6325 Stockton Boulevard Mixed-Use Project
Initial Study/Mitigated Negative Declaration

Errata Sheet
June 2025

Introduction

This Errata presents, in ~~strike-through~~ and double-underline format, the revisions to the 6325 Stockton Boulevard Mixed-Use Project Initial Study/Mitigated Negative Declaration (IS/MND). The revisions to the IS/MND reflected in this Errata do not affect the adequacy of the previous environmental analysis contained in the 6325 Stockton Boulevard Mixed-Use Project IS/MND. Because the changes presented below would not result in any new significant impacts or increase in impact significance from what was identified in the IS/MND, recirculation of the 6325 Stockton Boulevard Mixed-Use Project IS/MND is not required.

Changes to IS/MND

Page 28 of the IS/MND is hereby revised as follows:

> Based on the foregoing methodology, and the methodology presented in response to questions 'a' and 'b' regarding the estimation of construction emissions, the cancer risk and non-cancer hazard indices were estimated for the maximally-exposed receptor, and are presented in Table 4. According to SMAQMD Guidance, a significant impact related to TACs would occur if nearby sensitive receptors would experience an increased cancer risk of greater than or equal to 10 in one million people, or experience a chronic or acute hazard index of greater than or equal to 1.0 associated with stationary sources. Neither SMAQMD nor the City have established quantitative thresholds of significance for construction-related TAC emissions. While the SMAQMD's cancer risk threshold of 10 in one million people is intended for stationary sources, such thresholds are consistent with the thresholds used for AB 2588 risk assessment procedures, as established by the State.

Pages 32 and 33 of the IS/MND are hereby revised as follows:

> *III-2.* *Prior to the initiation of ground disturbance, the project applicant shall show on project improvement plans via notation that the contractor shall ensure that all construction equipment greater than 50 ~~100~~ horsepower ~~(i.e., rubber tired dozers, graders, scrapers, and cranes)~~ to be used in the construction of the proposed project, including owned, leased, and subcontractor vehicles, shall be Tier 4 final off-road construction equipment. In addition, all off-road equipment operating at the construction site must be maintained in proper working condition according to manufacturer's specifications.*
>
> *Idling shall be limited to five minutes or less in accordance with the In-Use Off-Road Diesel Vehicle Regulation as required by CARB. Clear*

signage regarding idling restrictions shall be placed at the entrances to the construction site.

Portable equipment over 50 horsepower must have either a valid SMAQMD Permit to Operate (PTO) or a valid statewide Portable Equipment Registration Program (PERP) placard and sticker issued by CARB.

The aforementioned requirements shall be noted on grading plans and submitted for review and approval by the City of Sacramento Public Works Department.

Page 42 of the IS/MND is hereby revised as follows:

IV-~~3~~4. *Prior to issuance of any grading permit and commencement of ground-disturbing activities, the project applicant shall obtain a Tree Permit from the City of Sacramento Community Development Department and comply with the permit requirements in effect at the time of project grading for removal, pruning, or soil disturbance within the canopy dripline of a Private Protected Tree.*

Pages 54 and 55 of the IS/MND are hereby revised as follows:

VII-~~3~~2. *In the event that a paleontological resource is inadvertently discovered during project-related work, regardless of the depth of excavation or location, work shall be halted within 50 feet (15 meters) of the find and a qualified paleontologist (Society of Vertebrate Paleontology [SVP] 2010) and the City of Sacramento Community Development Department shall be notified. The resources shall be examined by the qualified paleontologist at the developer's expense, for the purpose of recording, protecting, or curating the discovery as appropriate. Construction activities could continue in other areas.*

If the find is determined to be significant under SVP criteria, the find shall be left in place without further disturbance, or if avoidance is not feasible, then additional work, such as fossil recovery excavation (salvage) and curation at a certified repository, such as the University of California Museum of Paleontology (UCMP), may be warranted and would be discussed in consultation with the City of Sacramento Community Development Department, and any other relevant regulatory agency, as appropriate. The qualified paleontologist shall submit to the City of Sacramento Community Development Department for review and approval a report of the findings and method of curation or protection of the resources.

