## CERTIFICATION

This Assessment was prepared by Andrew Lush, President and Chief Geologist of Lush Geosciences, Inc. I am a California-registered Professional Geologist with more than 30 years of experience as a practicing geologist and environmental professional.

I, Andrew Lush, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 C.F.R. Part 312. Further, I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Based on the information collected during this investigation, subsurface soil and groundwater contamination of the site likely to result in required mitigation by past, present or future Site owners is unlikely. We conclude that the risk of contamination at the site is so minimal that no further investigation is warranted.

Please call our office if you have any questions regarding this report.

Sincerely,

**LUSH GEOSCIENCES, INC.**

Subject: Executive Summary, Phase I Environmental Assessment  
Six Bar C, LLC Property, Sacramento, California

Dear Mr. Foster:

At your request, Lush Geosciences, Inc. performed this Phase I Environmental Assessment of the property north of Greg Thatch Circle and west of Tres Piezas Drive in Sacramento, California (Site). The Site includes one vacant parcel. The purpose of this assessment was to provide you with information regarding the likelihood that hazardous materials contamination may exist on or in the vicinity of the Site.

Our assessment included: 1) examination of records pertaining to the Site and its vicinity at offices of Sacramento County and the State of California; 2) historical research, including review of aerial photographs and historical maps; 3) review of materials provided by the Site owners and interviews with owners of adjacent properties and with regulatory personnel familiar with the Site and its vicinity; and 4) reconnaissance of the Site and its immediate vicinity.

File and historical review was performed using Environmental Data Resources (EDR) searches of historical maps, historical air photos and telephone directories, and agency files. These materials were supplemented with our own research and verification of EDR reports using similar sources or using access to files not provided by EDR.

The Site is located on the north side of the southern section of Greg Thatch Circle and the west side of Tres Piezas Drive. It is grassy/brushy open land with no current structures; it was recently plowed during our reconnaissance. No transformers were present.

No documents and no visible evidence (fill pipes, vent pipes, dispensers, surface patches) which would indicate the past or current presence of USTs was discovered or reported during the Site reconnaissance.

No Hazardous Materials Business Plan (HMBP) materials were on file at Sacramento County, indicating that the Site occupants did not store hazardous materials or generate hazardous waste in reportable quantities during times when such were required.

### **Adjacent Properties**

Residences are to the east, west and south; a park is to the north.

### **Historical Sources**

A variety of sources were consulted to evaluate past use of the Site. Sources of historical data include topographic maps from the US Geological Survey (1907, 1915, 1950, 1951, 1954, 1967, 1975, 1980, 2012, 2015, 2018), aerial photographs (1937, 1947, 1952, 1957, 1964, 1966, 1972, 1984, 1993, 2006, 2009, 2012, 2016, 2021), and City Directories (1999, 2005, 2009, 2014, 2017) of the Site vicinity were reviewed to evaluate the recent past uses of the Site. Sanborn Maps were also consulted (no coverage of the Site). Our research indicates the following:

<b>Year</b>	<b>Source Type</b>	<b>Comments</b>
1907	Topographic Map	Vacant land.
1915	Topographic Map	Vacant land.
1937	Aerial Photo	Cultivated land, drainage ditch crossing from north to south across eastern part of Site.
1947	Aerial Photo	Cultivated land (rice), drainage ditch crossing from north to south across eastern part of Site.
1950	Topographic Map	Vacant land, drainage ditch crossing from north to south across eastern part of Site.
1951	Topographic Map	Vacant land, drainage ditch crossing from north to south across eastern part of Site.
1952	Aerial Photo	Cultivated land (rice), drainage ditch crossing from north to south across eastern part of Site.
1954	Topographic Map	Vacant land, drainage ditch crossing from north to south across eastern part of Site.
1957	Aerial Photo	Cultivated land (rice), drainage ditch crossing from north to south across eastern part of Site.

