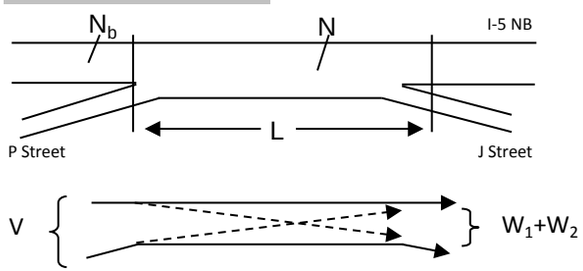
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? **Y**
   If optional exit lane, then "Y". Otherwise "N".
2. In the chart to the left, which two speed curves is the red "x" between?
   30 MPH and **35 MPH**
   If left of the 30 MPH curve, LOS is F. Select "-".
   If below the 55 MPH curve, out of the realm of weaving.
3. Interpolated Weaving Speed (S_w, mph) **33.0**
4. Weaving Intensity Factor (k) **3.00**
5. Service Volume (SV, pcph)
   $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$ **1,897**
6. Level of Service (LOS) **E**

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

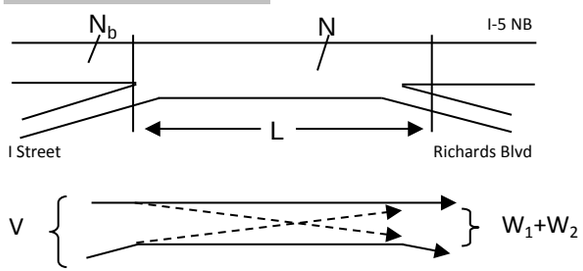
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**35 MPH** and **40 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	37.0
4. Weaving Intensity Factor (k)	3.00
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,509
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

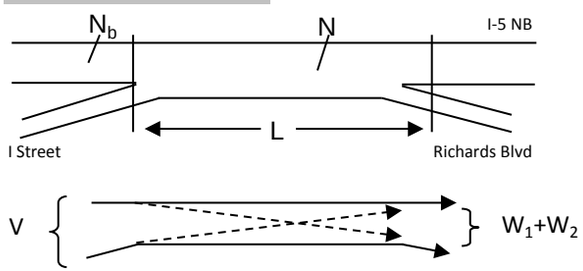
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**40 MPH** and **45 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	42.6
4. Weaving Intensity Factor (k)	2.27
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,146
6. Level of Service (LOS)	B

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

APPENDIX J.1.3:

Sidewalk Calculation Example

Appendix J.1 .3

The following example is intended to put to illustrate pedestrian LOS calculations and what an LOS C versus D versus E condition would feel like:

- Consider a 5-foot sidewalk that experiences a flow of two persons walking side by side every 2-seconds during the peak 15-minute period. Assuming a 1.5-foot shy area for the curb, the pedestrian flow rate would be:
    - 900 pedestrians during peak 15 minutes (1 person per second for 900 seconds) / (15 * 3.5 feet) = 17.1 pedestrians per minute per foot, which would correspond to LOS E.
    - If that sidewalk was 10 feet wide (with an effective 8.5-foot width), the pedestrian flow rate would be 7.1 pedestrians per minute per foot, which would correspond to LOS C.

APPENDIX J.1.4:

Technical Memorandums 1-6

FEHR PEERS

REVISED FINAL TECHNICAL MEMORANDUM #1

Date: December 4, 2015

To: Pelle Clarke & Samar Hajeer – City of Sacramento

From: John Gard – Fehr & Peers

Subject**: **Assumed Roadways under Baseline Conditions for Railyards / Kaiser / MLS EIR

RS15-3374

Attached to this memorandum are figures, which display the proposed roadways that would be constructed within the Railyards Specific Plan for each of the four scenarios that are being analyzed under baseline conditions.

Figure 1 shows that Railyards Boulevard would open to traffic between 7th Street and Jibboom Street under 'no project' conditions. Additionally, 5th and 6th Streets would extend northerly as two-lane, two-way streets from downtown to connect with Railyards Boulevard. Finally, G Street would extend westerly as a two-lane, two-way street, creating new intersections with 5th and 6th Streets. F Street would also be extended westerly under the 5th Street and 6th Street bridges. This extension would not connect to any other roadways under baseline no project conditions.

Figure 1 also includes a note indicating that 5th Street would be modified at H Street to permit southbound through travel under all baseline scenarios.

Figure 2 shows the assumed roadway connections with the proposed Railyards Specific Plan Update. This figure indicates that all proposed street improvements would occur within the Specific Plan area. No widenings, extensions, or other improvements outside the Plan area are currently proposed. This figure includes a note indicating that the project would dedicate right-of-way to allow for the future widening of 7th Street south of Railyards Boulevard to four lanes, but would not construct this improvement as part of the project's planned circulation system.

Figure 3 shows the assumed roadway connections with the Kaiser Permanente Medical Center. As shown, construction of the Medical Center would result in the extension of Bercut Drive southerly to Railyards Boulevard and the construction of South Park Street between Bercut Drive and 5th Street.

Figure 4 shows the assumed roadway connections with the MLS stadium. As shown, construction of the Stadium would result in the following street improvements:

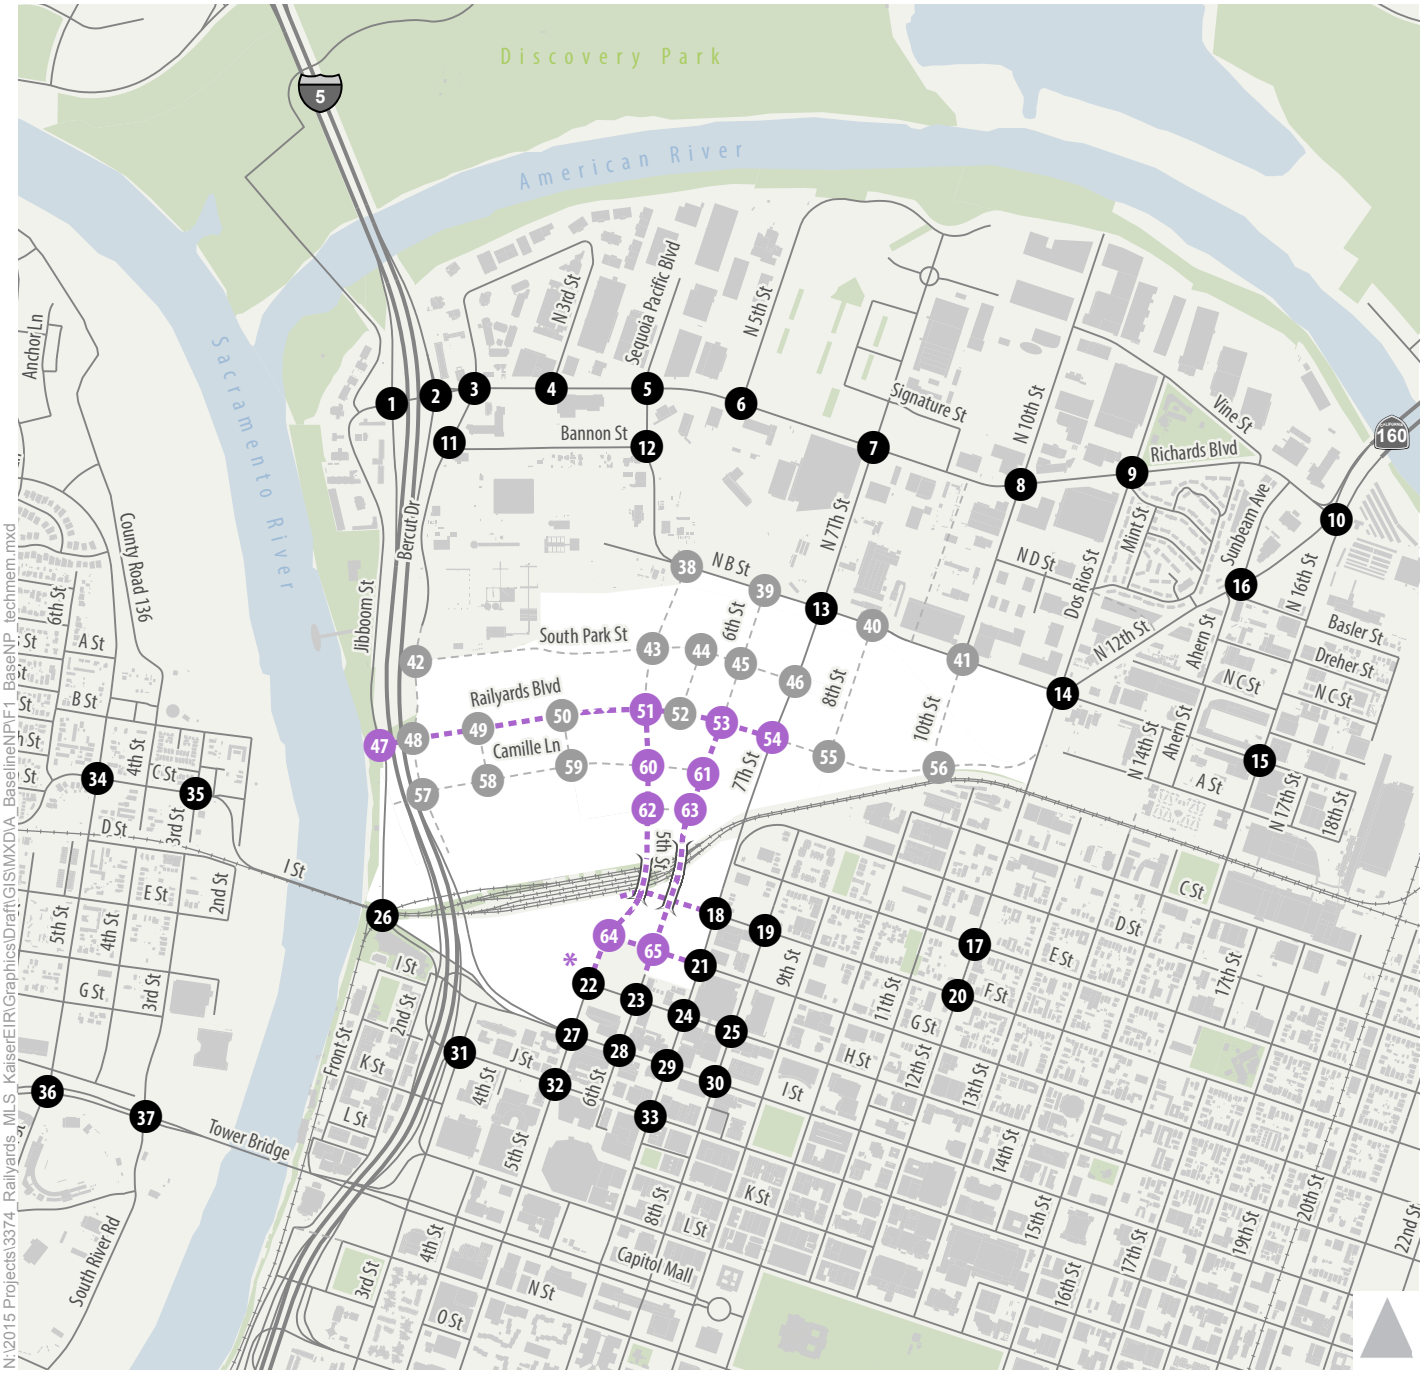
- Extend Railyards Boulevard easterly from 7th Street to 10th Street.

