOSED WITHIN THE WAPA OR SMUD EASEMENTS MUST BE PROPERLY GROUNDED. GROUNDING PLANS SHOULD BE STAMPED BY A CALIFORNIA LICENSED ELECTRICAL ENGINEER, MEET ALL NATIONAL ELECTRIC SAFETY CODE AND NATIONAL ELECTRIC CODE REQUIREMENTS, AND BE SUBMITTED TO SMUD FOR REVIEW.

FLORIN PERKINS LANDFILL - LANDFILL CLOSURE PLAN - PHASES II AND III
NORTH AND EAST FILL AREAS
GENERAL
GENERAL ABBREVIATIONS AND SYMBOLS

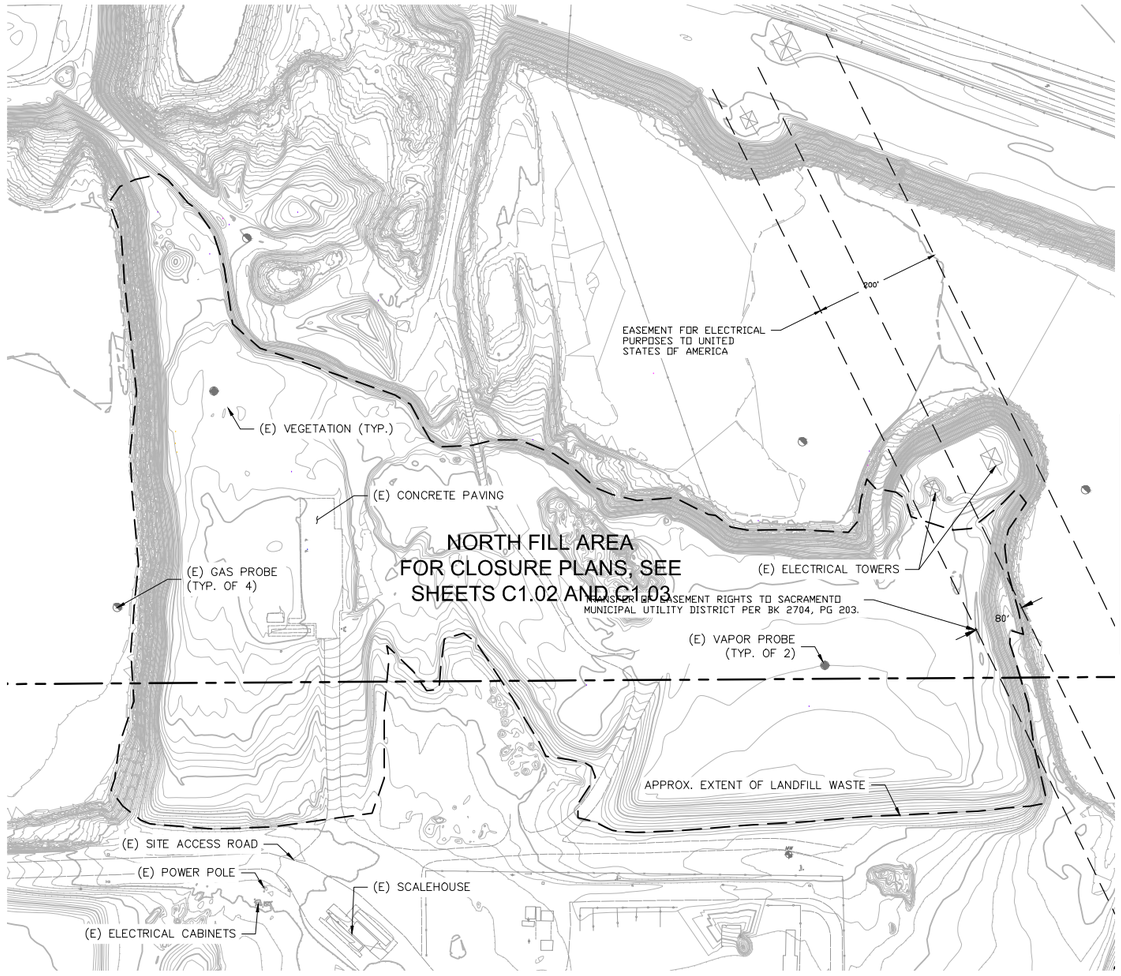
PREPARED FOR: FLORIN PERKINS LANDFILL

DATE SUBMITTED: AUGUST 30, 2016

SHEET NUMBER G1.03 OF 12 SHEETS

SCALE VERTICAL: N/A HORIZONTAL: N/A

JOB NUMBER SAB115018

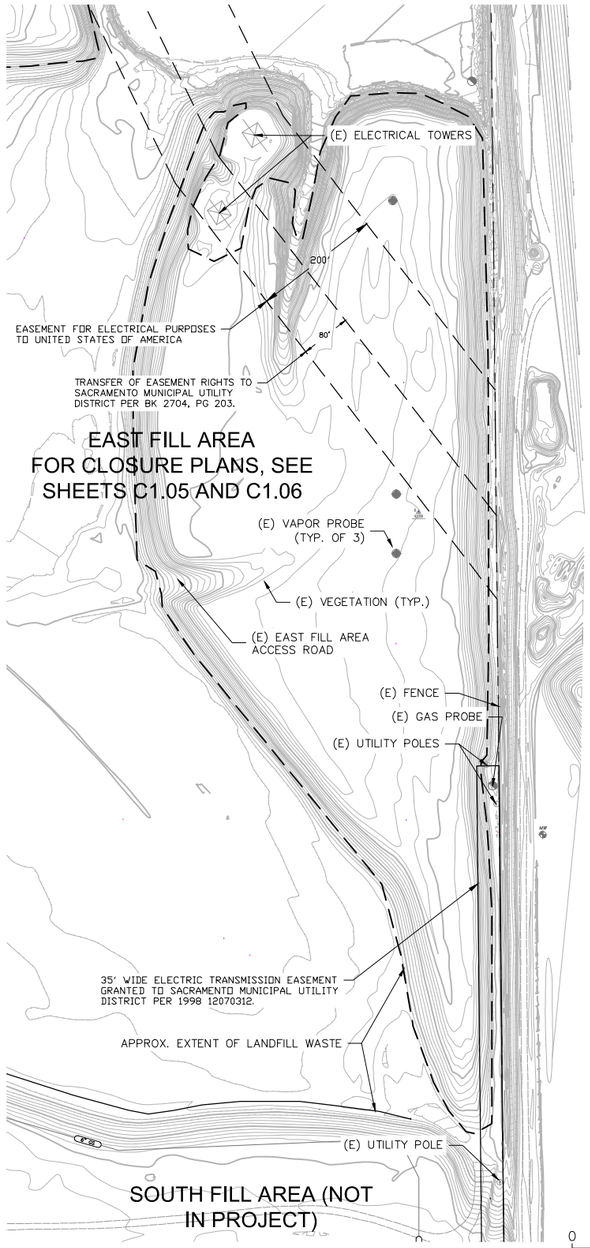


NORTH FILL AREA

SCALE: 1"=120'

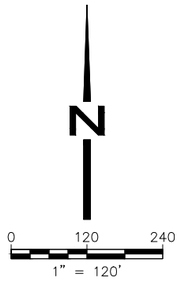
WARNING – SMUD 230KV ELECTRIC OVERHEAD LINES ARE LIVE –

ELECTROCUTION POTENTIAL. CONTRACTOR SHALL TAKE ALL APPROPRIATE SAFETY MEASURES WHEN WORKING NEAR OR UNDER THE LINES, INCLUDING PLACEMENT OF OSHA–REQUIRED WARNING SIGNAGE. ON–SITE SMUD INSPECTION REQUIRED WHEN WORKING WITHIN 25 FEET OF SMUD'S FACILITIES. CONTRACTOR SHALL CONTACT SMUD'S RICKY PLAZA AT (916) 732–5905 OR (916) 799–5733 TO SCHEDULE INSPECTION. 72–HOUR ADVANCE NOTICE IS REQUIRED. CONTRACTOR SHALL PROTECT SMUD FACILITIES DURING CONSTRUCITON AND NOTIFY SMUD IMMEDIATELY IF FACILITIES ARE DAMAGED. ANY DAMAGE TO EXISTING FACILITIES SHALL BE REPAIRED AT THE CONTRACTOR'S EXPENSE.



EAST FILL AREA

SCALE: 1"=120'



NOTES:

1. CONTRACTOR SHALL FIELD VERIFY THE LOCATION OF ALL SITE FEATURES THAT MAY IMPACT CONSTRUCTION OF THE LANDFILL CLOSURE AS SHOWN ON SHEETS C1.02, C1.03, C1.05, AND C1.06. CONTRACTOR SHALL NOTIFY CONSTRUCTION MANAGER IMMEDIATELY, IN WRITING, IF SITE CONDITIONS EXIST THAT WILL IMPACT THE PROPOSED LANDFILL CLOSURE.
2. PRIOR TO CONSTRUCTION OF LANDFILL CLOSURE, CONTRACTOR SHALL REMOVE ALL TREES AND CLEAR AND GRUB EXISTING VEGETATION FROM NORTH AND EAST FILL AREAS. ORGANIC PLANT MATERIAL SHALL BE SEPARATED AND REMOVED FROM EXISTING SOIL OVER WASTE MATERIAL IN ORDER TO BE CONSIDERED SUITABLE AS FILL MATERIAL FOR LANDFILL CAP.

