EXECUTIVE SUMMARY

Brusca Associates, Inc. has prepared this *Phase I Environmental Site Assessment* of the subject property in general accordance with ASTM Standard E 1527-13. Our assessment has been performed to determine if the potential exists for significant site contamination from either on- or off-site sources for the purpose of identifying any *recognized environmental conditions* in connection with the subject property. We understand that this report will be used for environmental due diligence purposes related to a commercial real estate transaction involving the subject property.

The approximate 22-acre subject property is situated directly westerly of Fong Ranch Road and easterly of an onramp from Truxel Road to Interstate 80 in Sacramento, Sacramento County, California. The subject property is addressed as 3625 Fong Ranch Road and is identified by the Sacramento County Assessor's Office as parcel number (APN) 225-0170-064. The subject site currently is vacant and unused. At the time of our site reconnaissance, the central and southerly portions of the site supported sparse, low, dry grasses, and the far northerly portion of the site supported waist-high volunteer grasses. A sizable stormwater drainage canal traverses the northerly portion of the property in an east-west direction and flows to the west to a culvert that extends underground beneath Interstate 80. The canal is situated within a raised embankment that is elevated about six feet above adjoining site grades. It is indicated that this canal is managed by Reclamation District 1000, and discharges to the west of this site into the East Drain, and eventually into the Main Drain which discharges to the Sacramento River.

Concrete rubble and other environmentally innocuous debris were observed at various locations on the property. We observed sizable rock fragments mixed with surface soils on the far easterly portion of the site, and low soil/fill piles mixed with rubble, vegetation, and other debris were observed along the southerly margin of the property. Additionally, we observed a substantial amount of debris, rubbish, and household materials as well as a makeshift shelter associated with a homeless encampment on the far northerly portion of the property. We did not observe any environmental concerns such as evidence of hazardous substances or staining in the areas of debris or soil piles on the property. Due to the amount of debris and for safety reasons, we were unable to perform a detailed observation/examination of the entire area of homeless encampment. Nonetheless, it is considered unlikely that the onsite homeless activities have resulted in significant environmental hazardous materials impairment conditions. Our reconnaissance identified no obvious evidence that current use or activities on the subject property have resulted in a significant release of hazardous substances or petroleum products to the environment on the subject property.

Our historical research indicates that the subject property historically consisted of low-lying undeveloped/unused land (an area identified as "Bush Lake") through the early 1900s. The property was farmed (apparently in dry crops) as early as the 1930s; at that time rural/farm access roadways traversed portions of the property, and an irrigation/drainage canal traversed the northerly portion of the site. It appears that the onsite canal was improved and/or widened by the 1980s, and currently functions as a regional stormwater drainage canal. The property continued to be farmed until initiation of nearby developments around the 1990s. Since that time, the property apparently has remained vacant and unused (save for the stormwater canal). It is indicated that past site activities have not included the use or storage of significant quantities of hazardous substances or petroleum products.

Our historical research has not revealed the likelihood that past on-site activities would have resulted in a significant release of hazardous substances or petroleum products to the environment on the subject property.

As requested, in conjunction with our Phase I study we collected surface soil samples from the subject property for screening testing to evaluate whether any past onsite pesticide applications (related to past onsite farming operations) or if historical leaded-fuel vehicle emissions along the Interstate 80 freeway directly northerly of the property resulted in significant impairment of surface soils (in our experience, surface soils on in areas adjoining older prominent roadways can contain aerially deposited lead [ADL] as a result of leaded-fuel vehicle emissions). None of the soil samples tested for organochlorine pesticides contained any of the pesticide analytes at concentrations above the laboratory reporting limits. Some of the soil samples contained low concentrations of lead and/or arsenic; however, the detected concentrations of these metals are within typical background (naturally-occurring) soil concentrations in the region and are not considered a concern. The laboratory results from the soil samples collected from the subject property do not indicate that past onsite farming activities or historical vehicle emissions along the Interstate 80 freeway northerly of the property resulted in significant surface soil impact conditions.

Neither our research of government agency information nor our observations of adjoining areas revealed evidence of nearby contamination conditions of sufficient magnitude or proximity to be considered a threat to the environment on the subject property.

This Phase I Environmental Site Assessment has not revealed evidence of *recognized environmental conditions* in connection with the subject property. In our opinion, the findings of this Phase I study do not warrant further due diligence environmental investigation of the subject property at this time. In consideration of the environmental condition of the property, please refer to the information contained in the remainder of this report.

March 23, 2022

Anton Fong Ranch Owners, LLC Attention: Le Anne Thomas 1610 R Street, Suite 250 Sacramento, CA 95811

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND SCREENING SOIL SAMPLING/TESTING FONG RANCH ROAD PROPERTY APN 225-0170-064 3625 Fong Ranch Road Sacramento, Sacramento County, California Brusca Project No. 115-004

1.0 INTRODUCTION

Brusca Associates, Inc. has completed this *Phase I Environmental Site Assessment* of the subject property at the request of Anton Fong Ranch Owners, LLC. The approximate 22-acre subject property is situated directly westerly of Fong Ranch Road and easterly of an onramp from Truxel Road to Interstate 80 in Sacramento, Sacramento County, California. The subject property is addressed as 3625 Fong Ranch Road and is identified by the Sacramento County Assessor's Office as parcel number (APN) 225-0170-064. The subject site currently is vacant and unused. In conjunction with our Phase I study, we collected surface soil samples from the property for screening testing to evaluate whether any past onsite pesticide applications (related to past onsite farming operations) or if historical leaded-fuel vehicle emissions along Interstate 80 directly northerly of the property resulted in significant impairment of surface soils; those results are included herein.