- Extend 8th Street between Railyards Boulevard and North B Street.
- Extend 10th Street partially north of Railyards Boulevard, but do not connect to North B Street.

Please note that we have been directed by the City to not assume the extension of Railyards Boulevard easterly from 10th Street to 12th Street as part of this scenario.

Kimley-Horn has provided us with detailed intersection geometrics for use in analyzing all on-site intersections. We will be using the City of Sacramento *Project Delivery Manual* (2007) as guidance for selection of signal phasings and timings at these intersections. We will have in-depth coordination with City staff regarding these inputs.

Please do not hesitate to call or email me with any questions or comments.



Study Intersections

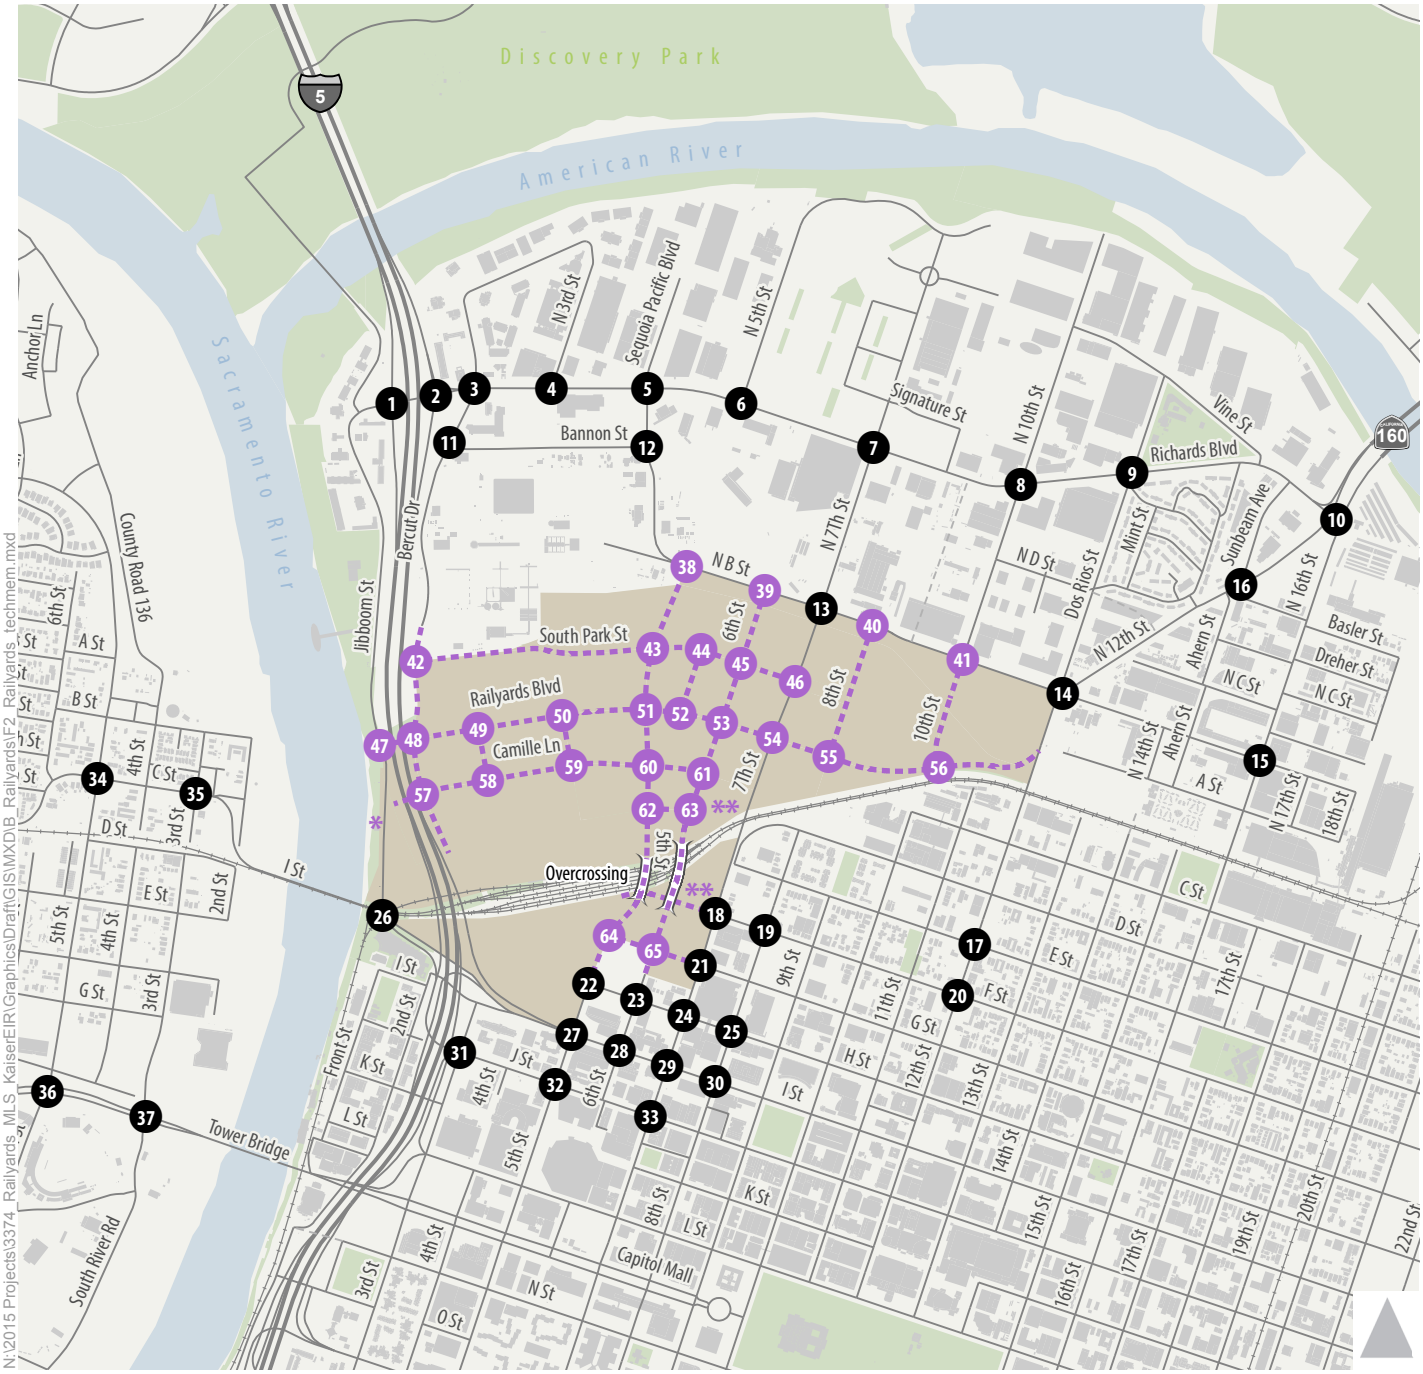
- Baseline No Project
- Existing
- Future Intersection within Railyards SP Update

* All baseline scenarios assume southbound through travel is permitted on 5th St. at H St.

- Baseline No Project Roadway
- Future Planned Roadway within Railyards SP Update

Figure 1

Baseline No Project Roadway Network



N:\2015 Projects\3374 Railyards_MLS_KaiserEIR\Graphics\Draft\GIS\MXD\B_Railyards\F2_Railyards_techmem.mxd

Study Intersections

- Baseline Plus Railyards SP Update
- Existing
- Future Intersection within Railyards SP Update

* Railyards SP Update would remove connection of Jibboom Street to I Street.

** Project will dedicate ROW, but not construct four-lane widening of 7th Street under Baseline Conditions.

- Project Roadway Assumed Under Baseline Plus Railyards SP Update
- Future Planned Roadway within Railyards SP Update
- Railyards Specific Plan Update

FEHR PEERS

FINAL TECHNICAL MEMORANDUM #2

Date: December 22, 2015

To: Pelle Clarke & Samar Hajeer – City of Sacramento

From: John Gard – Fehr & Peers

Subject*: *Travel Characteristics of Proposed Kaiser Permanente Medical Center in Railyards Specific Plan

RS15-3374

This memorandum presents the anticipated travel characteristics of the Kaiser Permanente Medical Center ("KP Medical Center") project to be located north of Railyards Boulevard between Bercut Drive and 5th Street in the Railyards Specific Plan. This evaluation is applicable primarily to the "Baseline Plus KP Medical Center" scenario. However, portions of the analysis presented herein will also be applicable to cumulative conditions.

This memorandum is organized into the following sections:

I. Project Land Uses
II. Trip Generation Characteristics
III. Trip Distribution Characteristics
IV. Expected Mode Split
V. Vehicle Trip Assignment

I. Project Land Uses

Table 1 displays the various land uses, employment levels, and other relevant information associated with the proposed Medical Center.

II. Trip Generation Characteristics

The *Trip Generation Manual*, 9th Edition (Institute of Transportation Engineers, 2012) contains the following two land use categories that may be applicable to the project:

- Hospital (LU Code 610) – an institution that provides medical or surgical care and overnight accommodations. This category does not include medical clinics or nursing homes, which are covered elsewhere in the *Manual*.
- Medical-Dental Office Building (LU Code 720) – a facility that provides diagnoses and outpatient care on a routine basis but is unable to provide prolonged in-house medical and surgical care.

The *Trip Generation Manual* does not include a 'regional medical center' category consisting of both hospital and medical-office space. Accordingly, data from this resource may be helpful in estimating trips from the proposed project, but cannot be used directly because internalization of trips between the two use types is not known.

