San Francisco, California 94117

Subject: **Phase I Environmental Site Assessment**
1976 Edgewater Road and Canterbury Rd Parcel
North Sacramento, California 95815
AEI Project No. 468374

Dear Maya Theuer:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or pmcintyre@aeiconsultants.com.

Sincerely,

Peter McIntyre, PG
National Director
AEI Consultants

PROJECT SUMMARY

REPORT VIABILITY

Report Viability Dates per ASTM E1527-21

Site Visit	September 7, 2022
Regulatory Database Review	August 29, 2022
Interview(s)	Property Owner: N/A Key Site Manager: N/A
EP Declaration	September 15, 2022
Lien Search (if conducted by AEI)	N/A
Report Viability per ASTM E1527-21	February 25, 2023

The dates listed are required for Users who are using the report in connection with CERCLA liability protections. The User may have their own criteria when the report is being used for business risk purposes, and not CERCLA liability protections.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Redwood Residential to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 1976 Edgewater Road and Canterbury Rd Parcel, North Sacramento, Sacramento County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	1976 Edgewater Road and Canterbury Rd Parcel, North Sacramento, Sacramento County, California 95815
Property ID (APN or Block/Lot)	275-0231-011 and 275-0240-077
Location	South side of Southgate Road, east side of Edgewater Road, north side of Canterbury Road
Property Type	Vacant Land
Site and Building Information	
Approximate Site Acreage/Source	7.30/Assessor
Number of Buildings	Zero
Number of Units	Zero
Additional Improvements	Vacant land
On-site Occupant(s)	N/A
Current On-site Operations/Use	Vacant land
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1902-1911	Unimproved land	Topographic maps
1912-1936	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, city directories, topographic maps, agency records
1937	Agricultural land and a stream running through the central portion of the subject property	Aerial photographs
1947-1956	Mostly vacant land with a stream and a small portion of agricultural land in the western portion	Aerial photographs, topographic maps
1957-Present	Vacant land and a stream running through the central portion of the subject property	Aerial photographs, city directories, topographic maps, site observation, and agency records

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Southgate Road followed by: Vacant land (APN: 275-0172-004) Residence (295 Southgate Road and 2055 Canterbury Road)	None identified
East	Residences (1955-2047 (odds) Canterbury Road) Canterbury Road followed by: SureStay Plus Hotel By Best Western Sacramento Cal Expo (1900 Canterbury Road)	None identified
South	Canterbury Road followed by: Vacant land (APN: 275-0240-083, 275-0240-002, and 275-0240-107) Expo Parkway South followed by Highway 160 followed by: West Coast Arborists, Inc (355 Commerce Circle, 401 Slobe Avenue) Vacant land (APN: 275-0252-002)	None identified
West	Edgewater Road followed by: Residence (1915 Edgewater Road) Residences (195 and 198 Baxter Avenue) Residence (1969 Edgewater Road)	None identified
Northwest	Residence (1969 Edgewater Road) Residences (207, 208, and 212 Johnston Road) Residence (212 Southgate Road)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- Based on a review of aerial photographs, the subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends considering whether on-site sampling is appropriate to evaluate whether the subject property has been impacted in connection with the historical agricultural use in the context of the planned development.

Conclusions, Opinions, and Recommendations

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21, of 1976 Edgewater Road and Canterbury Rd Parcel, North Sacramento, Sacramento County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 1976 Edgewater Road and Canterbury Rd Parcel, North Sacramento, Sacramento County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the size of the subject property, AEI performed a reconnaissance of the property utilizing a field technique of traversing the site in an attempt to provide an overlapping field of view. Due to the size of the property and the vegetation present on site, isolated areas of the site may have not been accessible for direct observation during AEI's field reconnaissance. This limitation is not expected to significantly alter the findings of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.
- AEI requested an interview with the subject property key site manager; however, the subject property key site manager has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	Historical sources were not obtained at five-year intervals dating back to first developed use. AEI was not able to track the history of the subject property between the years 1912 and 1936 as none of the historical sources utilized as part of this assessment covered this time period. In the 1911 topographic map, the subject property appears as unimproved land. In the 1937 aerial photograph, the subject property appears cultivated for agricultural use. Thus, it is assumed that during this time period the subject property would have been unimproved, if not cultivated for agricultural use. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, topographic maps, agency records, interviews

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Redwood Residential. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by Redwood Residential on August 3, 2022. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

Property Information	
Site Address(es)	1976 Edgewater Road and Canterbury Rd Parcel, North Sacramento, Sacramento County, California 95815
Property ID (APN or Block/Lot)	275-0231-011 and 275-0240-077
Location	South side of Southgate Road, east side of Edgewater Road, north side of Canterbury Road
Property Type	Vacant Land
Site and Building Information	
Approximate Site Acreage/Source	7.30/Assessor
Number of Buildings	Zero
Number of Units	Zero
Additional Improvements	Vacant land
On-site Occupant(s)	N/A
Current On-site Operations/Use	Vacant land
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

2.2 On-Site Utilities

The subject property is currently vacant land or lacks structures. Consequently, there are no on-site heating or cooling systems, or potable water or sewage disposal/treatment services.

2.3 Site and Vicinity Characteristics

The subject property is located in a residential/commercial area of North Sacramento, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Southgate Road followed by: Vacant land (APN: 275-0172-004) Residence (295 Southgate Road and 2055 Canterbury Road)	None identified
East	Residences (1955-2047 (odds) Canterbury Road) Canterbury Road followed by: SureStay Plus Hotel By Best Western Sacramento Cal Expo (1900 Canterbury Road)	None identified
South	Canterbury Road followed by: Vacant land (APN: 275-0240-083, 275-0240-002, and 275-0240-107) Expo Parkway South followed by Highway 160 followed by: West Coast Arborists, Inc (355 Commerce Circle, 401 Slobe Avenue) Vacant land (APN: 275-0252-002)	None identified
West	Edgewater Road followed by: Residence (1915 Edgewater Road) Residences (195 and 198 Baxter Avenue) Residence (1969 Edgewater Road)	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northwest	Residence (1969 Edgewater Road) Residences (207, 208, and 212 Johnston Road) Residence (212 Southgate Road)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qr: Riverbank Formation (alluvium) consisting of gravel, sand, silt, and clay of Pleistocene age/*Geologic Map of the Sacramento Quadrangle, California*, prepared by the California Division of Mines and Geology, dated 1981
Soil Series: Description/Source	161, Jacktone clay (33%)- 0-2 percent slopes, clay, clay loam, indurated, stratified loam to clay loam, somewhat poorly drained, run off class is high, depth to water table is about zero inches/USDA Soil Survey 117, Columbia sandy loam (33%)- 0-2 percent slopes, sandy loam, stratified loamy sand to silt loam, poorly drained, run off class is very low, depth to water table is more than 80 inches/USDA Soil Survey 211, San Joaquin fine sandy loam (34%)- 0-3 percent slopes, fine sandy loam, sandy clay loam, clay loam, indurated, stratified sandy loam to loam, moderately well drained, run off class is high, depth to water table is more than 80 inches/USDA Soil Survey
Groundwater Flow Direction/Source	Southwest/Topographic map interpretation
Estimated Depth to Groundwater/Source	Approximately 27-39 feet bgs/Case Closure Summary, 1000 Del Paso Boulevard. This site is located approximately 0.4 mile west of the subject property, obtained from GeoTracker.
Surface waters on the subject property or adjoining sites	Small water stream trending north/south in western to central portion of the subject property
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1902-1911	Unimproved land	Topographic maps
1912-1936	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, city directories, topographic maps, agency records
1937	Agricultural land and a stream running through the central portion of the subject property	Aerial photographs
1947-1956	Mostly vacant land with a stream and a small portion of agricultural land in the western portion	Aerial photographs, topographic maps
1957-Present	Vacant land and a stream running through the central portion of the subject property	Aerial photographs, city directories, topographic maps, site observation, and agency records

Based on a review of aerial photographs, the subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends considering whether on-site sampling is appropriate to evaluate whether the subject property has been impacted in connection with the historical agricultural use in the context of the planned development.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1937-2016 (non-inclusive)):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1937	Agricultural land and a stream running through the central portion of the subject property	NORTH: Agricultural land with a stream EAST: Vacant land, current residences, and agricultural land SOUTH: Agricultural land WEST: Agricultural land NORTHWEST: Agricultural land
1947	Mostly vacant land with a stream and a small portion of agricultural land in the western portion	NORTH: Vacant land with a stream EAST: Current residences and vacant land SOUTH: Agricultural land followed by current highway followed by agricultural land and vacant land WEST: Agricultural land and vacant land NORTHWEST: Vacant land

Year(s)	Subject Property Description	Adjoining Site Descriptions
1957, 1964	Vacant land and a stream running through the central portion of the subject property	NORTH: Road followed by current residence and vacant land with a stream EAST: No significant changes SOUTH: Road followed by vacant land and highway on/off ramps followed by highway followed by vacant land and a stream WEST: Road followed by current residences NORTHWEST: Vacant land with a current residence
1966, 1972	No significant changes	NORTH: No significant changes EAST: Current residences and a road followed by current commercial building with parking lot SOUTH: No significant changes WEST: No significant changes NORTHWEST: Current residences and vacant land
1984, 1993, 1998, 2006, 2009, 2012, 2016	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Road followed by vacant land and current highway on/off ramps followed by current commercial building with parking lot and vacant land with a stream WEST: No significant changes NORTHWEST: Current residences

Subject property:

- Agricultural land - Refer to Section 3.0

Adjoining Sites:

- No potential environmental concerns identified

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1920-2017 (non-inclusive). Please refer to the appendices for a complete list of historical subject property tenants identified by EDR.

Subject Property

Year(s)	Address - Occupant Listed
1920, 1923, 2928, 1933, 1937, 1942, 1947, 1952, 1956, 1961, 1965, 1966, 1970, 1975, 1980, 1982, 1991, 1994, 1995, 1999, 2002, 2004, 2005, 2009, 2014, 2017	No Address listed

The subject property address was not listed in the city directories searched. However, based on the undeveloped nature of the subject property, the lack of city directory listings is not a significant concern.