We understand that this report will be used for environmental due diligence purposes related to a commercial real estate transaction involving the subject property. This *Phase I Environmental Site Assessment* has been performed in general accord with the scope and limitations of the 2013 American Society for Testing and Materials (ASTM) *Standard Practice for Phase I Environmental Site Assessments Process* (E 1527-13).

1.1 PURPOSE AND KEY DEFINITIONS

The purpose of our assessment has been to identify any *recognized environmental conditions* in connection with the subject property to determine if the potential exists for significant site contamination from either on- or off-site sources. A *recognized environmental condition* is defined in the referenced standard as:

"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions." A de minimis condition is defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions".

We have also considered whether any historical recognized environmental conditions or controlled recognized environmental conditions are associated with the property. A historical recognized environmental condition is defined as:

"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)".

A controlled recognized environmental condition is defined as:

"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)".

1.2 PROPERTY INFORMATION AND LOCATION

General Property Information/Location					
Property Name: Fong Ranch Road Property Address: 3625 Fong Ranch Road, Sacramento, California				Sacramento, California	
APN: 225-0170-064	County:	Sacramento	Owner:	City of S	Sacramento
Location: See Vicinity Map, Plate 1 Size: Approx. 22 acres				Approx. 22 acres	
Latitude/Longitude: 38.6341190, -12	0 Current Use	Current Use: Vacant/unused			
Considered Future Use: Residential					

1.3 SCOPE OF WORK

Protocol and ASTM Scope Items

This *Phase I Environmental Site Assessment* has been performed in general accord with the scope and limitations of the 2013 ASTM *Standard Practice for Phase I Environmental Site Assessments Process* (E 1527-13). A *Phase I Environmental Site Assessment* is the primary component of an "*All Appropriate Inquiry*" designed to evaluate the environmental integrity of a property as part of the due diligence required to qualify for Landowner Liability Protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The regulatory requirements and standards for Phase I environmental site assessment were established by the Federal Environmental Protection Agency and are outlined in 40 CFR Part 312, "*The Final Rule for Standards and Practices for All Appropriate Inquiries (AAI)*".

The scope of this investigation included:

- Review of physical setting information sources
- Historical research, including review of any available, relevant environmental reports
- Site reconnaissance and observations of adjacent and nearby properties
- Interviews of individuals knowledgeable of the property and agency representatives
- Review of regulatory agency listings and records, including an agency database report
- Evaluation of the collected information, and preparation of this report

Non-ASTM Scope Items

As requested, our scope of work included the collection of surface soil samples from the property for screening testing to evaluate whether any past onsite pesticide applications (related to past onsite farming operations) or if historical leaded fuel vehicle emissions along Interstate 80 directly northerly of the property resulted in significant impairment of surface soils. The samples were submitted to a State-certified analytical laboratory for analysis. The results of the soil sampling and analytical testing are presented in *Section 3.5* of this report.

The scope of work associated with this *Phase I Environmental Site Assessment* has not included soil gas or groundwater sampling/testing, a chain-of-title document search, an evaluation of business environmental risk, an environmental compliance audit, research regarding use limitations (deed restrictions), or a property lien search. Our study also has not included evaluation of the following non-ASTM scope items: asbestos-containing building materials or naturally-occurring asbestos; lead-based paint; indoor air quality; industrial hygiene or safety; cultural or historic resources; ecological resources or endangered species; wetlands; biological agents; or, mold. We could develop a scope and cost estimate for performance of non-ASTM scope items upon request.

1.4 EXCEPTIONS AND LIMITATIONS

No significant exceptions to or deviations from the ASTM standard (E 1527-13) were made during the course of our work. The ASTM Standard E 1527-13 is designed to establish good commercial and customary practices to be implemented by the Environmental Professional in performing Phase I assessment of a property in a manner that satisfies CERCLA requirements. Our services are performed

in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. The findings and conclusions presented herein are based on the cited reference materials, conversations, reconnaissance, and other information obtained from a variety of sources deemed to be reliable. No warranty regarding the accuracy of our opinions or conclusions is expressed or implied. It should be understood that the scope of investigation described herein is not exhaustive, and performance of a *Phase I Environmental Site Assessment* cannot completely eliminate uncertainties regarding the potential for environmental impairment of a property.