Page 58 of the IS/MND is hereby revised as follows:

…In addition, all internal roadways and pedestrian connections would be constructed in conformance with City standards. As such, the proposed project would generally comply with Action TR-1.2 of the CAAP. Further, landscaping improvements would be provided

throughout the site and would comply with the City's WELO, as established by Chapter 15.92 of the City Code, consistent with Action WW-1.3 of the CAAP.

The CAAP also includes Action WW-1.4, related to the use of low impact development (LID) strategies for new construction and development. As discussed in Section X, Hydrology and Water Quality, of this IS/MND, the proposed source control measures included as part of the proposed project would be designed consistent with the standards set forth in the Sacramento Region Stormwater Quality Design Manual. Stormwater runoff from impervious surfaces such as roofs, driveways, and sidewalks within the project site would be captured by new drop inlets located throughout the site and would be routed by way of new storm drain lines located throughout the internal roadway system, which would ultimately discharge into the City's existing storm drain lines. Thus, the proposed project would generally comply with Action WW-1.4 of the CAAP.

Additionally, while, as discussed above, several measures and actions included in the CAAP are intended for Citywide implementation, and are, therefore, not directly applicable to the proposed project, the proposed project would generally be designed consistent with the goals of such measures and actions. For example, consistent with the goal of Measure E-5, the proposed project would be located on a site almost entirely surrounded by existing development and, as discussed in Section XVII, Transportation, would result in a less-than-significant impact related to VMT. In addition, consistent with the goal of Action E-5.2 related to the creation of 29,000 multi-unit dwellings accessible by way of public transit, the proposed project would include the development of 48 multi-family dwelling units that are located approximately 100 feet (i.e., within 0.5 mile) from the nearest transit stop. The proposed project would also include construction of sidewalks along the site's northern frontage along Dias Avenue, as well as extending into the project site to provide access to the proposed facilities and residential buildings. Such sidewalk improvements would help to remove barriers to access transit stops and provide low-stress connectivity to the existing transit stops in the project vicinity, consistent with Action TR-2.10. Finally, consistent with the goal of Action W-1.5, the proposed project would be required to subscribe to organics recycling collection service through the City's franchised commercial haulers in accordance with Section 13.24.520 of the City Code.

Pages 63 and 64 of the IS/MND are hereby revised as follows:

IX-1. *Prior to issuance of a demolition permit, the project applicant shall consult with certified Asbestos and/or Lead Risk Assessors to complete and submit for review to the Building Department an asbestos and lead survey. If asbestos-containing materials or lead-containing materials are not discovered during the survey, further mitigation related to asbestos-containing materials or lead-containing materials shall not be required. If asbestos-containing materials and/or lead-containing materials are discovered by the survey, the project applicant shall prepare a work plan to demonstrate how the on-site asbestos-containing materials and/or lead-containing materials shall be removed in accordance with current California Occupational Health and Safety (Cal-OSHA) Administration regulations and disposed of in accordance with all CalEPA regulations, prior to the demolition and/or removal of the on-site structures. The plan shall include the requirement that work shall be conducted by a Cal-OSHA registered asbestos and lead abatement contractor in accordance*

with Title 8 CCR 1529 and Title 8 CCR 1532.1 regarding asbestos and lead training, engineering controls, and certifications. The applicant shall submit the work plan to the City of Sacramento for review and approval. The City has the right to defer the work plan to the Sacramento County Environmental Health Division for additional review. Materials containing more than one (1) percent asbestos that is friable are also subject to SMAQMD regulations. Removal of materials containing asbestos shall be completed in accordance with SMAQMD Rule 1403 and SMAQMD Rule 902.