A search of historical city directories was also conducted for the adjoining sites noted below utilizing EDR. No potential occupants of concern were identified based on AEI's review of the historical city directories. Please refer to the appendices for a complete list of historical adjoining occupants identified by EDR.

Direction	Address(es)
North	APN: 275-0172-004 295 Southgate Road 2055 Canterbury Road
East	1955-2047 (odds) Canterbury Road 1900 Canterbury Road
South	APN: 275-0240-083, 275-0240-002, and 275-0240-107 355 Commerce Circle 401 Slobe Avenue APN: 275-0252-002
West	1915 Edgewater Road 195 and 198 Baxter Avenue 1969 Edgewater Road
Northwest	1974 Edgewater Road 207, 208, and 212 Johnston Road 212 Southgate Road

Subject property:

- No potential environmental concerns identified

Adjoining Sites:

- No potential environmental concerns identified

3.4 Historical Topographic Maps

A search of historical topographic maps was conducted for the subject property utilizing NETR Online (www.historicaerials.com). Historical topographic maps were reviewed for the years 1902-2015 (non-inclusive). Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1902, 1910	Unimproved land	NORTH: Unimproved land EAST: Unimproved land SOUTH: Unimproved land WEST: Unimproved land NORTHWEST: Unimproved land
1911, 1947	Unpaved road or path transecting subject property, no other significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Unpaved road or path transecting property, no other significant changes WEST: No significant changes NORTHWEST: No significant changes
1949	Unimproved land transected by a creek	NORTH: Built up area EAST: Built up area SOUTH: Unimproved land followed by a highway, followed by unimproved land WEST: No significant changes NORTHWEST: No significant changes
1956, 1957, 1964, 1965, 1969, 1977	Built up area	NORTH: No significant changes EAST: No significant changes SOUTH: Built up area followed by a highway, followed by unimproved land WEST: Built up area NORTHWEST: Built up area
1980	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Roadway followed by unimproved land, followed by a highway, followed by a small commercial building WEST: No significant changes NORTHWEST: No significant changes
1997	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Built up area WEST: No significant changes NORTHWEST: No significant changes
2012, 2015, 2018	No features other than creek depicted	NORTH: No features other than roadway depicted EAST: No features other than roadway depicted SOUTH: No features other than roadways depicted WEST: No features other than roadway depicted NORTHWEST: No features other than roadway depicted

Subject property:

- No potential environmental concerns identified

Adjoining Sites:

- No potential environmental concerns identified

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Sacramento County Environmental Health Department	August 25, 2022	Email	Peggy Silva	No records on file

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of Sacramento Fire Department	August 25, 2022	Telephone	A staff member	Referred to County Environmental health; Refer to section 4.1

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of Sacramento Building Division	August 25, 2022	Online	City of Sacramento Records Library Online Search	No records on file

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of Sacramento Planning Department	August 25, 2022	Telephone	A staff planner	No evidence indicating the existence of AULs on file for the subject property

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Sacramento County Assessor's Office	August 25, 2022	Online	N/A	Information obtained is discussed below

Records Summary

APN	275-0231-011 and 275-0240-077
Acreage	7.30 acres
Construction Date	Not provided
Building Square Footage	Not provided
Current Owner	Not provided

Additional Information	None

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	September 3, 2022	Online	N/A	No records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	September 3, 2022	Online	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	September 3, 2022	Online	N/A	No records on file
CA DTSC EnviroStor	September 3, 2022	Online	N/A	No records on file
Sacramento Metropolitan Air Quality Management District (SMAQMD)	August 25, 2022	Email	Virginia Muller, Legal Assistant II / Clerk of the Hearing Board	No records on file

No other agencies were contacted during the course of this assessment.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	September 3, 2022	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	September 3, 2022	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	1.0			
Federal CERCLA removals/orders lists	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generator lists (LQG, SQG, VSQG)	SP/ADJ			
Federal RCRA NonGen/NLR list	SP/ADJ			
Federal IC/EC registries	SP			
Federal ERNS list	SP			
State- and tribal "Superfund" equivalent sites	1.0			
State- and tribal hazardous waste facilities	1.0			
State/Tribal landfill and solid waste disposal lists	0.5			
State/Tribal leaking storage tanks	0.5			
State/Tribal registered storage tanks	SP/ADJ			
State/Tribal voluntary cleanup sites	0.5			

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
State/Tribal EC/IC registries	SP			
State/Tribal brownfield sites	0.5			
Orphans	N/A			
Additional Environmental Record lists	SP/ADJ			

5.2 Vapor Migration

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	North Sacramento Land Company	N/A	N/A	Over 40 years	Not interviewed; refer to Section 1.5
Key Site Manager	Jack Greer	N/A	Telephone	N/A	Interview pending; refer to Section 1.5

INTERVIEW SUMMARY

Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	N/A
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	N/A
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	N/A
Are you aware of any known plans for site redevelopment or change in site use?	N/A	N/A
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	N/A
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	N/A
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	N/A
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	N/A

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

Interview information was obtained from Ms. Maya Theuer via a completed questionnaire dated August 24, 2022. Ms. Theuer indicated that plans are in place for redevelopment of the subject property with residential townhomes. Ms. Theuer did not have any knowledge of previous environmental investigations or any potential environmental concerns.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Ms. Maya Theuer, property buyer. The following table represents information contained therein.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	No
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	No
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes

Question	Response/ Comment
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Yes. Vacant land since the dawn of time
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	September 7, 2022
AEI Site Assessor(s)	Michael Kalwasinski
Property Escort(s)/ Relationship(s) to Property	None
Units/Areas Observed	AEI observed all areas of the vacant land parcels
Area(s) not accessed and reason(s)	None
Other Physical Constraints	• Large parcel Refer to Section 1.5 for discussion of limiting condition(s)

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		✔
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers		✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		✔
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		✔
Septic Systems		
Biomedical Wastes		
Other		

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI did not observe any of the items listed in the above Reconnaissance Findings Summary table.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformers

Three pole-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.3 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking areas of the adjoining sites. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.2.4 Wells

A water production well was observed at the adjoining site to the east. Based on the nature of use of the well, the presence of the well is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 Asbestos-Containing Building Materials

The subject property is currently vacant land or lacks structures. Consequently, no building components containing suspect asbestos containing materials were identified during the site inspection.

8.2 Lead-Based Paint

The subject property is currently vacant land or lacks structures. Consequently, AEI did not observe building components likely to contain suspect LBP during the site reconnaissance.

8.3 Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, Five tests were conducted for radon levels in the subject property zip code (95815) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the United States EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 Mold

The subject property is currently vacant land or lacks structures. Consequently, mold was not addressed as part of this assessment.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

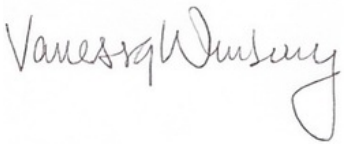

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/26/2022 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Site ID: 0904607
EPA Id: CAD983650128

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/26/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there are 2 CA RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/25/2022 has revealed that there are 6 CA ENVIROSTOR sites within approximately 1 mile of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 2 records.