1.5 USER RELIANCE AND CONFIDENTIALITY

Anton Fong Ranch Owners, LLC and Anton Devco, Inc. may read and rely upon the information, findings, conclusions, and recommendations contained herein. Without prior written consent of the client, Brusca Associates, Inc. will keep confidential and not disclose to any person or entity, any data or information provided by the client or generated in conjunction with the performance of this study. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

2.0 PHYSICAL SETTING

2.1 PHYSICAL SETTING SOURCES

Sources used to determine the regional setting during this study have included the following:

- 1977 CGS Geologic Map of California (1:750,000)
- 1981 CGS Geologic Map of the Sacramento Quadrangle (1:250,000)
- 1985 USGS Geologic Map of the Late Cenozoic Deposits of the Sacramento Valley (1:62,500)
- USGS Rio Linda Quadrangle (1:24,000)
- USDA NRCS Soil Mapping

2.2 TOPOGRAPHY

As shown on the USGS Rio Linda Quadrangle (see Plate 1), the subject property is situated at elevations on the order of 15 feet above sea level. The site is relatively flat, and surface gradients in the vicinity slope gently toward the southwest.

2.3 GEOLOGY AND SOILS

The subject property is situated within the Sacramento Valley in the Great Valley geomorphic province of California. The valley was formed by tilting of the Sierran Block with the western side dropping to form the valley and the eastern side uplifting to form the Sierra Nevada. The valley is characterized by a thick sequence of sediments derived from erosion of the adjacent Sierra Nevada to the east and the Coast Ranges to the west. These sedimentary rocks are mainly Cretaceous in age. The depth of the sediments varies from a thin veneer at the edges of the valley to depths in excess of 50,000 feet near the western edge of the valley. Available geological mapping by the California Geological Survay indicates that the subject site is underlain by Quaternary alluvium. The Quaternary alluvium consists of sands, silts and clays deposited by present-day river systems.

Soil mapping by the US Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) indicates that onsite soils are identified as Consumnes silt loam. This soil unit is indicated to be somewhat poorly drained.

2.4 SURFACE WATER AND GROUNDWATER

There are no surface water bodies on or adjacent to the subject property, except that a sizable stormwater drainage canal traverses the northerly portion of the property in an east-west direction. The onsite drainage canal is situated within an elevated embankment and drains to the west. Storm water generated on the subject property would appear to be directed towards adjoining properties or roadways. We observed no evidence of suspicious run-off to, or from the subject property during our recent site visit.

Groundwater conditions within the general area of the subject property have been considered utilizing information obtained from the California Department of Water Resources, Sacramento County, and the California Regional Water Quality Control Board. These sources indicate that groundwater generally occurs at depths on the order of 20 feet to 30 feet in the general site vicinity. Our research has not revealed specific information regarding the groundwater flow direction in the immediate vicinity of the subject property; however, the predominant regional flow direction is indicated to be southwesterly.

3.0 SITE RECONNAISSANCE

Site Reconnaissance					
Date: March 5, 2022 Brusca Associates, Inc. Representative: Joe Brusca Weather: Partly Cloud			Partly Cloudy		
Site Layout: See Plate 2, S	ite Map	Site Photographs: See Appendix A	Limit	ing Conditions	See below

3.1 SITE DESCRIPTION

The approximate 22-acre subject property is situated directly westerly of Fong Ranch Road and easterly of an onramp from Truxel Road to Interstate 80 in Sacramento, Sacramento County, California. The subject property is addressed as 3625 Fong Ranch Road and is identified by the Sacramento County Assessor's Office as parcel number (APN) 225-0170-064. The subject site currently is vacant and unused.

At the time of our site reconnaissance, the central and southerly portions of the site supported sparse, low dry grasses, and the far northerly portion of the site supported waist-high volunteer grasses. A sizable stormwater drainage canal traverses the northerly portion of the property in an east-west direction and flows to the west to a culvert that extends underground beneath Interstate 80. The canal is situated within a raised embankment that is elevated about six feet above adjoining site grades. It is indicated that this canal is managed by Reclamation District 1000, and discharges to the west of this site into the East Drain, and eventually into the Main Drain which discharges to the Sacramento River. The far westerly portion of the onsite canal is concrete-lined; otherwise, the canal appears to be unlined. Concrete and PVC piping was observed at locations near the canal and appear to be related to the storm drainage infrastructure. The canal contained a moderate amount of water at the time of our site visit.

Concrete rubble and other environmentally innocuous debris were observed at various locations on the property. We observed sizable rock fragments mixed with surface soils on the far easterly portion of the site, and low soil/fill piles mixed with rubble, vegetation, and other debris were observed along the southerly margin of the property. It appears that the soil piles and debris along the southerly margin of the site may have originated at the southerly adjoining high school facility (such as during landscaping activities/maintenance), as evidenced by an opening in the chain-link fence in that area. We did not observe any environmental concerns such as evidence of hazardous substances or staining in the areas of debris and soil piles on the property.

We also observed a substantial amount of debris, rubbish, and household materials as well as a makeshift shelter associated with a homeless encampment on the far northerly portion of the property. We did not observe any environmental concerns associated within the homeless encampment; no evidence of hazardous materials or fuels usage or storage was noted. However, due to the amount of debris and for safety reasons, we were unable to perform a detailed observation/examination of the entire area of homeless encampment. Nonetheless, it is considered unlikely that the onsite homeless activities have resulted in significant hazardous materials impairment conditions.