Page 86 of the IS/MND is hereby revised as follows:

XIII-1. *Prior to approval of grading permits, the City shall establish the following as conditions of approval for any permit that results in the use of construction equipment:*

- *The proposed project shall incorporate the use of eight-foot-tall temporary sound barriers at the locations shown in Figure 15. The sound barrier fencing shall consist of half-inch plywood or minimum STC 27 sound curtains placed to shield nearby sensitive receptors. The plywood barrier shall be free from gaps, openings, or penetrations to ensure maximum performance.*
- *Construction shall be limited to 7:00 AM and 6:00 PM, on Monday, Tuesday, Wednesday, Thursday, Friday and Saturday, and between 9:00 AM and 6:00 PM on Sundays;*
- *All construction equipment powered by internal combustion engines shall be properly muffled and maintained;*
- *Quiet construction equipment, particularly air compressors, shall be selected whenever possible;*
- *All stationary noise-generating construction equipment, such as generators or air compressors, shall be located as far as is practical from existing residences. In addition, such stationary construction equipment shall be placed so that noise is directed away from the sensitive receptors nearest to the project site;*
- *Unnecessary idling of internal combustion engines shall be prohibited; and*
- *The construction contractor shall, to the maximum extent practical, locate on-site equipment staging areas to maximize the distance between construction-related noise sources and noise-sensitive receptors nearest the project site during project construction.*

Proof of compliance with the above measures shall be submitted to the City of Sacramento Community Development ~~Services~~ Department for review.

The above modifications are for clarification purposes only and do not change the analysis or conclusions of the IS/MND.

6325 Stockton Boulevard Mixed-Use Project
Responses to Comments Received on the Initial Study/Mitigated Negative Declaration

The Initial Study/Mitigated Negative Declaration (IS/MND) for the 6325 Stockton Boulevard Mixed-Use Project (proposed project) was circulated for public comment from May 2, 2025, to May 22, 2025. Written comments were received as follows:

Date	Commenter
5/6/2025	Morgan Gross, California Department of Transportation
5/16/2025	Tamara Purvis, California Department of Toxic Substances Control
5/22/2025	Molly Wright, Sacramento Metropolitan Air Quality Management District

The written comments are attached. The comments are acknowledged by the City and have been considered as part of the project planning and its implementation. The comments received did not identify any new significant effect, increase in severity of an impact identified in the IS/MND, or any significant new information. Thus, recirculation of the IS/MND is not required.

The responses below include responses to each comment letter submitted regarding the proposed project. Where revisions to the IS/MND text are required in response to a comment, new text is double underlined and deleted text is ~~struck through~~.

Response to Morgan Gross, California Department of Transportation, 5/6/2025: Thank you for participating in the public review process of the IS/MND. The letter states that the commenter does not have comments on the proposed project and, thus, does not address the adequacy of the IS/MND. The comment has been noted for the record and will be forwarded to the decisionmakers as part of their consideration of the proposed project.

Response to Tamara Purvis, California Department of Toxic Substances Control, 5/16/2025: Thank you for participating in the public review process of the IS/MND. The comment letter provides information regarding applicable regulations and required procedures. The comments related to such do not address the adequacy of the IS/MND, have been noted for the record, and will be forwarded to the decisionmakers as part of their consideration of the proposed project.

With respect to residential screening levels, as discussed on page 63 of the IS/MND, the Phase II Report was narrowly focused on evaluating the potential hazards associated with the proposed car wash and oil change facilities due to potential petroleum and volatile organic compounds (VOCs) resultant of the aboveground storage tank (AST) and clarifier/drainage systems associated with the existing on-site car wash and oil change facilities. Therefore, the Phase II Report applied commercial/industrial screening thresholds in place of residential thresholds. However, according to a letter prepared subsequent to the Phase II Report, based on the location of the identified AST and clarifier/drainage systems and the analytical results of the Phase II Report, Partner concluded that significant impacts associated with VOCs and petroleum hydrocarbons at the proposed residential uses are not anticipated to occur.

