

## **6325 Stockton Boulevard Mixed-Use Project Mitigation Monitoring Plan**

In January 1989, Assembly Bill (AB) 3180 went into effect requiring the City to monitor all mitigation measures applicable to this project and included in the Mitigated Negative Declaration. For this project, mitigation reporting will be performed by the City of Sacramento in accordance with the monitoring and reporting program developed by the City to implement AB 3180.

This Mitigation Monitoring Plan is being prepared for the City of Sacramento Community Development Department, Environmental Planning Services, 300 Richards Boulevard, 3<sup>rd</sup> Floor, Sacramento, CA 95811, pursuant to the California Environmental Quality Act Guidelines, California Public Resources Code 21081.

**Project Name:** **6325 Stockton Boulevard Mixed-Use Project**

**Project Location:** The approximately 2.99-acre project site includes 6325 Stockton Boulevard, 6303 Stockton Boulevard, and 600 Dias Avenue in the City of Sacramento, CA 95824. The project site is identified by Assessor's Parcel Numbers (APNs) 038-0191-001 to -003, and -025.

**Project Description:** The 6325 Stockton Boulevard Mixed-Use Project (proposed project) would include the removal of all on-site structures and trees, and the development of two, three-story residential buildings with 24 units in each for a total of 48 apartment units, a car wash station, an oil change facility, and a playground/greenspace area for resident use. The proposed project would include 86 parking spaces throughout the project site. Site access would be provided by three new driveways, two connections to Dias Avenue north of the site and one to Stockton Boulevard in the southwest corner of the site. The proposed project would require the approval of a Conditional Use Permit, Rezone and Lot Merger, as well as Site Plan and Design Review.

| <i>Proof of compliance with this measure shall be submitted to the City of Sacramento for review and approval.</i>   |   |   |                            |      |
| <p><b>III-2</b> <i>Prior to the initiation of ground disturbance, the project applicant shall show on project improvement plans via notation that the contractor shall ensure that all construction equipment greater than 50 horsepower to be used in the construction of the proposed project, including owned, leased, and subcontractor vehicles, shall be Tier 4 final off-road construction equipment. In addition, all off-road equipment operating at the construction site must be maintained in proper working condition according to manufacturer's specifications.</i></p> <p><i>Idling shall be limited to five minutes or less in accordance with the In-Use Off-Road Diesel Vehicle Regulation as required by CARB. Clear signage regarding idling restrictions shall be placed at the entrances to the construction site.</i></p> <p><i>Portable equipment over 50 horsepower must have either a valid SMAQMD Permit to Operate (PTO) or a valid statewide Portable Equipment Registration Program (PERP) placard and sticker issued by CARB.</i></p> <p><i>The aforementioned requirements shall be noted on grading plans and submitted for review and approval by the City of Sacramento Public Works Department.</i></p> | Prior to initiation of ground disturbance     | City of Sacramento Public Works Department          |                            |      |
| <b>Biological Resources</b>  |   |   |                            |      |
| <p><b>Burrowing Owl IV-1.</b> <i>If construction activities commence between February 1 and August 31, a pre-construction survey for nesting burrowing owls within the project site and a 500 feet buffer surrounding the site shall be conducted within 15 days of project construction. The pre-construction survey shall be conducted by a qualified biologist consistent with the CDFW 2012 Staff Report on Burrowing Owl Mitigation. Survey results shall only be valid for the breeding season in which the survey was conducted. If a lapse in project-related work of 15 calendar days or longer occurs, an additional survey shall be required prior to reinitiation. A written summary of the survey results shall be submitted to the City of Sacramento Community Development Department before any construction permits are issued. If nesting burrowing owls are not found, then further mitigation measures are not necessary.</i></p>  | Prior to issuance of any construction permits | City of Sacramento Community Development Department |                            |      |