At the time of our site reconnaissance, we observed a small area of ponded rainwater on the far northerly portion of the property, to the west of the homeless encampment. We also observed a surface level access port/clean-out on the far easterly portion of the property near Fong Ranch Road; this feature consists of a four-inch diameter clay pipe with plastic cap fitting and would appear to be associated with an underground sewer utility.

3.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

No hazardous substances or petroleum products are used/stored on the subject site.

3.3 UTILITIES

Electricity is provided to the area of the subject site by the Sacramento Metropolitan Utility District (SMUD) and natural gas is provided by the Pacific Gas and Electric Company (PG&E). Municipal drinking water is provided by the City of Sacramento Water. The area of the property is connected to the local sewer utility (Sacramento Area Sewer District).

3.4 COMMON SITE-SPECIFIC ENVIRONMENTAL CONCERNS

Potential Environmental Concern	Observations/Comments
Storage Tanks, Vent/Fill Pipes	None revealed by our reconnaissance or research
Petroleum Pipelines or Oil & Gas Wells	None revealed by our reconnaissance or research
Drums	None revealed by our reconnaissance or research
Unidentified Substance Containers	None revealed by our reconnaissance or research
Sumps	None revealed by our reconnaissance or research
Floor Drains	None revealed by our reconnaissance or research
Stains	None revealed by our reconnaissance or research
Septic Systems	None revealed by our reconnaissance or research

Potential Environmental Concern	Observations/Comments		
Stressed Vegetation	None revealed by our reconnaissance or research		
Solid Waste Disposal/Fill Placement	Some soil piles containing assorted debris/rubble were observed along the far southerly margin of the property; see <i>Section 3.1</i>		
Pools of Liquid/Standing Water	A minor amount of standing stormwater was observed on the far northerly portion of the property; see <i>Section 3.1</i>		
Unusual Odors	None revealed by our reconnaissance or research		
Polychlorinated Biphenyls (PCBs)	None revealed by our reconnaissance or research		
Pits, Ponds, or Lagoons; Wastewater Treatment	None revealed by our reconnaissance or research		
Wells	None revealed by our reconnaissance or research		

3.5 SOIL SAMPLING AND LABORATORY TESTING

As requested, in conjunction with our Phase I study we collected surface soil samples from the subject property for screening testing to evaluate whether any past onsite pesticide applications (related to past onsite farming operations) or historical leaded-fuel vehicle emissions along the Interstate 80 freeway directly northerly of the property, resulted in significant impairment of surface soils (in our experience, surface soils in areas adjoining older prominent roadways can contain aerially deposited lead [ADL] as a result of leaded-fuel vehicle emissions). Thirty-two surface soil samples (identified as S1 through S32) were collected on the property; the locations of the samples are shown on Plate 2, *Site Map*. At each location, a soil sample was collected within the upper six inches of the soil profile in accord with standard environmental protocol. The collected samples were placed on ice and transported to a Statecertified laboratory under chain-of-custody documentation.

We instructed the laboratory to create eight, four-part composite samples from the set of soil samples collected across the site for analysis for organochlorine pesticides by EPA Method 8081A. Additionally, twelve of the discrete soil samples (S1, S4, S6, S7, S11, S14, S18, S22, S24, S26, S29, and S31) were analyzed for lead and arsenic by EPA Method 6010B. Lead and arsenic have occasionally been used as components of pesticides. Additionally, as indicated above, lead in surface soils is occasionally a concern on properties adjoining older prominent roadways as a result of ADL. The laboratory report and chain-of-custody documentation are presented in Appendix E. Quality control/quality assurance information is included in the appended laboratory report.

As shown in the appended laboratory report, none of the composite soil samples tested for organochlorine pesticides contained any of the pesticide analytes at concentrations above the laboratory reporting limits. Some of the tested soil samples contained very low concentrations of lead ranging from 6.5 milligrams per kilogram (mg/kg) to 11.5 mg/kg. The concentrations of lead detected in these soil samples are within typical background (naturally-occurring) soil lead concentrations in the region and are well below the commonly used screening value of 80 mg/kg for residential sites; as such, the concentrations of lead detected in the soil samples are not considered a concern. \(^1\)

w Francisco Dov Docional Water Quality Control Docad "Franciscom antal

¹ San Francisco Bay Regional Water Quality Control Board; "Environmental Screening Levels"; July 2019

As shown in the appended laboratory report, the tested soil samples contained low concentrations of arsenic (ranging from 6.9 mg/kg to 9.2 mg/kg). It is typically considered impractical to evaluate arsenic in soils by comparison to screening values (such as the referenced Environmental Screening Levels) since background concentrations of arsenic in native soils typically exceed the screening levels. More commonly, arsenic concentrations in soils are compared to background/naturally-occurring arsenic concentrations for screening purposes. Considering published literature and our experience throughout Northern California, maximum background arsenic concentrations typically are on the order of 10 mg/kg to 15 mg/kg; the detected concentrations of arsenic in soil samples from the subject site are below that range.