1966	Aerial Photo	Cultivated land (rice), drainage ditch crossing from north to south across eastern part of Site.
1967	Topographic Map	Vacant land, drainage ditch crossing from north to south across eastern part of Site.

1972	Aerial Photo	Cultivated land (rice), drainage ditch crossing from north to south across eastern part of Site.
1975	Topographic Map	Vacant land, power lines at east edge, freeway to north.
1980	Topographic Map	Vacant land, power lines at east edge, freeway to north.
1984	Aerial Photo	Cultivated land (rice), drainage ditch crossing from north to south across eastern part of Site.
1993	Aerial Photo	Vacant land, power lines at east edge, freeway to north.
1999	Directories	No Listing.
2005	Directories	No Listing.
2006	Aerial Photo	Site is vacant, parcels to north vacant. Surrounded by residential development.
2009	Aerial Photo	Site is vacant, parcels to north vacant. Surrounded by residential development.
2009	Directories	No Listing.
2012	Aerial Photo	Site and vicinity in present configuration.
2012	Topographic Map	No Site detail.
2014	Directories	No Listing.
2015	Topographic Map	No Site detail.
2016	Aerial Photo	Site and vicinity in present configuration.
2017	Directories	No Listing.
2018	Topographic Map	No Site detail.
2021	Aerial Photo	Site and vicinity in present configuration.

The Site has been essentially vacant with no significant construction. Previous use has been agricultural, with some rice cultivation. Development in the Site vicinity has been residential starting after 1993 and before 2006.

A review of data available from various regulatory agencies indicated that minimal hazardous materials are stored for use and retail sale at several locations in the vicinity of the site. The Site is listed on two lists provided by EDR. It is listed as a proposed school site (no further action). It is also listed under CERS as a construction site.

The Site is not listed by RCRA as a Small-Quantity Generator of hazardous wastes; it is not listed with Sacramento County as a waste generator or hazmat handler. No sites within 0.25 mi are on the County Master List. No listed UST sites are within 0.1 mi.

## **CERCLIS**

CERCLIS shows no "Superfund" site within 1 mi; no other CERCLIS "Superfund" sites, no Delisted "Superfund" Sites, and no Cleanup site are within 1 mi of the Site. No NFRAP site is within 1 mi. No such sites are likely to impact the subject property.

CalSites shows two additional sites within 1 mi; Creekside Learning Center is 0.85 mi to the south southeast, Northborough II Elementary is 0.5 mi east southeast. Neither required further action. No State "Superfund" sites are within 1 mi. No CalSites Evaluation Site was listed within 1 mi. No Voluntary Cleanup Sites are within 1 mi.

No Indian Lands are within 1 mi of the Site. No federal or State Institutional/Engineering Controls or environmental liens are applicable to the Site.

The subject property is not listed as a RCRIS Small-Quantity Generator. No sites within a 0.25-mi radius of the property were listed as RCRIS Small-Quantity Generators; no facilities within 1 mi are Large-Quantity Generators. No sites were listed as Transporters or very small-quantity generators. No Treatment, Storage or Disposal facility for hazardous wastes was listed within 1 mi. No sites are small-quantity generators no longer regulated within 0.25 mi. No CORRACTS site is within 1 mi.

No sites within 0.25 mi are listed as LUST sites. None are likely to impact the Site.

No SLIC site is within 0.5 mi. None are likely to impact the Site.

No site within 0.1 mi is listed as a landfill site.

No incident within approximately 0.1 mi of the Site appeared on the Emergency Response Notification System.

## **CONCLUSIONS**

A Recognized Environmental Condition (REC) is the presence or likely presence of any hazardous substances or petroleum products on or at a property due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. A Historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable

regulatory authority without subjecting the property to any required controls. A Controlled REC (CREC) is an REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. RECs do not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Our Site reconnaissance revealed no distressed vegetation. No indication of underground tanks and no indications of significant soil contamination were found. According to data available from regulatory agencies, there are no records of underground tanks or gasoline contamination on the Site.

