Council District - In Progress				
	P21-017	0 UNKNOWN	Matthew Aijala 916-808-7176 maijala@cityofsacramento.org	City Council
A request to annex approximately 470 acres of vacant land in North Natomas. The project proposes a Sphere of Influence Amendment, Annexation, General Plan Amendment, Pre-Zoning, creation of a Planned Unit Development, a Development Agreement, a Master Parcel Map, and Site Plan Design Review. The project site would be designated for light industrial/warehousing and highway-oriented commercial uses.				
Council District - 1 In Progress				
	DR25-165		Sarah Scott 916-808-2688 sscott@cityofsacramento.org	Staff
Request for Site Plan and Design Review to construct 165 single-unit dwellings on an approximately 39.82-acre parcel in the Single-Unit Dwelling and Single-Unit or Duplex Dwelling Zones (R-1,R-1A-PUD) in the Panhandle Planned Unit Development (Cononelos subdivision approved under Z23-043) and design review area.				
	DR25-186		Whitney Johnson 916-808-8947 wjohnson@cityofsacramento.org	Staff
Site Plan and Design Review (SPDR). The proposed scope of work on this site includes New single family homes ranging from one and two story with attached garages complying with Panhandle PUD design guidelines. The homes are divided into two different series to accommodate the different lot sizes - Echo (45'x100' lots) and Luna (55'x100' lots). Series 1- Echo consists of (3) different home plans with three different elevation styles each. Series 2- Luna consists of (4) different home plans with three different elevation styles each. Homes in both series propose the following elevation styles: 1. Modern Prairie- Elev A 2. Craftsman- Elev B 3. Farmhouse- Elev C

CURRENT STATUS	FILE #	ADDRESS DESCRIPTION	PLANNER	REVIEW LEVEL
Council District - 6 In Progress		<p>Since 2007, HP Hood has owned and operated the dairy products processing and packaging facility on Belvedere Avenue. This was an existing facility previously owned and operated by Crystal Cream and Butter. Currently, packaging for the finished products is produced off-site and trucked to the facility. Some of the packaging, specifically empty plastic bottles, are both large and light, which makes them inefficient for truck transport. Currently, roughly 3,600 truckloads of plastic bottles are delivered to the facility annually.</p> <p>In 2018, HP Hood purchased an adjacent parcel of land (the "Project Site"). Over time, it became clear that developing the project by constructing a stand-alone plastic bottle production facility (the "Project") would greatly benefit operations of the existing facility. This project will allow HP Hood more direct control of the quality and quantity of bottles supplied to the facility. Since the project is fed by pelletized plastic, it would reduce the number of trucks to 2 resin tanker loads of pelletized HDPE resin plastic per day. The throughput of finished bottled product for the facility will remain the same.</p> <p>The project building is a single story 27,000 square foot blow molding facility consisting of tilt-up concrete wall construction and TPO roof. A conveyor bridge conveys newly formed bottles over an existing truck aisle into the existing facility. Exterior color will match the existing facility. Exterior light and sound are not a generator above existing plant activities. No process effluent is produced or discharged from this new facility. Excess blow molded material is recycled on site. Bottles that are deemed ineligible for recycling on site, are recycled offsite. The project is expected to have minimal emissions of volatile organic compounds (VOC) and particulate matter associated with operation of new equipment. Particulate matter emissions from material conveyance or grinding are controlled by a dust collection system. There is a net zero increase of plastic wrap waste or recycled products over current operations. General refuse from the project's small office area is either removed through a janitorial service or bagged and taken to the existing facility's trash.</p> <p>The project site is an unimproved industrial lot, with industrial uses to the west and north, the existing HP Hood facility to the east, and railroad and industrial uses to the south. 21st ave extends up to the South West corner of the site. There is no intent to have access to or improve 21st ave. Truck access to the project site will be through the existing HP Hood facility off Belvedere ave to maintain site security. Employee parking would be in the existing employee parking lot on the east side of the existing facility. The new facility will be replacing the activity of offloading bottles from a truck, and staging them for conveyance into filling, therefore the headcount between this facility and the existing facility will remain the same. The headcount of the new facility will be 6 per shift. There is no additional full-time employees anticipated for this site once the new facility is operational.</p> <p>Fire and domestic water will be provided via a new connection to the existing main in 21st Avenue. Sewer will be connected to the existing sewer main that runs along the east side of the project area. The design storm will be retained onsite. There will be an outfall to the existing storm infrastructure in the 21st Avenue road reservation for stormwater over and above the design storm. Electricity will be provided via connection to the existing private HP Hood substation. The project will</p>