**MITIGATION MONITORING PLAN**

| Mitigation Measure  | Reporting Milestone | Reporting / Responsible Party | Verification of Compliance |      |
|---|---------------------|-------------------------------|----------------------------|------|
|   |                     |                               | Initials                   | Date |
| <p><i>If an active burrow (i.e., a burrow occupied by more than one adult burrowing owl, and/or if juvenile owls are observed) is found, the project applicant shall implement the following measures:</i></p> <ul style="list-style-type: none"> <li><i>a. Avoid all nest sites that could be disturbed by project construction during the remainder of the breeding season or while the nest is occupied by adults or young (including individuals or family groups foraging on or near the site following fledging); and</i></li> <li><i>b. Establish a minimum 500-foot non-disturbance buffer zone around nests, unless otherwise approved by the City in consultation with CDFW. The buffer zone shall be flagged or otherwise clearly marked to prevent project-related activities from occurring within the buffer zone. Should construction activities cause the nesting bird to vocalize, make defensive flights at intruders, or otherwise display agitated behavior, then the exclusionary buffer shall be increased such that project construction activities occur far enough from the nest that the bird(s) cease displaying such agitated behavior. Construction shall only occur within the 500-foot buffer zone during the breeding season if a qualified biologist monitors the nest and determines that the proposed activities would not disturb nesting behavior; that the birds have not begun egg-laying and incubation; or that the juveniles from the occupied burrows have fledged and moved off-site. Any modifications to the aforementioned buffer shall be approved by the City in consultation with CDFW. The buffer reduction request shall include relevant information and/or propose new measures to justify the buffer reduction.</i></li> </ul> <p><i>Mitigation for the permanent loss of burrowing owl foraging habitat (all areas of suitable habitat within 250 feet of an active burrow) shall be preserved at a 3:1 ratio. The mitigation lands may require habitat enhancements including enhancement or expansion of burrows for breeding, shelter and dispersal opportunity, and removal or control of population stressors. In addition, the mitigation provided shall be consistent with recommendations in the CDFW Staff Report on Burrowing Owl Mitigation.</i></p> |                     |                               |                            |      |

| <p><i>Burrowing Owl IV-2.</i></p> <p><i>If project construction commences during the non-nesting season (September 1 through January 31), a pre-construction survey for burrows or debris that represent suitable nesting habitat for burrowing owls shall be conducted within areas of proposed ground disturbance, as well as the areas directly adjacent. If burrowing owls are not found, then further mitigation measures are not necessary. If overwintering owls are located, the project applicant shall establish a minimum 160-foot (50-meter) buffer zone around active burrows. The buffer zone shall be flagged or otherwise clearly marked. CDFW-approved measures, such as visual screens, may be used to further reduce the buffer, provided a qualified biologist confirms that such measures would not cause agitated behavior.. A written summary of the survey results shall be submitted to the City of Sacramento Community Development Department before any construction permits are issued.</i></p> <p><i>Burrow exclusion shall only be conducted during the non-breeding season for active burrows located within the project site boundaries, and in limited instances within a buffer zone around the project site, as determined by the City in consultation with CDFW after all avoidance and minimization measures have been exhausted. The project applicant shall acquire an Incidental Take Permit (ITP) from CDFW prior to exclusion. Following the ITP, any exclusion and burrow collapse activities shall be conducted in accordance with the CDFW Staff Report on Burrowing Owl Mitigation. The foregoing guidance requires a Burrowing Owl Exclusion Plan to be developed and approved by a qualified biologist in consultation with CDFW for the City's review and approval prior to burrow exclusion and/or closure.</i></p> | <p>Prior to issuance of any construction permits, if project construction commences during the non-nesting season (September 1 through January 31)</p> | <p>City of Sacramento Community Development Department</p> |                            |      |
| <p><i>Nesting Raptors and Other Migratory Birds IV-3.</i></p> <p><i>Not more than seven days prior to commencement of project construction activities, including removal of any trees, a pre-construction nesting bird survey shall be conducted by a qualified biologist within the project site and within a 500-foot radius of the site. If there is a break in construction activity of more than seven days, then subsequent surveys shall be conducted. A written summary of all survey results shall be submitted to the City of Sacramento Community Development Department before any construction commences.</i></p> <p><i>If nesting raptors and other migratory birds are not found, then further</i></p>  | <p>Within seven days prior to commencement of project construction activities</p>  | <p>City of Sacramento Community Development Department</p> |                            |      |