Response to Molly Wright, Sacramento Metropolitan Air Quality Management District, 5/22/2025: Thank you for participating in the public review process of the IS/MND. As discussed on page 57 of the IS/MND, the Sacramento Metropolitan Air Quality Management District's (SMAQMD's) CEQA Guidelines note that, where local jurisdictions have adopted thresholds or

guidance for analyzing greenhouse gas (GHG) emissions, the local thresholds should be used for the project analysis. The City of Sacramento has adopted a CAAP, which provides a jurisdiction-wide approach to the analysis of GHG emissions. The City's CAAP includes Citywide measures intended to reduce emissions from existing sources, as well as measures aimed at reducing emissions from future sources related to development within the City. Thus, the analysis provided within the IS/MND is focused on the proposed project's consistency with the City's CAAP, and compliance with SMAQMD's GHG thresholds is not required.

As further noted on page 57, the majority of the reduction measures set forth in the CAAP are citywide efforts in support of reducing overall citywide emissions of GHG and are not applicable to individual development projects. The GHG analysis included in the IS/MND provides a discussion of the project's consistency with the measures related to new development within the City that would directly apply to the proposed project. Nonetheless, based on the comment, page 58 of the IS/MND is hereby revised as follows to provide an analysis of project consistency with additional measures included in the CAAP:

> …In addition, all internal roadways and pedestrian connections would be constructed in conformance with City standards. As such, the proposed project would generally comply with Action TR-1.2 of the CAAP. Further, landscaping improvements would be provided throughout the site and would comply with the City's WELO, as established by Chapter 15.92 of the City Code, consistent with Action WW-1.3 of the CAAP.
>
> The CAAP also includes Action WW-1.4, related to the use of low impact development (LID) strategies for new construction and development. As discussed in Section X, Hydrology and Water Quality, of this IS/MND, the proposed source control measures included as part of the proposed project would be designed consistent with the standards set forth in the Sacramento Region Stormwater Quality Design Manual. Stormwater runoff from impervious surfaces such as roofs, driveways, and sidewalks within the project site would be captured by new drop inlets located throughout the site and would be routed by way of new storm drain lines located throughout the internal roadway system, which would ultimately discharge into the City's existing storm drain lines. Thus, the proposed project would generally comply with Action WW-1.4 of the CAAP.
>
> Additionally, while, as discussed above, several measures and actions included in the CAAP are intended for Citywide implementation, and are, therefore, not directly applicable to the proposed project, the proposed project would generally be designed consistent with the goals of such measures and actions. For example, consistent with the goal of Measure E-5, the proposed project would be located on a site almost entirely surrounded by existing development and, as discussed in Section XVII, Transportation, would result in a less-than-significant impact related to VMT. In addition, consistent with the goal of Action E-5.2 related to the creation of 29,000 multi-unit dwellings accessible by way of public transit, the proposed project would include the development of 48 multi-family dwelling units that are located approximately 100 feet (i.e., within 0.5 mile) from the nearest transit stop. The proposed project would also include construction of sidewalks along the site's northern frontage along Dias Avenue, as well as extending into the project site to provide access to the proposed facilities and residential buildings. Such sidewalk improvements would help to remove barriers to access transit stops and provide low-stress connectivity to the existing transit stops in the project vicinity, consistent with Action TR-2.10. Finally, consistent with the goal of Action W-1.5, the proposed project would be required to subscribe to organics recycling collection service through the City's franchised commercial haulers in accordance with Section 13.24.520 of the City Code.

In addition, with regard to the comment related to the thresholds used within the health risk assessment (HRA) conducted for the proposed project, page 28 of the IS/MND is hereby revised as follows:

> Based on the foregoing methodology, and the methodology presented in response to questions 'a' and 'b' regarding the estimation of construction emissions, the cancer risk and non-cancer hazard indices were estimated for the maximally-exposed receptor, and are presented in Table 4. <u>According to SMAQMD Guidance, a significant impact related to TACs would occur if nearby sensitive receptors would experience an increased cancer risk of greater than or equal to 10 in one million people, or experience a chronic or acute hazard index of greater than or equal to 1.0 associated with stationary sources. Neither SMAQMD nor the City have established quantitative thresholds of significance for construction-related TAC emissions. While the SMAQMD's cancer risk threshold of 10 in one million people is intended for stationary sources, such thresholds are consistent with the thresholds used for AB 2588 risk assessment procedures, as established by the State.</u>

The AERMOD and HARP 2 RAST modeling files are included as Attachment B to this document.

