Footnotes:

Settle: Balance of fees due under settlement agreement of 5/18/2001, after contribution of Souza and Natomas Farms Properties

Sills: Balance of fees due after contribution of Sills Property

Alleg: Difference between acquisition fee of \$6,947 per acre for 513.8 acres and the cost of 206.9 acres of land purchased on the conservancy's behalf by Alleghany. Alleghany donated the remaining 50 acre parcel to the Conservancy on November 7, 2002

FEEWLD: Fees abated for land acquisition portion of total fee. Land was dedicated in partial satisfaction for payment of fees.

NCent: Fees paid for Natomas Central were based on 2004 mitigation rates by exception granted by the City of Sacramento

Annex: Projects w/in Panhandle area not yet annexed into the City of Sacramento but included in the NBHCP Permit Area

Ose: Ose property (The Crossing) pre-paid fees in 1999, however this property did not receive an urban development permit and is not included in the acreage totals on this table.

Loan to TNBC: April 7, 2020 City Council approved a \$2 million loan to TNBC for land acquisition purposes. May18, 2020 City transferred \$2 million to the Conservancy. City retains the land acquisition component of the HCP fees for the repayment of the loan. **Lag**: Fee payment lagged the actual grading activity.

2%: Beginning in 2012, the City retained the 2% administrative fee; thus this schedule shows net proceeds only.

Tufts: In 2004, Opus West paid HCP mitigation fees on 295.9 project acres at the 2004 land dedication mitigation fee rate (\$8,624) and dedicated the Tufts tract, 147.95 acres, to satisfy the land dedication portion of the fee. TNBC carries credits for 32.1075 acres (Brookfield) and 10.7215 acres (unassigned).

Coral: Coke/Raley's non-HCP mitigation fees deposited into the Conservancy's Endowment Fund.

Attachment F Summary of Mitigation Measures from Pre-Construction Biological Surveys 2021 Grading-Construction Activity

The City is required to comply with the terms of the Natomas Basin Habitat Conservation Plan (HCP) (City of Sacramento, et al. 2003) prior to new grading / habitat disturbance. Pre-Construction Biological Surveys are prepared to document compliance with the pre-construction requirements of the HCP and includes descriptions of the study methodology, results of fieldwork, and conclusions regarding implementation of conservation measures. Prior to authorization of any grading activity, proposed development must meet the requirements set forth in Attachment G (Pre-Construction Survey Checklist).

There was very limited new grading that occurred in 2021. In 2021, there was 3.63 acres grading activity in South Natomas. Although, there was an increase in building construction activity that took place in 2021 it was done so on properties that were previously graded per prior approvals. For properties that experienced limited activity following the initially mass grading, the City required updated biological surveys prior to issuance of building permits. The attached table identifies all of the 2021 biological surveys (including updated/follow-up surveys) in chronological order starting with the most recent.

NATOMAS BASIN HABITAT CONSERVATION PLAN INVENTORY OF BIOLOGICAL SURVEYS FOR YEAR 2021

Resource Agency Notification Date*	Bio Report Date & Survey Date	Project Name & Biologist	Brief Description	Notes
2021 Annual Rpt	12/6/2021	Medley Apartments (P18-070) Staff biologist Zach Carpenter	The 6.4 acre property for the proposed Medley Apartments is located at 4190 E Commerce Way, Sacramento, California.	No SWHA, BUOW, or other nesting birds were observed at the site or within 0.50 mile. No sign (i.e. pellets, feathers, whitewash) or BUOW were observed using the area. Observed species include California scrub-jay, mourning dove, white-crowned sparrow, Nuttall's woodpecker, and black-tailed jackrabbit.
2021 Annual Rpt	10/4/2021 Bio Survey Date On 10/4/ 2021	Duckhorn Advanced Logistics Center Principal: Bruce Barnett Ph.D Barnett Environmental	The 11-acre property is located southwest of the intersection of Interstate 5 and Arena Boulevard in the North Natomas area of the City of Sacramento	Survey findings – no covered HCP species observed.
2021 Annual Rpt	9/24/2021 Bio Survey Date 9/17/2021	Sacramento Aloft Hotel Biologist: Monica Coll	The Project parcel (APN 225-1960-012; ± 4.5 acres) is located west of the intersection of Advantage Court and Benefit Way in the Natomas area of Sacramento, California	No NBHCP-covered species were observed during the September 17, 2021 preconstruction survey. There are no California Natural Diversity Database (CNDDB) records of any NBHCP-covered species on the Project parcel.
2021 Annual Rpt	7/29/2021 Bio Survey Date 7/27/2021	Natomas II Apartments Biologist: Brian Kearns, Ph.D.	The Survey Area is approximately 19.4 acres in size, and can be generally described as a highly disturbed area that is bounded to the east by East Commerce Way, to the west by Interstate 5, and to the north and south.	No special-status species have been documented within the Survey Area in the CNDDB2. Specialspecies documented 1 mile of the Survey Area include: burrowing owl (Athene cunicularia), giant gartersnake (Thamnophis gigas), and Swainson's hawk (Buteo