In summary, the laboratory results from the soil samples collected from the subject property do not indicate that past onsite farming activities or historical vehicle emissions along the Interstate 80 freeway northerly of the property resulted in significant surface soil impact conditions.

3.6 RESULTS OF SITE RECONNAISSANCE

We observed no obvious evidence of contamination conditions, improper hazardous substance/petroleum products use or storage, environmentally suspicious dumping or discharge, or significant staining on the subject property. Our reconnaissance identified no obvious evidence that current use or activities on the subject property have resulted in a significant release of hazardous substances or petroleum products to the environment on the subject property.

4.0 ADJOINING SITE CONDITIONS AND USE

The approximate 22-acre subject site is located within a predominantly residential area of Sacramento, Sacramento County. The subject site is generally bounded by Interstate 80 to the north, by an on-ramp to Interstate 80 from Truxel Road to the west, by school facilities to the south, and by vacant land and Fong Ranch Road to the east. Information regarding adjoining and nearby site use is presented below.

Direction	Description		
Northwesterly (across Interstate 80)	Multi-tenant commercial buildings and associated parking areas: 180 Promenade Circle—Law Offices of Ali Yousefi, PC, GNT Solutions, Sterling Royal-Royal Real Estate, and Carsen Smith Tazi DBA Gold River Family Law 3678 N Freeway Boulevard—BevMo!, Boot Barn, and Best Buy (portion of the Promenade Shopping Center)		
Northeasterly	Vacant and unused land, beyond which is a single-family residential subdivision		
Southerly	Discovery High School (3401 Fong Ranch Road) and Natomas High School (3301 Fong Ranch Road)		
Easterly (across Fong Ranch Road)	Single-family residential development		
Westerly	Onramp from Truxel Road to Interstate 80, beyond which is a vacant right-of-way area and a freeway interchange		

Our research and visual observations of adjoining and nearby properties did not identify current conditions or activities considered likely to have resulted in a significant release of hazardous substances or petroleum products affecting the environment on the subject property.

5.0 INTERVIEWS AND USER QUESTIONNAIRE

5.1 INTERVIEWS

The following individuals were contacted in person, by phone, or by written communication to obtain information relevant to the environmental status and condition of the subject property.

Relationship to Property	Name/Affiliation	Comments
User Representative	Le Anne Thomas, Anton Fong Ranch Owners, LLC/Anton Devco	See Section 5.2
Owner Representative/Key Site Manager	Rich Sanders, City of Sacramento	See below
Agency Official	Peggy Silva, Sacramento County Environmental Management Department	See Section 8.2

As a part of our research, we conducted an interview with a current property owner representative, Rich Sanders of City of Sacramento. Mr. Sanders indicated that he has been familiar with the site for about the last ten years, and that during that time the property has been vacant, undeveloped, and unused. Mr. Sanders stated that there are no environmental liens or environmentally-related activity and use limitations associated with the subject property. Mr. Sanders also indicated that there are no known past hazardous substances/petroleum hydrocarbons releases or known contamination conditions on the property, and that there are no activities or features of potential environmental concern (including past or present underground storage tanks, above-ground storage tanks, on-site waste disposal, pits, sumps, oil-water separators, or septic systems) associated with the site.

Additional information obtained from interviews is presented in the relevant sections of this report.

5.2 USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user of this report must provide specific information (if available) to the environmental professional. A user representative (Le Anne Thomas of Anton Fong Ranch Owners, LLC) completed a *User Questionnaire* for the subject property; a copy of the completed *User Questionnaire* is presented in Appendix B. The responses presented on the *User Questionnaire* did not reveal any evidence of recognized environmental conditions in connection with the subject property.

6.0 PREVIOUS ENVIRONMENTAL INVESTIGATION

Our research did not reveal any previous environmental investigations of the subject property.

7.0 HISTORICAL RESEARCH

7.1 HISTORICAL INFORMATION SOURCES

General

As a part of this *Phase I Environmental Site Assessment*, historical research was performed to determine the past usage of the subject property and to evaluate the potential that past site usage resulted in recognized environmental conditions on the property. In accordance with ASTM Standard E 1527-13, our research has included evaluation of obvious uses of the property back to initial site development, or the 1940s, whichever is earlier. A number of different historical resources have been considered; the historical information sources considered are discussed below. Selected historical information (including aerial photographs, topographical maps, and city directories) is presented in Appendix C.