In response to the comment regarding Mitigation Measure III-2, pages 32 and 33 of the IS/MND are hereby revised as follows:

> *III-2.* *Prior to the initiation of ground disturbance, the project applicant shall show on project improvement plans via notation that the contractor shall ensure that all construction equipment greater than <u>50</u> ~~100~~ horsepower ~~(i.e., rubber tired dozers, graders, scrapers, and cranes)~~ to be used in the construction of the proposed project, including owned, leased, and subcontractor vehicles, shall be Tier 4 final off-road construction equipment. In addition, all off-road equipment operating at the construction site must be maintained in proper working condition according to manufacturer's specifications.*
>
> *Idling shall be limited to five minutes or less in accordance with the In-Use Off-Road Diesel Vehicle Regulation as required by CARB. Clear signage regarding idling restrictions shall be placed at the entrances to the construction site.*
>
> *Portable equipment over 50 horsepower must have either a valid SMAQMD Permit to Operate (PTO) or a valid statewide Portable Equipment Registration Program (PERP) placard and sticker issued by CARB.*
>
> *The aforementioned requirements shall be noted on grading plans and submitted for review and approval by the City of Sacramento Public Works Department.*

Recommendations regarding specific vegetation species to be used within on-site landscaping have been noted for the record and will be forwarded to the decisionmakers as part of their consideration of the proposed project.

In response to the comment regarding compliance with SMAQMD Rule 902 during demolition activities, Mitigation Measure IX-1 of the IS/MND is hereby revised as follows:

> *IX-1.* *Prior to issuance of a demolition permit, the project applicant shall consult with certified Asbestos and/or Lead Risk Assessors to complete and*

submit for review to the Building Department an asbestos and lead survey. If asbestos-containing materials or lead-containing materials are not discovered during the survey, further mitigation related to asbestos-containing materials or lead-containing materials shall not be required. If asbestos-containing materials and/or lead-containing materials are discovered by the survey, the project applicant shall prepare a work plan to demonstrate how the on-site asbestos-containing materials and/or lead-containing materials shall be removed in accordance with current California Occupational Health and Safety (Cal-OSHA) Administration regulations and disposed of in accordance with all CalEPA regulations, prior to the demolition and/or removal of the on-site structures. The plan shall include the requirement that work shall be conducted by a Cal-OSHA registered asbestos and lead abatement contractor in accordance with Title 8 CCR 1529 and Title 8 CCR 1532.1 regarding asbestos and lead training, engineering controls, and certifications. The applicant shall submit the work plan to the City of Sacramento for review and approval. The City has the right to defer the work plan to the Sacramento County Environmental Health Division for additional review. Materials containing more than one (1) percent asbestos that is friable are also subject to SMAQMD regulations. Removal of materials containing asbestos shall be completed in accordance with SMAQMD Rule 1403 and SMAQMD Rule 902.

Finally, as discussed on page 23 of the IS/MND, the proposed project would be required to comply with all SMAQMD rules and regulations for construction, and all feasible SMAQMD Basic Construction Emission Control Practices/BMPs and BACTs related to dust control would be incorporated into the project through Mitigation Measure III-1 of the IS/MND.

COMMENT LETTERS

From: Gross, Morgan@DOT on behalf of D3 Local Development@DOT
To: Ron Bess
Subject: RE: Notice of Availability/Intent to Adopt the 6325 Stockton Boulevard Project (P23-014)
Date: Tuesday, May 6, 2025 9:04:00 AM

Good morning Ron,

Thank you for including the California Department of Transportation (Caltrans) in the review process of the proposed 6325 Stockton Boulevard Project (P23-014). We wanted to reach out and let you know we have no comments at this time.

Please provide our office with copies of any further actions regarding this project as we would appreciate the opportunity to review and comment on any changes related to this project.

Should you have questions regarding these comments or require additional information, please contact me by phone (530) 720-2778 or via email at D3.local.development@dot.ca.gov.