Site Name	Database(s)
MICHELETTI PROPERTY	CA CPS-SLIC
SACRAMENTO TRAP SHOOT RANGE**	CA CPS-SLIC

OVERVIEW MAP - 7101920.2S

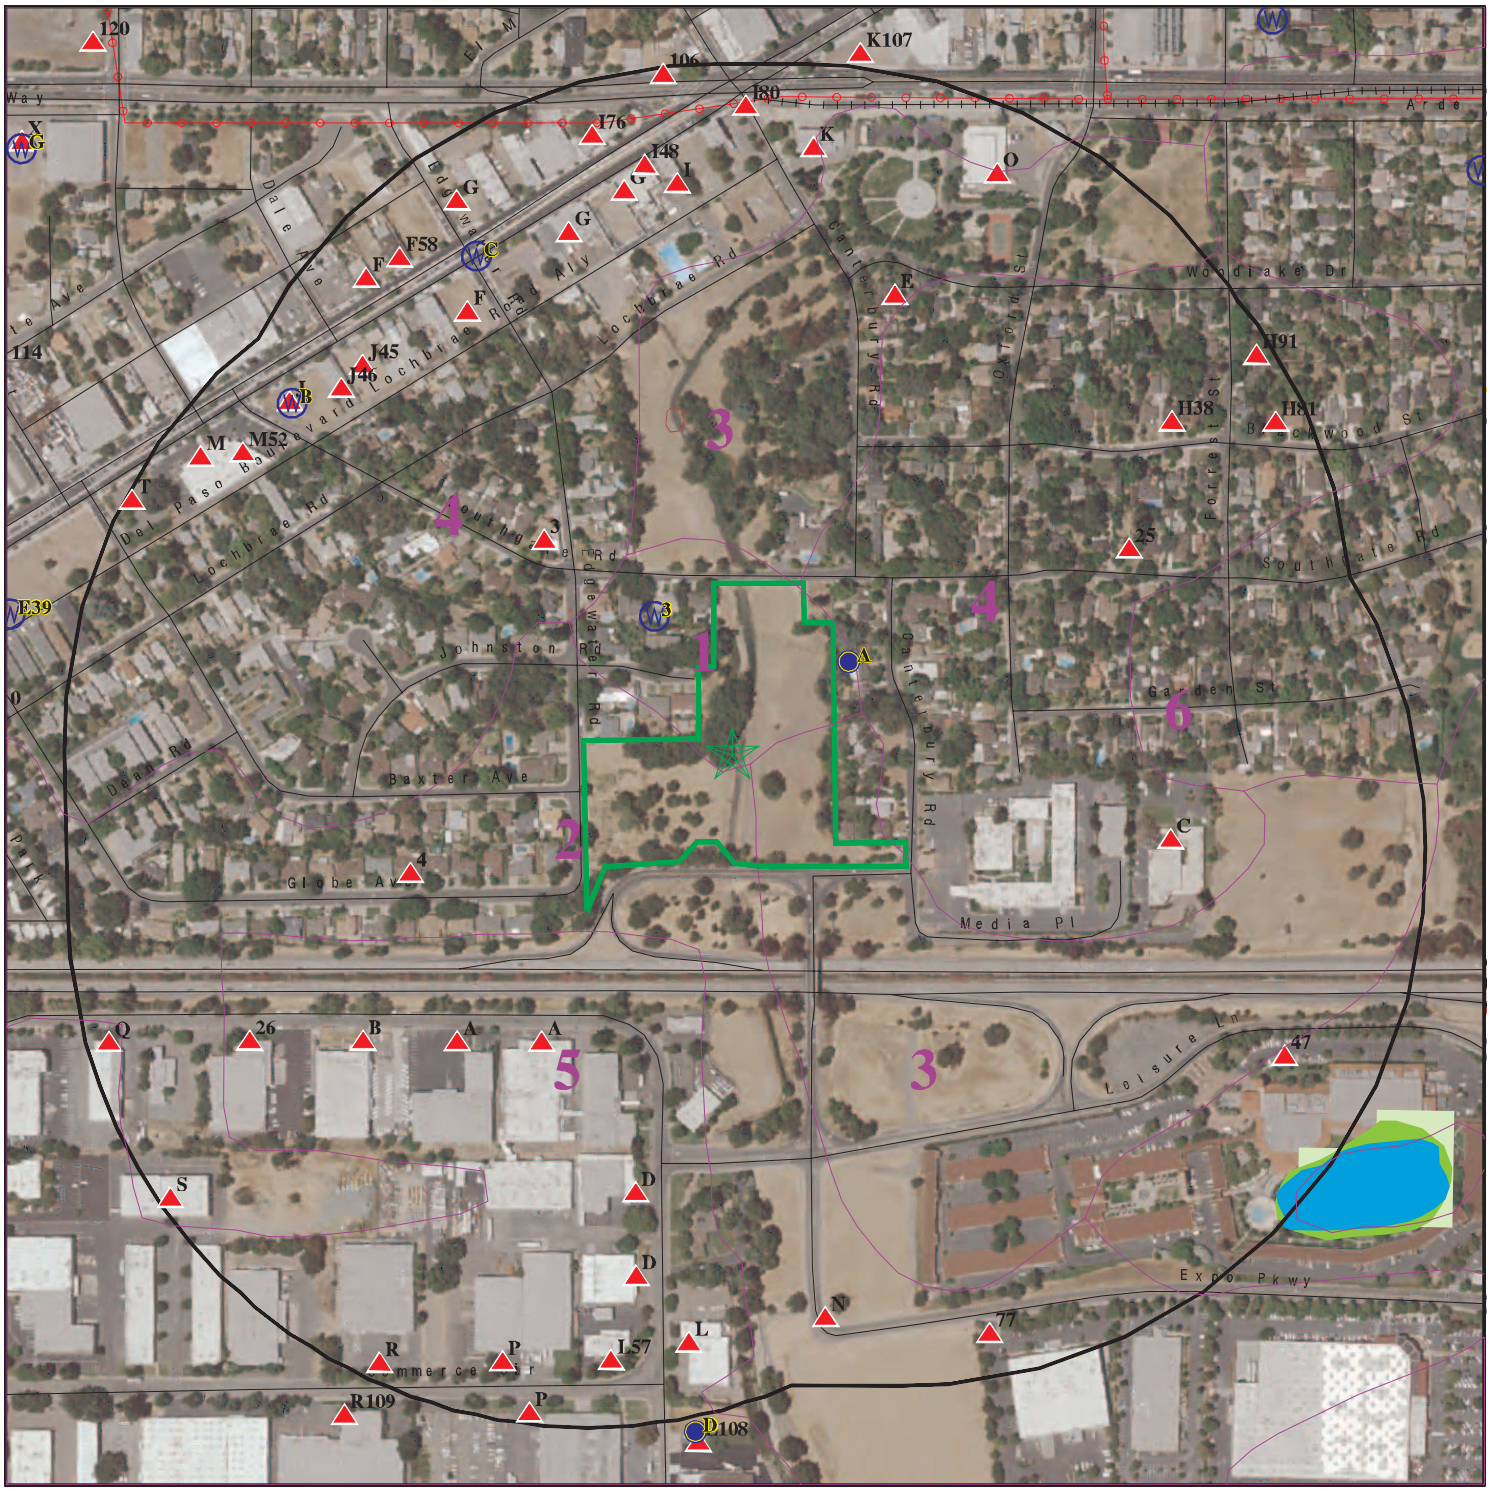

- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- Power transmission lines
- 100-year flood zone
- 500-year flood zone
- National Wetland Inventory
- State Wetlands
- Areas of Concern

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

	Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	The hazardous waste accumulation label on the used oil accumulation drum was not legible. The hazardous waste accumulation label on the waste gasoline accumulation drum was missing an accumulation start date. All hazardous waste accumulation containers must be labeled with the words 'hazardous waste,' the generator name and address, the phyical stage of the waste, the hazardous properties of the waste, and the container accumulation start date. Properly label each of these hazardous waste accumulation containers and submit photo showing correction.

Site ID: 405242
CERS ID: 10224298
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 405242
Site Name: VACUUM PROCESS ENGINEERING, INC
Violation Date: 03-26-2014
Citation: HSC 6.95 25504(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(a)
Violation Description: Failure to complete and/or submit hazardous material inventory forms for all reportable hazardous materials on site.
Violation Notes: Returned to compliance on 04/14/2014. OBSERVATION: The facility has not submitted the Hazardous Materials Inventory Chemical Description page forcompressed oxygen to this department. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in this department's e-Reporting Portal or in the California Environmental Reporting System.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 405242
Site Name: VACUUM PROCESS ENGINEERING, INC
Violation Date: 10-17-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 10/17/2017. OBSERVATION: In the Hazardous Materials Inventory Sheet, there were duplicate pages for the COMPRESSED ARGON GAS and NITROGEN COMPRESSED GAS. In addition, ACETYLENE GAS is listed in its own inventory sheet even though it was not observed during the time of inspection. Delete the described

VACUUM PROCESS ENGINEERING, INC (Continued) **S102957095**

inventory sheets. In addition the maximum daily amount needs to be increased for the COMPRESSED HELIUM GAS and COMPRESSED HYDROGEN GAS. CORRECTIVE ACTION: During the time of inspection, the described inventory sheets were deleted and updated and submitted in CERS. No further action required.

Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 405242
Site Name: VACUUM PROCESS ENGINEERING, INC
Violation Date: 03-26-2014
Citation: 19 CCR 4 2729.2(a)(3) - California Code of Regulations, Title 19, Chapter 4, Section(s) 2729.2(a)(3)
Violation Description: Failure to complete and/or submit an annotated site map if required by CUPA.
Violation Notes: Returned to compliance on 04/14/2014. The current facility hazardous materials business plan (HMP) site map does not include the various hazardous material and hazardous waste storage area locations. The facility HMP site map is required to include the location of the hazardous material and hazardous waste storage areas. Update the facilty HMP site map to include these elements and resubmit through the EMD Portal on line database.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Status Date:	06/19/2009
Global Id:	T10000000457
Lead Agency:	SACRAMENTO COUNTY LOP
Lead Agency Case Number:	C367
Latitude:	38.603893
Longitude:	-121.463445
Case Type:	Cleanup Program Site
Case Worker:	DVA
Local Agency:	SACRAMENTO COUNTY LOP
RB Case Number:	Not reported
File Location:	Local Agency
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Diesel
Site History:	In 2006 Nichols Consulting Engineering (NCE) performed a Phase I assessment for SHRA that identified the likelihood that two dry cleaners were previously located on the property. This finding was based on historical City Directories and was not independently verified. NCE subsequently performed a subsurface soil and groundwater investigation to investigate potential releases from the dry cleaners. Low concentrations of TPHd were found in soil (52 ppm) and groundwater (240 ug/l.) PCE was found in groundwater below the site at a maximum of 11 ug/l. With authorization of Regional Transit (RT) NCE also investigated soil and groundwater conditions on RT property directly west of the SHRA site. TPHd, PCE (400 ug/l) and other VOCs were found in groundwater below the RT site at significantly higher concentrations than on the SHRA property. Groundwater was found to flow from the RT property toward the SHRA site, indicating that groundwater below the SHRA property was impacted by an off-site source. In 2007 NCE conducted indoor-air quality and ambient air sampling to evaluate potential human health risks. Based on the air sampling results, vapor intrusion to indoor air does not appear to be occurring. In April 2009 NCE collected 12 additional soil samples to further evaluate whether VOCs or PAH were present in the SHRA site soils. No VOCs or PAH were detected in any of the soil samples. On May 29, 2009 the Site Assessment and Mitigation Unit as well as a representative of the Central Valley Regional Water Quality Control Board Site Cleanup Unit (SLIC) agreed that the site warranted a finding of no further action. Therefore, the attached documentation is being submitted for the Directors signature.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction - Site Inspection/Visit
Completed Date:	03/28/2008
Comments:	No observed activities contrary to the conditions set forth in the land use Covenant.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	02/05/1996
Comments:	Removal action consisted of excavation and disposal of approximately 477 cubic yards of lead contaminated soils. Soils were loaded into 27 - 18cy trucks and transported to a Class I landfill in Nevada. Historical activities included the burial of battery parts underground in two locations in the alley. Analysis results of soil samples ranged from not detected to 8370 mg/kg of lead. Confirmation sampling results indicate soils onsite are less than the target cleanup level of 220 mg/kg. Volume disposed to landfill: 477cy. Acres of land returned/ released for reuse: 0.4 acres, commercial/industrial use only.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	09/05/1995
Comments:	Removal Action Workplan approved detailing a plan to excavate and dispose of lead contaminated soils. Soil was contaminated as a result of improper hazardous waste management practices.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/26/1994
Comments:	In October 1992, DTSC collected surface soil samples from the site to better assess the area of contamination. Lead contamination was revealed in the private residence yard and the fence line of the mobile home park.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	01/14/1992
Comments:	Site Screening Completed. In 1988 DTSC, Surveillance and Enforcement responded to a complaint alledging the improper handling of batteries. 120 cracked batteries were observed. Samples collected on-site indicated hazardous waste levels of lead as high as 8920. Site has been fenced in response to a Fence and Post Order issued 9-89. Facility owner agreed to prepare a Preliminary Endangerment Assessment as part of a CAO settlement.