Based on the information collected during this investigation, significant subsurface soil contamination of the Site by past Site activities is unlikely. Groundwater contamination is unlikely. Some potential for unknown Site contamination exists because of potentially contaminated sites unknown to regulatory agencies and not apparent through reconnaissance and historical research. This possibility is considered very unlikely.

We therefore recommend no additional work to assess possible contamination onsite.

Please call our office if you have any questions regarding this report.

Sincerely,

## 1.0 INTRODUCTION

---

At your request, Lush Geosciences, Inc. performed this Phase I Environmental Assessment of the property north of Greg Thatch Circle and west of Tres Piezas Drive in Sacramento, California (Site). The Site includes one vacant parcel (Figures 1, 2, 3). The purpose of this assessment was to provide Next Generation Capital with information regarding the likelihood that hazardous materials contamination may exist on or in the vicinity of the Site. A Recognized Environmental Condition (REC) is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. RECs do not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Our assessment included: 1) examination of records pertaining to the Site and its vicinity at offices of Sacramento County, the City of Sacramento, and the State of California; 2) historical research including a review of aerial photographs and historic maps; 3) and interviews with and review of materials provided by owner of the Site, occupants of adjacent properties and with regulatory persons familiar with the Site and its immediate vicinity; and 4) a reconnaissance of the Site and its immediate vicinity.

This Assessment meets guidelines set forth in ASTM Standard 1527-05 for Environmental Assessments. Information regarding hazardous materials contamination on or near the project Site was obtained from the following agencies:

- California State Environmental Protection Agency (Cal EPA) Department of Toxic Substances Control, and U.S. Environmental Protection Agency (EPA) information on file at Cal EPA;
- California Environmental Protection Agency (Cal EPA), Office of Environmental Information;
- California State Department of Water Resources (DWR);
- The Central Valley Region of the California Regional Water Quality Control Board (CRWQCB);
- California Integrated Waste Management Board (CIWMB), and
- Sacramento County Environmental Management Department (SCEMD).

---

## **2.0 SCOPE OF WORK**

---

The scope of work for this assessment was to provide information regarding the past use of the Site and its immediate vicinity to assist in evaluating the feasibility of its purchase. The assessment objectives were to evaluate whether there is evidence of soil or groundwater contamination beneath the Site from storage, use, or disposal of hazardous or potentially hazardous materials present on or in the immediate vicinity of the Site.

---

## **3.0 SITE IDENTIFICATION**

---

The Site is in the City of Sacramento, Sacramento County, and appears in Sacramento County Assessors Map Book 201 on Page 176, as parcel 76. The Site is owned by the Twin Rivers Unified School District.

### **3.1 Location**

The Site appears on the U.S.G.S. topographic map of the Sacramento area in Section 34 of Township 10 North and Range 4 East (Figure 1, 3).

### **3.2 Site Description**

The Site is located on the north side of the southern section of Greg Thatch Circle and the west side of Tres Piezas Drive. It is grassy/brushy open land with no current structures; it was recently plowed during our reconnaissance. No transformers were present.

No documents and no visible evidence (fill pipes, vent pipes, dispensers, surface patches) which would indicate the past or current presence of USTs was discovered or reported during the Site reconnaissance.

Photographs of the Site and vicinity are presented in Appendix A.

No Hazardous Materials Business Plan (HMBP) materials were on file at Sacramento County, indicating that the Site occupants did not store hazardous materials or generate hazardous waste in reportable quantities during times when such were required.

### **3.3 Adjacent Properties**

Residences are to the east, west and south; a park is to the north.