				swainsoni). Given the habitual discing within the Survey Area, no suitable habitat for this species appears to exist there.
2021 Annual Rpt	5/18/2021 Bio Survey Date on 5/14/2021 & 5/17/2021	Greenbriar Northlake – Lone Tree Canal Project Site Pre-construction surveys performed for the Greenbriar Phase 2 Mass Grading Jeff Olberding Regulatory Scientist	The Greenbriar Project Site is located to the northwest of the Interstate 5 and Highway 99 junction in Sacramento County, California. The Property is bounded by West Elkhorn Boulevard to the north, Highway 99 to the east, Interstate 5 to the south, and cropland to the west.	Most of the surveys for the species resulted in negative findings. No giant garter snakes or western pond turtles were observed during the surveys. Although a Swainson's hawk was observed during surveys, no active nest was observed. There is a Red-tailed hawk nest within 710-feet of the Project Boundary that must be actively monitored by the on-site biologist per CDFW guidelines to ensure Project activities are not disturbing this nest site which could potentially lead to nest abandonment and failure. No other active bird nesting was observed on Property or within.0.5 miles of the perimeter of Property.
2021 Annual Rpt	5/7/2021 Bio Survey Date on 4/9/2021	Hyatt House & Place Jeffrey Little, Vice President Sycamore Environmental Consultants, Inc.	The proposed project will construct a new hotel and parking lot southeast of the intersection of El Centro Road and Del Paso Road in the City of Sacramento. The site consists of an open ruderal field which encompasses a portion of ±4.19-acre assessor's parcel number (APN) 225-0080-070.	No NBHCP listed species were observed on or near the Project site. No active nests of any bird, raptors, or other special status species were observed on or near the Project site. A list of wildlife species observed is in Attachment A. The 9 April 2021 survey satisfies the NBHCP Preconstruction Protocol condition for a survey a

				minimum of 30 days and a maximum of 6 months prior to grading.
2021 Annual Rpt	3/15/2021 Bio Survey Date On 3/11/2021	Preconstruction Survey Results and an Evaluation of Natomas Basin HCP Covered Species per SMUD MMRP for the Elverta Line 6 Extension Phase 2 Project Biologist: Elliot B. Maldonado,	The Project Study Area (PSA) is the proposed approximately 1.4-mile-long Sacramento Municipal Utility District (SMUD) utility line and species-specific buffers. The survey included a 0.25-mile radius for SWHA, a 300 ft radius for burrowing owl, and a 200-foot buffer giant garter snake around the proposed project footprint.	No special-status species were observed during the preconstruction survey covering the Elverta 6 SMUD Utility Line and surrounding area. The PSA provides foraging habitat for Swainson's hawk and burrowing owl. The PSA provides marginal nesting habitat for ground nesting birds. The PSA provides marginal habitat for giant garter snake. No SWHA, BUOW, GGS, nesting birds, or other special status species were observed during the preconstruction survey. The 11 March 2021 preconstruction survey satisfies BIO Measures listed in the NBHCP for SWHA, BUOW, nesting birds, and GGS.
2021 Annual Rpt	3/3/2021 Bio Survey Date on 3/3/2021	Northlake Senior (DR20-134) Principal: Bruce Barnett Ph.D Barnett Environmental	An approximately 8.05-acre parcel (APN 201-0300-180) at 3500 Hammock Ave. at the NW corner of the California Hwy 99 and Interstate 5	No indication of active bird nests in trees or on the ground within this area, including nests of ground nesting burrowing. No other indication of special status amphibian, reptile, bird or mammal activity and, consequently, see no constraints to construction at this time.
2021 Annual Rpt	2/24/2021 Bio Survey Date on 2/24/2021	Serenade Condos Biologist: Tim Nosal, Natural Investigations Inc.	Site is located at 50 Regency Drive and Natalino Circle, consisting of 2 parcels. The parcel sizes are 1.4 acre and 0.2 acre. Site is surrounded by existing residential development and a fire station.	Survey findings – no covered HCP species observed.