Background Info:	The site is comprised of a quonset hut, unpaved alley and vacant lot. Adjacent to the Site are a private residence and a mobile home park. The owner of the private residence operated a battery shop in the quonset hut since 1963. The facility bought and sold used automobile batteries and stored unsalable batteries in the alley prior to shipment off-site for recycling.

Description:	The Sierra Battery Sales site (Site) is comprised of a Quonset hut, unpaved alley and vacant lot. Adjacent to the Site are a private residence and a mobile home park. The owner of the private residence operated a battery shop in the Quonset hut since 1963. The facility bought and sold used automobile batteries and stored unsalable batteries in the alley prior to shipment off-site for recycling. The first site inspection and soil sampling was conducted in 1998 by the then Department of Health Services Surveillance and Enforcement

SIERRA BATTERY SALES (Continued) **S101481738**

Branch (now known as DTSC) in response to a complaint of lead-acid batteries mismanagement. Results showed up to 8,920 mg/kg of lead in the Site's soil. A Fence and Post Order was issued by DTSC for the alley and part of the vacant lot. In 1992, DTSC conducted another inspection and sampling. Signs of spillage were observed within the Quonset hut with the worst spillage located at the battery charging area. In 1994, a Preliminary Endangerment Assessment (PEA) was completed by DTSC. Based on the recommendations from the PEA, a removal action was completed in February 1996. Approximately 477 cubic yards of lead contaminated soil was excavated and transported to a Class I landfill in Nevada. Confirmation sampling results indicated lead in soil onsite was less than the target cleanup level of 220 mg/kg. In March 1996, a land use covenant was recorded by DTSC on Sacramento County Assessor's Parcel Number (APN) 275-162-003, where the Quonset hut is located.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: In January 1989, the three fuel USTs were removed. Following removal of the USTs, three soil samples were collected from the native soil beneath the tanks. The samples were analyzed for Total Petroleum Hydrocarbons (TPH)-as-gasoline, benzene, toluene, ethylbenzene and xylenes (BTEX). Two of the three soil samples contained concentrations of TPH-as-gasoline and BTEX compounds above laboratory reporting limits. The highest concentrations were in the soil sample designated as S8-1, which contained 2,100 milligrams per kilogram (mg/kg) of TPH-as gasoline, 1 mg/kg of benzene, 4 mg/kg of toluene, 16 mg/kg of ethylbenzene, and 88 mg/kg of xylenes. On October 26, 2007, Johnson Petroleum Construction, Inc. removed a waste oil UST, discovered in the central portion of the site. On December 14,2007, Ramage Environmental documented the UST removal and soil sampling and analytical results. The soil sample collected from native soil beneath the former UST only contained 27.9 micrograms per liter (4.g/l) of soluble chromium and 24.3 4.g/l of soluble zinc. The composite sample from the waste soil stockpile only contained 2.71 mg/kg of TPH-as-gasoline1 and 452 mg/kg of oil and grease. No other analyzed compounds were detected in either soil sample. On September 22, 2006, Ramage Environmental published Preliminary Investigation

GREEN PROPERTY (Continued) **S101300836**

and Evaluation Report, which documented the drilling of four soil borings, one of which was converted to a groundwater monitoring well (MW-1). Results of the investigation revealed that soil and groundwater beneath the site were impacted by diesel-range and gasoline hydrocarbons. The soils observed to the total drilling depth of 40 feet consisted of a sequence of mixed clay, silt and sand soils. First groundwater appeared to be present within relatively porous sands at a depth of approximately 30 feet below ground surface (bgs), and under non-confined water table conditions. In soil, the lateral extent of petroleum compounds in the vadose (i.e., unsaturated) zone appeared to be defined to the northeast and southeast of the source areas, but remained undefined to the north} west and south. Within saturated soil, the concentrations of petroleum compounds appeared to attenuate to the northeast and southeast, but were not fully defined. In groundwater, TPH-as-diesel, TPH-as-gasoline, BTEX compounds and 1,2-dichloroethane (1,2-DCA) were detected in all three groundwater samples analyzed, at concentrations exceeding California Maximum Contaminant Levels (MCl). Concentrations of the five oxygenate compounds, including methyl tertiary butyl ether (MTBE) were below laboratory reporting limits. The lateral extent of impacted groundwater was not defined. On October 27, 2006, Ramage Environmental documented the results of a sensitive receptor survey in Sensitive Receptor Survey and Work Plan for Additional Site Investigation. The survey included a review of water well completion reports at the California Department of Water Resources (DWR), contact with local water purveyors, and a tour the site vicinity. No water well completion reports were on file at DWR for wells located within 2,OOO-feet of the site. According to Mr. Dan Sherry, an engineer with the city of Sacramento Utility Department (city), the city is the only water purveyor serving the site vicinity. A map provided by Mr. Sherry showing city water well locations indicated that a water distribution well was located approximately 2,000 feet to the east of the site. No further data on this well, such as its installation date, total depth or screened interval(s) were available from the city, and a log of the well was not on file with DWR. On September 14, 2006, Ramage Environmental toured the site vicinity to search for wells not documented in the DWR records. The tour included walking the area within at least 500 feet of the site, and driving throughout the remaining 2,OOO-foot site vicinity radius. The site is located on Del Paso Boulevard in a mixed commercial and residential area, and is surrounded by a mix of single family residential and multi-family residential areas north and south of Del Paso Boulevard. No evidence of water wells (e.g., pressure tanks, power line drops, pump sheds, etc.) not previously identified was observed during the tour of the site vicinity. A Head Start facility is located approximately 200 feet west of the site at 925 Del Paso Boulevard. No other daycare facilities, schools or hospitals were observed within 2,000 feet of the site. The American River is located approximately 3,500 feet southwest of the site. Based on the results of the survey, no identified potential sensitive receptors appeared to be threatened by the petroleum hydrocarbons present beneath the site. On March 9, 2007, Ramage Environmental published Additional Site Investigation Report, which documented the installation of two additional groundwater monitoring wells (MW-2 and MW-3), and the drilling of five additional soil borings (B-5, 8-6, 8-7, 8-8 and 8-9). These site investigations appeared to adequately characterize the site and define the extents of impacted soil and groundwater. The microbial

GREEN PROPERTY (Continued) **S101300836**

and physiochemical groundwater analytical results indicated that the existing subsurface conditions are probably sufficient to support biodegradation of petroleum hydrocarbons. On November 6, 2007, Ramage Environmental published Site Conceptual Model and Corrective Action Plan, which interpreted the project data collected to date, and evaluated monitored natural attenuation, SVE and AS, and source area excavation followed by SVE and AS as potential remedial alternatives. Based on the high effectiveness and relatively short duration of source area excavation followed by AS and SVE, Ramage Environmental recommended that this remedial strategy be pursued. On November 13, 2007, SCEMD approved the recommended remedial strategy. On February 6, 2008, Ramage Environmental published Remediation Work Plan, Excavation of Gasoline-Impacted Soils. On March 3, 2008, SCEMD approved the work plan, following a public comment period. On May 16, 2008, Ramage Environmental supervised the destruction of MW-1, AS-1, SVE-1and SV-2, in preparation for the proposed source area excavation. On June 6, 2008, Ramage Environmental submitted documentation of the well destructions to SCEMD. On December 15, 2008, Ramage Environmental published Source Area Excavation Report, which documented the excavation of approximately 3,405 cubic yards of soil from the on-site source area, including approximately 2,600 cubic yards of impacted soil and approximately 805 cubic yards of clean overburden soil. Based on the field observation of heavily-impacted soil at 32 feet, the depth of the excavation was extended from the approved depth of 32 feet to 34 feet bgs. Upon completion of the excavation, Ramage Environmental collected four soil samples at a depth of 34 feet bgs from the floor of the excavation. All four of the excavation floor soil samples did not contain significant concentrations of gasoline compounds. Only the soil sample collected at BS-1 contained only 0.013 mg/kg of tertiary butanol (TBA). No other gasoline compound was detected in any of the samples at concentrations above laboratory reporting limits. An engineered steel Uplate and pile!! shoring system was installed to excavate impacted soils along the property lines. The excavation was backfilled with the 805 cubic yards of clean excavated soil and 4,119 tons of imported aggregate base rock. The backfill material was compacted under the supervision of Earthtec, a licensed geotechnical engineering firm. The excavation appeared to remove the majority of the impacted soil from beneath the site to a depth of 34 feet bgs. The excavation removed approximately 3,472 pounds of gasoline hydrocarbons, or approximately 88% of the original estimated gasoline hydrocarbon mass. On May 8, 2009, Ramage Environmental published Well Installation and Groundwater Monitoring Report,First Quarter 2009, which documented the installation of one groundwater monitoring well to replace MW-1, two on-site soil vapor extraction wells (SVE-4 and SVE-5), and two on-site air sparge wells (AS-3 and AS-4). To re-establish a source area groundwater monitoring capability, the MW-1 replacement well was constructed as a four-inch diameter groundwater monitoring well to a total depth of 45 feet bgs. On July 15, 2009, Ramage Environmental published Remediation System Installation and Groundwater Monitoring Report, Second Quarter 2009, which documented the installation of two additional soil vapor extraction wells (SVE-3 and SVE-6) and two additional air sparge wells (AS-2 and AS-5), and the installation of an air sparge and soil vapor extraction remediation system. Remediation wells SVE-3 and AS-2 were located off-site in the Globe Avenue right-ofway, and wells SVE-3 and AS-5 were angled from the site beneath Del Paso Blvd. In

GREEN PROPERTY (Continued) **S101300836**

September 28, 2009, Ramage Environmental started the SVE and AS system for continuous operation. On November 5, 2009, Ramage Environmental submitted to the Sacramento Metropolitan Air Quality Management District (SMAQMD), mission Verification Report, which documented the successful start-up of the system.