## 4.0 HISTORICAL LAND USE

Past configurations of the Site are presented in Figures 1-27. A variety of sources were consulted to evaluate past use of the Site. Sources of historical data include topographic maps from the US Geological Survey (1907, 1915, 1950, 1951, 1954, 1967, 1975, 1980, 2012, 2015, 2018), aerial photographs (1937, 1947, 1952, 1957, 1964, 1966, 1972, 1984, 1993, 2006, 2009, 2012, 2016, 2021), and City Directories (1999, 2005, 2009, 2014, 2017) of the Site vicinity were reviewed to evaluate the recent past uses of the Site. Sanborn Maps were also consulted (no coverage of the Site). Our research indicates the following:

<b>Year</b>	<b>Source Type</b>	<b>Comments</b>
1907	Topographic Map	Vacant land.

The Site has been essentially vacant with no significant construction. Previous use has been agricultural, with some rice cultivation. Development in the Site vicinity has been residential starting after 1993 and before 2006.

A review of data available from various regulatory agencies indicated that minimal hazardous materials are stored for use and retail sale at several locations in the vicinity of the site. The Site is not listed by RCRA as a Small-Quantity Generator of hazardous wastes; it is not listed with Sacramento County as a waste generator or hazmat handler. 13 sites within 0.25 mi are on the County Master List. No listed UST sites are within 0.1 mi.

---

## **5.0 ENVIRONMENTAL SETTING**

---

The Site, situated in the floodplain for the Sacramento River, is approximately 4.5 mi east of the Sacramento River. Surface drainage at the site is controlled by the Site topography, which directs overland flow to the county's network of storm drains and sewers.

### **5.1 Physiography**

The Site is located near the southern end of the Sacramento Valley, which is the northern half of the Great Valley Physiographic Province. The elevation at the Site is approximately 23 ft above mean sea level. The topography of the Site is flat. The semi-arid local climate is characterized by mild to cool, wet winters and hot, dry summers with approximately 10 to 18 ins of annual precipitation.

### **5.2 Soil Conditions**

Native soil is not exposed at the Site; native soil below the building is mapped as Clear Lake clay and San Joaquin soil loam(USDA, 2022). The soils are developed on Quaternary basin deposits (Wagner et al., 1981).

### **5.3 Groundwater**

The Site is located within the Sacramento River Hydrologic Basin, as defined by the State of California Department of Water Resources (DWR). Groundwater surface elevation maps from DWR (1986) and the Sacramento County Department of Public Works (1987), indicate that the elevation of uppermost groundwater beneath the Site was approximately 30 ft below mean sea level, or approximately 30-45 ft below the existing ground surface with a flow direction that is generally to the south southeast.

---

## **6.0 AGENCY REVIEW**

---

File and historical review was performed using Environmental Data Resources (EDR, 2022) searches of historical maps, historical air photos and telephone directories, and agency files. These materials were supplemented with our own research and verification of EDR reports using similar sources or using access to files not provided by EDR.

A computer-generated agency file search is presented as Appendix B1-B6. The Site is listed on two lists provided by EDR. It is listed as a proposed school site (no further action). It is also listed under CERS as a construction site.

### **6.1 Underground Storage Tanks**

According to Sacramento County, there are no registered active or inactive underground storage tanks present within 0.1 mi of the Site. The Site is not listed as having had present or former USTs.

### **6.2 Hazardous Materials**

A review of data available from various regulatory agencies indicated that minimal hazardous materials are stored for use and retail sale in the vicinity of the site (Appendix B). No listed incident of contamination has occurred at the subject property; the Site is not listed by RCRA as a Small-Quantity Generator of hazardous wastes; it is not listed with Sacramento County as a waste generator or hazmat handler. No sites within 0.25 mi were listed on the SCEMD Master List.

### **6.3 RCRIS**

The subject property is not listed as a RCRIS Small-Quantity Generator. No sites within a 0.25-mi radius of the property were listed as RCRIS Small-Quantity Generators; no facilities within 1 mi are Large-Quantity Generators. No sites were listed as Transporters or very small-quantity generators. No Treatment, Storage or Disposal facility for hazardous wastes was listed within 1 mi. No sites are small-quantity generators no longer regulated within 0.25 mi. No CORRACTS site is within 1 mi.