Table 1 – Proposed KP Medical Center Land Use Information	
Type	Amount
Land Use [1]	
Hospital (non HSB)	658,000 sq. ft.
Hospital Support Building (HSB)	210,000 sq. ft.
Medical-Office	300,000 sq. ft.
CUP [2]	60,000 sq. ft.
Total (excluding CUP)	1,228,000 sq. ft.
Employees / Providers / Beds [3]	
Total Employees	2,941 existing (from Morse Facility), 4,247 total future employees
Health Care Providers	299 (1,705 sq. ft. of MOB space per provider)
Licensed Beds	420

Notes:
1. Buildout land uses from *Kaiser Railyards Master Plan*, Lionakis, September 17, 2015. Totals exclude square-footage associated with CUP because it consists of non-trip generating uses.
2. CUP is the central processing plant that consists of mechanical and electrical equipment. It generates almost no traffic. It is included in the square footage totals, but excluded from trip calculations.
3. Per November 11th and 16th emails from Matthew Miller, Kaiser's Director of Program Management.

TBD = To be determined.

According to Kaiser staff, the Hospital Support Building (HSB) area offers specialty medical care. It houses physicians and support services needed to support the hospital, but that aren't required to be located within the hospital. Given this definition, HSB is considered to be a medical-office type use from a trip generation perspective.

The proposed Medical Center would consist 1,168,000 square feet of trip generating land uses (the CUP is excluded). That square footage is separated into 658,000 square feet of hospital (56 percent) and 510,000 square feet of medical-office (44 percent).

Trip Generation of Kaiser Medical Centers in Southern California [1]

Kaiser representatives provided land use and traffic count data from three comparable medical centers in Southern California. This information is summarized in **Table 2**.

[1] We reviewed our internal files and online resources but could not find any empirical trip generation studies of the existing Kaiser Medical Centers in Roseville and South Sacramento.

Table 2 – Trip Generation of Kaiser Medical Centers in Southern California								
Facility	Ksf [1]	% Hosp. / % MOB	Vehicle Trips [2]			Trip Rates (per ksf)		
			Daily	AM Pk Hr	PM Pk Hr	Daily	AM Pk Hr	PM Pk Hr
Kaiser Irvine Medical Center	579.2	49% / 51%	10,519	926	767	18.16	1.60	1.32
Kaiser Anaheim Medical Center	551.2	47% / 53%	11,683	874	836	21.20	1.59	1.52
Kaiser Riverside Medical Center	840.8	45% / 55%	19,486	1,697	1,535	23.18	2.02	1.83
					Average	20.85	1.74	1.56

Notes:
[1] Includes hospital space, HSB space within hospital, and MOB space.
[2] Counts collected using tube counts at driveways. Results averaged for a Tuesday thru Thursday condition. At each facility, AM peak hour occurred from 8 to 9 AM and PM peak hour occurred from 4 to 5 PM.
ksf = thousand square feet.

Table 2 indicates that these facilities generated an average of about 20.85 daily vehicle trips, 1.74 AM peak hour vehicle trips, and 1.56 PM peak hour vehicle trips per thousand square feet (ksf). Individual trip rates show a strong correlation to the percentage of the campus dedicated to MOB space (i.e., trip rates increase as MOB space increases).

Trip Generation of Kaiser Medical Center on Morse Avenue in Sacramento County

We conducted traffic counts on Tuesday, October 27, 2015 at the ten (10) driveways on Cottage Avenue, Morse Avenue, and Alta Arden Expressway that serve the Kaiser Morse Avenue facility. Kaiser administrators report that October is generally one of their busier months, and actual bed/hospital room use on the count day was above average[2]. Therefore, the counts collected on this day are representative of slightly above average hospital occupancy levels.

Table 3 displays the land use totals and vehicular trip generation observed at the Kaiser Morse Avenue facility. This table indicates that the site generated about 1.8 trips per thousand square feet (ksf) during the AM peak hour and 2.0 trips per ksf during the PM peak hour.

[2] According to data provided by Matt Miller of Kaiser in an email to Brian Boxer on November 17th, the medical center had a patient census of 160 on the count day, which is greater than their average annual patient census of 150.

Table 3 – Vehicular Trip Generation of Kaiser Morse Avenue Facility							
Peak Hour [1]	Square Feet (ksf)	Vehicle Trips			Trip Rates (per ksf)		
		Inbound	Outbound	Total	Inbound	Outbound	Total
AM (8 – 9 AM)	477.43	676	183	859	1.42	0.38	1.80
PM (4 – 5 PM)	477.43	296	664	960	0.62	1.39	2.01
Pre-Event (6:30-7:30 PM)	477.43	189	266	455	0.39	0.56	0.95
Notes: [1] Counts collected from 7 to 9 AM and from 4 to 7:30 PM on Tuesday, October 27, 2015. ksf = thousand square feet.							

Kaiser representatives indicated that about 29 percent of the Morse Avenue Kaiser Facility is classified as MOB space. Kaiser representatives indicated that there are currently 214 health care providers who occupy an average of 1,350 square feet of space per provider. This represents substantially more building area than the 138,500 square feet of designated MOB space. This implies that some health care providers are using hospital space to provide outpatient services, meaning that the medical center's effective percentage of MOB space is greater than 29 percent.

Table 3 also shows trip rate data for the pre-event peak hour. Although this period is not being studied under "Baseline plus Medical Center" conditions, this period is analyzed under "Baseline Plus Railyards Specific Plan Update" conditions, in which the pre-event peak hour trip generation of the proposed Medical Center is analyzed.

The Kaiser Morse Avenue Facility trip rates were compared to published ITE rates for general reasonableness.[3] Pages 26-28 of the *Trip Generation Handbook* (Institute of Transportation Engineers, 2014) provide guidance regarding when the average rate versus fitted curve equation should be used. Based on the project's size and the data in the *Manual,* the *Trip Generation Handbook* recommends that the weighted average rates should be used instead of the fitted curve equations for each category. The following weighted average AM and PM peak hour (of the generator) trip rates are provided:

	ITE Trip Generation Rates	
	AM Peak Hour	PM Peak Hour
• Hospital:	0.96	1.16
• Medical-Office:	3.5	4.27

[3] The observed rates should not necessarily match the ITE rates perfectly for reasons cited on the previous page. However, the rates should be in the same general range.

The above trip rates can be used to develop a "blended ITE" rate that considers the relative mix of hospital versus medical-office space. The blended ITE rates are as follows:

	ITE Blended Trip Generation Rates	
	AM Peak Hour	PM Peak Hour
• Hospital (71%) / Medical-Office (29%):	1.70	2.06

The following shows how these blended rates compare with the observed trips at the Kaiser Morse Avenue Facility:

- AM peak hour: observed rate of 1.8 trips per ksf is six percent greater than the ITE blended trip rate.
- PM peak hour: observed rate of 2.01 trips per ksf is 2.5 percent lower than the ITE blended trip rate.

This suggests that blended ITE rates provide a reasonably accurate estimate of the Kaiser Morse Avenue facility's existing trip generation. Therefore, the blended ITE rates are also considered to be applicable for estimating the proposed project's trip generation, subject to the following two adjustments:

- Adjustment #1 (Difference in MOB Space) – The proposed project would consist of a greater proportion of MOB space (44 percent) than the Kaiser Morse Avenue facility (29 percent).
- Adjustment #2 (Decompression of MOB Space) - The proposed project would provide an average of 1,705 square feet of space per provider, whereas the Kaiser Morse Avenue facility currently provides 1,350 square feet per provider. Hence, the proposed project would result in a 20.8 percent reduction in MOB provider density. Since provider density affects both the number of employees and patient visits, this effect was accounted for by applying a 20.8 percent reduction to the MOB trip rate.

The following shows the blended ITE trip rates based on the proposed project's mix of hospital and MOB space.

	ITE Blended and Adjusted Trip Generation Rates	
	AM Peak Hour	PM Peak Hour
• Hospital (56%) / Medical-Office (44%):	1.76 [4]	2.14 [5]

Table 4 displays the vehicular trip generation of the proposed Kaiser Medical Center using the identical trip rates observed at the Kaiser Morse Avenue Facility.

[4] Calculated as follows: (56%*0.96) + ((44%*3.5)0.792) = 1.76

[5] Calculated as follows: (56%*1.16) + ((44%*4.27)0.792) = 2.14

Table 4 – Unadjusted [1] Trip Generation of Proposed Medical Center							
Peak Hour	Square Feet (ksf)	Vehicle Trip Rates (per ksf) [2]			Trips		
		Inbound	Outbound	Total	Inbound	Outbound	Total
AM (8 – 9 AM)	1,168	1.39	0.37	1.76	1,624	432	2,056
PM (4 – 5 PM)	1,168	0.66	1.48	2.14	771	1,729	2,500
Pre-Event [3] (6:30-7:30 PM)	1,168	0.31	0.70	1.01	362	818	1,180

Notes:
[1] The term 'unadjusted' is used because the location of the proposed Medical Center could result in greater levels of walking, bicycling, or transit use than occurred at the Kaiser Morse Avenue Facility. Analysis of these travel choices is presented later in this memo.
[2] AM and PM peak hour vehicular trip rates applied to the proposed Medical Center are based on adjusted 'blended ITE trip rates' that are calibrated to Kaiser Morse Avenue Facility travel. Refer to previous page for description of how adjustments were made.
[3] Existing pre-event peak hour trip rate at Kaiser Morse Avenue Facility was 53 percent lower than PM peak hour trip rate. This same adjustment was applied for proposed project.

It is important to note that the values in Table 4 do not reflect any additional adjustments for the potential for bicycle, walk, and transit trips made to the proposed project. Such adjustments are presented in Section IV of this memorandum.

Prior to settling on the above approach, we considered using the observed trip generation studies of Kaiser facilities in Southern California. However, we ultimately decided against using that data for the following reasons:

1. Additional documentation would be necessary including: date of counts, name of count firm, and consultant(s) overseeing counts, data on patient census levels (compared to annual averages) on count days, and building occupancy during counts. Also, it would be helpful if the accuracy of the hose counts placed across slow-speed driveways could be demonstrated. Additionally, were any non-project trips passing through the Kaiser Irvine Medical Center observed and accounted for?
2. The Anaheim Canyon Metrolink Commuter Rail station is located less than ¼ mile from the Kaiser Anaheim Medical Center. The observed trip rates at that medical center take into consideration person trips made by rail. A metrolink station is also located in the vicinity of the Kaiser Riverside Medical Center, though not as conveniently located.

Lastly, it is noted that since the Kaiser project application calls for the closure of its Morse Avenue Facility, it would be difficult to justify the use of a different trip rate than was measured at Morse Avenue.

III. Trip Distribution Characteristics

The spatial distribution of Kaiser members who would regularly use the new facility and employees who would work at the new facility is critically important to the analysis. Kaiser representatives provided the following data to support this analysis:

- Anonymous home residence zip codes of about 230,000 Kaiser members who would regularly use the new facility (Kaiser excluded zip codes closer to their Roseville and South Sacramento facilities).
- Anonymous home residence zip codes of about 3,000 Kaiser employees who currently work at the Kaiser Morse Avenue facility. These employees would be relocated to the new facility. Although total employment levels will likely rise due to the proposed facility's larger size, it is reasonable to assume that the overall distribution pattern of employee residences will be similar given the large sample size.