Aerial Photographs

We reviewed historical aerial photographs showing the area of the subject property dated 1937, 1947, 1953, 1957, 1964, 1966, 1972, 1984, 1993, 1998, 2006, 2009, 2012, 2016 and 2020. The aerial photograph dated 1937 shows the property supporting vacant farmland (apparent dry crops); at that time rural/farm access roadways traversed the westerly and northerly portions of the site, and a drainage or irrigation canal also traversed the northerly property area. No significant onsite changes are evident on the subsequent aerial photographs dated through 1966. By the time of the 1972 aerial photograph, Interstate 80 to the north had been constructed, and it appears that the northerly onsite rural roadway had been abandoned. On the 1984 aerial photograph, farming activities on the southerly portion of the property appeared to have ceased, and the water canal on the property appeared to have been improved and/or widened. No significant onsite changes are evident on the 1993 photograph. By the time of the 1998 aerial photograph, the westerly adjoining onramp to Interstate 80 had been constructed and the former rural roadway on the westerly portion of the property is no longer apparent. On the photograph dated 2006, some minor ground disturbance is evident along the far southerly margin of the property (area where soil piles were observed during our site reconnaissance). By the time of the 2009 aerial photograph, the far northerly portion of the property no longer appeared to be farmed. No significant onsite changes are evident on the subsequent aerial photographs dated through 2021; the property appears to have continued to be undeveloped and unused.

USGS Topographic Maps

We reviewed U.S. Geological Survey topographic quadrangle maps (Rio Linda Quadrangle) dated 1891, 1892, 1893, 1902, 1911, 1950, 1951, 1954, 1967, 1975, 1980, 1992, 2012, 2015 and 2018. The quadrangle maps dated 1891, 1892, and 1893 show the subject property as vacant and undeveloped. On the quadrangle maps dated 1902 and 1911, the subject property appears to be located within a low-lying area identified as Bush Lake. By the time of the 1950 quadrangle map, the subject site is no longer depicted as a "lake" area; at that time the site is shown as vacant, with the exception of an irrigation/drainage canal trending east to west on the northerly portion of the site. No significant changes to the subject property are apparent on the quadrangle maps dated 1951 and 1954. On the 1967 and 1980 quadrangle maps, a north-south rural roadway is depicted across the westerly portion of the site. No onsite features are shown on the subsequent topographic maps, except for the existing drainage canal.

Sanborn Fire Insurance Maps

Our research indicates that the area of the subject property is not covered by available Sanborn Fire Insurance Maps.

Local Street Directories

Our historical research included review of city directories (Cole Information Services and Haines Criss-Cross Directory, and Pacific Bell) for the vicinity of the subject property. Listings for the vicinity are available from 1991 through 2017 and generally were reviewed in about five-year increments; the directory listings are included in Appendix C. The subject property address of 3625 Fong Ranch Road is not included in the directory listings reviewed.

Oil and Gas Well Maps

Our review of California Department of Conservation Division of Oil and Gas records indicates no evidence of past or present oil or gas wells on the subject property.

EDR Proprietary Listings

Environmental Data Resources (EDR) maintains proprietary databases of historic potential high-risk sites, including dry cleaners, gasoline stations, automotive stations, and manufactured gas plants. The proprietary databases were developed largely from historic business directories. As shown in the database report presented in Appendix D, the subject property does not appear in any of these databases.

Interviews

Interview information is presented in *Section 5.1* of this report.

7.2 SUMMARY OF PAST SITE CONDITIONS AND USAGE

The historical information obtained from the sources described above indicate that the subject property consisted of low-lying undeveloped/unused land (an area identified as "Bush Lake") through the early 1900s. The property was farmed (apparently in dry crops) as early as the 1930s; at that time rural/farm access roadways traversed portions of the property, and an irrigation/drainage canal traversed the northerly portion of the site. It appears that the onsite canal was improved and/or widened by the 1980s, and currently functions as a regional stormwater drainage canal. The property continued to be farmed until initiation of nearby developments began around the 1990s. Since that time, the property apparently has remained vacant and unused (save for the stormwater canal). It is indicated that past site activities have not included the use or storage of significant quantities of hazardous substances or petroleum products.

As indicated above, the property was farmed from at least the 1930s until the 1990s. In our experience, previous agricultural chemical applications to farmland typically do not seriously impair the soil chemistry. Pesticide contamination is most commonly attributable to the rinsing of equipment after field application, when rinsing occurs in one place over a period of time. Such rinsing activities are

usually performed at a farming headquarters or at an airport supporting crop dusting aircraft; our research has revealed no evidence of any previous crop dusting or farm headquarters facilities on the subject property. Additionally, as requested our firm performed screening soil sampling/testing for pesticides in conjunction with this Phase I study; as described in *Section 3.5* of this report, the results of the testing did not reveal elevated concentrations of pesticides in site soils.

7.3 PAST ADJOINING SITE USAGE

Information obtained from historical sources cited in *Section 7.1* indicates that adjoining and nearby properties historically were comprised low-lying undeveloped/unused land (an area identified as "Bush Lake") through the early 1900s. By the 1930s, surrounding areas were farmed. Interstate 80 northerly of the property was constructed by the early 1970s; properties to the south, west, and east continued to be farmed at that time. By the 1980s, developments were initiated in the general area, and nearby farming was mostly discontinued. Single-family residential subdivision construction easterly of the property had been initiated by the early 1990s. The southerly adjoining Natomas High School facility and the westerly adjoining onramp to Interstate 80 were constructed by the late 1990s. By the mid-2000s, the southeasterly-adjoining Discovery High School facility was in place; additionally, commercial/shopping center development northerly of the property across Interstate 80 had been initiated by that time. Fong Ranch Road was extended northerly along the easterly margin of the subject property in the last few years. Our research has not identified past adjoining or nearby site usage considered likely to have resulted in a release of hazardous substances or petroleum products that would have affected the environment on the subject property.