### **6.4 Contaminated Sites - CERCLIS**

CERCLIS shows no "Superfund" site within 1 mi; no other CERCLIS "Superfund" sites, no Delisted "Superfund" Sites, and no Cleanup site are within 1 mi of the Site. No NFRAP site is within 1 mi. No such sites are likely to impact the subject property.

## **6.5 Contaminated Sites - CalSites**

CalSites shows two additional sites within 1 mi; Creekside Learning Center is 0.85 mi to the south southeast, Northborough II Elementary is 0.5 mi east southeast. Neither required further action. No State “Superfund” sites are within 1 mi. No CalSites Evaluation Site was listed within 1 mi. No Voluntary Cleanup Sites are within 1 mi.

## **6.6 LUST Sites**

No sites within 0.25 mi are listed as LUST sites. None are likely to impact the Site.

## **6.7 SLIC Sites**

No SLIC site is within 0.5 mi. None are likely to impact the Site.

## **6.8 Indian Lands**

No Indian Lands are within 1 mi of the Site.

## **6.9 Institutional/Engineering Controls**

No federal or State Institutional/Engineering Controls or environmental liens are applicable to the Site.

## **6.10 Environmental Liens**

Environmental liens are a charge, security, or encumbrance on a property's title to secure payment of cost or debt arising from response actions, cleanup, or other remediation of hazardous substances or petroleum products. We have reviewed title documents and found no evidence of such liens; further, our review of Site history and regulatory files showed no evidence of past or present response actions, cleanup, or other remediation onsite or on nearby properties which would have resulted in such a lien for the subject property.

## **6.11 ERNS Sites**

OES lists no incidents in the vicinity of the Site. No incident within approximately 0.1 mi of the Site appeared on the Emergency Response Notification System.

## **6.12 Contaminated Sites – Proposition 65**

No incidents within approximately 0.25 mi of the Site appeared on the Sacramento County list of Proposition 65 reports.

**6.13 Landfills**

No site within 0.1 mi is listed as a landfill site.

## 7.0 CONCLUSIONS

---

A Recognized Environmental Condition (REC) is the presence or likely presence of any hazardous substances or petroleum products on or at a property due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. A Historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority without subjecting the property to any required controls. A Controlled REC (CREC) is an REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. RECs do not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

No RECs were found during this investigation. We found no USTs or areas of heavy staining or distressed vegetation indicative of subsurface contamination, nor did we find indications of contamination in agency files. According to data available from regulatory agencies, there is no known record of unknown underground tanks or hazardous materials contamination on the Site.

Based on the information collected during this investigation, significant subsurface soil and groundwater contamination of the Site by Site activities is unlikely. Contamination from offsite locations is unlikely. This opinion is based on our understanding of the present and historical use of the site, on the nature and distribution of contaminants at known contaminated sites, on our interpretation of subsurface soil units, and on the inferred northerly groundwater flow direction. Some potential for unknown Site contamination exists because of potentially contaminated sites unknown to regulatory agencies and not apparent through reconnaissance and historical research. Should a higher degree of certainty regarding this conclusion be required, the possibility of contamination can be evaluated more definitely by drilling borings and collecting and chemically analyzing soil and/or groundwater samples. These procedures, however, are unlikely to result in the discovery of significant contamination. We therefore do not recommend further work to assess possible contamination.

---

## **8.0 DATA GAPS**

---

AAI standards require interviews with past and present owners, operators, and occupants of the subject property. During our assessment we spoke with current operators/occupants of the Site and information was provided by the Site owner. We were unable to contact former owners. This may be viewed as a Data Gap. Based on the information collected during our historical research, our review of reasonably obtainable data from regulatory files, and on information collected during our Site inspection, on information provided by the current occupants and owner, and communications with Site and regulatory personnel, we remain confident in our conclusion that no conditions are known to exist or to have existed which would have resulted in the release of pollutants, contaminants, petroleum and petroleum products or controlled substances to the ground or groundwater on, at, in, or to the subject property which would require remediation; this data gap does not prevent us from reaching this conclusion.