Figure 1 shows that 96 percent of Kaiser members who would use the proposed facility reside in the top 27 (i.e., most recurring) zip codes. These zip codes reveal pronounced east-west directionality relative to the project site. This is due to the existing Kaiser Medical Centers in Roseville and Elk Grove, which would continue to serve those members living northeast and south of the project vicinity, respectively.

Figure 2 shows how the spatial distribution of zip codes translates into anticipated usage of major freeways to access the project site. As shown, the majority of member zip codes are located east of the project site. A variety of freeways would be used to access the project including US Highway 50, Capital City Freeway, SR 160, Interstate 5, and Interstate 80.

Figure 3 shows the distribution of Kaiser employee zip codes. This figure shows that 82 percent of employees reside in the top 40 (i.e., most recurring) zip codes. Unlike the distribution of member zip codes, Kaiser employee zip codes have a more pronounced north-south orientation. This is because some employees residing in the populated areas of Elk Grove, South Placer County, Citrus Heights, and other areas would work at the proposed project despite being physically closer to the other medical centers. **Figure 4** shows how the spatial distribution of zip codes translates into anticipated usage of major freeways to access the project site.

Medical centers also attract visitors who come to see patients. Trips made by visitors can represent an important component of overall travel. Their trips are reflected in the Morse Avenue Kaiser Facility trip rates. Their spatial trip distribution patterns are likely similar to the member zip codes shown on Figure 1. Other types of trips, such as deliveries, taxis, ambulances, etc. also occur, but do not represent a substantial percentage of overall trips, and are reflected in the trip rates.

The top 25 residence zip codes of Kaiser members and employees are attached to this memo.
The data on Figures 1 through 4 will serve the following technical purposes:

1. *Distribution of Vehicle Trips* – The percentages shown on Figures 2 and 4 allow us to develop project trip distributions for purposes of estimating project-added vehicle trips at the study intersections and freeway facilities.
2. *Likelihood of transit usage* – In the next section, we evaluate how the zip code locations influence the likelihood of travel to the project site via public transit.
3. *Vehicle Miles of Travel (VMT) Calculations* – The zip code data, along with trip generation and mode split estimates, will be used to estimate how the closure of the Kaiser Morse Avenue Facility and opening of the proposed project would affect overall VMT.

Proportion of Peak Hour Trips by Kaiser Members Versus Employees

Kaiser administrators indicated that their employees (at Morse Avenue and also for the project) who are involved in health care-related functions typically work the following shifts (start/end times are approximate):

- 70 percent work the day shift from 7 AM to 3 PM.
- 18 percent work the evening shift from 3 PM to 11 PM.
- 12 percent work the overnight shift from 11 PM to 7 AM.

Kaiser administrators also indicated that the first and last appointment times for outpatient care typically occur at 8:30 AM and 5 PM, respectively. However, medical centers such as Kaiser also have a variety of other employees with various administrative roles who work a more typical weekday (i.e., 8 AM to 5 PM) type schedule.

Table 5 shows the temporal distribution of arriving and departing traffic to the Kaiser Morse Avenue facility. Key conclusions from this data include:

- AM Peak Period: Inbound traffic is greatest from 8 to 9 AM, presumably as patients arrive in advance of their appointments, which begin at 8:30 AM. However, it is likely that many employees also arrive during this peak hour.
- PM Peak Period: Inbound traffic is greatest from 4 to 5 PM as patients arrive in advance of their appointments, the last of which begins at 5 PM. Outbound travel is much greater from 4 to 5:30 PM (versus after 5:30 PM) due to the combined effects of both patients and some employees departing during this period.

Table 5 – AM and PM Peak Period Travel at Kaiser Morse Avenue Facility

Time	Inbound Vehicles [1]	Outbound Vehicles [1]
7:00 – 7:30 AM	223	99
7:30 – 8:00 AM	281	105
8:00 – 8:30 AM	**375**	79
8:30 – 9:00 AM	301	104
TOTAL	1,180	387
4:00 – 4:30 PM	155	335
4:30 – 5:00 PM	141	329
5:00 – 5:30 PM	92	**356**
5:30 – 6:00 PM	109	189
6:00 – 6:30 PM	115	173
6:30 – 7:00 PM	109	122
7:00 – 7:30 PM	80	144
TOTAL	801	1,648

Notes:
[1] Counts collected on Tuesday, October 27, 2015. Bolded values represent the peak directional 15-minute vehicle flow rates.
ksf = thousand square feet.

In consideration of the above, we believe it is reasonable and (technically justified based on employee shift times) to assume the following proportions of member versus employee trips for each study period. These ratios are also based on our own professional judgement, which reflects our numerous observations at medical centers and MOBs located throughout Sacramento and beyond.

- AM Peak Hour: 65 percent members and 35 percent employees.
- PM Peak Hour: 40 percent members and 60 percent employees.
- Pre-Event Peak Hour: 40 percent members and 60 percent employees.

These ratios do not affect trip generation. Rather, they affect trip distribution and mode split due to the different geographic origins and destinations of the two groups as is described later in this memo.

IV. Mode Choice

Table 4 displayed the unadjusted trip generation of the proposed project prior to any adjustments being made for bicycle, walk, and transit trips (due to adjacent transit service availability) given the project's location. This section discusses the project's expected mode split (under baseline conditions).

Anticipated Use of Bus

A bus stop is located on both sides of Morse Avenue adjacent to the Kaiser Morse Avenue Facility. Sacramento Regional Transit (RT) operates bus routes 22, 80, and 84 on one-hour headways during peak periods, while Route 82 operates on 30-minute headways. During peak hours, ten buses per hour stop at the Kaiser facility to pick-up or drop-off members and employees.

We obtained peak hour boarding and alighting data from RT for these four bus routes. It is likely that bus riders that board or alight at this stop were associated with Kaiser Morse Avenue given its close proximity and regional attraction. The following data was obtained:

- AM Peak Hour (8-9 AM): 8 passengers alighted (exited) and 5 passengers boarded from the four routes.
- PM Peak Hour (4-5 PM): 6 passengers alighted (exited) and 9 passengers boarded from the four routes.

This information can be used to estimate a bus mode split by converting vehicle trips from Table 4 into person trips (assuming an average vehicle occupancy of 1.2 persons per vehicle). This represents a 0.5 percent bus mode split during the AM and PM peak hours.

The proposed Kaiser facility in the Railyards would have a similar level of fixed-route bus service available under near-term conditions. Four routes (11, 15, 29, 33) currently include stops in the project vicinity. Figures 1 and 3 show that these routes extend in northerly and easterly directions and cover only a minor amount of the zip codes from which Kaiser members and employees reside.

To provide an additional comparative evaluation, we obtained bus ridership data from the Sutter Sacramento Medical Center (adjacent to the Capital City Freeway) to understand whether medical centers near the CBD have higher levels of bus ridership than in more suburban locations. This facility is served by four bus routes. During the AM peak hour, there were 12 alightings. During the PM peak hour, there were 21 boardings. Given that project's size (over one million square feet), this level of bus ridership appears generally comparable to the Kaiser Facility on Morse Avenue.

- Fehr & Peers proposes to not make any additional adjustments to the gross trip generation estimates in Table 5 to account for additional bus ridership at the proposed project. This approach is based on the following:
    - The trip rates already account for a 0.5 percent bus ridership mode split.
    - Current bus service provided near the project site would serve only a minor proportion of zip codes in which Kaiser members and patients reside.
    - The proposed Kaiser facility would have comparable levels of (near-term) bus service as the Sutter Sacramento Facility, which was found to have a similar bus mode split.

Anticipated Use of Light Rail

Figures 2 and 4 reveal the following (approximate) proportions of Kaiser members and employees who reside in the vicinity of a light rail corridor. While some members/patients could walk to the station, most would need to drive, take a bus, or get dropped off to access light rail.

Approximate Kaiser Member and Employee Zip Code Proportions Along Light Rail Corridors

	Gold Line (East to Folsom)	Blue Line (East to Watt)	Blue Line (South to CRC)
Members	28%	33%	< 5%
Employees	23%	40%	21%

Note: Each of these routes would require a transfer to the Green line.

Figure 5 shows that an estimated four percent of Kaiser members reside within ½-mile of a light rail station. This distance is often considered the maximum distance individuals will walk to access transit. This figure shows that another 26 percent reside between ½ and 2 miles of a light rail station. These members could walk/bike, drive, be dropped off, or take a bus to access the station. The remaining 70 percent reside at least two miles from a light rail station.

Figure 6 shows that one percent of Kaiser employees reside within ½-mile of a light rail station. Another 10 percent of employees reside between ½ and 2 miles of a light rail station. The remaining 89 percent reside at least two miles from a light rail station.

The relative travel time between light rail and driving is one of several important determinants of mode choice. **Table 6** compares AM peak hour inbound travel time and PM peak hour outbound travel time along the three LRT/freeway corridors for travel by (single occupant) vehicle and light rail. This data indicates that travel to the site by vehicle is currently much shorter than travel by light rail.

Table 6 –Peak Hour Directional Travel Time Comparison Along LRT/Freeway Corridors

Travel Mode	AM Peak Hour Inbound			PM Peak Hour Outbound		
	Blue Line (Northeast) at Watt Avenue	Gold Line (East) at Watt-Manlove	Blue Line (South) at Meadowview	Blue Line (Northeast) at Watt Avenue	Gold Line (East) at Watt-Manlove	Blue Line (South) at Meadowview
Single Occupant Vehicle [1]	15 to 20 min.	20 to 25 min.	20 to 30 min.	20 to 25 min.	25 to 35 min.	25 to 35 min.
Light Rail	52 min.	51 min.	50 min.	52 min.	49 min.	50 min.

Notes:
[1] Vehicle travel time range is based on https://www.google.com/maps website (using peak hour peak-period congested travel times) with trip origin/destination being the light rail station and project site.

We translated the Kaiser member and employee residence zip code data into the traffic analysis zone (TAZ) system of the SACMET regional travel demand model. We then used the base year version of this model to estimate the transit mode split associated with inbound travel from each TAZ to the Kaiser project (it is not possible to isolate the reverse movement due to model trip tracking limitations). For employees, only home-based-work trips were tracked. For members, trips with home-based-other, and non-home-based-other purposes were tracked. The model estimated that less than one percent of Kaiser members[6] and 14 percent of Kaiser employees[7] would take transit to access the proposed project.