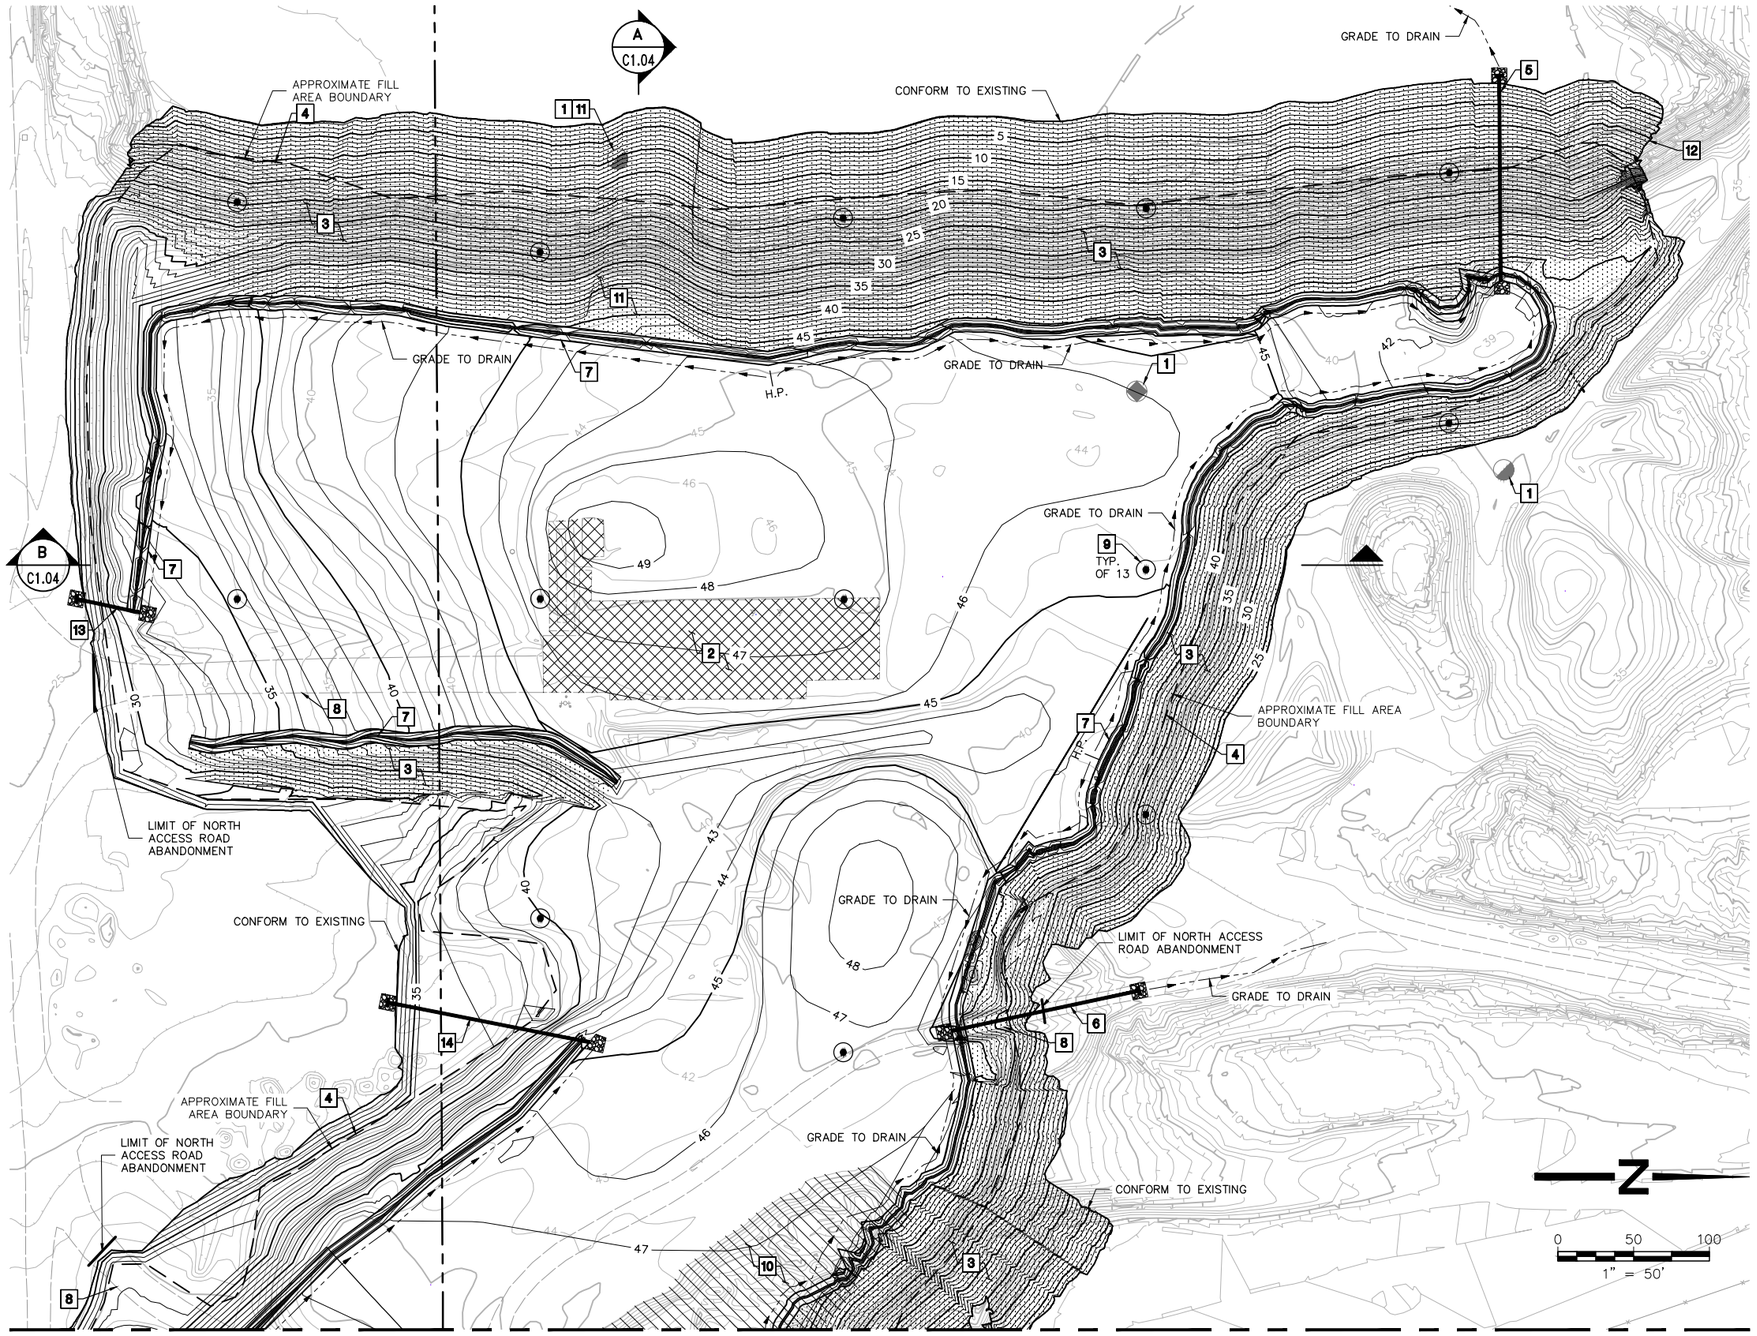
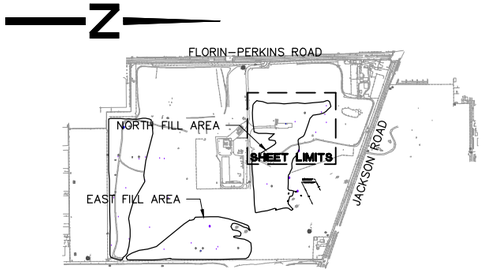
JOB NUMBER SAB115018



PLAN
SCALE: 1"=50'



KEY MAP
SCALE: 1"=1,000'

SHEET NOTES:

1. PROTECT EXISTING GAS PROBES AND VAPOR PROBES IN PLACE.
2. BREAK UP AND ABANDON EXISTING CONCRETE PAVING IN PLACE
3. RE-GRADE EXISTING WASTE FILL EMBANKMENT PER DETAIL 1, SHEET D1.02
4. CONSTRUCT LANDFILL CAP ABOVE LANDFILL UNIT PER DETAIL 5, SHEET D1.01. PROVIDE 3' MINIMUM COVER ABOVE INERT WASTE MATERIAL. SLOPE OF FINISH GRADE SHALL NOT EXCEED 3:1 IN ANY LOCATION. INSTALL FIBER ROLLS PER CALTRANS STD. DETAIL H51 (TYPE I) AT 15' ON CENTER WHERE FINISH SLOPE IS GREATER THAN 4:1.
5. CONSTRUCT 135 LF 24" CMP DOWNDRAIN PER CALTRANS STD. DETAIL D87A, INLET AND OUTLET PER DETAILS 3 AND 4, SHEET D1.01. INV. AT TOP = 41.93, INV. AT BOTTOM = 0.01.
6. CONSTRUCT 125 LF 24" CMP DOWNDRAIN PER CALTRANS STD. DETAIL D87A, INLET AND OUTLET PER DETAILS 3 AND 4, SHEET D1.01. INV. AT TOP = 43.71, INV. AT BOTTOM = 24.93.
7. CONSTRUCT 2' DIKE AT TOP OF BANK PER DETAIL 2, SHEET D1.01
8. ABANDON (E) NORTH UNIT ACCESS ROAD IN PLACE
9. INSTALL EROSION MONUMENT PER DETAIL 1, SHEET D1.01
10. REMOVE EXISTING DEBRIS PILES TO MATCH SURROUNDING GRADES. RELOCATE EXCAVATED MATERIAL WITHIN FILL AREA BOUNDARIES TO PROMOTE DRAINAGE PRIOR TO CONSTRUCTION OF LANDFILL CAP.
11. EXISTING GAS PROBE TO BE EXTENDED OR REPLACED TO 3' ABOVE FINISH GROUND SURFACE.
12. TRANSITION FROM RE-GRADED FILL EMBANKMENT TO EXISTING NATIVE MATERIAL CUT EMBANKMENT WITH CAP MATERIAL AT 3:1 MAX FILL SLOPE.
13. CONSTRUCT 45 LF 24" CMP DOWNDRAIN PER CALTRANS STD. DETAIL D87A, INLET AND OUTLET PER DETAILS 3 AND 4, SHEET D1.01. INV. AT TOP = 31.91, INV. AT BOTTOM = 24.94.
14. CONSTRUCT 135 LF 24" CMP DOWNDRAIN PER CALTRANS STD. DETAIL D87A, INLET AND OUTLET PER DETAILS 3 AND 4, SHEET D1.01. INV. AT TOP = 44.67, INV. AT BOTTOM = 30.92.

LEGEND:

—50— CONTOURS OF EXISTING GROUND ELEVATION

—50— CONTOURS OF PROPOSED GROUND ELEVATION, SEE NOTE 1

NOTES:

1. PROPOSED CONTOURS ARE DRAWN ASSUMING AN EXISTING SUITABLE MATERIAL COVER OF 0.5' ABOVE TOP OF EXISTING INERT WASTE FILL. CONTRACTOR SHALL VERIFY DEPTH OF EXISTING COVER AND ADJUST FINISH GRADES AS NECESSARY TO ENSURE A MINIMUM COVER OF 3.0' ABOVE TOP OF EXISTING INERT WASTE FILL AND ADEQUATE DRAINAGE.