---

## **9.0 LIMITATIONS**

---

The above conclusions are based on our assessment of conditions indicated to exist as of the date of our field reconnaissance (July 2022). Our assessment included a brief field reconnaissance, a review of the referenced public documents and materials provided by the client, and interviews with the Site owner and/or occupants and other persons thought to be familiar with the Site and its near vicinity, and state or local regulatory persons familiar with the area. This assessment was conducted in accordance with generally accepted standards of environmental geological practice at the time it was performed.

The results of this assessment do not preclude the possibility that substances that are currently or which in the future may be defined as hazardous may be present on the property because of activities that we could not identify or in locations which were not sampled. Further investigation, including subsurface exploration and laboratory testing of soil and groundwater samples can reduce the uncertainties inherent in this type of limited environmental assessment. These investigations are unlikely to discover contamination and we therefore do not recommend further work to assess possible contamination

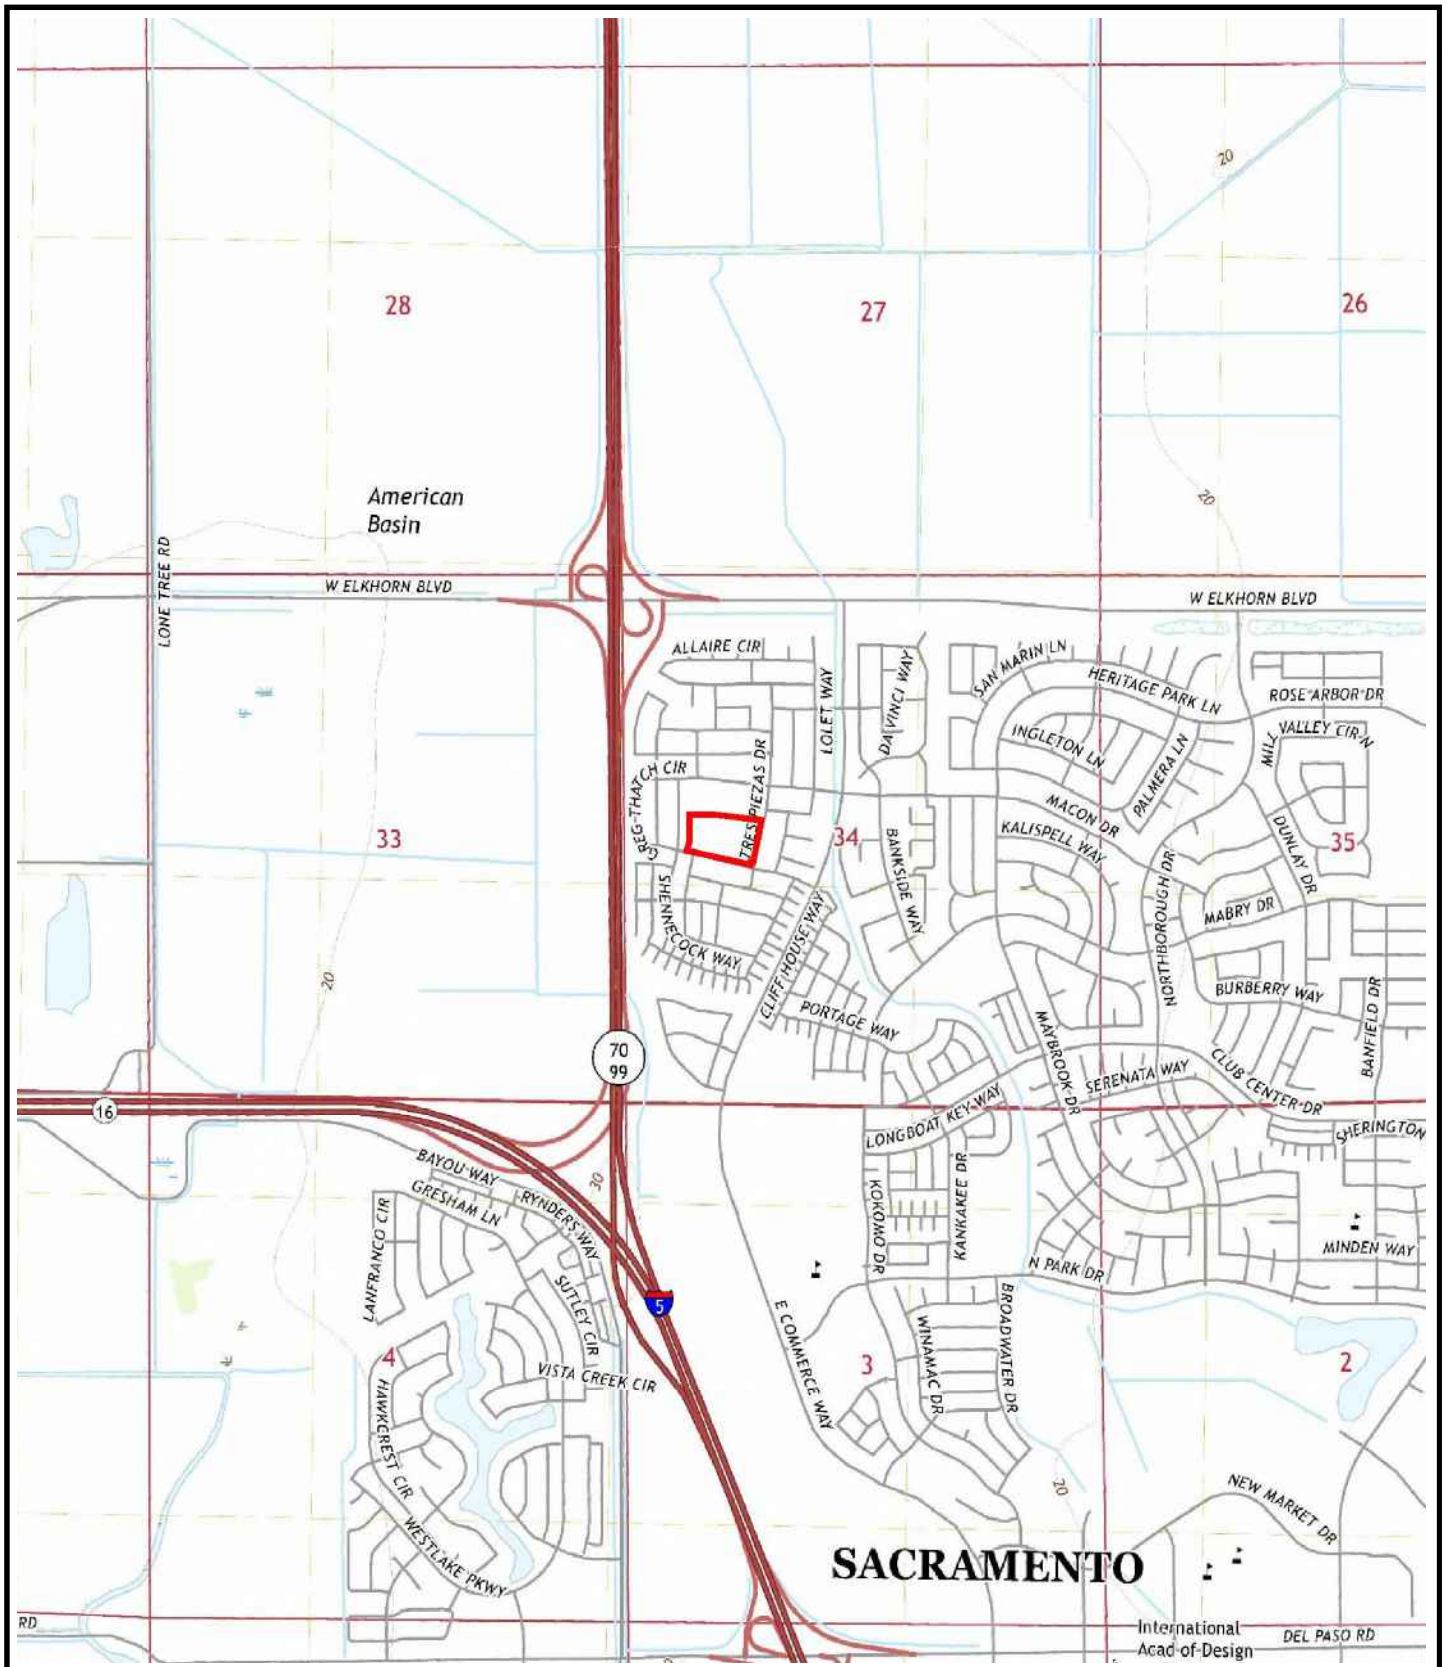

No soil engineering or geotechnical references are made nor should they be inferred. This report is applicable only to the investigated property and should not be used for any other property.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: A review of the ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: SAN JOAQUIN