2021 Annual Rpt	2/4/2021	Tanzanite Subdivision	Subdivide 4 lots into 135 residential, 4	No active avian nests were
		(P20-009)	common area, 7 pedestrian access, 2	observed. A western burrowing
			landscape, and 7 private road lots on	owl (Athene cunicularia)
	Bio Survey Date	Biologist: Laurens Kuypers,	approximately 20.57 acres	individual
	on 1/26/2021,	Gallaway Enterprises		was observed near a burrow
	4/8/2021 &			approximately 200 feet south of
	5/26/2021			the project boundary. Based on
				Mr. Kuypers' observations,
				there may be three (3) occupied
				winter burrows approximately
				200
				feet south of the project
				boundary. One (1) burrow was
				confirmed by Mr. Kuypers, the
				other
				two (2) burrows were
				unconfirmed due to lack of
				access to the adjacent parcel.

Pre-Construction Protocols Natomas Basin Habitat Conservation Plan

Attached is a checklist related to preparing a complete pre-construction survey for a proposed urban development project in the Natomas area subject to the 2003 Natomas Basin Habitat Conservation Plan (NBHCP).

Submittal of a pre-construction survey is one of several required steps toward obtaining and Urban Development Permit that allows grading within the Natomas Basin subject to the HCP. For questions about the urban development permitting process -- including pre-construction surveys -- within the City of Sacramento, please contact:

Cheryle Hodge at (916) 808-5971, chodge@cityofsacramento.org

All pre-construction surveys shall be submitted to the City of Sacramento, Community Development Department.

The City is the point of contact for HCP matters and will provide the completed pre-construction survey to each of the following:

- U.S. Fish and Wildlife Service (Attn: Michele Havens);
- California Department of Fish and Wildlife (Attn: Dylan Wood);
- Sutter County (Attn: Doug Libby);
- Natomas Basin Conservancy (Attn: John Roberts)

The pre-construction survey will generally include:

- I. Project Description;
- II. Results of the Biological Survey; and
- III. Conservation Measures.

A pre-construction survey is needed a minimum of 30 days and a maximum of 6 months prior to grading or otherwise disturbing the site. The requirement to provide a pre-construction survey applies to both public and private development projects.

If this survey is the first pre-construction survey the biologist has prepared for the NBHCP, a resume of qualifications should be submitted to USFWS and CDFW with the complete pre-construction survey.

For NBHCP, conservation measures are to be implemented as conditions of urban development permits, as well as for projects sponsored by the respective land use agency (NBHCP §V-1).

The purpose of the pre-construction survey is to determine the status, presence of, and likely impacts to covered species. Wildlife Agency-approved biologists shall conduct the surveys and must implement the conservation measures outlined in the NBHCP, unless otherwise approved by the Wildlife Agencies. Because of concerns regarding Swainson's hawk, conducting the pre-construction survey at least 30 days prior to construction activities is especially important for construction projects that are initiated near riparian and tree groves and when work will commence in spring or early summer.

Surveys and recommended conservation measures are provided to the permitting agency (City of Sacramento), Sutter County, CDFW, and the USFWS. Based upon the results of the preconstruction survey, the land-use agencies identify appropriate conservation measures. Reconnaissance level surveys may indicate that species-specific surveys are not necessary. It is the permittee's (i.e., the City and Sutter) responsibility to ensure the appropriate surveys have been conducted and that appropriate conservation measures are being implemented.

Note: Plant surveys must be appropriately timed so that the plants will be identifiable, if present.

The pre-construction survey must include:

- 1. The name of the project.
- 2. The exact location and size (acres) of the project within the City/Sutter's permit area. Include a map. Something on the scale of the maps in the Implementation Agreement should be sufficient.
- 3. The dates and types of survey(s) conducted.
- 4. A description of the site. Describe current land uses, habitats on site, habitats adjacent to the site such as canals, waterways, trees, riparian areas, and shrubscrub. Is it grasslands, wetlands (includes both jurisdictional and non-jurisdictional), row crops, pasture, rice, etc.? Are there seasonal wetlands or vernal pools? What are the adjacent land uses? Past land uses should also be described to the extent possible since those uses may have some bearing on the species that could occur on site. Any species observed on site should be described and noted.
- 5. Recorded special status species occurrences including: a description of known occurrences on the site and on adjacent sites, known California Natural Diversity Database (CNDDB) records on site and on adjacent sites, occurrences from previous biological monitoring results (contact the Natomas Basin Conservancy for this information), records published in the NBHCP. Be sure to note the nearest localities of Swainson's hawk nest trees, giant garter snake records, even if not on the project site.
- 6. A statement as to whether or not there are any vernal pools, swales, or other seasonal wetlands capable of supporting vernal pool associated species (i.e. Vernal Pool Fairy Shrimp, Vernal Pool Tadpole Shrimp, Colusa grass, Sacramento Orcutt grass, slender Orcutt grass, Midvalley Fairy Shrimp, Legenere, Bogg's Lake Hedge-Hyssop, western spadefoot toad, and California tiger salamander) within 250 feet of project activities. If so, additional surveys and/or mitigation may be necessary. See sections V.A.4, V.A.5.k-m, and V.A.5.p for further info.

- 7. A statement as to whether or not the proposed project is within 200 feet of any potential giant garter snake aquatic habitat (i.e., contains water between May 1 and October 1 does not have to be wet the entire time). This also includes canals and ditches operated by RD 1000 and Natomas Central Mutual Water Company. Is so, see NBHCP § V.A.5.a.
- 8. A statement as to whether or not there are any Swainson's hawk nests within ¼ mile and/or within ½ mile of the project site. If either, see NBHCP §V.A.5.b. If any trees are on site or in the vicinity, the surveys must be timed to detect Swainson's hawk nesting.
- 9. A statement as to whether or not there are any elderberry shrubs with stems measuring greater than one inch in diameter at ground level within 1000 feet of proposed project activities. If so, see NBHCP §V.A.5.c. The applicant may need to mitigate separately with the Service.
- 10. A statement as to whether or not there are any tricolor nests within 500 feet of the proposed project. If so, see NBHCP §V.A.5.d.
- 11. A statement as to whether or not there are any Aleutian Canada geese on-site. If so, see NBHCP §V.A.5.e.
- 12. A statement as to whether or not there are any white-faced ibis nest sites within ½ mile of proposed project activities. If so, see NBHCP § V.A.5.f.
- 13. A statement as to whether or not any loggerhead shrike nest sites are within 100 feet of proposed project activities. If so, see NBHCP § V.A.5.g.
- 14. A statement as to whether or not any burrowing owl burrows are within 300 feet of proposed project activities. Relocation of affected owls may be necessary. If so, see NBHCP § V.A.5.h.
- 15. A statement as to whether or not there are any bank swallow nest sites within 250 feet of proposed project activities. If so, see NBHCP § V.A.5.i.
- 16. A statement as to whether or not there is any Sanford's arrowhead or delta tule pea habitat on-site. If so, see NBHCP § V.A.5.n and V.A.5.o.
- 17. Conclusions of surveys and research: report those special status species that do occur or could potentially occur on site, as well as those species that could be affected by project activities. For example, birds nesting in proximity (see species-specific information for a definition of proximity) to the site. The report should include a description of activities that may affect covered species. These conclusions should be based upon your responses to items 4-16 above.
- 18. Recommendations: the consulting biologist should recommend those avoidance and minimization measures appropriate to the habitats on or adjacent to the site, the species that may occur on site, and the types of activities that could affect special status special (dewatering canals prior to filling; installing one-way doors on owl burrows; following timing restrictions near an active nests; etc.). These conclusions should be based upon your responses to items 4-17 above.
- 19. A statement of how many acres of mitigation will be provided.

Notes: When addressing nesting bird species, consulting biologists must actually survey for the birds. For example item 10 asks if there are any tricolor blackbird nests within 500 feet of the project site. In addition to consulting CNDDB and other date sources, the biologist should actually look for tricolor blackbirds within 500 feet of the project site. Do not just rely on known localities.

All observations of covered species should be reported to CNDDB by the consulting biologist.

As stated above and in the NBHCP, it is up to the permitting agency (the City) to ensure that the appropriate surveys are being conducted and therefore, that the appropriate minimization measures will be implemented. The person issuing the urban development permit needs to read the report, ensure that all the necessary information has been included in the report, and ensure that the mitigation and minimization actions are consistent with observations on the property.

All planning staff should rely upon the April 2003 Final Natomas Basin Habitat Conservation Plan and the June 2003 errata to the HCP to assist them in reviewing pre-construction surveys.