6 Transit use is expected to be greater for employees than members because some members may have mobility challenges that pose challenges to access light rail stations. Further, travel behavior data shows that transit comprises a greater percentage of work versus other trips.

7 This result is supported by data from the *Highway Capacity Manual* (2010), Transportation Research Board,. pp. 3-26, in which it was reported using Census data that 12.3 percent of downtown commuters to Sacramento chose transit.

Page 9 of this memo presented estimated proportions of trips made by members versus employees during each peak hour. The SACOG model's transit mode split percentages can be applied to these proportions to create a 'weighted average' transit mode split for each peak hour.

Anticipated Walking

The project site is located within zip code 95811, which extends northerly to the American River, southerly to the UPRR tracks, westerly to the Sacramento River, and easterly to 12th Street. The adjacent zip code to the south is 95814, which covers the CBD. These two zip codes represent the expected primary origins/destinations of walk trips. These zones comprise 1.7 percent of all member residence zip codes and 0.3 percent of all employee residence zip codes. Thus, the number of Kaiser employees and members within the catchment area for walk trips is limited.

Anticipated Bicycling

The catchment area for bicycle trips to Kaiser will be geographically larger than walk trips. The majority of properties within zip codes 95811, 95814, 95816, 95833, and 95605 are within a four-mile bike ride of the Medical Center. These zones comprise 11 percent of all member residence zip codes and 3 percent of all employee residence zip codes. Thus, the number of Kaiser employees and members within the catchment area for bike trips to Kaiser is moderate, and suggests that some bicycling activity to/from the site is expected.

Table 7 displays the expected mode split for the proposed Kaiser Medical Center under baseline conditions. This table indicates transit (bus and light rail) mode split ranges from 5.5 to 8.5 percent depending on the peak hour, while the active transportation (bike and walk) mode split is 2.5 percent.

Table 7 – Kaiser Medical Center Mode Split – Baseline Conditions

Peak Hour	Travel Mode				
	Auto	Light Rail	Bus	Bike	Walk
AM	92%	5%	0.5%	2%	0.5%
PM	89%	8%	0.5%	2%	0.5%
Pre-Event	89%	8%	0.5%	2%	0.5%

Notes:
Refer to pages 10-13 for analyses methodologies used to estimate mode split.

Table 8 displays the net external vehicular trip generation of the proposed Kaiser Medical Center. This table reflects adjustments for travel by bicycle, walk, and transit trips.

Table 8 – Net External Vehicular Trip Generation of Proposed Medical Center

Land Use	Square Feet (ksf)	Trips [1]								
		AM Peak Hour			PM Peak Hour			Pre-Event Peak Hour		
		In	Out	Total	In	Out	Total	In	Out	Total
Medical Center	1,168	1,624	432	2,056	771	1,729	2,500	362	818	1,180
Reduction for Bicycle Trips (2%)		32	9	41	15	35	50	7	17	24
Reduction for Walk Trips (0.5%)		8	2	10	4	9	13	2	4	6
Reduction for Light Rail Trips (5% / 8%)[2]		81	22	103	62	138	200	29	65	94
Net External Vehicle Trips		1,503	399	1,902	690	1,547	2,237	324	732	1,056

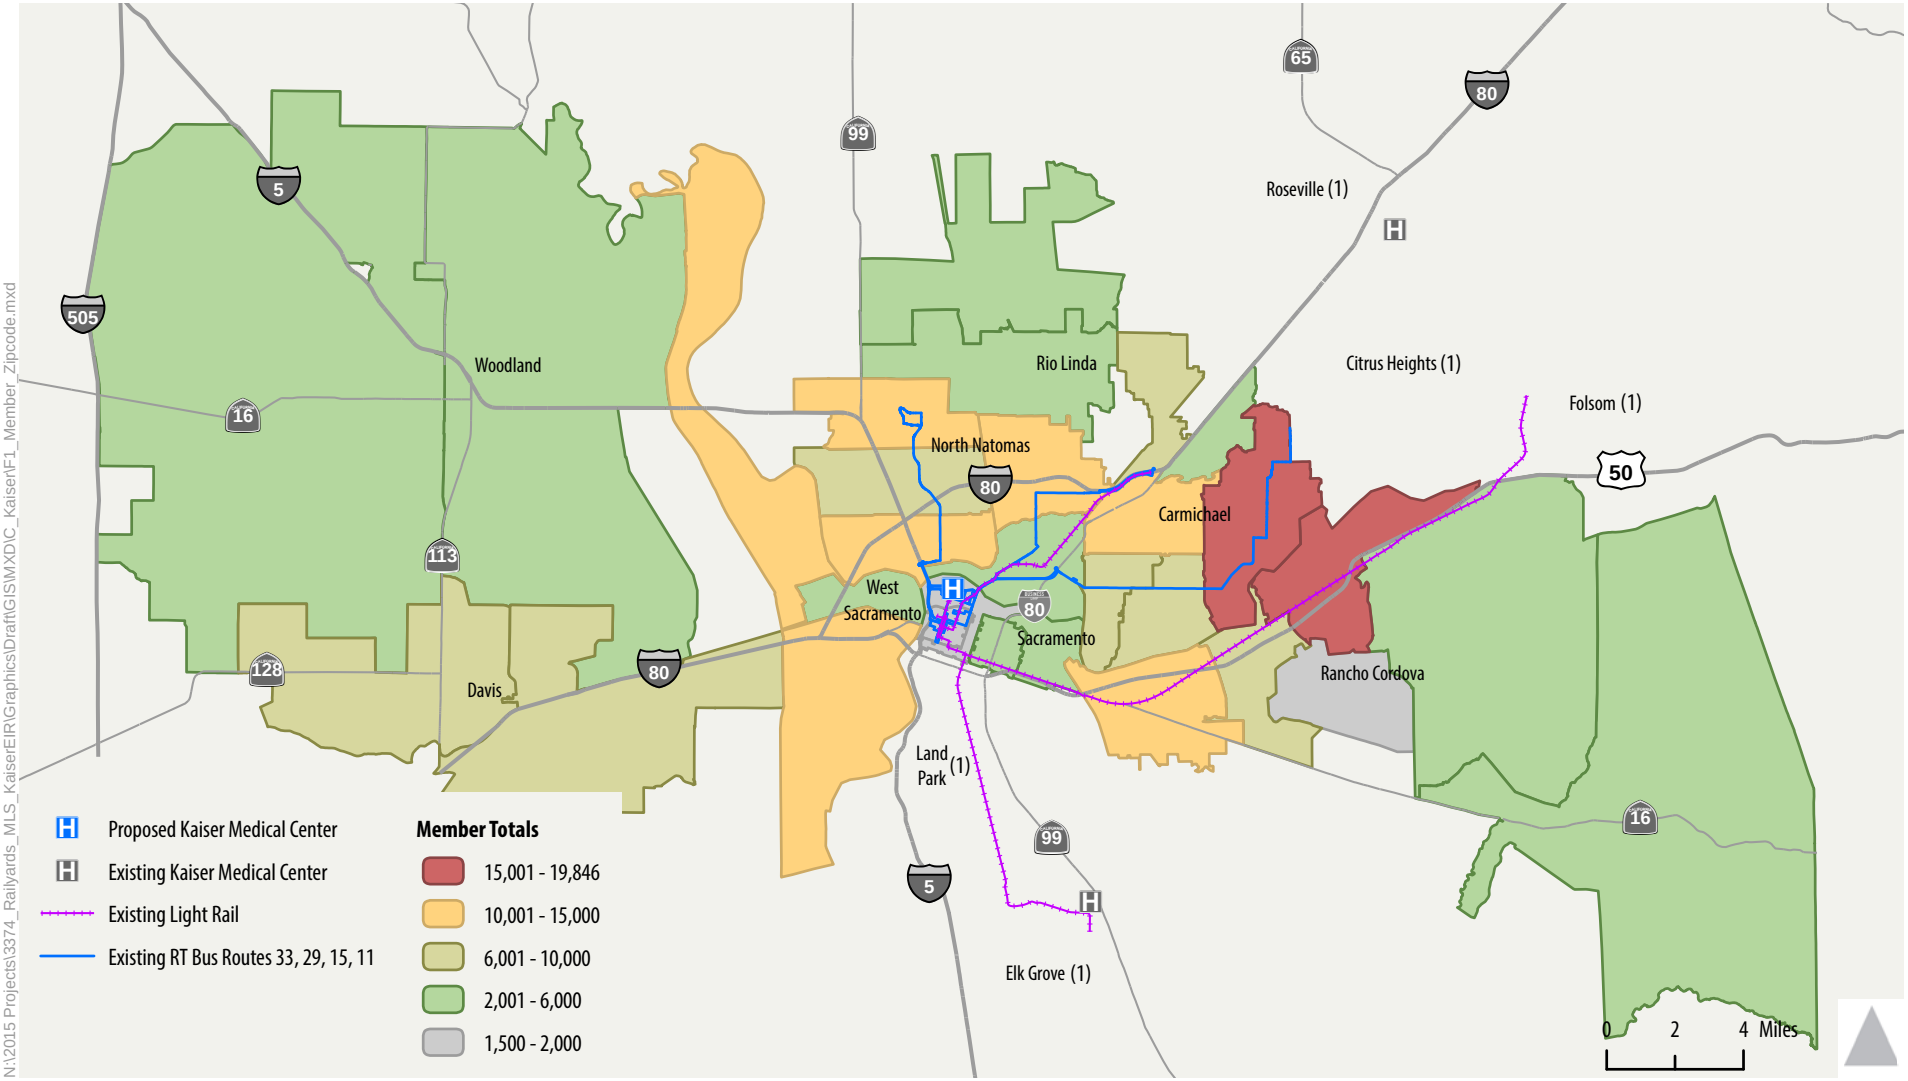
Notes:
[1] Gross trips from Table 4 are reduced for bicycle, walk, and light rail trips. Gross trips already account for 0.5% bus mode split.
[2] Light rail mode split is 5% during AM peak hour and 8% during PM and pre-event peak hours.

V. Vehicle Trip Assignment

The SACMET model will be used to assign vehicle trips through the study intersections and freeway facilities in accordance with the following steps:

1. The origin/destination of trips will be based on employee and member zip codes, which were translated into the model's TAZ system. The weighting of zip codes will be based on the trip proportions shown on page 8 for each peak hour.
2. A trip table (matrix) is created that assigns inbound and outbound vehicle trips between the various TAZs and the Kaiser site.
3. The model assigns project trips to various freeways and surface streets. This process allows for the traffic model to keep account of the volume and routing of trips. These trips are then added to the "Baseline No Project" scenario to yield the "Baseline Plus Medical Center" scenario. We will review the trip assignment patterns for reasonableness (i.e., congested ramps and other bottlenecks). If necessary, we will reroute trips to shorter paths.