8.0 AGENCY RECORDS REVIEW

8.1 INFORMATION SOURCES

As a part of this *Phase I Environmental Site Assessment*, agency listings and records were reviewed and considered to evaluate the environmental status and condition of the subject property. Agency research has included obtaining an agency listings database report through a third-party provider; the database records search (including search radii) meets and exceeds the agency listings search provisions of ASTM Standard E 1527-13. The database report was obtained from Environmental Data Resources (EDR) and is presented in Appendix D. In addition to review of the agency database report, supplemental research was performed via online environmental databases (including Geotracker² and Envirostor³), and through direct communications and file review (as warranted) with various agencies (including local agencies not included in the database report).

Federal, State, and Tribal Listings/Records

A partial summary of federal, state, and tribal agency records and listings reviewed/researched, including the *Standard Environmental Record Sources* required by ASTM E 1527-13, is presented below. A

² Geotracker (<u>www.geotracker.waterboards.ca.gov</u>); environmental database of regulated facilities in California maintained by the State Water Resources Control Board.

³ Envirostor (<u>www.envirostor.dtsc.ca.gov</u>); online database of contaminated sites, environmental cleanups, and permitted facilities in California maintained by the Department of Toxic Substances Control.

significant number of additional lists were reviewed; for a comprehensive listing of the agency sources researched and descriptions of the agency listings, refer to the appended database report.

Federal Databases	Search Radius	Comments

Brownfield Sites	0.5 mile	No relevant listings/records identified

Local Agency Listings/Records

The Sacramento County Environmental Management Department (SCEMD) is the local *Certified Unified Program Agency (CUPA)* responsible for sites located within Sacramento County. As the local CUPA, the SCEMD is certified and responsible for oversight of the following consolidated programs: Hazardous Materials Release Response Plans and Inventories (Business Plans); California Accidental Release Program; Underground Storage Tank Program; Aboveground Petroleum Storage Act; Hazardous Waste Generator and Onsite Hazardous Waste Treatment (tiered permitting) Programs; and, California Uniform Fire Code: Hazardous Materials Management Plans and Hazardous Material Inventory Statements. Our research indicates no environmentally-relevant listings or records pertaining to the subject property are maintained by the SCEMD. Additionally, our research does not indicate that other local agencies maintain any environmentally-relevant records or files pertaining to the subject property.

8.2 SUBJECT PROPERTY LISTINGS/RECORDS

Our research has not revealed that the subject property appears on the federal or state listings reviewed. Additionally, our research with local agencies, including the CUPA, indicates that none of these agencies maintains environmentally-relevant records or files pertaining to the subject property.

8.3 NEARBY SITES LISTINGS/RECORDS

Our research of agency listings and records indicates that a few nearby sites appear on agency listings within the search radii considered (up to one mile from the subject property). We researched and reviewed agency information regarding nearby listed sites to evaluate whether readily available information would suggest the potential for environmental impairment of the subject property from off-site areas. Our research and review of agency information regarding the nearby listed sites included consideration of the following:

- the nature/type of each listing
- the proximity of these sites to the subject site
- the nature of any nearby hazardous materials violations
- the magnitude and character of nearby known contamination conditions (including details regarding contaminant type, contamination extent, affected media, and agency status).

The agency information reviewed does not indicate that any of the nearby listed sites poses a significant threat to the environmental integrity of the subject property.

9.0 SIGNIFICANT DATA GAPS

Environmental assessment data gaps may affect the ability to identify recognized environmental conditions. Data gaps may include the inability to access relevant on-site structures or to communicate with individuals knowledgeable of the subject property or nearby contamination conditions. Lack of adequate historical information sources can also result in data gaps. In general, minor data gaps do not hinder an environmental professional's ability to render an opinion regarding potential environmental conditions associated with the subject property. There were no significant data gaps identified for this study.

10.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Brusca Associates, Inc. has performed *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Standard E 1527-13 of the Fong Ranch Road Property identified by the Sacramento County Assessor's Office as APN 225-0170-064. Any exceptions to, or deletions from, this practice are described in *Section 1.4* of this report. This assessment has revealed no evidence of existing, controlled, or historical recognized environmental conditions in connection with the property.

11.0 STATEMENT OF QUALIFICATIONS

Brusca Associates, Inc. is a multi-disciplinary geoscience consulting firm serving private and public-sector clients throughout Central and Northern California, and beyond. The firm specializes in environmental assessment and engineering geology consulting related to property acquisition, finance, due diligence, development, and regulatory compliance. Environmental services include: initial site assessment; soil, soil gas, and groundwater investigations; site characterization; groundwater monitoring; remedial feasibility studies; remedial design; and, clean-up oversight.

The Environmental Specialist for this study, Alycia Cridebring, holds a Bachelor of Science degree in Environmental Science and Management from the University of California at Davis, California. Ms. Cridebring has been an Environmental Specialist for Brusca Associates, Inc. since 2017.