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### **Lists of state- and tribal hazardous waste facilities**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### ***Local Lists of Hazardous waste / Contaminated Sites***

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category, depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 01/24/2022 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

#### ***Other Ascertainable Records***

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/18/2022 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

### ***Local Brownfield lists***

## US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Biological & Wetland Resources Due Diligence Assessment**

Dear Brian,

This letter responds to your request to examine this 8.21-acre parcel at 891 Greg Thatch Circle in Sacramento CA (APN 201-1070-076) for development concerns related to potential biological and/or wetland resources. I visited this site earlier today (7/11/22) to assess these concerns.

This site has been continuously cultivated from at least the early 20<sup>th</sup> century (as evidenced by a 1937 aerial photograph showing rice growing there at that time) until it was fallowed permanently in 2004. It has remained unfarmed since, though appears to have been annually disked for fire and weed control since. Magnolia Park was constructed in 2009 at 251 Greg Thatch Circle, just north of the property in question.

There are no trees on the parcel itself and only several small oriental cherry trees and 2 redwoods associated with residences adjacent to the SW corner of the parcel. Because of regular (and recent) diskings of the site, there remains little to no natural habitat for native plants or wildlife. The habitat that does remain is seasonal (i.e. grows between diskings) and consists of a highly disturbed annual grassland with no sensitive plant communities, wetlands or "other waters of the U.S." or of the State of California, and no resident wildlife of particular concern, apart from an occasional jackrabbit or foraging songbird.

I saw no evidence of ground squirrel or rabbit burrows that could be occupied by burrowing owls and only marginal foraging habitat value for Swainson's hawks or other raptors. At present, it appears that the nearest possibly active Swainson's hawk nest (2016 record) is just over 1 mile to the west of the site. All other records are >10 yrs old and unlikely to support Swainson's nests, as in most cases the trees where these nests were initially recorded no longer exist. Regardless, mitigation for any lost Swainson's hawk foraging habitat would occur through payment of a preset development fee to the the Natomas Basin Conservancy under their Habitat Conservation Plan (HCP).

Apart from marginal Swainson's hawk foraging habitat, there does not appear to be any plant or wildlife species of concern nor any wetlands or "other waters of the U.S." or State that would be adversely affected by the proposed project. Mitigation for any lost Swainson's hawk foraging habitat (if required) would be covered under the HCP. Apart from this potential impact, I see no biological or wetland constraints to development of the site and recommend no other mitigation to offset adverse effects.

I hope this provides you the information you need to make your CEQA determination, but please do not hesitate to call me with any questions or to further discuss.

Sincerely,

Bruce D. Barnett, Ph.D.