Since the Kaiser project application calls for the closure of its Morse Avenue Facility, the "Baseline Plus Medical Center" scenario will remove existing vehicle trips generated by that facility. The process for doing this is very similar to the three steps described above.



Notes:

1. Top 27 zip codes which are shown, represent 96% of members.
2. Database represents members who would regularly use proposed project versus Kaiser regional medical facilities in Roseville and South Sacramento.

(1) Membership database shows no members in zip codes in these areas (due presumably to other Kaiser facilities being closer).

FEHR PEERS

FINAL TECHNICAL MEMORANDUM #3

Date: January 8, 2016

To: Pelle Clarke & Samar Hajeer – City of Sacramento

From: John Gard – Fehr & Peers

Subject*: *Travel Characteristics of Proposed MLS Stadium in Railyards Specific Plan

RS15-3374

This memorandum presents the anticipated travel characteristics of the proposed Major League Soccer (MLS) Stadium ("Stadium") project to be located north of Railyards Boulevard between 8th and 10th Streets in the Railyards Specific Plan. This evaluation is applicable primarily to the "Baseline Plus Stadium" scenario. However, portions of the analysis presented herein will also be applicable to cumulative conditions.

This memorandum is organized into the following sections:

I. Proposed Stadium Size and Activities
II. Travel Behavior at Sacramento Republic FC Soccer Matches
III. Analogous MLS Stadium – Providence Park (Portland Timbers)
IV. Expected Parking Demand and Proposed Supply
V. Expected Mode Split
VI. Trip Generation Characteristics
VII. Trip Distribution Characteristics
VIII. Vehicle Trip Assignment

I. Proposed Stadium Size and Activities

During the scoping process, it was determined that the following activity at the proposed Stadium would be quantitatively studied in the Draft EIR:

- Analysis of Pre-Event Peak Hour (6:30 to 7:30 PM) for Weekday Evening Sold-Out (25,000 attendees) Professional Soccer Match

The following two points offer support for the selection of this analysis scenario. First, although more MLS matches are played on weekends than weekdays, background traffic levels are greater during weekday evenings. Second, our prior studies (i.e., counts at a Sacramento Kings game at Sleep Train Arena and at a Sacramento Republic FC match at Bonney Field) have shown that the busiest pre-event hour of travel occurs one hour prior to the event start. The Draft EIR will include a more detailed description supporting why this day/time was selected for study (including the schedule for West Coast MLS teams and detailed traffic volume comparisons between weekday evenings and weekend afternoons).

It is possible for there to be both MLS and USL (United Soccer League) teams residing in Sacramento. This currently occurs in New York, Montreal, Toronto, Los Angeles, Seattle, Portland, Vancouver, and Salt Lake City. However, the majority of MLS teams (particularly those in smaller markets) do not also have a USL team. Additionally, it is noted that MLS matches do not necessarily overlap with USL matches. For these reasons, this analysis does not "subtract" trips associated with a Sacramento Republic FC weekday evening match being played at Bonney Field (at Cal Expo) at the same time an MLS game would be played at the proposed Stadium.

It is acknowledged that the travel behavior and demographics of attendees to MLS soccer matches may be somewhat different than for Sacramento Republic FC soccer matches. However, those differences are not currently known. Therefore, this analysis conservatively assumes the same travel behavior observed at Sacramento Republic FC soccer matches would also occur at the proposed Stadium. The analysis will consider how mode choice, route selection, ad parking will be influenced by the location of the proposed Stadium.

During weekday evening MLS matches, an estimated 460 employees would be present at the Stadium including police, medical, concessions, ticketing, ushers, security, and cleaning. The vast majority of these employees would arrive prior to the pre-event peak hour.

II. Travel Behavior at Sacramento Republic FC Soccer Matches

This section presents travel data collected at Sacramento Republic FC soccer matches. This data is used in later sections to help determine the expected mode split, vehicular trip generation, and parking demand of the proposed Stadium.

Vehicle Occupancy and Arrival Patterns at Sacramento Republic FC Match at Bonney Field

We conducted evening peak period traffic counts at all entry/exit points that serve Bonney Field at Cal Expo on Saturday, September 20, 2014. During this evening, the Sacramento Republic FC hosted a home playoff match, which had an announced sell-out crowd of 8,000 persons. Key findings from this data collection effort included:

- The gates opened at 6:00 PM and the match started at 7:30 PM. The following shows the vehicular arrival percentages in 30-minute increments. This data indicates that 70 percent of inbound traffic arrived during the one hour prior to the start of the event.

Time	Inbound Percentage
5:30-6:00 PM	6.1%
6:00-6:30 PM	16.7%
6:30-7:00 PM	38.0%
7:00-7:30 PM	32.0%
7:30-8:00 PM	7.2%
Total	100%

- During the pre-event peak hour, there was approximately one outbound trip for every 30 inbound trips. This was presumably made by an employee, delivery, or attendee drop-off.

- Vehicle occupancy was recorded for over 1,900 inbound vehicles, with the average vehicle occupancy (AVO) being 2.23 persons per vehicle.

- Travel to Bonney Field by walk or bike was negligible (though it is noted that some attendees chose to park on the north side of Exposition Boulevard and walk into Cal Expo to avoid paying for parking).

The reasonableness of these results is confirmed by counts we conducted on April 5, 2012 during a Sacramento Kings game at Sleep Train Arena. During that game, 67.4 percent of inbound traffic arrived during the one hour prior to the start of the event. An AVO of 2.27 was observed.

Light Rail Use at Hughes Stadium

Sacramento Regional Transit (RT) provided boarding and alighting information during four Sacramento Republic matches played at Hughes Stadium, which is located in close proximity (i.e., less than ¼-mile walk) to the Sacramento City College light rail station along the Blue line. The data below indicates that between 4.5 and 6.2 percent of attendees traveled to Hughes Stadium by light rail.

Date	Alightings (pre-match)	Boardings (post-match)	Attendance	Mode Split
5/3/2014	1,082	972	17,414	5.6% - 6.2%
5/17/2014	916	967	20,231	4.5% - 4.8%
6/7/2014	910	963	20,231	4.5% - 4.8%
2/28/2015	1,043	930	20,231	4.6% - 5.2%

Sacramento Republic FC Season Ticket Holder Residence Zip Codes

We were provided anonymous residence zip codes for all 2015 season ticket holders by Sacramento Republic FC representatives. Approximately two-thirds of the 12,000 seats at Bonney Field, which was expanded from 8,000 to 12,000 seats after the 2014 season, are reserved for season ticket holders. Of this total, 6,687 tickets are associated with individuals (versus businesses or other organizations).

Figure 1 displays the distribution of zip codes for residential season ticket holders within the Sacramento region. This figure indicates that zip codes with the greatest proportion of season ticketholders (i.e., 3 to 5 percent in each zip code) occurs in Land Park, Elk Grove, East Sacramento, Carmichael, and Folsom. However, other areas of the region including Natomas, West Sacramento, Rancho Cordova, Roseville, and eastern Sacramento County also have significant shares (i.e., ranging from 1.5 to 3 percent in each zip code). Lastly, it is noted that 17 percent of season ticket holder zip codes are beyond the limits of Figure 1, suggesting that some reside in outlying areas such as Yuba City, Dixon, Lincoln, Auburn, Cameron Park, Placerville, Galt, Rancho Murrieta, and Stockton/Lodi.

Figure 2 indicates the general direction of travel residential season ticket holders would likely take to access the proposed Stadium (for travel originating/destined from the residence). This information is based on GIS mapping of zip code frequency and street network connectivity. This figure shows the predominant travel directions being to/from the east, south, and north. Attendees would use a variety of freeways including I-5, I-80, SR 160, SR 99, US 50, the W-X Freeway, and the Capital City Freeway.

Sacramento Republic FC Attendee Cell Phone Data Travel Patterns

We contracted with AirSage to obtain cell phone data for eight (8) Sacramento Republic weekday evening matches played at Bonney Field in 2014 and 2015. AirSage contracts with cell phone service providers to obtain this data. Their agreements require the data to be 'scrubbed' so that individual travel behavior is anonymous. They use complex analytical tools and methods to determine when a trip begins and ends based on the location of the cell phone, time elapsed without cell phone movement, and other considerations. We provided AirSage with a GIS file containing the traffic analysis zone (TAZ) system of the SACMET regional travel demand model. We added several additional zones beyond the SACOG region to capture travel from San Joaquin and Solano Counties. We also specified that inbound trips be collected from 5 to 8 PM during match days. Similarly, data for outbound trips was collected from 9 PM to 12 AM. We made certain that the selected match days did not overlap with other major events held at Cal Expo, such as the State Fair and remote parking for the 2015 US Senior Open.

The data yielded a sample of 722 inbound trips and 878 outbound trips. Over the eight matches, the total attendance was approximately 74,000 persons. Each directional sample represents about one percent of overall attendance level. This level of sampling is expected for several reasons. First, most, but not all attendees have cell phones. Second, data was provided by one of the cell phone service providers in the area, meaning only a portion of the cell phone market was sampled. Third, cell phone data is not continuously transmitted, and as such, some trips involving idle phones were not observed. Fourth, AirSage carefully reviews the cell phone records and removes data points that are potentially inaccurate (e.g., unclear of start/end of trip or TAZ). We reviewed the resulting sample and found the data to represent a broad geographic area of trip origins and destinations.

The pre-event inbound directionality of trips showed a strong correlation with season ticket holder zip code residence data. This suggests that many of the pre-event trips originated from a residence, which is generally reasonable since games started at 7:30 PM (i.e., less likely for trip to come from an employment center).

The post-event outbound directionality of trips is comparable to the pre-event distribution, but shows a slightly greater orientation of trips toward TAZs with retail uses. In fact, the TAZs comprising the post-event destinations had 16 percent more retail employees (based on data from the SACMET model) than the pre-event destinations. This makes intuitive sense because two of the eight games were played on a Friday evening, in which attendees may be more inclined to visit a restaurant, bar, or ice cream shop after games, given that most people do not work on Saturdays.

In summary, the cell phone data is considered valid for use in helping to assess the project's travel characteristics.

Figures 3 and 4 show the trip origins and travel directions for Sacramento Republic FC attendees. **Figures 5 and 6** show similar information for post-event trip destinations. As is described later, this data is used in the distribution and assignment of project trips.

III. Analogous MLS Stadium – Providence Park (Portland Timbers)

The Portland Timbers are an MLS team that plays their home matches at Providence Park (22,000-seat capacity that frequently sells out) in the western area of downtown Portland, Oregon. We visited this facility in July 2015 and spoke with Mr. Jim Blocher, Guest Services Coordinator. We also observed their operations during a Portland Thorns (female professional team) soccer match played at the facility.