Region:	STATE
Facility Status:	**Open - Assessment & Interim Remedial Action**
Status Date:	12/01/2018
Global Id:	SL0606762702
Lead Agency:	CENTRAL VALLEY RWQCB (REGION 5S)
Lead Agency Case Number:	Not reported
Latitude:	38.605317988847
Longitude:	-121.465626955032
Case Type:	Cleanup Program Site
Case Worker:	DPL
Local Agency:	Not reported
RB Case Number:	Not reported
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Indoor Air, Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	Soil and groundwater at the site are impacted with VOCs. Site assessment and cleanup activities are being conducted by the Sacramento Housing and Redevelopment Agency, which has secured funding from the State to implement soil vapor extraction at the Site. A soil vapor extraction pilot test was conducted in early 2012. An SVE system was installed at the site during 2013, and operated through 2015 removing a total of 4,156 pounds of VOCs. The SVE system was expanded to the Lawson property in 2018, and two air sparge wells were installed for a groundwater remediation pilot test.

Status:	Completed - Case Closed
Status Date:	11/06/2018
Case Worker:	VJF
RB Case Number:	340474
Local Agency:	Not reported
File Location:	Regional Board
Local Case Number:	B501/RO0000180
Potential Media Affect:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Gasoline
Site History:	One 5,000-gallon gasoline underground storage tank (UST) was removed in October 1988. One 1,000-gallon gasoline UST was removed in August 1989. Petroleum hydrocarbons were detected in soil samples collected beneath the former 1,000-gallon UST. The UST pit was over-excavated to approximately 30 feet below ground surface. Excavated soil was aerated on-site and used as backfill on the Site in December 1990. A Phase 1 Environmental Site Assessment was conduced in 1990. Initial site characterization began in October 1992, and includes the advancement of multiple soil borings, the installation of groundwater monitoring wells, and collection of grab soil and groundwater samples. Additional site characterization continues and groundwater monitoring is ongoing to monitor the extent and trends of groundwater contamination.

RB Case Number: 340832
Local Agency: Not reported
File Location: Not reported
Local Case Number: C522/RO0000301
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Benzene, Diesel, Gasoline
Site History: The Site was a former maintenance yard and fueling facility. Three, two 1,000 gallon and one 500 gallon, underground storage tanks (USTs) were owned and operated by the City of Sacramento from 1974 until their removal in 1992. The USTs were used to store gasoline and diesel fuel. A 575 gallon waste oil UST was removed from the Site in April 1994. Soil gas surveys were conducted in September 1996 and May 1997. Soil gas samples contained petroleum hydrocarbon constituents at concentrations up to: total petroleum hydrocarbons as gasoline (TPH-G) 170 micrograms per liter (ug/l), benzene 7.7ug/l, toluene 9.6 ug/l, and ethylbenzene 4.0 ug/l. Additionally, the chlorinated solvents trichloroethene (TCE) and tetrachloroethene (PCE) were detected at maximum concentrations of 69.6 ug/l and 2.2 ug/l, respectively. On 3 March 1998, petroleum hydrocarbons were not

COLFAX YARD (Continued) **U001615256**

detected in Site wells, and had not been detected since at least December 1996. On 16 August 2000, PCE and TCE were detected in all site wells at maximum concentrations of 26 ug/l and 2,600 ug/l, respectively. Results of soil and groundwater investigations indicated that the Colfax Maintenance Yard was not a source of the solvent plume detected in the El Monte Area, and that petroleum hydrocarbon contamination did not threaten the beneficial uses of the groundwater underlying the Site. A finding of No Further Action Required from the Regional Water Board was granted on 21 March 2000. Site wells MW-1, MW-2, MW-4, and MW-5 were destroyed on 6 November 2004. Well MW-3 was not destroyed. A regional soil gas survey was conducted as part of proposed development of the area. The results were presented in the report titled Site Characterization Report, El Monte Area dated 13 December 2007. Elevated concentrations of benzene were detected in soil gas samples collected in the vicinity of the Colfax Maintenance Yard and in the vicinity east of the Site. Benzene was detected in soil gas samples at concentrations above California Human Health Screening Levels (CHHSL) of 36.2 ug/m3 (0.0362 ug/l) (residential) and 122 ug/m3 (0.122 ug/l) (commercial) to the east of the Site, in the vicinity of residential properties. Additional assessment is needed to establish the source of the benzene vapor plume and to obtain a regional understanding of contributing sources of pollution in this area. Based on historic and current soil gas data, the Colfax Yard could be a source or a contributing source of the benzene vapor plume. For this reason, Regional Water Board staff reopened the case, and requested additional investigative activities.

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
RISK AND TECHNOLOGY REVIEW
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	State Bond funds were used to characterize and remediate this site. DHS will be seeking cost recovery for all direct costs plus staff costs and overhead related to the project.
Site Description:	A-1 Plating is a chrome, copper and nickel plating shop. Soils on the north, east and south sides of the building were stained. The most heavily stained area was north of the building and was orange in color. Runoff from the processing area inside the building at one time was discharged along the north side of the building to a ditch along the road in front of the site.
Hazardous Waste Desc:	Cyanide and the following metals have been found in soil on the north side of the site: cadmium, chromium, copper, nickel, lead and zinc.
Threat To Public Health & Env:	There was a potential threat to public health due to unrestricted access. The facility is in an industrial area in the City of Sacramento with residences nearby. Employees and customers of the plating shop were the population at risk because of their potential exposure to the contaminated soil on the site. One hundred sixty (160) cubic yards of contaminated soil were excavated and removed to a Class 1 Landfill.
Site Activity Status:	A preliminary site assessment was completed in August, 1986. A remedial investigation was conducted by the Department in 1987-1988. The RAP was public noticed in April - May, 1988. The selected remedial action was implemented and the site certified in June, 1988.

KMEP AMERICAN RIVER (Continued) **S110275466**

Potential Media Affected: Not reported
Potential Contaminants of Concern: Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: The site is located approximately 100-feet south of the intersection of Highway 160 and the Union Pacific Rail Road (UPRR) tracks in Sacramento, California. The site is bordered to the west and south by active business parks, to the east by the UPRR tracks, and to the north by Highway 160. SFPP owns and operates a 12-inch diameter underground pipeline that parallels the UPRR tracks and is located between the tracks and a parking lot area. On March 16, 2010, SFPP personnel were conducting routine maintenance activities and encountered petroleum hydrocarbon-stained soils while performing hand excavation to expose a 2-inch diameter check valve bypass assembly attached to the 12-inch diameter underground pipeline. Upon identifying the petroleum hydrocarbon impacted soil, SFPP personnel initiated SFPPs California Notification procedure and implemented initial response activities. Several investigations have been conducted. A soil vapor extraction system began operating in 2014 and continues to operate to remove petroluem hydrocarbon contamination at the Site.

Status:	Completed - Case Closed
Status Date:	09/15/2014
Case Worker:	VJF
RB Case Number:	340104
Local Agency:	Not reported
File Location:	Regional Board
Local Case Number:	RO0000137
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	In February 1986, a 1,000-gallon underground storage tank was removed from the site, and gasoline constituents were detected in the subsurface in soil, soil vapor, and groundwater testing. An investigation was conducted to assess the extent of gasoline constituents in the soil and groundwater , and a total of seven groundwater monitoring wells were installed as part of the investigation. Remediation activities included the extraction of separate-phase gasoline constituents from the underlying groundwater, and natural attenuation to degrade the residual hydrocarbons. Historical quarterly groundwater monitoring data, collected since 1986, indicated that the extent of dissolved hydrocarbons was stable to shrinking both in concentration and in areal extent. This case was closed on 15 September 2014.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Address: 2000 ROYAL OAKS DR
City,State,Zip: SACRAMENTO, CA 95813
Site ID: 79429
CERS ID: 10220644
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 79429
Site Name: US POSTAL SRVC: VEHICLE MNTNCE
Violation Date: 08-29-2016
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 02/07/2017. Observation: Waste brake lathe grindings, which the facility owner/operator has identified as a hazardous waste, were observed built up on the shop floor under the shop brake lathe. The facility owner/operator is required to operate the facility in a manner to prevent unplanned release of hazardous materials/hazardous wastes to the environment. This would include cleaning up all hazardous waste spills promptly upon discovery. Correction: Properly clean up all waste brake lathe grinding spills and submit photo documentation showing violation correction.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 79429
Site Name: US POSTAL SRVC: VEHICLE MNTNCE
Violation Date: 01-09-2020
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.
Violation Notes: Returned to compliance on 10/20/2020.
Violation Division: Sacramento County Env Management Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 79429
Site Name: US POSTAL SRVC: VEHICLE MNTNCE
Violation Date: 08-29-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 01/30/2018. Observation: The facility was observed to have reportable quantities of Safety Clean Heavy Duty Cleaner/Degreaser in the wash rack area but has not reported this hazardous material on the facility hazardous material business plan

VEHICLE MAINTENANCE FACILITY (Continued) **S103427267**

(HMP). Correction: Complete/Submit an HMP chemical inventory sheet through the CERS on-line HMP database for this material and notify Specialist Ryan Artz once this has been completed. Also, the facility HMP chemical inventory sheet currently on file for compressed Oxygen listed the maximum daily amount and largest container as 126 cubic feet. The compressed oxygen cylinder observed on site was approximately 275 cubic feet. Update the HMP chemical inventory sheet for compressed oxygen to disclose the correct volume of this material that is stored on site.

Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 79429
Site Name: US POSTAL SRVC: VEHICLE MNTNCE
Violation Date: 01-09-2020
Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes: Returned to compliance on 10/20/2020. Undetermined status: Pending hazardous waste determination for waste aqueous brake wash solution (Q259) it is undetermined if the waste generator was required to ship this waste stream using a uniform hazardous waste manifest. Correction: Complete hazardous waste determination (Q259) for the aqueous waste brake wash solutions, and if the waste stream is determined to be a regulated hazardous waste, ship all future hazardous waste shipments using a uniform hazardous waste manifest.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 79429
Site Name: US POSTAL SRVC: VEHICLE MNTNCE
Violation Date: 01-09-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 10/20/2020. Observation: The facility owner/operator has failed to complete and submit the annually required hazardous materials business plan (HMBP) renewal recertification. Correction: Review and resubmit each component of the facility HMBP through the CERS on-line database. Notify Specialist Ryan Artz when this has been completed.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 79429
Site Name: US POSTAL SRVC: VEHICLE MNTNCE
Violation Date: 08-29-2016
Citation: 22 CCR 15 66265.195(c) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(c)
Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.

VEHICLE MAINTENANCE FACILITY (Continued) **S103427267**

Violation Notes:	Returned to compliance on 05/25/2017. Observation: At the time of facility inspection, the Veeder Root used oil tank monitoring system was not working (no power). The facility "AST's Tanks Daily Inspection Log" had been completed for the day of inspection (8/29/2016) and had noted that the secondary containment was free of waste and liquid even though the tank system monitoring equipment wasn't working that morning. Per facility staff there is no other method to monitor the tank system for leaks from the primary tank other than the Veeder Root leak detection probe. Correction: Re-train facility staff specifically on the hazardous waste tank daily inspection requirements and submit a copy of this updated training to Specialist Ryan Artz.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	79429
Site Name:	US POSTAL SRVC: VEHICLE MNTNCE
Violation Date:	01-09-2020
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 10/20/2020. Observation: The employee hazard communication training refresher was last provided to shop staff on 3/28/2018. Haz Comm refresher is required to be completed annually with applicable facility staff. Correction: Provide employee haz comm refresher to applicable facility staff and submit a copy of the training roster sheet to Specialist Ryan Artz.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	79429
Site Name:	US POSTAL SRVC: VEHICLE MNTNCE
Violation Date:	08-29-2016
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 05/25/2017. Observation: The facility hazardous waste accumulation container of oily solids was observed left open at the time of facility inspection. All hazardous waste accumulation containers are required to be kept closed unless adding/removing material. Correction: Properly close this hazardous waste accumulation container and submit photo documentation showing violation correction.

VEHICLE MAINTENANCE FACILITY (Continued) **S103427267**

Site Name:	US POSTAL SRVC: VEHICLE MNTNCE
Violation Date:	01-09-2020
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 10/20/2020. Observation: Spills of oily water were observed in the large cabinet washer oil skimmer bucker hazardous waste accumulation secondary containment. All hazardous waste spills are required to be cleaned up immediately. Correction: Throughly clean up all hazardous waste oily water spills associated with the large cabinet washer oil skimmer accumulation container and submit photo documentation showing violation correction to Specialist Ryan Artz.

Violation Date:	08-29-2016
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes:	Returned to compliance on 05/25/2017. Observation: A facility employee 'hazardous waste management training' printed out powerpoint presentation was observed on site at the time of facility inspection but the facility did not have any records documenting if/when the facility staff subject to this training requirement has completed the hazardous waste management training. The facility owner/operator is required to retain training records for the previous 3 years showing that facility staff that are required to completed hazardous waste training have done so within 6 months of hire and annually thereafter. Correction: Ensure that all facility staff that are subject to hazardous waste training requirements have completed the training course and have a documented roster sign off sheet that is maintained for 3 years.

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

VEHICLE MAINTENANCE FACILITY (Continued) **S103427267**

Violation Notes:	Returned to compliance on 10/20/2020. Observation: The facility owner/operator (waste generator) has failed to make a hazardous waste determination for the waste aqueous brake wash solutions generated on-site. Waste generators are required to make a hazardous waste determination for all wastes generated on-site. Correction: Make a documented hazardous waste determination for the waste aqueous brake wash solutions that are generated on-site and submit copy of the waste determination to Specialist Ryan Artz.

Violation Date:	08-29-2016
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 02/07/2017. Observation: 1. The facility staff stated that metal grindings generated from the bench grinders were being managed as scrap metal. The facility owner/operator appears to have failed to make a proper hazardous waste determination for these metal fines generated on site. 2. Facility is currently managing waste brake wash solution as a non-hazardous waste stream. At the time of facility inspection the facility had no documentation for a hazardous waste determination for this waste stream. Correction: 1. Make a documented hazardous waste determination for the metal fines generated from shop cutting or grinding operations and submit a copy of this determination to Specialist Ryan Artz. 2. Make a documented hazardous waste determination for the waste brake wash solution and submit a copy of this determination to Specialist Ryan Artz.

RB Case Number: 341197
Local Agency: Not reported
File Location: Local Agency
Local Case Number: D512
Potential Media Affect: Soil
Potential Contaminants of Concern: Other Solvent or Non-Petroleum Hydrocarbon
Site History: A small (350-500 gallon) fuel tank was located in the sidewalk adjacent to a restaurant supply company. A remote fuel dispenser was located next to the building, approximately 35 feet from the tank. On January 23, 1998, Wallace-Kuhl & Associates (WKA) advanced one soil boring near the dispenser and one to intercept soil under the tank. Soil contaminated with gasoline was found at both locations. On January 27, 1998 the tank was properly abandoned in place under permit. From January 2001 to April 2002 WKA advanced seven soil borings that defined the vertical and lateral extent of hydrocarbons in soil. In April 2006 Western Resource Management (WRM) installed two soil vapor extraction (SVE) wells and an SVE system. The SVE system operated until March 2007 removing approximately 400 pounds of gasoline. In August 2008 WRM submitted a No Further Action Request

FRED CULLINCINI TRUST (Continued) **S103480166**

Report that included a sensitive receptor survey, human health risk assessment, fate and transport analysis of remaining soil contaminants, and results of confirmation soil and soil-vapor sampling. Fate and transport modeling (VLEACH) indicated that groundwater below the site was not likely to become impacted by remaining soil hydrocarbons, and that human health risks were below target risk goals. On October 3, 2008 the SA/MS closure committee reviewed a summary of site environmental work and determined that no further action was necessary pending certain documentation revisions, well destruction and waste removal. The Central Valley Regional Water Quality Control Board concurred with this finding. Wells were properly destroyed on March 30, 2009, and the required revisions were submitted in May 2009.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 04/16/2013
Comments: DTSC determined there is sufficient data to suggest that a limited, shallow excavation should be further considered, as the excavation will affect the operational time-frame and extracted vapor treatment significantly.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/08/2012
Comments: DTSC requested the Third Quarter 2012 groundwater monitoring report present all available geologic and groundwater data, and include an update to the site conceptual model.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

1031 ARDEN WAY (Continued) **U001615244**

Completed Document Type: Monitoring Report
Completed Date: 11/29/2012
Comments: The Report recommends reducing the collection of groundwater samples for volatile organic compound analyses in the deeper wells from quarterly to annual. DTSC requested quarterly monitoring continue, and that two wells be redeveloped.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/20/2013
Comments: It is not clear what the source of contamination is in upgradient wells 5A and 7A or what, if any, action is planned to identify the source of this contamination. If contamination in these wells is believed to be sourced from the 1031 Arden Way site, a mechanism for its transport upgradient to areas south of Arden Way should be presented in all future monitoring reports. If this contamination is believed to be sourced from another release, then future reports should 1) discuss possible location(s) where this potential release point is/was located and 2) identify actions that are proposed or being considered to verify this potential.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/23/2013
Comments: First Quarter 2013 Groundwater Monitoring Report

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 04/10/2013
Comments: The Community Profile describes the community and community concerns regarding the potential health risks associated with the Site, and the anticipated public participation activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 10/15/2010
Comments: The Redevelopment Agency of the City of Sacramento (SHRA), submitted an application for the USEPA s Brownfields Community-Wide Assessment Grant for the Swanston Station Transit Village Area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 06/02/2011
Comments: Lead, mercury, cadmium, and chromium were commonly used in paint as pigments and preservatives and are now found in paint on older buildings. Arsenic was used as a pigment, a wood preservative and as an anti-fouling ingredient. Barium has been used as a pigment and a corrosion inhibitor. Asbestos has been used to provide decorative texture to paint. PCBs (polychlorinated biphenyls) were used in paint formulations as drying oils (resins) and plasticizers or softening agents (liquids).
http://www.ecy.wa.gov/programs/hwtr/demodebris/pages2/demopaint.html.

1031 ARDEN WAY (Continued) **U001615244**

The building was constructed during the 1950s and, based on the age of the structure, the above contaminants may be present in the building paints. Asbestos containing material (ACM) may also be present in concrete and remaining plumbing and pipelines. These contaminants may be present in soils adjacent to the building.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 09/14/2010
Comments: Attendees agreed there are two primary goals. First, the Project Property needs to be made suitable for its intended use (i.e., unrestricted residential) at the earliest opportunity. Second, groundwater contamination and releases from the sewer line would need to be addressed. These efforts will proceed in parallel. Attendees agreed that the Project is to proceed as quickly as possible by implementing a dynamic work strategy and working closely in order to minimize unnecessary delays preparing technical reports and workplans. Attendees also agreed a comprehensive Site Conceptual Model (SCM) which identifies all the site history, technical data and uncertainties is needed to establish and support the investigative process.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/18/2011
Comments: For offsite waste material, DTSC requires that waste be handled properly by state authorized haulers and treatment, storage, and disposal (TSD) facilities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 01/18/2012
Comments: DTSC requested Shell Oil Company provide information by April 2, 2012, regarding operations at 1099 Arden Way.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 11/27/2012
Comments: From: Brown, Jeff@DTSC ; Sent: Friday, November 30, 2012 10:05 AM; To: McMahan, Lance@DTSC; Subject: Aramark, Arden Way- Field Report for 11/27 Site Visit; Lance, Please find attached a summary of events for my site visit conducted on 11/27. As noted, no issues or concerns arose. I believe the use of a bladder pump vs. submersible Grundfos pump led to a smoother sampling event and the collection of representative parameter data. Jeff

1031 ARDEN WAY (Continued) **U001615244**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received
Completed Date: 10/07/2011
Comments: The Site Vicinity Properties of Interest document for the property located at 1031 Arden Way, Sacramento, California (Site) supplements the information presented in the Site Conceptual Model (SCM) and Preliminary Endangerment Assessment (PEA) Work Plan. Specifically, a site conceptual model includes information regarding potential releases near a site. For 1031 Arden Way, this information is voluminous, exceeding all other elements of the SCM combined. Since this information is primarily historic, it is published in this separate, complementary report for reference in the PEA Workplan and subsequent documents, as appropriate.