—50— CONTOURS OF EXISTING GROUND ELEVATION

—50— CONTOURS OF PROPOSED GROUND ELEVATION, SEE NOTE 1

NOTES:

1. PROPOSED CONTOURS ARE DRAWN ASSUMING AN EXISTING SUITABLE MATERIAL COVER OF 0.5' ABOVE TOP OF EXISTING INERT WASTE FILL. CONTRACTOR SHALL VERIFY DEPTH OF EXISTING COVER AND ADJUST FINISH GRADES AS NECESSARY TO ENSURE A MINIMUM COVER OF 3.0' ABOVE TOP OF EXISTING INERT WASTE FILL AND ADEQUATE DRAINAGE.
2. IN AREAS WHERE FILL AREA BOUNDARY ENCROACHES UPON STEEP NATIVE CUT BANKS WHICH SUPPORT EXISTING ELECTRICAL TOWERS, WASTE MATERIAL SHALL BE REMOVED TO THE DEPTH OF THE UNDERLYING NATIVE MATERIAL CUT SLOPE. REMOVED MATERIAL SHALL BE RELOCATED TO WITHIN THE WASTE FILL AREA TO PROMOTE DRAINAGE PRIOR TO CONSTRUCTION OF LANDFILL CAP.

NANCY C CLARK
LEGISLATIVE COUNSEL
SACRAMENTO OFFICE

c Sacramento Area

The decision to allow the Sacramento area to be graded under the Sacramento Area All decisions (including Sacramento) rendered in the Central Valley Area

The Central Valley Area is unique in that it is the only area in which the Board has been able to establish a system of graded decisions that can be applied to the Central Valley Area as a whole.

Section (a)(1) allows the Board to establish a graded system for the Central Valley Area. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(2) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(3) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(4) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(5) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(6) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(7) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(8) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(9) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(10) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(11) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(12) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(13) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(14) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(15) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(16) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(17) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(18) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(19) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(20) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(21) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(22) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(23) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(24) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(25) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(26) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(27) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(28) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(29) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(30) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(31) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(32) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(33) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(34) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(35) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(36) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(37) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(38) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(39) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(40) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(41) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(42) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(43) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(44) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(45) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(46) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(47) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(48) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(49) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(50) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(51) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(52) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(53) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(54) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(55) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(56) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(57) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(58) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(59) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(60) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(61) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(62) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(63) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(64) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(65) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(66) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(67) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(68) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(69) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(70) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(71) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(72) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(73) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(74) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(75) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(76) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(77) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(78) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(79) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(80) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(81) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(82) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(83) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(84) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(85) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(86) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(87) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(88) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(89) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(90) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(91) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(92) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(93) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(94) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(95) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(96) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(97) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(98) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(99) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(100) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(101) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(102) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(103) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(104) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(105) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(106) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(107) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(108) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(109) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(110) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(111) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(112) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(113) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(114) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(115) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(116) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(117) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(118) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(119) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(120) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(121) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(122) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(123) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(124) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(125) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(126) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(127) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(128) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(129) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(130) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(131) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(132) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(133) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(134) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(135) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(136) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(137) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(138) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(139) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(140) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(141) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(142) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(143) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(144) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(145) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(146) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(147) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(148) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(149) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(150) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(151) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(152) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(153) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(154) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(155) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(156) allows the Board to establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare. The Board may establish a graded system for the Central Valley Area if it finds that the system is necessary to protect the public health, safety, and welfare.

Section (a)(157) allows the Board to establish a graded system for the Central Valley Area if it finds that

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

MONITORING AND REPORTING PROGRAM
FOR

NANCY CLARK AND
FAMILY TRUST
LARRY NISHLAND LLC
UNCLASSIFIED LAND LLC
CLASS AND CURRENT ACTION
SACRAMENTO COUNTY

This Monitoring and Reporting Program (MRP) is issued pursuant to California Water Code (CWC) section 13267 and 13383. This MRP is issued to Nancy Clark and Family Trust, Larry Nishland LLC, and Unclassified Land LLC (hereafter Discharger) as a component of Waste Discharge Requirements (WDR) Order No. R5-2021-0000 and Water Quality Certification for the Clark Ranch Project (Project), Sacramento County. This MRP is ordered by the Executive Officer of the Central Valley Water Board (Executive Officer).

I. General Monitoring Provisions

A. The Discharger shall comply with the Standard Provisions and Reporting Requirements for Waste Discharge Requirements (Standard Provisions), dated September 1, 2023, which are incorporated by reference into this MRP.

B. The Discharger shall comply with all applicable requirements of the Central Valley Water Board's Water Quality Control Plan for the Sacramento and San Joaquin River Basins (Basin Plan).

C. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

D. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

E. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

F. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

G. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

H. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

I. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

J. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

K. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

L. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

M. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

N. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

O. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

P. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

Q. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

R. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

S. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

T. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

U. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

V. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

W. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

X. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

Y. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

Z. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

AA. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

BB. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

CC. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

DD. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

EE. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

FF. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

GG. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

HH. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

II. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

JJ. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

KK. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

LL. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

MM. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

NN. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

OO. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

PP. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

QQ. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

RR. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

SS. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

TT. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

UU. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

VV. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

WW. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

XX. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

YY. The Discharger shall comply with all applicable requirements of the State Water Board's Water Quality Control Policy for Implementation of Antidegradation Standards (Antidegradation Policy).

DRAINAGE CALCULATIONS

DRAINAGE CALCULATIONS

CLOSURE AND POST-CLOSURE MAINTENANCE PLAN

FLORIN-PERKINS LANDFILL

SACRAMENTO, CALIFORNIA

December, 2011

Revision 0 - Appendix B

(only change Appendix letter)

INTRODUCTION

These calculations support the Closure and Post-Closure Maintenance Plan (CPCMP) for the Florin-Perkins Landfill (FPL), in Sacramento, California. The CPCMP is a "planning-level" document, not a "construction-level" document. Therefore, these drainage calculations incorporate a level of detail appropriate for a planning effort. They present a relatively conservative approach to evaluating the drainage for the landfill following closure. FPL will prepare "construction-level" plans and specifications (construction documents) for the landfill closure following regulatory review and approval of the CPCMP. Performing a more detailed, less conservative, drainage analysis in conjunction with preparing construction documents may be appropriate at that time. Alternatively, the construction documents may incorporate the information presented in these calculations, since a more detailed analysis may not result in any significant changes in the final drainage facilities for the closed landfill. For example, these calculations conclude below that standard (CALTRANS) 24-inch, or 36-inch, corrugated metal pipe (CMP) overside drains will accommodate storm runoff flows from a 100-year, 24-hour storm event. Significantly smaller pipes are typically not suitable for use on a closed landfill, even if they provide sufficient hydraulic capacity, since they are significantly more susceptible to clogging. (i.e., larger pipes that are easier to clean and maintain are frequently more cost effective over time than smaller pipes that may cost less initially.)

Essentially, these calculations evaluate the following topics:

- Will "standard" landfill drainage facilities accommodate calculated runoff from a 100-year 24-hour storm event?
- Will existing on-site excavations provide sufficient volume/capacity to retain runoff from a 100-year, 24-hour storm event, particularly after construction stability buttresses to support the existing slopes in the excavations? (i.e, can FPL continue to operate as a "zero-discharge" site with regard to storm runoff?)

As demonstrated below, the answer to both of the above questions is, "yes."

BACKGROUND

FPL is a 106-acre unclassified (inert waste) landfill within a larger 210-acre site in Sacramento, California. The CPCMP, with the appended documents presents thorough site description. With regard to grading and drainage, landfill closure has the flowing major objectives:

- Preventing precipitation from infiltrating into wastes, thus creating leachate, by preventing water from ponding on final cover.
- Preventing exposure of wastes by erosion, or washout.

For the purposes of these drainage calculations, the following information, presented in the CPCMP is significant:

- Existing grades appear to be adequate for preventing ponding water from creating leachate, based on the fact that extensive recent field investigations encountered leachate only at one location(as described in the CPCMP and its appended documents). In addition, this one body of leachate was gone within one month.
- The inert wastes at FPL are not likely to settle as much as typical municipal solid waste.

In addition, the following items affect these drainage calculations:

- Existing grades in most areas on-site are relatively flat and not conducive to erosive velocities in storm runoff.
- At fill slopes, cut slopes and other steep locations, storm runoff should flow in pipes, or lined (erosion resistant) channels to prevent erosion of cover soils and the resulting exposure of wastes.

ANALYTICAL METHODS

Consistent with local (City and County) requirements, these calculations incorporate the computer program SacCalc to calculate storm runoff flows. As the name implies, SacCalc is intended specifically for use in the City of Sacramento and Sacramento County. These calculations include the results of the SacCalc program ("Sacramento method results") with the schematic showing the water sheds and retention basins used in the program. The text below discusses the major input parameters for the program:

- Water Shed Areas – As shown on Figure 1, FPL consists of three major water sheds, each of which flows to a different on-site excavation (retention basin). Since existing grades appear to be adequate to achieve the objectives of landfill closure (as discussed above), the final cover grading plan presented in the CPCMP "mirrors" existing grades. Therefore, these calculations incorporated water sheds based on existing grades, as shown in Figure 1. As shown in Figure 1, each water shed has the area shown below:
    - Area 1 (WS001) in the northwest portion of the site – 33 acres

- Area 2 (WS002) in the north and east portions of the site – 84 acres
- Area 3 (WS003) in the south and southwest portions of the site – 73 acres

(NOTE: The areas above do not total 210 acres, the total acreage of the site. This difference is not significant and probably results from minor deviations from the property line at the site perimeter. That is, the "Area boundaries" shown on Figure 1 may not match the site property line at the perimeter of the site. In addition, there may be some small perimeter areas that drain off-site)

- Design Storm – The program used the SacCalc 100-year, 1 day, design storm.
- Soil Group -
  - Consistent with page 5-4 of the Sacramento County Drainage Design Manual, Soil Group "D" was the input parameter for the program.
  - Based on site observations, the selected land use was "Open Space, Grass Land, Ag."
- Slope – The estimated average slope for each water shed (Area) is shown below:
  - Area 1 – 1.5%
  - Area 2 – 0.7%
  - Area 3 – 0.6%

RESULTS

As shown on the attached printout, the SacCalc program calculated the following peak runoff flows from each area:

- Area 1 (WS001) – 80 cubic feet per second (CFS)
- Area 2 (WS002) – 173 CFS
- Area 3 (WS003) – 145 CFS

In addition, SacCalc calculated the following peak storage (the quantity of runoff stored) in each of the existing on-site basins resulting from the 100-year, 1 day storm event as shown below:

- Basin 1 (DE001) in Area 1 – 7.1 acre-feet
- Basin 2 (DE002) in Area 2 – 18 acre-feet
- Basin 3 (DE003) in Area 3 – 16 acre-feet

REQUIRED DRAINAGE FACILITIES

Overside Drains – As noted above, storm runoff should flow down steeper slopes either in pipes, or in channels with erosion resistant linings, to prevent erosion. These calculations recommend using standard CALTRANS CMP overside drains for this. The CMP for these overside drains should be at least 24 inches in diameter to reduce the chances of the drains becoming blocked, or

clogged. The equation shown below is a variation of Manning's Formula that will yield the capacity of a pipe flowing full:

$Q = (0.463/n)D^{8/3}S^{1/2}$ where…

Q = Flowrate in CFS

n = 0.024 for CMP

D = Pipe diameter in feet (ft)

S = Pipe slope in ft/ft

Solving this equation for a 24-inch and a 36-inch CMP on a 3:1 (horizontal;vertical) slope yields the following pipe capacities:

- 24-inch CMP – 70 CFS
- 36-inch CMP – 208 CFS

The detailed construction documents prepared for the FPL closure, following regulatory agency review and approval of the CPCMP, will likely include several overside drains within each Area (Water Shed) to convey runoff down the steeper slopes at the landfill. Since each area will likely require several overside drains, either 24-inch, or 36-inch CMP will be adequate, for the peak flows presented above.

Retention Basins

Figure 2 shows the volume, below the 20-foot contour, of each existing on-site excavation (retention basin) following construction of buttress fills to support the cut and fill slopes at the edge of each basin. The summary below compares the available volume, or capacity, of each basin to the calculated peak storage for that basin:

Area (Water Shed)	Basin	Peak Storage (acre-feet)	Basin Capacity (acre-feet)
1 (WS001)	DE001	7.1	72
2 (WS002)	DE002	18	83
3 (WS003)	DE003	16	91

As shown above, the existing on-site excavations have more than sufficient capacity to serve as retention basins for the 100-year, 1 day storm event, based on the SacCalc program.

The following summary presents the area of each basin and the depth of water in the basin (conservatively assuming vertical sides) that would result from storing the peak storage from a 100-year, 1-day storm event:

Basin	Basin Bottom Area (acres)	Peak Storage (acre feet)	Depth (feet)
DE001	3.52	7.1	2.0
DE002	15.38	18	1.2
DE003	5.01	16	3.2

SUMMARY

These drainage calculations yield the following information regarding drainage facilities for the closure of FPL:

- Standard landfill drainage facilities will be adequate to convey runoff from a 100-year, 24-hour storm event. In particular, the construction documents prepared following regulatory agency approval of the CPCMP should include installation of several 24-inch, or 36-inch CMP overside drains in each drainage area, or water shed, to convey storm runoff down the steeper slopes in the drainage area.
- The existing on-site excavations have sufficient capacity to serve as retention basins for the 100-year, 24-hour storn event. Therefore, FPL will continue to operate as a "zero discharge" site with regard to storm water, following closure, including construction of stability buttresses around the perimeter of each basin.

SUPPLEMENTAL DRAINAGE CALCULATIONS

REVISED CLOSURE AND POST-CLOSURE MAINTENANCE PLAN

FLORIN-PERKINS LANDFILL

SACRAMENTO, CALIFORNIA

October, 2012

INTRODUCTION

The October 15, 2012 letter from the Dunn Environmental Team (DE Team) to Mr. John Moody of the Regional Water Quality Control Board (RWQCB) presents the DE Team response to a September 28, 2012 letter from Teichert Land Company (TLC) to Mr. Moody, regarding potential offsite drainage of storm water from Florin Perkins Landfill (FPL) onto its (TLC's) adjacent property. These supplemental calculations support the DE Team response as presented in their October 15, 2012 letter. Please refer to the October 15, 2012 DE Team letter for a more complete discussion of this matter.

BACKGROUND

The drainage discussed in the TLC letter is runoff from the east slope of the East Waste Management Unit (WMU). As presented, in the October 15, 2012 DE Team letter, a triangular swale, six feet wide and two feet deep, at the toe of the east slope can intercept the storm runoff before it flows onto TLC property and convey it to the North Pit at FPL. Drawing 2 that accompanies the October 15, 2012 DE Team letter presents the following information:

- Area of east slope (i.e., water shed area) = approximately 1.86 acres
- Fall along the toe of slope (south to north) = approximately 7.4 feet
- Distance along toe of slope (south to north) = approximately 1,575 feet
- Therefore, slope of proposed swale = approximately 0.0047 feet/foot, or approximately 0.47%

ANALYTICAL METHODS

Consistent with local (City and County) requirements, these supplemental calculations incorporate the computer program SacCalc to calculate storm runoff flows. As the name implies, SacCalc is intended specifically for use in the City of Sacramento and Sacramento County. These calculations include the results of the SacCalc program ("Sacramento method results") with the schematic showing the water shed used in the program. The text below discusses the major input parameters for the program:

- Water Shed Areas – As shown above, the water shed area is approximately 1.86 acres.

- Design Storm – The program used the SacCalc 100-year, 24 hour, design storm.
- Soil Group -
    - Consistent with page 5-4 of the Sacramento County Drainage Design Manual, Soil Group "D" was the input parameter for the program.
    - Based on site observations, the selected land use was "Open Space, Grass Land, Ag."
- Slope – As noted in the October 15, 2012 DE Team letter, final cover slopes at FPL will be 3:1, or flatter. Therefore, the east slope of the East WMU will have a slope of 3:1, or 0.33 feet/foot.

RESULTS

As shown on the attached printout, the SacCalc program calculated the peak runoff flow to be 6.5 cubic feet per second (CFS).

REQUIRED DRAINAGE FACILITIES

Triangular Swale – Manning's Formula for open channel flow is shown below:

$Q = (0.463/n)AR^{2/3}S^{1/2}$ where…

Q = Flowrate in CFS

n = 0.080 for an unlined channel with dense weeds as high as the flow depth (possibly conservative)

A = Area of Flow = 6 square feet (triangular swale 6 feet wide and 2 feet deep)

R = Hydraulic Radius = area/wetted perimeter = 0.885 feet

S = Channel Slope = 0.0047 ft/ft

Solving this equation yields a capacity for the triangular swale of 6.76 CFS.

SUMMARY

These drainage calculations indicate that the proposed triangular swale will provide sufficient capacity to convey the runoff from the east slope of the East WMU to the North Pit.

CONSTRUCTION QUALITY ASSURANCE PLAN

FLORIN-PERKINS LANDFILL
CONSTRUCTION QUALITY ASSURANCE PLAN
November, 2017
(Amended Soil Acceptance Protocol Attached)

1.0 INTRODUCTION

A Quality Assurance (QA) program consists of selected testing and inspection of the final product in order to provide the Owner/Agencies an evaluation of whether the end product is of the specified quality of materials and workmanship. This QA program will be implemented to evaluate the phased closure construction of a landfill cap for the Florin-Perkins Landfill in Sacramento, California. Since in earthwork construction it is both inefficient and impractical to withhold QA testing until completion of work, an on-going QA program is typically conducted during construction to ascertain the quality of the end product. Because of possible conflicts of interest, the Contractor should not undertake the QA function directly. Rather, QA inspection and testing should be left under the objective authority of a single team of design and inspection professionals.

A Quality Control (QC) program consists of selected tests and inspections during production which can assist the Contractor in producing the quality product that is required. While the QC function is the sole responsibility of the Contractor, the Project Manager may, at his discretion, provide information regarding the on-going QA monitoring for the Contractor's use in implementing his QC function. If provided, release of the QA data to the Contractor is for convenience only and will, in no way, relieve the Contractor from his QC function nor will it result in assumption by the QA Team of any part of the Contractor's sole responsibility for fulfilling the project requirements and his own QC functions.

1.1 PROJECT DESCRIPTION

This document presents the Construction Quality Assurance (CQA) plan and requirements for construction of the earthworks portion of the phased final cover system proposed for the Florin-Perkins Landfill, located in Sacramento, California. This CQA Document details the quality assurance tests and procedures to be implemented during construction of the final cover system and will be used in conjunction with the Construction Drawings and Technical Specifications. This CQA Plan will be revised once the Construction Drawings and Technical Specifications have been generated and finalized. The Soil Acceptance Protocol, Revision 5, dated May 2016 is provided as an attachment.

1.2 PROJECT REQUIREMENTS

Final cover “landfill cap” soils must be uniformly blended, moisture conditioned, and compacted to the minimum requirements of the Alternative Final Cover Evaluation Report (GLA, 2012). The proposed final cover system for the Florin-

Perkins Landfill is a 3-foot thick cover composed of a one foot foundation layer and two foot engineered soil layer composed of materials that have been mixed, and moisture conditioned during excavation and placement in order to yield a uniform product that meets or exceeds the Project Specifications. The top six inches of the engineered soil layer will be seeded and will function as a vegetative layer. Section 6.0 presents more detailed information on these layers. These soils shall yield a maximum saturated hydraulic conductivity of no greater than $1x10^{-5}$ cm/sec (as measured by a laboratory permeability test performed with a field collected sample).

This CQA plan specifically addresses the construction of the final cover system to be built over the Florin-Perkins Landfill. The final cover materials will become a finished product during the course of construction and as a result, it is important that each layer or material of the final cover system be completed to design specifications prior to construction of successive or overlying layers.

While not addressed in this CQA Plan, closure improvements might also include construction of various drainage structures including storm drain pipes, landfill gas collection and control facilities, concrete and/or shotcrete drainage courses, grouted rip-rap and down drains.

All materials used to construct the landfill cap system must meet or exceed the criteria indicated in the Waste Discharge Requirements (WDRs), Construction Drawings, Technical Specifications and this CQA document. Any deviation from these criteria must be pre-approved by the Geotechnical Consultant and/or Landfill Engineer.