The firm's founder and President, Joe Brusca, directly oversees all firm operations. Mr. Brusca holds a Bachelor of Science degree in Geology from the University of California at Davis, California, is a Professional Geologist and Certified Engineering Geologist in the State of California, and has over 30 years of environmental and geological consulting experience spanning a broad range of geographic areas, project types, and client needs. Mr. Brusca and key staff are certified for Hazardous Waste Site Operations training in accord with 29 CFR 1910.120.

12.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in §312.10 of 40 CFR 312. An Environmental Professional is "a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f) of 40 CFR 312."

13.0 CLOSING

If you have any questions or require additional information, please contact the undersigned at (916) 677-1470.

APPENDIX B – User Questionnaire

USER QUESTIONNAIRE

Page 1 of 2

This *User Questionnaire* is part of the *Phase I Environmental Site Assessment* (ESA). To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments") the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Attach additional sheets if necessary for further explanation.

User Representative	Name:	Le Anne Thomas	Signature:	Date: 2/16/2022
Property Address:	3625 Fo	ng Ranch Rd, Sacramento, CA 95833	Parcel Number(s):	225-0170-064

ADDITIONAL INFORMATION

Certain information should be collected, if available, and provided to the environmental professional selected to conduct the Phase I ESA. This information is intended to assist the environmental professional but is not necessarily required to qualify for one of the LLPs.

Why is the Phase I ESA required?

Purchasing new property to convert from vacant land to residential multifamily rental development.

What is the nature of the property transaction (sale, purchase, exchange, bank loan, etc.)? Purchase in an arms length transaction.

What is the planned use of the property?

Development of a multifamily residential rental project

*Is there any scope of services desired or required beyond ASTM 1527 Phase I ESA 1527?*Project had been used for farming, please sample for agricultural chemicals.

Identify all parties who will rely on the Phase I ESA report.

Anton Fong Ranch Owners, LLC is successors, members, and assigns. Anton Devco, Inc.

Are there any special terms or agreements which must be agreed upon by the environmental professional?

access from property owner

Is there any other knowledge or experience with the property (for example, copies of prior environmental reports or documents relative to the environmental conditions of the property)? No

Identify the current owner of the property and how the owner can be reached.

City of Sacramento Rich Sanders RSanders@cityofsacramento.org 916-808-7034

Identify the site contact and how the contact can be reached.

City of Sacramento Rich Sanders RSanders@cityofsacramento.org 916-808-7034

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

As ummary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SIGNETICS CORP	4130 SOUTH MARKET CO	NE 1/2 - 1 (0.934 mi.)	D15	80
EPA ID:: CAT000614016				

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

BEST BUY STORE #660	3690 N FREEWAY BLVD	N 1/8 - 1/4 (0.169 mi.)	В3	12	

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

File Location: All Files are on GeoTracker or in the Local Agency Database

Potential Media Affected: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Aviation, Total Petroleum Hydrocarbons (TPH), * Pesticides/Herbicides

Site History:

Parcels 14 and 28 were the western-most properties comprising the Natomas Air Park, and were cleaned and released for residential development in July 2006, Parcel 30 contained pesticides, which were excavated in about 2006. Parcel 30 was underlain with fuel pollution, which was remediated. Extensive soil removal and soil vapor extraction has removed the source area of the fuel pollutants.

Groundwater concentrations are declining and closure was issued 2/19/2016. Information relating to the fuel remediation is found under Sacramento Aero Services (Geotracker ID T0606700952).

NATOMAS AIRPORT (Continued)

1000904832

EDR ID Number

(DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. STATE MASTER

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

ORPHAN SUMMARY

Count: 1 records.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Number of Days to Update: 24

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

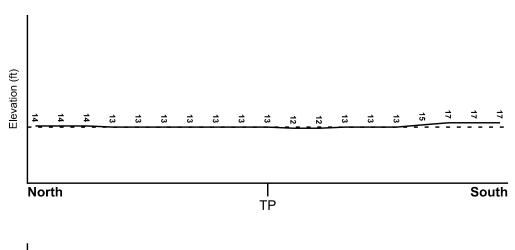

TOPOGRAPHIC INFORMATION

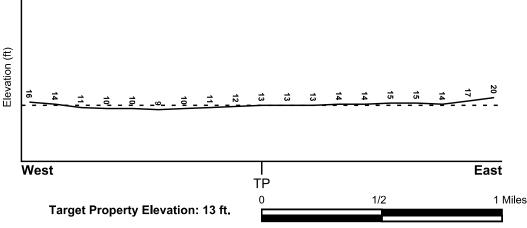

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

RIO LINDA YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION
MAP ID FROM TP GROUNDWATER FLOW
Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: COSUMNES

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Boundary			r Information Classification		Saturated	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	hydraulic conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
2	7 inches	20 inches	stratified silty clay loam to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
3	20 inches	42 inches	stratified clay loam to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8,4 Min: 6.6
4	42 inches	59 inches	stratified clay loam to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558 Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at

private sources such as universities and research institutions.

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

adon levels
