STATEMENT

We embrace the idea of complementarity of the Arts. The uniqueness of a piece of art, stimulus of imagination and creativity, enriches our existence. We strive towards a global art, respectful of the past, projected to the future, thought out from the smallest detail. We endeavor to honor our surroundings and all people, our environment, creating something not anonymous, taking inspiration from the site, stories, nature, people and events. We are dreamers and we would like to share a vision where planners, engineers, architects, artists, designers, landscapers, restorers would collaborate in harmony working together like an orchestra to create an amazing, timeless, beautiful environment where we all can live and prosper in peace.

Svirgola, 2006, Cast-in-place colored concrete, Reno, NV