2.0 RESPONSIBLE PARTIES AND DEFINITIONS

2.1 RESPONSIBLE PARTIES

The responsible parties for the phased final cover construction for closure of the Florin-Perkins Landfill are as follows:

Landfill Owner:

Cleavinger Multi-Family Trusts, represented by Nancy Cleavinger
5970 First Avenue
Sacramento, CA 95817
Contact: Nancy Cleavinger
Phone: (916) 456-8770

Project Director/Project Manager:

TBD

Landfill Engineer:

TBD

Geotechnical CQA Consultant:
TBD

2.2 DEFINITIONS

"Construction Manager" - Person(s) or firm(s) authorized by the Owner to manage and oversee the administration of the Construction Contract. The Construction Manager shall be responsible for evaluating lines and grades (survey control) for the final cover system components as well as verification of payment requests, submittal acceptance, and change orders.

"General Contractor" - The firm responsible for construction of the phased landfill final cover system including preparation of supporting surfaces. In this regard, the General Contractor's responsibilities include but are not limited to: preparation of subgrade and supporting surfaces (generally soils) for the placement of earth materials. The General Contractor is further responsible for all activities of Subcontractors.

"Geotechnical CQA Consultant" - Geologist/geotechnical professional registered in the State of California and responsible for earthwork quality assurance observation, inspection and testing.

"Landfill Engineer" - The firm responsible for design and preparation of the Project Construction Drawings and Technical Specifications. All completed work is subject to approval by the Landfill Engineer.

"Owner" - The owner of the site, in this case Cleavinger-Multi Family Trusts.

"Project Documents" - All Contractor submittals, WDRs, Construction Drawings, Record Drawings, "As-Built" Plans, Construction Specifications, CQA Plan, Health and Safety Plan and Project Schedule.

"Project Manager" - The Owner's designated representative responsible for the project.

"Project Plans and Specifications" - All project related Drawings and Specifications including design modifications and Record Drawings.

"CQA Officer" - A registered civil engineer or certified engineering geologist responsible for construction quality assurance (CQA).

"CQA Monitors" - The individuals working under the direction of the CQA Officer. Such personnel include "Technicians", "Field Engineers" and "Field

Geologists" representing the Engineer and Geotechnical CQA Consultant. CQA Monitors responsible for the earthwork, shall be experienced in landfill construction monitoring, earthworks construction and compaction testing during grading operations.

"Work" - All tools, equipment, supervision, labor, and materials or supplies necessary to complete the project as specified herein and as shown on the Project Drawings.

3.0 CQA ORGANIZATION

The CQA Team will consist of design and field personnel with specific experience in the inspection and CQA monitoring of earthworks activities related to the phased final cover construction at the Florin-Perkins Landfill The CQA Project Organization with principal functions of each of the CQA team members is presented below:

3.1 CQA PROJECT DIRECTOR/PROJECT MANAGER

The CQA Project Director/Project Manager shall have overall authority for all CQA personnel and activities.

3.2 CONSTRUCTION MANAGER

The Construction Manager will serve as the Owner's on-site representative and will be required to show specific experience on similar final cover construction projects. All CQA functions will be under his direct authority. All coordination, reporting and issues related to non-compliance will be directed through the Construction Manager. In addition, he will participate with the Engineer and Geotechnical CQA Consultant in all decisions related to design issues which arise during the course of construction.

3.3 LANDFILL ENGINEER

The Landfill Engineer will be responsible for reviewing all design issues which may arise during construction. The approval of the Landfill Engineer will be required prior to any design changes. The Landfill Engineer will have demonstrated experience with similar landfill final cover construction projects.

3.4 GEOTECHNICAL CQA CONSULTANT

The Geotechnical CQA Consultant will be responsible for reviewing all earth material issues which may arise during construction. Geotechnical CQA Consultant approval will be required for any earth material modifications or for any design modifications which may impact the performance of the final cover system. The Geotechnical CQA Consultant will have demonstrated experience

with similar landfill final cover construction projects.

3.5 CQA OFFICER

The CQA Officer will be a representative of the Geotechnical CQA Consultant and shall be responsible for overall review, observation, sampling and testing activities for earthwork construction. Specific duties of the CQA Officer include:

- Review of all designs, Project Construction Drawings and Technical Specifications.
- Implementation of the CQA Plan including: assignment and management of all CQA personnel; and engineering review of all CQA related issues.
- Review of all design changes.
- Familiarization of all CQA Monitors with the site and the CQA requirements for the project.
- Attendance at CQA related meetings, (i.e. preconstruction, progress and special meetings as required).
- Participation in the preparation of Record Drawings.
- Review of all field testing, sampling and laboratory testing procedures.
- Review of all field and laboratory test results and preparation of recommendations for appropriate responses.
- Preparation of a monthly summary of CQA activities.
- Designation of a CQA Manager to act on his behalf at the site while operations are ongoing.
- Reporting of any unresolved deviations from the CQA Plan to the Construction Manager.
- Preparation of the final CQA report for all completed earthwork construction activities.
- Minimum qualifications for the CQA officer will include demonstrated experience with similar final cover construction projects acting in the same capacity.

3.6 CQA MONITORS

3.6.1 FIELD ENGINEER/FIELD GEOLOGIST

The Field Engineer/Field Geologist will be a representative of the Geotechnical CQA Consultant and will be responsible for evaluation of whether the as-constructed earth materials conform to the requirements of the Project Construction Drawings and Technical Specifications. Duties of the Field Engineer/Field Geologist will include the following:

- Subgrade inspection including areas that require regarding of landfill material.
- Review of the adequacy of all clearing, grubbing, stripping and site preparation in areas to receive fill.

- Monitoring and evaluation of all material processing, mixing, blending and moisture conditioning operations.
- Evaluation of the engineering characteristics of proposed on-site and/or imported cover materials.
- Observation and evaluation of all cuts including key way excavations that may be impacted by geologic conditions.
- Notation of any on-site activities or conditions that could jeopardize the quality or function of the final cover system and reporting of these to the Construction Manager.
- Minimum qualifications for the Field Engineer/Field Geologist will include demonstrated experience with similar final cover construction projects acting in the same capacity.

3.6.2 TECHNICIANS

Technicians will be representatives of the Geotechnical CQA Consultant and will continuously observe all grading and materials operations to provide a basis for concluding that construction is carried out in conformance with the Project Construction Drawings and Technical Specifications. The duties of the Geotechnical CQA Technicians include monitoring, observing and testing all earthwork activities. The operations to be monitored, observed, and/or tested for earthwork include:

- Observation of the preparation of the subgrade surface.
- Verification that soils used in the individual layers of the final cover are derived from the appropriate sources.
- Visual evaluation of soil material properties for consistency with the Project Construction Drawings and Technical Specifications.
- Identification of deleterious materials or other deficiencies in soil quality to minimize the possibility that these materials are incorporated into the final cover system.
- Monitoring of moisture conditioning, mixing, blending, and processing for uniformity of material and moisture content.
- Monitoring of activities for removal and/or disaggregation of oversize material from the fill.
- Evaluation of the as-constructed final cover material for conformance with the Project Construction Drawings and Technical Specifications.
- Observation of the uniformity of coverage of compaction equipment, especially at fill edges, turnaround areas and on slope faces.
- Monitoring of lift thickness.
- Observation of the active fill pad at the beginning of each grading day and establishment of requirements for wetting/drying and/or processing of the exposed surface prior to placement of additional fill.
- Undertaking field tests including but not limited to field moisture/density content and hydraulic conductivity testing at the minimum frequencies noted

herein or at any time that a deficiency is suspected.
- Recovery of soil samples for laboratory testing.
- Laboratory testing of the moisture content and density, grain size distribution, Atterberg Limits, and hydraulic conductivity of fill materials in accordance with the requirements of the Technical Specifications (including retests if necessary).
- Confirmation that the test results are in accordance with the Project Specifications (including retests of any previously failed area).
- Minimum qualifications for the CQA officer will include demonstrated experience with similar final cover construction projects acting in the same capacity.

4.0 MEETINGS

In order to facilitate construction, close coordination between the Project Director/Project Manager, Construction Manager, Engineer, Geotechnical CQA Consultant, Contractor (including appropriate Subcontractors) and Construction Quality Assurance personnel is essential. To this end, the following meetings are recommended:

4.1 PRE-CONSTRUCTION MEETING

A Pre-Construction Meeting will be held at the site. At a minimum, the meeting shall be attended by the Owner (or designated representative), the Construction Manager, the Engineer, the Geotechnical CQA Consultant, the Contractor and the CQA staff.
Specific items to be considered at this meeting will include:

- Development of a format for site specific agenda.
- Any appropriate modifications to the CQA requirements.
- Review of the responsibilities of each party.
- Review of the lines of authority and communication.
- Review of work area security and safety protocols.
- Review of the procedures for project documentation and reporting, and distribution of documents and reports.
- Review of procedures for submittals, change orders and extra work efforts.
- Review of the Contractor's proposed methods of construction (including equipment), with specific emphasis on methods of select grading, stockpiling, processing, moisture conditioning and compaction.
- Review of the procedures for field and laboratory geotechnical CQA testing.
- Establishment of procedures for correcting and documenting construction deficiencies.
- Conducting a site inspection to discuss work areas, excavations, stockpile areas, mixing tables, processing areas, lay-down areas, access roads, haul roads, and related items.
- Review of the project construction schedule.

The meeting shall be documented by the Construction Manager and the meeting minutes shall be distributed to all appropriate parties.

4.2 WEEKLY PROGRESS MEETINGS

Progress Meetings should be held weekly. At a minimum, these meetings should be attended by the Construction Manager, the CQA Officer and/or the CQA Monitor(s), and the Contractor. The purpose of these meetings is to:

- Discuss any health and safety related issues.
- Review scheduled work activities.
- Discuss project related problems.
- Review Contractor performance.
- Discuss the Contractor's personnel and equipment assignments.
- Review the previous week's activities and accomplishments.
- Review CQA laboratory and field test data.

Weekly progress meetings shall be documented by the Construction Manager or his representative and the meeting minutes shall be distributed to all appropriate parties.

4.3 SPECIAL MEETINGS

Special meetings will be conducted as required to discuss problems or deficiencies. At a minimum, these meetings will be attended by the Construction Manager, the CQA staff and the Contractor. If the correction of a problem requires a design modification, the Engineer and the Geotechnical CQA Consultant will also be present. The purpose of these meetings is to:

- Define and discuss any problems or deficiencies in the project.
- Review possible corrective actions or solutions.
- Implement an action plan to resolve the problems or deficiencies.

Special meetings shall be documented by the Construction Manager or his representative and the meeting minutes shall be distributed to all appropriate parties.