Completed Document Type: Monitoring Report
Completed Date: 11/29/2012
Comments: The Report recommends reducing the collection of groundwater samples for volatile organic compound analyses in the deeper wells from quarterly to annual. DTSC requested quarterly monitoring continue, and that two wells be redeveloped.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/20/2013
Comments: It is not clear what the source of contamination is in upgradient wells 5A and 7A or what, if any, action is planned to identify the source of this contamination. If contamination in these wells is believed to be sourced from the 1031 Arden Way site, a mechanism for its transport upgradient to areas south of Arden Way should be presented in all future monitoring reports. If this contamination is believed to be sourced from another release, then future reports should 1) discuss possible location(s) where this potential release point is/was located and 2) identify actions that are proposed or being considered to verify this potential.

Comments: The Redevelopment Agency of the City of Sacramento (SHRA), submitted an application for the USEPA s Brownfields Community-Wide Assessment Grant for the Swanston Station Transit Village Area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 06/02/2011
Comments: Lead, mercury, cadmium, and chromium were commonly used in paint as pigments and preservatives and are now found in paint on older buildings. Arsenic was used as a pigment, a wood preservative and as an anti-fouling ingredient. Barium has been used as a pigment and a corrosion inhibitor. Asbestos has been used to provide decorative texture to paint. PCBs (polychlorinated biphenyls) were used in paint formulations as drying oils (resins) and plasticizers or softening agents (liquids).
http://www.ecy.wa.gov/programs/hwtr/demodebris/pages2/demopaint.html.
The building was constructed during the 1950s and, based on the age of the structure, the above contaminants may be present in the building paints. Asbestos containing material (ACM) may also be present in concrete and remaining plumbing and pipelines. These contaminants may be present in soils adjacent to the building.

Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 09/14/2010
Comments: Attendees agreed there are two primary goals. First, the Project Property needs to be made suitable for its intended use (i.e., unrestricted residential) at the earliest opportunity. Second, groundwater contamination and releases from the sewer line would need to be addressed. These efforts will proceed in parallel. Attendees agreed that the Project is to proceed as quickly as possible by implementing a dynamic work strategy and working closely in order to minimize unnecessary delays preparing technical reports and workplans. Attendees also agreed a comprehensive Site Conceptual Model (SCM) which identifies all the site history, technical data and uncertainties is needed to establish and support the investigative process.

Comments: The Site Vicinity Properties of Interest document for the property located at 1031 Arden Way, Sacramento, California (Site) supplements the information presented in the Site Conceptual Model (SCM) and Preliminary Endangerment Assessment (PEA) Work Plan. Specifically, a site conceptual model includes information regarding potential releases near a site. For 1031 Arden Way, this information is voluminous, exceeding all other elements of the SCM combined. Since this information is primarily historic, it is published in this separate, complementary report for reference in the PEA Workplan and subsequent documents, as appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

468374
1976 EDGEWATER ROAD AND CANTERBURY RD PARCEL,
SACRAMENTO, CA 95815

TARGET PROPERTY COORDINATES

Latitude (North):	38.601738 - 38ˆ 36’ 6.26’’
Longitude (West):	121.458673 - 121ˆ 27’ 31.22’’
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	634218.2
UTM Y (Meters):	4273502.0
Elevation:	22 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5619748 SACRAMENTO EAST, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

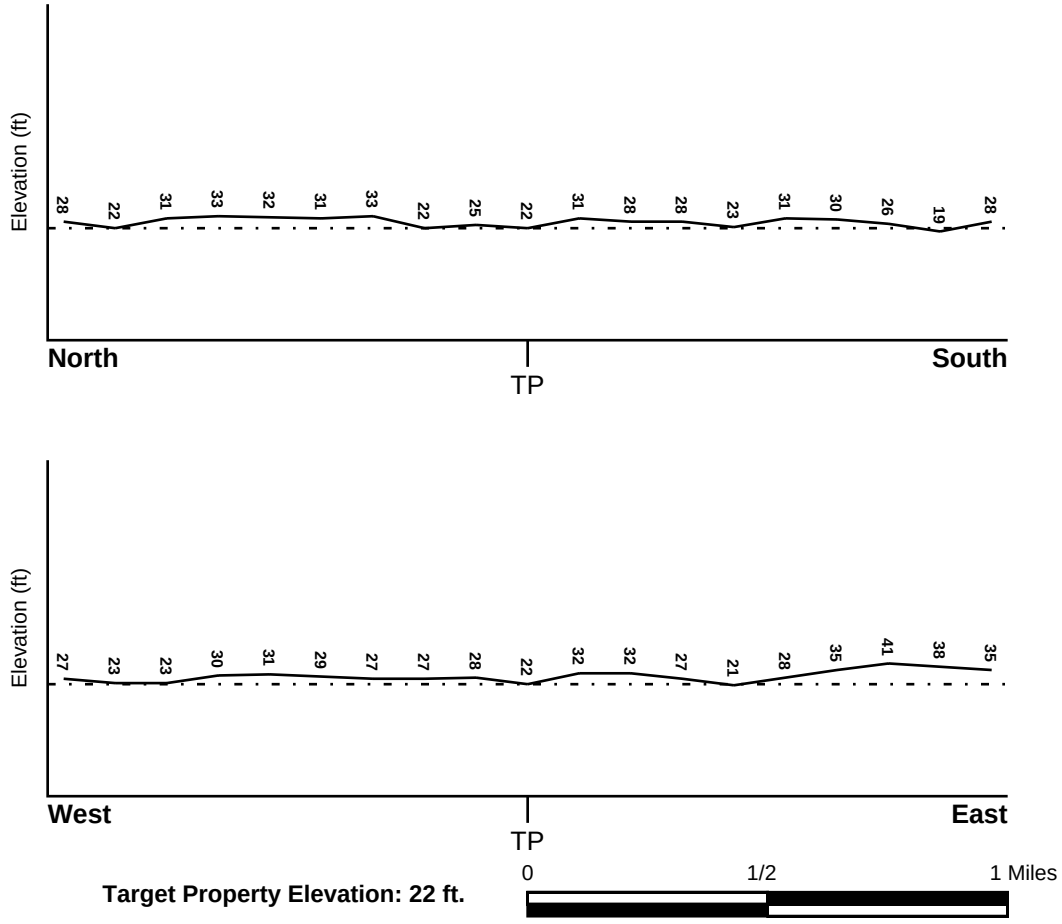

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 22 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06067C0177J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06067C0176J	FEMA FIRM Flood data
06067C0180J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SACRAMENTO EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: JACKTONE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 9 Min: 7.9
2	11 inches	33 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 9 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	33 inches	51 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 9 Min: 7.9
4	51 inches	59 inches	stratified loam to clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 9 Min: 7.9

Soil Map ID: 2

Soil Component Name: COLUMBIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	11 inches	59 inches	stratified loamy sand to silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

Soil Map ID: 3

Soil Component Name: SAN JOAQUIN

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	12 inches	29 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 1.4 Min: 0.42	Max: 7.8 Min: 6.1

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Walnut Creek, CA 94597
Contact: Rocio Romero

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 49F4-41C8-BD95

PO # 317908

Project 468374

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 49F4-41C8-BD95

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

OWNER INFORMATION

California Government Code Section 6254.21 states that “No state or local agency shall post the home address or telephone number of any elected or appointed official on the internet without first obtaining the written permission of that individual.” As the cost to collect and continuously update that information is prohibitive, the Assessor’s website does not display the Assessee name. It may be obtained by calling 916-875-0700 or by visiting the Assessor's Office at 3636 American River Drive, Suite 200, in Sacramento.

City of SACRAMENTO

Try our new regional search portal, Search.cityofsacramento.org. The new website allow you to search many Sacramento websites and information resources simultaneously.

Helpful Hints

Searching is simple: Just type a term in the search box and click the search button.The application will search document content that's relevant to your search. Every word matters. Generally, all the words you put in the query will be used.

Search is always case insensitive. A search for [City of Sacramento] is the same as a search for [city of sacramento]. Generally, punctuation and special characters are ignored.

Document Category	Building Permit
Project/Permit Number contains	
APN Number contains	
Address contains	1976 edgewater

Advanced Search Clear Fields

Your Search did not match any records.
Suggestions:

- Make sure all words are spelled correctly.
- Try different keywords.
- Try more general keywords.

Subject: Thank You For Submitting a PRA Request

Workflow Notification

Hello Michael Kalwasinski,

Thank you for submitting a PRA Request. The PRA Request is being processed and you can expect to hear back from the District within 10 business days.

Below is a record of your submission details:

Request Details:

First Name: Michael
Last Name: Kalwasinski
Company: AEI Consultants
Address: 2500 Camino Diablo
City: Walnut Creek
State / Province: CA
ZIP / Postal Code: 94597
Home Phone: 5079909596
Business Phone:
Fax Number:
E-Mail: mkalwasinski@aeiconsultants.com
Facility Description: Vacant land
Information Description: AEI Consultants is currently conducting the Phase I Environmental Site Assessment for the properties of 1976 Edgewater Road and 380 Southgate Road. I am requesting any current or archived records on any applications, permits, violations, or episodes for the property. Thank you.
Response Method: E-mail

Michael Kalwasinski

From: Virginia Muller <VMuller@airquality.org>

ASTM USER QUESTIONNAIRE

AEI Consultants

ASTM E 1527-13 USER QUESTIONNAIRE

To qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the User (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: 1976 Edgewater Road

Property Owner (Name/Title/Company): North Sacramento Land Company

Phone/Email: 916-796-5519

Key Site Personnel (Name/Title/Company): Jack Greer (Property Manager)

Phone/Email: 916-796-5519

Past Owner (Name/Title/Company)

Phone/Email:

1. Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate, see NOTE 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

NOTE 1: In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

☐ Yes ▣ No If yes, please include an explanation in the space provided below:

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi).