Thank you!

Good Afternoon,

This email is to inform you that the City of Sacramento, Community Development Department, as Lead Agency, has issued a **Notice of Availability/Intent to Adopt the 6325 Stockton Boulevard Project (P23-014).**

The Comment Period is from May 2, 2025, to May 22, 2025.

The documents are now available for public review and comment. The NOA/NOI is available, along with the Mitigated Negative Declaration and Appendices at the City's Community Development Department webpage located at:

https://www.cityofsacramento.gov/community-development/planning/environmental/impact-reports

Comments are invited from all interested parties. Written comments on the Mitigated Negative Declaration should be submitted to the following address **NO LATER THAN 4:00 pm on Thursday, May 22, 2025**. All comments should be submitted via email or mailed to:

RE: MITIGATED NEGATIVE DECLARATION FOR 6325 STOCKTON BOULEVARD MIXED-USE PROJECT DATED May 2, 2025, STATE CLEARINGHOUSE NUMBER 2025050127

Dear Ron Bess,

The Department of Toxic Substances Control (DTSC) reviewed the Mitigated Negative Declaration (MND) for the 6325 Stockton Boulevard Mixed-Use Project (Project). The proposed Project would include the removal of all on-site structures and trees, and the development of two, three-story residential buildings with 24 units in each for a total of 48 apartment units, a car wash station, an oil change facility. The proposed Project would include 86 parking spaces throughout the Project site. Partner's Phase II Subsurface Investigation Report (SIR) revealed methylene chloride impacting soil gas initially exceeded the commercial/industrial screening levels. An additional Tier 2 Evaluation found they were within the commercial/industrial thresholds, however there is no mention of residential screening levels. Since the proposed Project will have residential use and Partner's SIR tested for commercial/industrial use, DTSC recommends and requests consideration of the following comments:

1. The analysis within the MND should reflect residential screening levels as the Phase I Environmental Site Assessment and Phase II SIR only analyzed screening levels to commercial / industrial thresholds.

2. The City of Sacramento address contamination found to be present within the Project area through oversight from a self-certified local agency, DTSC or Regional Water Quality Control Board. If entering into one of DTSC's voluntary agreements, please note that DTSC uses a single standard Request for Lead Agency Oversight Application for all agreement types. Please apply for DTSC oversight using this link: Request for Agency Oversight Application. Submittal of the online application includes an agreement to pay costs incurred during agreement preparation. If you have any questions about the application portal, please contact the relevant Regional Brownfield Coordinator for your Project.

3. All imported soil and fill material should be tested to assess any contaminants of concern meet screening levels as outlined in DTSC's Preliminary Endangerment Assessment Guidance Manual. Additionally, DTSC advises referencing the DTSC Information Advisory Clean Imported Fill Material Fact Sheet if importing fill is necessary. To minimize the possibility of introducing contaminated soil and fill material there should be documentation of the origins of the soil or fill material and, if applicable, sampling be conducted to ensure that the imported soil and fill material are suitable for the intended land use. The soil sampling should include analysis based on the source of the fill and knowledge of prior land use. Additional information can be found by visiting DTSC's Human and Ecological Risk Office (HERO) webpage.

DTSC would like to thank you for the opportunity to comment on the MND for the 6325 Stockton Boulevard Mixed-Use Project. Thank you for your assistance in protecting California's people and environment from the harmful effects of toxic substances. If you have any questions or would like clarification on DTSC's comments, please respond to this letter or via our CEQA Review email for additional guidance.

Sincerely,

Subject: 6325 Stockton Boulevard Mixed Use Project (State Clearinghouse #2025050127)

Dear Ron Bess:

Thank you for providing the Sacramento Metropolitan Air Quality Management District (Sac Metro Air District) with the opportunity to review the Mitigated Negative Declaration (MND) for the 6325 Stockton Boulevard Mixed Use Project under the California Environmental Quality Act (CEQA). This project includes the removal of all on-site structures and trees, the development of two three-story residential buildings with 24 units in each for a total of 48 apartment units, a car wash station, an oil change facility, a playground/greenspace area for resident use, and 86 motor vehicle parking spaces. Sac Metro Air District offers the project comments below, on air quality and climate considerations for project implementation and CEQA review consistent with methods recommended in our Guide to Air Quality Assessment in Sacramento County (CEQA Guide), available on our website.