4.4 DAILY PROGRESS MEETINGS

Daily Progress Meetings will be conducted at the start of the work day if deemed necessary. At a minimum, these meetings shall be attended by the CQA Manager or his representative, CQA Monitors, and the General Contractor. The purpose of these meeting is to:

- Review and coordinate the daily scheduled work activities.
- Discuss any problem areas or necessary re-work.
- Review test data.
- Discuss personnel and equipment assignments for the day.
- Review the previous day's activities, accomplishments and/or deficiencies.

5.0 GENERAL EARTHWORK REQUIREMENTS

5.1 GENERAL

The following earthwork requirements present the generally accepted standards and minimum requirements for earthwork grading operations to be used in construction of the phased final cover system at the Florin-Perkins Landfill. These specifications shall be the project requirements for earthwork construction except where specifically superseded by prevailing guidance documents of the controlling regulatory agency and/or the Project Technical Specifications.

Earthwork components for the final cover system will consist of a foundation layer (that may consist of in-place inert wastes), overlain by a minimum 2-foot thick engineered fill composed of materials that have been mixed, and moisture conditioned during excavation and placement in order to yield a uniform product that meets or exceeds the Project Specifications. Section 6.0 presents more detailed information on these layers. These soils shall yield a maximum saturated hydraulic conductivity of no greater than $1x10^{-5}$ cm/sec (as measured by a laboratory permeability test with a field collected sample). Refer to Table 6-1 for soil testing details.

5.2 SPECIFICATIONS

A. The Contractor shall be solely responsible for the satisfactory completion of all earthwork in accordance with the Project Construction Drawings and Technical Specifications.

B. Equipment used in the excavation, transport, mixing, stockpiling, processing, installation and compaction of all materials used in construction of the final cover system will be standard of practice grading machinery of known specifications suitable for performing the required work in a timely and efficient manner.

C. All materials considered by the Geotechnical CQA Consultant to be unsuitable for use in the construction of the final cover system over the Florin-Perkins Landfill shall be removed and disposed off-site or moved to a location on-site, as directed by the Construction Manager.

D. All clearing, grubbing, stripping and site preparation for the project shall be accomplished to the satisfaction of the Geotechnical CQA Consultant and the Construction Manager.

E. Material deemed unlikely to meet the performance specifications and not disposed of during clearing and grubbing or demolition shall be removed from the stockpiles, borrow area, and/or fill as directed by the Geotechnical CQA Consultant and disposed of as directed by the Construction Manager.

F. The existing surface to receive foundation layer (or equivalent) fill soils shall be prepared (cleared, grubbed or stripped) to the satisfaction of the Geotechnical CQA Consultant and the Construction Manager and the fill shall be placed, spread, mixed, watered and compacted in accordance with the project specifications and as recommended by the Geotechnical CQA Consultant.

G. The existing surface prepared to receive foundation layer (or equivalent) fill soils shall be scarified, disced or bladed until it is uniform and free from uneven features which may prevent uniform compaction. The scarified surface shall then be brought to $\pm$4 percent of optimum moisture content, mixed as required, and compacted to a minimum of 90 percent of the maximum dry density as determined by ASTM D1557, or as specified in Section 6.3 for foundation layer soils. If the scarified zone is greater than 8 inches in depth, the excess shall be removed and placed in lifts no greater than eight inches in thickness. Prior to fill placement, the existing surface to receive foundation layer fill soils shall be inspected by the Geotechnical CQA Consultant.

H. Irreducible rock or rock fragments maximum dimensions as noted on Table 6-1 shall not be used in the final cover system.

I. Suitable and sufficient processing and compaction equipment shall be on the job site to handle the amount of fill being stockpiled, processed, mixed and/or placed. If necessary, excavation or placement equipment will be shut down temporarily in order to allow time for proper preparation and/or compaction of fills. Sufficient watering apparatus will be provided with due consideration to the type of fill material, curing characteristics, rate of placement, and time of year.

J. All materials incorporated as part of the final cover system, must be inspected and placement must be observed by the Geotechnical CQA Consultant.

K. Fill material for the foundation and the final cover shall be placed in thin lifts with a maximum uncompacted thickness of six to eight inches. Each layer shall be spread evenly and thoroughly mixed to obtain a near uniform condition in each layer. In areas of excess lift thickness, regrading of the surface to the maximum lift thickness will be completed prior to construction of additional lifts.

L. The minimum compaction for fill materials placed in the foundation and as final cover material is specified as 90 percent of the maximum dry density as determined by ASTM D 1557, or as specified in Section 6.3 for foundation layer soils placement. Section 6.0 presents the specified moisture content for the foundation layer and engineered soil layer as, percents of optimum moisture content as determined by ASTM D 1557.

M. For soils placed within one foot of waste, a relative density of slightly less than 90 percent of the ASTM D1557 maximum dry density may be approved if, in the opinion of the Geotechnical Consultant, the yielding nature of the underlying refuse prism, creates a situation where the minimum required density cannot readily be achieved. In no event will the minimum density requirement of the remainder of the cover system be modified.

N. The Contractor shall selectively excavate soils from pre-approved on-site borrow sources or stockpiles as identified by the Landfill Engineer and Geotechnical CQA Consultant (or his representative) during the grading operations. The cover soils shall contain sufficient fine-grained constituents such that gravel size and larger fragments do not cluster during construction. Final cover soils are required to be free of potentially hazardous environmental pollutants as determined using the May 2016 Amended Soil Acceptance Protocol, Revision 5 which is attached.

O. At the beginning of each grading day, the active fill pad (where final cover soils will be placed) will be inspected. Any previously placed soils which have a moisture content below the specified minimum shall be thoroughly watered and processed in preparation for receiving additional fill. If necessary, additional moisture shall be added until the moisture content is within the limits required so as to assure an adequate bonding and compaction of all fill materials. In the event of rain, if the moisture content of previously placed fill material exceeds specified requirements, the fill material shall be aerated by blading or other satisfactory methods until the moisture content is within the specified moisture content range. Any previously compacted materials which are disturbed (aerated, bladed, etc.), to reduce or increase the moisture content, must be recompacted to the project specifications and to the satisfaction of the Geotechnical Consultant once specified moisture contents are attained.

P. In the designated processing areas, cover soils shall be processed to obtain a uniform soil condition and moisture conditioned (or dried) to the specified moisture content as determined by ASTM D 1557.

Q. Fill soils placed as part of the foundation and final cover shall be placed in horizontal lifts on a working bench a minimum of one equipment width. Following placement and compaction, any "over-built" fill will be trimmed-back to design grades leaving a compacted fill surface at design grade, unless an alternative method has been approved by the Project Engineer.

R. Neither material processing nor final cover material moisture conditioning, placement or compaction shall exceed the capability of the equipment to meet the project specifications.

S. Representative samples of the final cover soils materials will be tested in the field and laboratory in order to determine the physical characteristics of the materials. During processing and/or grading operations, no soils or soil types other than those previously analyzed may be used, unless the Geotechnical CQA Consultant documents the suitability of these soils with appropriate additional testing paid for by the Contractor.

T. Where tests indicate that any final cover soils or portion thereof is inconsistent with the project requirements, that particular portion shall be retested and if necessary reworked until the project requirements have been attained. No additional final cover fill shall be placed over an area until the last fill has been tested horizontally and vertically and meets the requirements of this document or the Technical Specifications to the satisfaction of the Geotechnical CQA Consultant.

U. Where work is interrupted by heavy rains, final cover fill placement operations shall not be resumed until observations and field tests by the Geotechnical CQA Consultant indicate the moisture content and density of the in-place fills and/or materials intended for placement are within the limits previously specified.

V. Drainage provisions shall be constructed in compliance with the recommendations of the Design Engineer and as shown in on the Project Construction Drawings.

W. If any unanticipated earth conditions of an adverse or potentially adverse nature are encountered during grading, the Geotechnical CQA Consultant shall investigate, analyze and make recommendations to the Landfill

Engineer and the Construction Manager to mitigate these conditions, as soon as practical.

X. All excavated or fill surfaces shall be graded to provide positive drainage and prevent ponding of water. Surface water shall be controlled to avoid damage to adjoining properties or to finish work on the site.

Y. Project site drainage and slope protection should be in accordance with the site specific storm water pollution prevention plan (SWPPP).

6.0 CQA MONITORING FOR EARTH MATERIALS

6.1 GENERAL

Construction of the final cover system proposed for the phased closure of the Florin-Perkins Landfill will consist of a minimum 3-foot thick soil cover (composed of one foot foundation layer and two foot engineered soil layer) and moisture conditioned during excavation and placement in order to yield a uniform product that meets or exceeds the Project Specifications. The top six inches of the engineered soil layer will be seeded and will function as a vegetative layer. These soils shall yield a maximum saturated hydraulic conductivity of no greater than $1x10^{-5}$ cm/sec (as measured by a laboratory permeability test with a field collected sample). Each soil layer shall be constructed in accordance with the WDRs, Project Construction Drawings and Technical Specifications and these soil materials shall be routinely observed, sampled, and tested by the CQA Monitor(s) for the physical parameters described within this CQA plan and as referenced on Table 6-1

The testing frequency for the final cover system presented herein is a minimum. Additional tests will be conducted by the CQA Monitor for retests and at any time that in the opinion of the CQA Monitor, additional testing is required and/or a deficiency is suspected. Retests of previously failed areas will be performed at the discretion of the CQA Monitor when, in his opinion, sufficient reworking of the area has been performed by the Contractor to warrant a retest. Following a thorough re-working of a failed area, retesting will be performed by the CQA Monitor to evaluate whether the re-worked area meets the requirements of the project.

6.2 COVER THICKNESS VERIFICATION

Thickness verification for the final cover soils will be conducted by point-over-point surveying on a one hundred foot grid. Thickness and line and grade verification of the compacted final cover system will be performed by a Land Surveyor retained by the Landfill Owner.

6.3 FINAL COVER SOILS TESTING

Field and laboratory testing will be performed on the compacted final cover soils according to the following minimum schedule (Table 6-1). Compacted final cover fill soils are required to have a maximum particle sizes referenced on Table 6-1. CQA field monitors will continuously inspect these materials so as to minimize the inclusion of these oversize particles within the placed and compacted soils layer. Soils placed as final cover fill are required to have an in-place moisture content, referenced on Table 6-1, and a minimum in-place density of 90 percent of the maximum dry density as defined by ASTM D 1557. Additionally, final cover soils shall possess a minimum fines content (percent by weight passing the #200 sieve) of 33 percent with a minimum of 12 percent finer than 5-microns. Lastly, these soils shall yield a maximum saturated hydraulic conductivity of no greater than $1x10^{-5}$ cm/sec (as measured by a laboratory permeability test with a field collected sample).