Providence Park is considered to be amongst the best analogous MLS facilities to the proposed Stadium for the following reasons (refer to Appendix A for photos):

1. It is located in downtown Portland, approximately one-mile west of the heart of downtown (i.e., Pioneer Place). It feels physically separated from downtown by the I-405 freeway. *The proposed Stadium is situated a similar distance from downtown Sacramento and is also physically separated by the UPRR tracks.*

2. Providence Park is served by the Tri-Met MAX Blue and Red light rail lines. The light rail stop is less than ¼-mile from the facility. Both lines extend westerly from downtown Portland (providing connections to other light rail lines and its downtown streetcar system). These lines continue westerly to the suburban communities of Beaverton and Hillsboro. A bus stop is also situated adjacent to the facility that is used by multiple bus lines that serve numerous areas of the City. *Although the proposed Stadium would also have both bus and light rail service, the overall level of transit service is considered much greater at Providence Park.*

However, there are some noteworthy differences between Providence Park and the proposed Stadium. Providence Park was originally constructed in 1928. Sidewalk widths and on-site pedestrian walkways, number of bathroom stalls, etc. can therefore be somewhat lacking. The available parking supply in the vicinity of Providence Park is limited. As a result, bus, light rail, and bicycling are preferred modes of travel. Although specific estimates of mode split are not available, we were informed that the majority of its patrons travel to the facility in a non-auto mode.

The number of bicyclists traveling to the facility is substantial. In response, the segment of Morrison Street along the facility's frontage is closed to vehicular traffic. It is lined with temporary barricades that are used for bicycle parking during matches.

Mr. Blocher also described various other operational details that will help inform some of our on-site circulation review efforts. This information will be shared in a future memorandum pertaining to site circulation.

IV. Expected Parking Demand and Proposed Supply

This section estimates the parking demand for the proposed Stadium during a sold-out 25,000-person MLS match. The following estimates and assumptions are used to develop this estimate:

- 90 percent of attendees travel by vehicle, with the remaining 10 percent traveling by light rail, bus, bicycle, or walking (see Section V).
- The AVO is 2.23 based on Sacramento Republic FC observations.
- All employees are assumed to park in remote lots and be shuttled to the Stadium.

Based on these parameters, a sold-out 25,000-seat MLS match would require 10,090 parking spaces[1]. To assess available parking in the vicinity of the Stadium, we performed the following evaluations:

- Obtained the proposed supply of parking to be provided on vacant lots within the Railyards Specific Plan.
- Conducted field observations to measure available parking south of the UPRR tracks.
- Evaluated the amount of available parking on vacant and underutilized parcels located north of the Railyards Specific Plan.

Figure 7 shows that there are a total of more than 12,000 planned, available parking spaces in the vicinity of the proposed Stadium. However, as indicated by the walk distance contour lines, not all spaces are located within a ¾-mile or less walk of the stadium. This figure includes various notes that describe in detail how the available parking supply was calculated.

Figure 8 shows that there would be over 10,875 parking spaces located within a ¾-mile walk of the proposed Stadium. Approximately one-third is each located within ¼-mile, within ¼- to ½-mile, and within ½- to ¾- mile of the Stadium. The anticipated use of parking is described in Section VIII.

In summary, an adequate supply of parking is proposed to accommodate a sold-out 25,000-person MLS soccer match under baseline conditions.

V. Expected Mode Split

This section discusses the anticipated use by attendees of light rail, bus, walking, bicycling, and vehicle to travel to the proposed Stadium.

Anticipated Use of Light Rail

During a meeting on November 3, 2015 with the applicant, RT, and City of Sacramento, RT officials expressed a willingness to work with the City and the applicant to ensure that necessary light rail facilities and services would be in place by the time the proposed Stadium would open. Specific improvements identified as being necessary included:

[1] Calculated as follows: 25,000 attendees x 90% auto mode split x one parking space per 2.23 persons = 10,090 spaces.

- Construction of a new (either temporary or permanent) light rail station located on the east side of 7th Street north of Railyards Boulevard.
- Increased service frequency to accommodate special events (including 15-minute train headways and/or 3- or 4-car trains).
- Increased service duration to accommodate transit riders after an MLS match ends (i.e., service would extend until 10:30 or 11:00 PM for a 7:30 PM match).

We estimate a six percent light rail mode split for pre- and post-event attendees. This estimate is based on the following:

- When Sacramento Republic FC matches were played at Hughes Stadium (adjacent to a blue line stop), an average of five percent of attendees were observed using light rail.
- Although the proposed Stadium would be located closer to downtown than Hughes Stadium, it would require any riders using the Blue line (from Cosumnes River College or Watt/I-80) or the Gold line (from Folsom) to transfer at a downtown station to the Green line. In contrast, the Blue line that serves Hughes Stadium does not require the same degree of transfers, which suggests that some riders may choose to deboard at the Alkali Flat station and walk to the Stadium.
- The expected mode split also considers that a portion of the approximately three percent of current Sacramento Republic FC season ticket holders reside in close proximity of the Stadium (i.e., in zip codes 95811 and 95814) and could therefore use the Green line versus walking for their trip. See below for detailed discussion.

Anticipated Use of Bus

The proposed Stadium would initially (unless service was upgraded) be served by four RT routes (11, 15, 29, 33). Routes 11 and 15 operate on one-hour headways throughout most of day to serve Natomas and Del Paso Heights/Rio Linda. However, their weekday service ends by 8 or 9 PM, meaning that current operations would not provide opportunities for attendees to ride the bus after matches. Routes 29 and 33 are peak-period only.

However, since RT has pledged to work with the City and the Stadium to enhance transit (including bus) operations in response to demand, we estimate that 0.5 percent of MLS match attendees will travel by bus to/from the Stadium. This translates into 125 riders in each direction, which could be accommodated by four special event buses.

Anticipated Walking

The project site is located in zip code 95811, which extends northerly to the American River, southerly to the UPRR tracks, westerly to the Sacramento River, and easterly to 12th Street. The adjacent zip code to the south is 95814, which covers the CBD. These two zip codes represent the expected primary origins/destinations of walk trips. These zones comprise three percent of all Sacramento Republic FC season ticket holder residence zip codes. About 15 percent of all season tickets are registered to businesses or organizations, some of which are presumably located downtown. Thus, the catchment area for walk trips could include about five percent of all match attendees.

It is expected that some potential walk trips would instead use the Green line. This is particularly true for destinations to the south, in which it would be a ¾-mile walk from the 7th/K and 8th/K LRT Green line stations to a future station on 7th Street at Railyards Boulevard. Some attendees may choose to ride light rail versus walk that distance. In contrast, the Green line terminal station at Richards/Township 9 is located less than ½-mile north of a future Railyards/7th Street station. Other factors such as wait time, train crowding, and cost would also influence their mode choice.

Based on the above factors, we estimate that 1.5 percent of MLS match attendees will walk (as their primary mode of travel). It is important to note that this mode split represents the travel mode for the primary trip used to access the Stadium. There will be substantial numbers of pedestrians who will walk from remote lots and garages (after driving to them) to access the Stadium.

Anticipated Bicycling

The catchment area for bicycle trips to the proposed Stadium will be geographically larger than the walk trip catchment area. The majority of properties within zip codes 95811, 95814, 95816, 95833, and 95605 are within a four-mile bike ride of the proposed Stadium. These zones comprise eight percent of all season ticket holder residence zip codes. Thus, the number of attendees within the catchment area for bike trips to the proposed Stadium is considerable, and suggests that bicycling activity to/from the site is expected. Based on the above factors, we believe it is reasonable to expect about two percent of attendees (500 bicyclists) will bicycle to/from matches. It is important to note that this mode split applies only to weekday evening soccer matches. During weekends, west coast MLS soccer matches often begin in the afternoon, meaning that pre- and post-event bicycle travel would occur during daylight hours.

Table 1 displays the expected mode split for the proposed Stadium under baseline conditions. As shown, 90 percent of MLS match attendees are anticipated to travel to the proposed Stadium by automobile.

Table 1 – Proposed Stadium Mode Split – Baseline Conditions					
Peak Hour	Primary Travel Mode				
	Auto	Light Rail	Bus	Walk	Bike
Pre-Event / Post-Event	90%	6%	0.5%	1.5%	2%
Notes: Refer to pages 7-9 for analysis methodologies used to estimate mode split.					

It is anticipated that the mode split would change significantly under cumulative conditions due to a variety of factors. The Green line is planned to extend northerly from its current terminus to serve the Natomas area and beyond. Additional bicycle facilities are planned including a two-way cycle track on 12th Street. Development of the Railyards Specific Plan is assumed to occur under cumulative conditions, which provides numerous opportunities for shorter trips from businesses, retail/restaurant establishments, and residences. The mode split under cumulative conditions will be presented in future memorandum.

VI. Trip Generation Characteristics

The proposed Stadium's weekday pre-event peak hour trip generation is calculated based on the auto mode split, percentage of attendees arriving during the pre-event peak hour, and AVO. **Table 2** indicates that the proposed Stadium would generate approximately 7,060 inbound trips and 235 outbound trips during the pre-event peak hour.

Table 2 – Pre-Event Vehicular Trip Generation of Proposed Stadium – Baseline Conditions				
Land Use	Quantity	Pre-Event Peak Hour (6:30-7:30 PM)		
		Inbound	Outbound	Total
Stadium	25,000 Attendees - Auto Mode Split (90%) [1] - Average Vehicle Occupancy (2.23) [2] - Percent Arriving During Pre-Event Peak Hour (70%) [2]	7,063	-	-
	Outbound trips [3]	-	235	
	Pre-Event Peak Hour Trip Generation	7,063	235	7,298
Notes: [1] Refer to Section V for mode split estimates. [2] Refer to Section II for AVO and arrival characteristics for analogous Sacramento Republic FC match. [-3] One outbound trip (i.e., deliveries, employee/attendee drop-offs, uber/taxi) for every 30 inbound trips based on data from analogous Sacramento Republic FC match.				