Project Routing
The only project that Sac Metro Air District has reviewed on the 6325 Stockton Boulevard site was a carwash without residential uses that was distributed in September 2023, and we understand that a subsequent project routing was distributed in August 2024, which included residential uses. Further, this MND was circulated on May 2 with a due date of May 22. For these reasons, we do ask for your patience with any oversights in this letter.

CAAP Consistency
The MND contends that the proposed project is consistent with the City of Sacramento Climate Action & Adaptation Plan (CAAP) and therefore would have less than significant impacts on global climate change. The discussion on CAAP consistency (page 57) largely references the project's all-electric construction. There are many other elements of CAAP consistency that would apply to the project, for example CAAP policies and actions that support sustainable modes of transportation such as transit. To fully demonstrate CAAP consistency, the MND should reference other elements of CAAP consistency that would apply to the project.

In our September 2023 letter on the previously routed project on this site, Sac Metro Air District noted that the proposed car wash, as an automobile-oriented use, would not be supportive of Sacramento Regional Transit's plans for high frequency transit along the Stockton Boulevard Corridor. As noted, sustainable transportation such as transit is key to implementing state and regional plans to reduce polluting motor vehicle emissions, including the Sacramento region's Metropolitan Transportation Plan and Sac Metro Air District's Sacramento Regional Ozone Attainment Plan and other plans for meeting

federal and state air quality standards. Support for sustainable transit would also be supportive of the CAAP, as referenced above.

- Sac Metro Air District recommends including project measures consistent with Sac Metro Air District's performance-based greenhouse gas thresholds for CEQA significance. This inclusion would further support the MND's determination of less than significant global climate change impacts. Specifically, in addition to the project's all-electric construction, we recommend that it meet the current CalGreen Tier 2 electric vehicle (EV) infrastructure standards, except that all EV Capable spaces called for in those standards instead be EV Ready.

Public Toxic Air Contaminant Exposure from Project Construction
MND Tables 4 and 6 show cancer risk and hazard index associated with unmitigated and mitigated project construction emissions, respectively, using the Sac Metro Air District thresholds of significance for public exposure to toxic air contaminants from stationary sources, rather than a range of sources such as mobile construction equipment. We do not have a threshold of significance for public exposure to mobile sources of toxic air contaminants, and while *we accept your analysis method and the use of stationary source threshold is not inappropriate here*, it is important to note that the threshold is intended for use with stationary sources only.

- Please include clarification in the final MND that the threshold is intended for use in assessing health risk from stationary sources.

- Further, the sources identified for the information provided in Table 4 and 6 are AERMOD and HARP 2 RAST, and Sac Metro Air District recommends including into MND appendices the modeling inputs and outputs that resulted in the information provided in Tables 4 and 6, to provide full, clear public disclosure of project public health effects. We could not find modeling runs for HARP 2 RAST or AERMOD in MND appendices.

- MND mitigation measure III-2 calls for use of Tier 4 construction equipment where equipment is greater than 100 horsepower, and Sac Metro Air District recommends that this measure call for use of Tier 4 construction equipment where equipment is greater than 50 horsepower. This would be consistent with the Portable Equipment Registration Program requirements cited in mitigation measure III-2 and with Sac Metro Air District's Enhanced On-Site Exhaust Controls, which require NOx reductions in off road construction equipment in equipment 50 horsepower or more. NOx emissions can be significantly reduced by using Tier 4 engines in the 50 to 100 horsepower range.