For soils placed within one foot of waste, a relative density of slightly less than 90 percent of the ASTM D1557 maximum dry density may be approved if, in the opinion of the Geotechnical Consultant, the yielding nature of the underlying refuse prism, creates a situation where the minimum required density cannot readily be achieved. In no event will the minimum density requirement of the remainder of the cover system be modified.

Where test results indicate that the lift thickness, maximum particle size and/or in-place density/moisture content, and/or any portion of the fill does not satisfy the project requirements, that particular portion shall be re-worked or replaced then retested until the required condition has been attained and the resulting product meets or exceeds the Project Specifications and the passing criteria as listed in Table 6-1. Where tests indicate that the hydraulic conductivity and/or grain-size distribution does not meet the project requirements then that particular section shall be retested and if necessary re-worked or replaced until the required conditions have been attained. No additional fill shall be placed over an area until the existing fill has been tested horizontally and vertically and determined by the CQA Monitor to meet the Earthwork Specifications of this document. The area to be reworked will be verified by survey if in the opinion of the CQA Monitor conditions warrant this detail.

6.3.1 IN-PLACE MOISTURE CONTENT AND DENSITY

If the test results indicate a moisture content outside of the specified limits for the foundation, select backfill, and compacted backfill soils layers as depicted on Table 6-1, then the area represented by these test results will be considered inadequate and will be reworked. Any reworked areas will be re-tested by the CQA Monitor to assure the reworked soils meet the moisture content requirements.

The minimum in-place density for soils placed as final cover materials is specified as 90 percent of the maximum dry density as defined by ASTM D 1557. If the field test results indicate an in-place density below this minimum value, the area represented by these test results will be considered inadequate and will be reworked. Any reworked areas will be retested by the CQA Monitor to assure the reworked soils meet the minimum density requirements.

For soils placed within one foot of waste, a relative density of slightly less than 90 percent of the ASTM D1557 maximum dry density may be approved if, in the opinion of the Geotechnical Consultant, the yielding nature of the underlying refuse prism, creates a situation where the minimum required density cannot readily be achieved. In no event will the minimum density requirement of the remainder of the cover system be modified.

TABLE 6-1
COMPACTED FINAL COVER FILL TESTING
TYPE AND FREQUENCY

TEST DESCRIPTION	TEST DESIGNATION	MINIMUM TEST FREQUENCY	PASSING CRITERIA
Moisture-Density Relationship	ASTM D1557	one per 5,000 cubic yards	No testing criteria. (Results used to evaluate relative compaction).
In-Place Moisture/Density (Nuclear or Drive Ring)	ASTM D6938, ASTM D2937	Four (4) field density tests shall be performed for each 1,000 cubic yards of material placed	Minimum of 90% for compaction and +/- 1% of optimum moisture content for the engineered soil layer. For the foundation layer, moisture content shall be +/- 3% of optimum for coarse-grained materials and 0 to 4% over optimum for fine-grained materials.
In-Place Density and Moisture Content (Sand-Cone)	ASTM D1556	10% of required density tests	Minimum of 90% for compaction and +/- 1% of optimum moisture content for the engineered soil layer. For the foundation layer, moisture content shall be +/- 3% of optimum for coarse-grained materials and 0 to 4% over optimum for fine-grained materials
Laboratory Permeability	ASTM D5084 or approved method	One per 5,000 cubic yards placed	Maximum of 1.0×10^{-5} cm/sec
Atterberg Limits	ASTM D4318	One per 1,000 cubic yards placed	None required
Full Grain Size Distribution	ASTM D422	One per 1,000 cubic yards placed	Minimum of 33% passing #200 and minimum of 12% passing 5-micron, with a maximum size of 3/8 inch for the engineered soil layer. Maximum particle size of 3 to 4 inches for the foundation layer. .
Standard Classification	ASTM D2487	One per 1,000 cubic yards placed	See Alternative Final Cover Evaluation Report, GLA 2012
Visual Inspection	ASTM D2488	Daily Observations	No oversize rocks and deleterious materials. Maximum sizes referenced above

6.3.2 GRAIN SIZE DISTRIBUTION

Where grain size distribution test results for the final cover soils layer indicate that the grain size distribution requirements presented above, the Contractor shall immediately reprocess these materials or return them to the mixing table/stockpile area and replace these fill soils with materials that meet the specified grain size distribution requirements, as stipulated in Table 6-1.

6.3.3 HYDRAULIC CONDUCTIVITY

If the laboratory hydraulic conductivity tests (ASTM D5084 or equivalent) completed within the three-foot thick final cover section result in a value exceeding 1.0×10^{-5} cm/sec, two (2) additional tests of the same type will be taken in the immediate vicinity of the test or tests yielding the unacceptable hydraulic conductivity. If either of the additional tests fails to meet the minimum average test requirements, the area represented by the tests will be considered inadequate and will be removed or reprocessed and re-compacted. If both subsequent tests satisfy the project requirements, these tests will be used to calculate the "new" running geomean and the failing test will be considered anomalous and no additional processing will be required.

6.3.5 REJECTION OF SOIL

Where test results indicate that the lift thickness, maximum particle size, and/or in-place density/moisture content of any portion of the final cover soils layer does not satisfy the project requirements, that particular portion shall be re-worked or replaced then retested until the required condition has been attained and the resulting product meets or exceeds the Project Specifications. No additional fill shall be placed over an area until the existing fill has been tested horizontally and vertically and determined by the CQA Monitor to meet the requirements of this document. The area to be reworked will be verified by survey if in the opinion of the CQA Monitor conditions warrant this detail.

7.0 DOCUMENTATION

To provide evidence of satisfactory work performance, the CQA Monitor will document all stages of prescriptive final cover construction. The information shall be recorded on a standardized form or in a bound field logbook.

7.1 DAILY RECORD KEEPING

The purpose of daily record keeping is to record construction activities, including results of continuous visual observations; laboratory/field test data; sampling; review of test results; repairs; problems; solutions and general field activity.

The CQA Monitor(s) shall keep a Daily Field Inspection Report of project activities. At a minimum, this report shall include the following:

- Date and project identification.
- Field activity and work locations.
- Summaries of field communications.
- Summary of equipment and personnel used.
- Work activity monitored, general location on-site and any related tests taken.
- Record of material sampling and testing activities.
- Any variance from specified methods and standards.
- Estimated quantities of material placed and compacted.
- Compliance of the Amended Soil Acceptance Protocol Attached.
- Unusual events.
- Actions regarding acceptance/rejection of work.
- Weather conditions.
- Signature of person preparing the report.

The daily field inspection report shall be reviewed by the CQA Manager and shall be submitted to the Construction Manager. One complete set of Daily Field Reports shall be kept on site by the CQA personnel at all times. The contractor will be notified of the "pass/fail" nature of the CQA results but will not be provided with numerical data unless authorized to do so by the Construction Manager.

7.2 PHOTO DOCUMENTATION

The Construction Manager shall prepare a photographic record as part of the construction control activities. Photographs shall be in color and shall include photographs of construction activities, problem areas, corrective actions, and final constructed features. Photographs shall be identified with the site designation, the date taken, the location, and a description of the activity covered by the photograph.

7.3 MONTHLY PROGRESS REPORT

A monthly progress report shall be prepared by the Geotechnical CQA Manager and submitted to the Construction Manager. This monthly progress report shall summarize the work activities, deficiencies and corrective actions implemented. It shall also summarize the CQA test results.

7.4 AS-BUILT DOCUMENTATION

As the work is completed, final Record Drawings and a report shall be prepared under the direction of the Engineer and Construction Manager utilizing the record prepared during construction. These drawings and the report shall be retained as a

permanent record of construction. The report shall include an Earthworks CQA As-built Summary document that includes a summary of laboratory test results and discusses typical construction conditions and procedures. The Record Drawings and report will be submitted to the Owner. The Contractor shall submit all "As-Built" information to the Owner as required by the Project Plans and Specifications.

Maintenance Plan

AMENDED
SOIL ACCEPTANCE PROTOCOL
Revision 5

LOAD CHECK PROGRAM

Amended
Soil Acceptance Protocol
Zanker Road Resource Management, Ltd.

On Behalf of

Florin Perkins Landfill
and Appendix of the
Updated Final Closure and
Post- Closure Maintenance
Plan (FCPCMP)

4201 Florin Perkins Road
Sacramento, CA 95826

The purpose of this Soil Acceptance Protocol is to identify clean, native soils that will be utilized for landfill cover and eliminate the acceptance of hazardous soils at the Florin Perkins Landfill (FPL). Cover soils will be stockpiled and used in accordance with the FPL 2013 WDRs and FPL Closure Plan (FCPCMP). Zanker Road Resource Management, Ltd (Zanker – Transfer Station) will be accepting soil on behalf of the FPL. The criteria includes rationale for determining acceptable origins of the soil, inspecting such loads at the receiving area as well as at the tipping area and implementing verification, disposal and reporting procedures. If contaminated soils are inadvertently received at the FPL, this protocol will be used in conjunction with Attachment A – "Protocol for Response to Hazardous Materials Discovery" documentation process.

Screening of Acceptable Closure Soils

The Weighmasters or transfer station staff will initially assess all loads of soils at the scale house. Training of transfer station staff will be used to increase interview and inspection program skills and support decision readiness to reject questionable loads. Preferred timing of the load review would be prior to entering the FPL. Training records for PID use and calibration are attached to this document and available for inspection at the Transfer Station.

Small Loads (20 CY and Less): The Weighmaster will interview haulers generating small unknown sources of soil (less than 20 cubic yards (CY) in total). They will interview the hauler as follows to obtain the following information at a minimum for small loads: 1) hauler information (truck license, hauler name), 2) origin of soil (i.e. – city, native condition (non-fill or impacted area), residential or industrial, construction project type and known environmental reports), 3) size (i.e. - number of loads and excavation method), 4) soil type (sand or clay/silt, grains less than 4 inches– meets landfill closure plan requirements as per the 2013 WDRs/Closure Plan) and 5) availability of chemical laboratory data.