Did a search of recorded land title records (or judicial records where appropriate, see NOTE 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). Institutional Controls are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

☐ Yes ▣ No If yes, please include an explanation in the space provided below:

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ▣ No If yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

▣ Yes ☐ No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

☐ Yes ▣ No

Comments:

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

a. Do you know the past uses of the property?
▣ Yes ☐ No

b. Do you know of specific chemicals that are present or once were present at the property?
☐ Yes ▣ No

c. Do you know of spills or other chemical releases that have taken place at the property?
☐ Yes ▣ No

d. Do you know of any environmental cleanups that have taken place at the property?
☐ Yes ▣ No

If yes for questions above, please include an explanation in the space provided below:

Vacant land since the dawn of time

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

☐ Yes ▣ No If yes, please include an explanation in the space provided below:

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Sacramento County, California
Survey Area Data: Version 20, Sep 3, 2021

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Apr 23, 2022—Apr 24, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
117	Columbia sandy loam, drained, 0 to 2 percent slopes	13.8	16.1%
161	Jacktone clay, drained, 0 to 2 percent slopes	6.4	7.5%
211	San Joaquin fine sandy loam, 0 to 3 percent slopes	13.5	15.7%

APPENDIX H

QUALIFICATIONS

Michael Kalwasinski

Project Manager, Due Diligence

EDUCATION

- B.A. – Geology, University of Minnesota-Duluth

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Kalwasinski provides expertise in environmental project management, consulting, and due diligence services to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database and Historical Records Reviews for large- and small-scale industrial, commercial, multi-tenant residential, and rural properties.

PROJECT EXPERIENCE

Project experience for Mr. Kalwasinski includes:

- Phase I Environmental Site Assessments (PHI ESAs)
- Limited Environmental Site Assessments (LESAs)
- Environmental Transaction Screens (ETSs)
- Records Research with Risk Assessments (RSRAs)
- Regulatory Database Reviews
- Historical Records Reviews

In addition, prior to joining the environmental consulting industry, Mr. Kalwasinski spent one year in the oil and gas industry as a mud logger in west Texas, as well as spending a year and a half in the exploration industry doing geophysics work for mining companies in Nevada, Arizona, Alaska, and occasionally other parts of the United States.

Vanessa Winbury

National Client Manager

EDUCATION

- B.A. Geography – Montclair State University, cum laude
  Concentration in Environmental Studies
  Senior Thesis: Hudson River Sediment Contamination

CERTIFICATIONS

- EPA/AHERA Accredited Asbestos Inspector
- New York State Asbestos Inspector
- OSHA 40 Hour HAZWOPER Certification

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Winbury has worked in the environmental consulting industry since 2010, conducting various phases of environmental assessments and asbestos, lead, mold, and indoor air quality screenings. Ms. Winbury has performed hundreds of assessments, including over 500 Phase I Environmental Site Assessments, for lending institutions and private investment groups on multifamily residential, commercial, and industrial properties throughout the United States. As a National Client Manager, Ms. Winbury is responsible for the day-to-day responsibilities of providing client, project manager, and subcontractor interface while maintaining QA/QC protocols to ensure ASTM compliance, a consistent due diligence product, and satisfaction of client requirements.

PROJECT EXPERIENCE

Project experience for Ms. Winbury includes:

- Phase I Environmental Site Assessments
- HUD Phase I Environmental Site Assessments
- Real Estate Transaction Screens
- Environmental audits for dry cleaning facilities and automotive repair shops
- File and regulatory database reviews
- Asbestos, lead-based paint, and indoor air quality screenings
- Lead-in-water sampling

Peter J. McIntyre, PG, REA

Executive Vice President, Principal Geologist, Environmental Services

EDUCATION

- University of California at Berkeley, Haas School of Business, Masters of Business Administration, May 2011
- University of California at Berkeley, B.A. Geology, May 1997

CERTIFICATIONS

- California Professional Geologist (PG) # 7702
- California Registered Environmental Assessor I (REA I) # 07977
- Illinois Licensed Professional Geologist # 196.001173
- Nevada Certified Environmental Manager (CEM) # 2108
- North Carolina Registered Geologist # 2496
- New York State Registered Geologist # 000263
- OSHA 40-Hour HAZWOPER Training
- OSHA 8-Hour HAZWOPER Site Supervisor
- Member: Groundwater Resources Association (GRA), Urban Land Institute (ULI)

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. McIntyre has over twenty years of experience in environmental consulting and engineering services. His project experience includes: Soil and groundwater investigation design and implementation; Environmental Due Diligence (Transaction Screens, ASTM Phase I and Phase II ESAs); hydrologic assessment and modeling; underground storage tank (UST) removals, closure, and compliance; and the development and implementation of remedial action projects. Additional experience includes the design and management of asbestos survey and abatement projects.

Mr. McIntyre has managed engagements and staff throughout Northern California and nationwide. Responsibilities include client relationship management, project oversight, design and review, and staff management and training. Clients include private and public sector clients, including commercial, industrial and residential real estate, petroleum industry, attorneys, developers, financial institutions, and public agencies.

PROJECT EXPERIENCE

Project experience for Mr. McIntyre includes:

- The design and implementation of numerous site investigations, groundwater monitoring programs, remedial investigations / feasibility studies (RI/FS), pilot tests, and corrective action plans (CAP) under the direction of various state and local regulatory oversight agencies

- The design and implementation of numerous soil, soil gas, and groundwater investigations for environmental due diligence (Phase II Investigations) for a variety of suspected contaminants, including UST sites, dry-cleaning facilities, plating and galvanizing operations, agricultural operations, and other industrial facilities
- Environmental engineering and consulting services for numerous development and redevelopment projects (brownfield sites), including properties impacted with solvents, metals, petroleum, and agricultural chemicals. Projects have included planning and implementation of preliminary endangerment assessments (PEA) and portions of environmental impact reports (EIR) relating to hazardous materials during development planning, risk evaluations, release characterization and mitigation, and consulting with redevelopment agencies, investors, and regulatory agencies
- Technical oversight and management for projects in Colorado, Nevada, Illinois, and throughout the United States
- Investigation and mitigation at active gasoline stations and fuel facilities with significant free phase and dissolved phase contaminant plumes
- Design, implementation, and management of various remedial strategies, including the use of soil vapor extraction / air sparge, dual phase extraction, in situ chemical oxidation (ISCO), bio-remediation, soil removal, groundwater pump and treat, and natural attenuation
- Design and implementation vapor intrusion assessments and mitigation
- Providing witness testimony and litigation support, including document review, site assessment, and remediation services

APPENDIX I

LIST OF COMMONLY USED ABBREVIATIONS

UNITS

µg/L	Micrograms per Liter	**pCi/L**	PicoCuries per Liter
mg/kg	Milligrams per Kilogram	**ppb**	Parts per Billion
mg/L	Milligrams per Liter	**ppm**	Parts per Million

ABBREVIATIONS AND ACRONYMS

ACM	Asbestos-Containing Material	**NESHAP**	National Emission Standards for Hazardous Air Pollutants
ADJ	Adjacent site	**NFA**	No Further Action
AEI	AEI Consultants	**NFRAP**	No Further Remedial Action Planned
AHERA	Asbestos Hazard Emergency Response Act	**NLR**	No Longer Reporting
APN	Assessor's Parcel Number	**NOV**	Notice of Violation
AST	Aboveground Storage Tank	**NPL**	National Priorities List
AUL	Activity and Use Limitation	**O&M**	Operations and Maintenance
bgs	Below Ground Surface	**OEC**	Other Environmental Considerations
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes	**OSHA**	Occupational Safety and Health Administration
CERCLA	Comprehensive Environmental Response Compensation and Liability Act	**PCB**	Polychlorinated Biphenyl
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System	**PCE, PERC**	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene
CESQGs	Conditionally Exempt Small Quantity Generators	**RCRA**	Resource Conservation and Recovery Act
COC	Contaminant of Concern	**REC**	Recognized Environmental Condition
CREC	Controlled Recognized Environmental Condition	**RP**	Responsible Party
EC	Engineering Controls	**SDS**	Safety Data Sheet
EDR	Environmental Data Resources, Inc.	**SEMS**	Superfund Enterprise Management System
EPA	Environmental Protection Agency	**SF**	Square Footage/Square Feet
ERIS	Environmental Risk Information Services	**SP**	Subject Property
ERNS	Emergency Response Notification System	**SQG**	Small Quantity Generator
ESA	Environmental Site Assessment	**SWLF**	Solid Waste Landfill
GPR	Ground-Penetrating Radar	**SVOC**	Semi-Volatile Organic Compound
HREC	Historical Recognized Environmental Condition	**TCE**	Trichloroethylene, Trichloroethene
HVAC	Heating, Ventilation and Air Conditioning	**TPH**	Total Petroleum Hydrocarbons
HWS	Hazardous Waste Site	**TPHd**	Total Petroleum Hydrocarbons (diesel range)
IC	Institutional Controls	**TPHg**	Total Petroleum Hydrocarbons (gasoline range)
LBP	Lead-Based Paint	**TPHo**	Total Petroleum Hydrocarbons (oil range)
LCP	Lead-Containing Paint	**TRPH**	Total Recoverable Petroleum Hydrocarbons
LLP	Landowner Liability Protection	**TSDF**	Treatment, Storage, and Disposal Facility
LQG	Large Quantity Generator	**USDA**	United States Department of Agriculture
LUST	Leaking Underground Storage Tank	**USGS**	United States Geological Survey
MCL	Maximum Contaminant Level	**UST**	Underground Storage Tank
MTBE	Methyl Tertiary Butyl Ether	**VCP**	Voluntary Cleanup Program
ND	None Detected	**VOC**	Volatile Organic Compound