Idling Vehicles
Because the car wash will result in idling vehicles near residential uses and a playground, for project landscaping please consider using vegetation species selected from those recommended in our Landscaping Guidance for Improving Air Quality Near Roadways (Landscaping Guidance). The Landscaping Guidance, available on our website, provides specific recommendations on using vegetation to reduce public health impacts from motor vehicle emissions, including the selection, placement, planting, and care of tree and shrub species on project sites. Trees and shrubs from the Landscaping Guidance should be planted where they can best serve as a buffer between residential uses

and the car wash, for example along the north boundary of the project residential units and playground, and along the project's eastern boundary, which abuts residential uses.

Demolition
As a reminder, due to the health risks posed by public exposure to asbestos, demolition and renovation of existing buildings is subject to Sac Metro Air District Rule 902, to limit asbestos exposure during these activities. Sac Metro Air District staff is available to review notifications and answer asbestos related questions, either by emailing asbestos@airquality.org, or calling 279-207-1122.

Construction Rules
All projects are subject to Sac Metro Air District rules and regulations in effect at the time of construction. Please visit our website to find a list of the most common rules that apply at the construction phase of projects.

Conclusion
Thank you for your attention to our comments. If you have questions about them, please contact me at mwright@airquality.org or 279-207-1157.

Sincerely,

Molly Wright, AICP
Air Quality Planner / Analyst

c: Rich Muzzy, Program Supervisor, Sac Metro Air District

                                              ***   MODEL SETUP OPTIONS SUMMARY
  ***
 -
- -

 ** Model Options Selected:
      * Model Uses Regulatory DEFAULT Options
      * Model Is Setup For Calculation of Average CONCentration Values.
      * NO GAS DEPOSITION Data Provided.
      * NO PARTICLE DEPOSITION Data Provided.
      * Model Uses NO DRY DEPLETION. DDPLETE = F
      * Model Uses NO WET DEPLETION. WETDPLT = F
      * Stack-tip Downwash.
      * Model Accounts for ELEVated Terrain Effects.
      * Use Calms Processing Routine.
      * Use Missing Data Processing Routine.
      * No Exponential Decay.
      * Model Uses RURAL Dispersion Only.
      * ADJ_U*   - Use ADJ_U* option for SBL in AERMET
      * CCVR_Sub - Meteorological data includes CCVR substitutions
      * TEMP_Sub - Meteorological data includes TEMP substitutions
      * Model Accepts FLAGPOLE Receptor . Heights.
      * The User Specified a Pollutant Type of: PM25

 **NOTE: Special processing requirements applicable for the 24-hour PM2.5 NAAQS
have been disabled!!!
         High ranked 24-hour values are NOT averaged across the number of years
modeled, and
         complete years of data are NOT required.

 **Model Calculates 1 Short Term Average(s) of: 1-HR
     and Calculates ANNUAL Averages

 **This Run Includes: 2 Source(s);   1 Source Group(s); and   8857
Receptor(s)

                with: 0 POINT(s), including
                           0 POINTCAP(s) and   0 POINTHOR(s)
                 and: 2 VOLUME source(s)
                 and: 0 AREA type source(s)

```
                and:      0 LINE source(s)
                and:      0 RLINE/RLINEXT source(s)
                and:      0 OPENPIT source(s)
                and:      0 BUOYANT LINE source(s) with a total of     0 line(s)
                and:      0 SWPOINT source(s)

 **Model Set To Continue RUNning After the Setup Testing.

 **The AERMET Input Meteorological Data Version Date:  19191

 **Output Options Selected:
         Model Outputs Tables of ANNUAL Averages by Receptor
         Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE
Keyword)
         Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE
Keyword)
         Model Outputs External File(s) of High Values for Plotting (PLOTFILE
Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing
Hours
                                                                 b for Both Calm
and Missing Hours

 **Misc. Inputs:  Base Elev. for Pot. Temp. Profile (m MSL) =     7.00 ;  Decay
Coef. =    0.000     ;  Rot. Angle =     0.0
                 Emission Units = GRAMS/SEC                                 ;
Emission Rate Unit Factor =   0.10000E+07
                 Output Units   = MICROGRAMS/M**3

 **Approximate Storage Requirements of Model =      4.5 MB of RAM.

 **Input Runstream File:          aermod.inp

 **Output Print File:             aermod.out