The following information will be recorded on the receipt or weight ticket: truck license,

hauler name (if available) and City of Origin. Notes deemed important such as a project name, load accepted (or rejected) and stock pile location on site, please refer to the attached Soil Profile Log form. Additional documentation in the scale software is noted below. A photoionization detector (PID) will be used to screen soils for Volatile Organic Compounds (VOCs). PID screening of small loads, less than 20 CY, will consist of a minimum of 4 PID measurements, or one PID screening per 5 CY.

As of March 2016, a representative load sample will be taken at a frequency of every 5,000 CY for accumulated small soil loads that will be used to complete laboratory testing for California Assessment Metals (CAM) 17 Total Metals, at a minimum. Total metals results will be compared to the Soluble Threshold Limit Concentrations (STLC) Limit values (metal specific x 10) for additional STLC Wet (DI and Citric) testing to assess soil cover suitability and whether the soil is hazardous waste. Refer to Table 1 for the metal results of on-site soils tested to date. Small loads will be screened visually, by odor, and with a PID and Title 22 Laboratory SVOCs/VOCs will be tested if visual and PID screening results warrant. If hazardous, Attachment A – "Protocol for Response to Hazardous Materials Discovery" – will be followed and the results documented. Contaminant source and visual information may warrant additional evaluation and laboratory analysis specific to the load and soil source.

Large Loads (Over 20 CY): The same data collection and interviews referenced above will be used for the review of larger loads as well. Larger soil load sources will be assessed by Zanker and/or a Cleavinger Representative. If the project size is over 20 CY, but under 100 CY, the FPL Representative will be contacted to determine, based upon location and available information, the need to visit the project site to assess in place environmental conditions of the soil before hauling is initiated. If the project size is over 100 CY, the project site will be visited by a Zanker or Cleavinger representative prior to hauling to further assess the origin of the soils and review the laboratory information for final acceptance determination.
For large loads, over 20 CY, PID screening will occur at a rate of one reading per 10 CY, for loads up to 100 CY. For loads greater than 100 CY, PID screening will be completed at one reading per 10 CY for the first 100 CY, then one reading every 25 CY over 100 CY.

As of March 2016, representative load samples will be taken at a frequency of every 10,000 CY for accumulated large soil loads to complete laboratory testing for California Assessment Metals (CAM) 17 Total Metals, at a minimum. Total metals results will be compared to the Soluble Threshold Limit Concentrations (STLC) Limit values (metal specific x 10) for additional STLC Wet (DI and Citric) testing to assess soil cover suitability and whether the soil is hazardous waste. Refer to Table 1 for the metal results of on-site soils tested to date. Title 22 Laboratory SVOCs/VOCs will be tested if visual and PID screening warrant. If hazardous, Attachment A – "Protocol for Response to Hazardous Materials Discovery" – will be followed and the results documented. Contaminant source and visual information may warrant additional evaluation and laboratory analysis specific to the load and soil source.

Soil Load Inspection upon Arrival

The Weighmaster or transfer station staff will observe all soil loads (small or large) for the presence of contamination via visual and sensory inspection. Pertinent information will also be documented into the scale software under the "comment" section prior to generation of the customer receipt or weight ticket. Based on the interview, visual observations, screening of soil with a PID, and evaluation, acceptable loads will be directed to the appropriate tipping location. **Unacceptable loads or loads that are questionable will be rejected.** Soil loads rejected will also be documented in the special occurrences log and shall be reported to the LEA at least annually, or other periodic basis, as specified by the LEA.

The Weighmaster or transfer station staff will also monitor the soil loads as they are being dumped onto the tipping area. The Weighmaster or transfer station staff will look for any inconsistencies in the load such as discoloration, hidden wastes and potential odors. If the load is determined to be "clean native soil," the hauler/customer may proceed to dispose and then exit the facility. As referenced in the 2013 WDRs/Closure Plan, minimum soil observations every 10,000 CY by a geologist for visual classification of gradation testing will be completed.

Procedures Used for Identified Contaminated Soil

In the event a load of suspected or confirmed contaminated soil (visual or PID results over 20 PPM using bagged sample collection) is received inadvertently, it will be placed back into the customer's vehicle. If the generator/hauler is no longer present, the soil will be moved into a separate pile and covered with a tarp. The generator/hauler of the suspected or confirmed contaminated soil will be contacted so that it can be hauled directly to an appropriate facility for disposal by the generator/hauler. In the event the generator/hauler is not located, the soil that is suspected to have contamination will be sampled for the suspected contaminants by the transfer station manager/supervisor or the FPL representative. Attachment A – "Protocol for Response to Hazardous Materials Discovery" will be used to determine whether the incident is minor, moderate, or major and determine the appropriate protocol for removal, disposal, or mitigation and record keeping. Contaminated soils will generally follow the protocols for minor incidents.

Record Keeping and Notification of Contaminated Soil

In accordance with Attachment A, contaminated loads inadvertently received at the landfill will be recorded by the transfer station manager/supervisor or the FPL representative. The contaminated loads will be required to be documented as a Special Occurrence by management and the contaminated soil will be marked for removal. The generators/haulers who attempt to dispose of contaminated soil at the FPL will be reported to the CUPA/Hazmat at 916-875-8484 and to the California Department of Toxic Substances Control, Region 1 Office at 916-255-3545. Monthly summaries of this information shall be provided to Nancy Cleavinger and shall be reported to the LEA at least annually, or other periodic basis, as specified by the LEA.

LOAD CHECK PROGRAM

LANDFILL CLOSURE

ATTACHMENT A

PROTOCOLS FOR RESPONSE TO HAZARDOUS MATERIALS DISCOVERY

June 2015, Amended May 2016

If suspect hazardous materials are discovered through the load check program or other means (i.e. by equipment operators, tipping spotters, etc.), the Operations Manager and/or Supervisor will be called to confirm the suspect discovery. If the suspect material is confirmed to be a hazardous waste discovery, the Operations Manager and/or Supervisor will provide and/ or coordinate response to the incident. The Operations Manager and/or Supervisor will be trained in proper hazardous waste handling procedures.

Response protocol to a confirmed incident will be as follows:

- ***If the incident is minor*** (such as discovery of a sealed, unleaking container of paint or automotive fluid product, discovery of an undamaged, unleaking lead-acid battery, **discolored or suspicious soil**), the Operations Manager and/or Supervisor will don personal protective equipment as appropriate for the hazards involved, thence move, or containerize and/or move the waste to the designated hazardous waste storage area for the facility or isolated area (if soil). If the hauler/ generator who deposited the material is known, or can be obtained from the Weighmaster, the name of the hauler/ generator will be marked on the container or noted. The Operations Manager and/or Supervisor will contact the generator to remove the material.

  If the hauler/ generator is not identifiable, unreachable, or unwilling to remove the waste, or if management decision is made for Zanker to manage the waste, the waste will be placed into temporary storage or tarped (soil) for subsequent testing and lawful recycling or disposal at an off-site location.

- ***If the incident is moderate*** (such as discovery of several leaking paint containers, discovery of a moderate quantity of flammable or corrosive liquids (i.e. 5 gallons or less), discovery of leaking lead-acid batteries, discovery of a small quantity of poisons, discovery of combustible liquids such as diesel fuel or motor oil, discovery of a minor quantity of friable asbestos, etc.), the area will be cordoned off by the Operations Manager and/or Supervisor (by means such as traffic cones/ traffic delineators and caution tape), and the Weighmaster will be

notified. Tipping will be directed to a portion of the soil stockpiling area so that continuing operations will not impeded by incident response. Response personnel will then don the appropriate level of personal protective equipment, and institute measures to contain leakage (laying of boom, spreading of sorbant, etc.).

If the vehicle has not left the facility, the Weighmaster will stop the hauler/ generator who has tipped the load and inform them of the incident. If the hauler/ generator has left the facility, attempts to contact the hauler/ generator will be made. If the hauler/ generator is stopped or contacted, the Operations Manager will cause the hauler/ generator to bring in trained and properly equipped personnel to clean up the release and remove the materials, or alternately to have properly trained Zanker staff containerize and temporarily store the material. If the hauler/ generator is not identifiable, unreachable, or unwilling to remove the waste, the waste will be containerized and placed into temporary storage for subsequent lawful recycling or disposal at an off-site location.

- ***If the incident is major*** (such as discovery of greater than 5 gallons of flammable or corrosive liquid, discovery of more than a small quantity of poison, discovery of a significant quantity of friable asbestos, discovery of a reactive substance, explosives, or biohazard) the following procedures will be followed:

  The area will be cordoned off by the Operations Manager and/or Supervisor and the Weighmaster notified. The Weighmaster will immediately suspend vehicle intake into the involved portion of the particular operational tipping area until containment or response is complete. Any resumption of tipping will be conducted in an upwind area until the release is contained. If the materials involved are within their level of training, the Operations Manager and/or Supervisor will then don the appropriate level of personal protective equipment, and institute measures to contain leakage (i.e. spreading of sorbant, boom etc.).

  If the incident involves explosives (unstable reactive material, biohazards or other hazardous materials beyond the level of training or personal protective equipment of site personnel) the Weighmaster will call 911 and request that the Sacramento Hazardous Materials Response Team be notified. Upon arrival, incident command will be relinquished to the Sacramento Hazardous Materials Response Team incident commander.

  If the vehicle has not left the facility, the Weighmaster will stop the hauler/generator and inform them of the incident. If the hauler/generator has left the facility, attempts to contact the hauler/ generator will be made. If the hauler/generator is stopped or contacted, Zanker will cause the hauler/generator to bring in trained and properly equipped personnel to clean up the release and remove the materials. If the Sacramento Hazardous Materials Response team is called on to assist, the identity of the hauler/ generator will be provided to the Sacramento Hazardous Materials Response team incident commander.

  If the hauler/generator is not identifiable, unreachable, or unwilling to remove the waste, and the if the materials discovered are identifiable and within the scope of

the hazardous waste operations training of Zanker's personnel, the waste will be containerized, logged into the incident log and placed into temporary storage for subsequent lawful recycling or disposal at an off-site location. The date of discovery will be marked on the container, and the date, type of material, and approximate weight or volume present in the container will be recorded on the hazardous materials inventory log for the particular class of material.

Hazardous materials resulting from a "major incident" which are not appropriate for temporary storage at the facility (such as unstable reactives, explosives, etc.) will be removed as soon as practicable by a professional industrial services firm for lawful disposal at an appropriate facility.

In addition to recording in the incident log, all "major incidents" will be reported by phone to the Duty Officer at the California Department of Toxic Substances Control (DTSC), Region 1 Office at 916/ 255-3545.