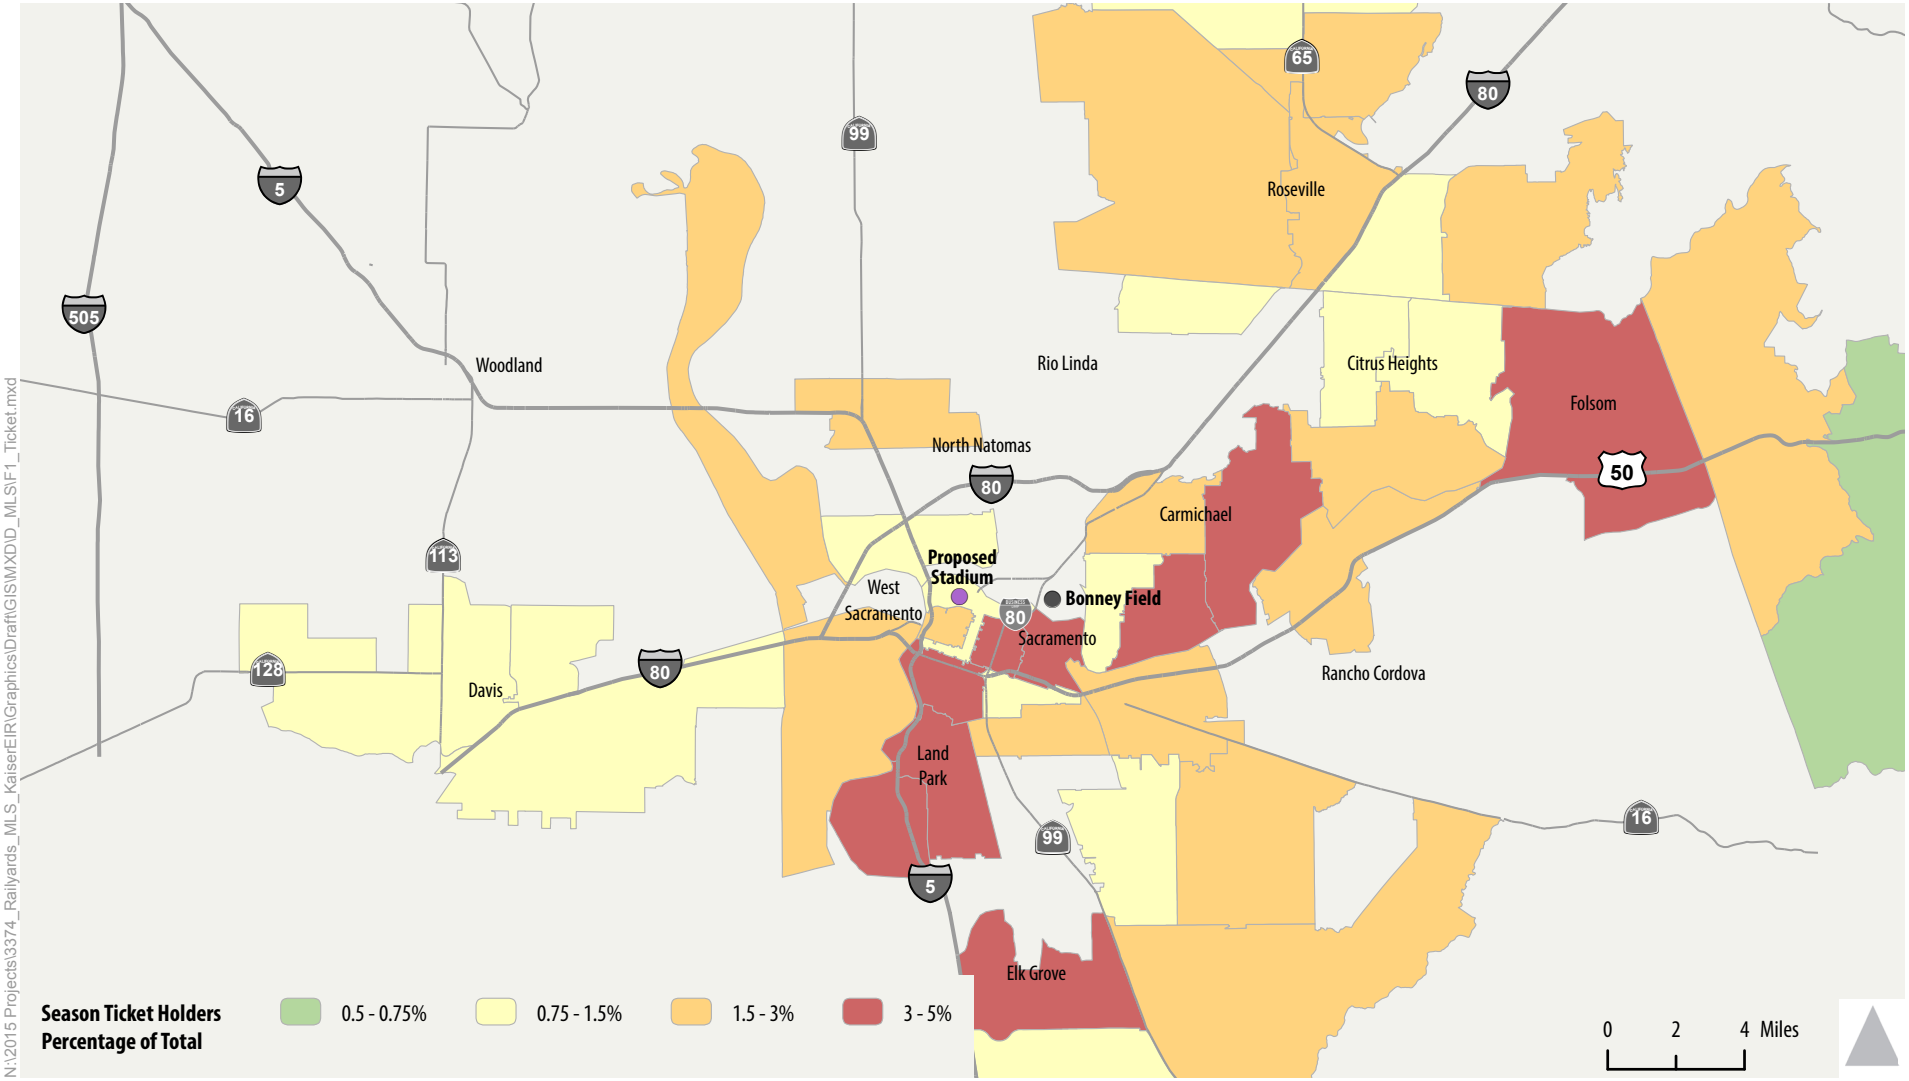
VII. Trip Distribution Characteristics

The pre-event peak hour trips would be distributed in accordance with Figure 3, which displays the trip origins of Sacramento Republic FC attendees based on the cell phone data.

VIII. Vehicle Trip Assignment

The SACMET model will be used to assign vehicle trips through the study intersections and freeway facilities in accordance with the following steps:

1. Project trips will be assigned into various garages, surface lots, and available on-street spaces based on the amount of available parking in each facility, location of each facility (relative to trip origin and Stadium), and walk distance. The assignment process will consider the origin/destination of trips (i.e., trips from the north will likely park north of the Stadium).
2. A trip table (matrix) is created that assigns inbound and outbound vehicle trips between the TAZs (shown in Figure 3) and a series of newly created TAZs that represent parking at Stadium.
3. The SACMET travel forecasting model assigns project trips to various freeways and surface streets. This process allows for the traffic model to keep account of the volume and routing of trips. These trips are then added to the "Baseline No Project" scenario to yield the "Baseline Plus Stadium" scenario. We will review the trip assignment patterns for reasonableness (i.e., congested ramps and other bottlenecks). If necessary, we will reroute trips to shorter paths.



Notes:

1. According to the Sacramento Republic FC, about 2/3 of seats at the 12,000-seat Bonney Field facility were reserved by season ticket holders during the 2015 season. This exhibit displays anonymous zip code data for the approximately 6,687 personal (non-business) season ticket holders.
2. Zip codes data provided represent 83% of all season ticket holders.

Figure 1

Sacramento Republic FC Season Ticket Holder Residence Zip Codes

FEHR PEERS

FINAL TECHNICAL MEMORANDUM #4

Date: January 22, 2016

To: Pelle Clarke & Samar Hajeer – City of Sacramento

From: John Gard – Fehr & Peers

Subject*: *Travel Characteristics of Proposed Railyards Specific Plan Update

RS15-3374

This memorandum presents the anticipated travel characteristics of the proposed Railyards Specific Plan Update (RSPU) under baseline and cumulative conditions. A separate memo will be prepared to document the expected travel characteristics of the 2007 Railyards Specific Plan, which would serve as the 'no project' scenario under cumulative conditions.

This memorandum is organized into the following sections:

I. Proposed Railyards Specific Plan Update Land Uses and Employment
II. RSPU Trip Generation – Baseline Conditions
III. RSPU Trip Generation – Cumulative Conditions
IV. RSPU Trip Distribution/Assignment Methods

I. Proposed Railyards Specific Plan Update Land Uses and Employment

According to the most recent project site plan (Sacramento *Railyards – Land Use Option 1*, AECOM, December 21, 2015), the RSPU would consist of the following land uses:

- 3,857,027 square feet of office space
- 514,270 square feet of retail space
- 771,405 square feet of flexible mixed-use space [1]
- Kaiser Medical Center (658,000 square feet of hospital and 510,000 square feet of medical-office) [2]
- 6,000 multi-family dwelling units [3]
- 1,100 hotel rooms
- Major League Soccer (MLS) Stadium
- 485,390 square feet of historical and cultural space consisting of 162,525 square feet of retail, 142,865 square feet of flex space[1], and a 180,000 square-foot museum.

---

1 Assumed to consist of 75 percent office and 25 percent retail per December 17, 2015 e-mail from Ms. Teresa Haenggi with the City of Sacramento Community Development Department.

2 Excludes the 60,000 square-foot Central Utility Plant (CUP) that generates little or no trips.

3 An email from Brian Boxer of ESA on January 21, 2016 confirmed that all residential would be multi-family, attached units.

The non-residential uses would consist of the following totals by land use type:

- 4,542,730 square feet of office space
- 905,362 square feet of retail space
- 658,000 square feet hospital space
- 510,000 square feet of medical-office space
- 180,000 square-foot museum

The total non-residential land uses (excluding the Stadium) sum to 6,796,092 square feet.

Table 1 shows the employment associated with the non-residential uses.[4] As shown, during typical weekdays when an MLS match is not being played, approximately 22,900 employees would work within the RSPU. An additional 460 employees would be present during days in which an MLS match is being played. The project would have a jobs-housing ratio of 3.8, which implies the vast majority of workers will be imported from external destinations (i.e., versus live within the RSPU).

Table 1: Employment Within Railyards Specific Plan Update

Land Use	Quantity (square feet)	Employee Ratio	Employees	
			Weekdays Without an MLS Match	Weekdays With an MLS Match
Office	4,542,730	1 per 300 square feet [1]	15,142	15,142
Retail	905,362	1 per 400 square feet [1]	2,263	2,263
Medical Center	1,168,000	1 per 275 square feet [2]	4,247	4,247
Museum	180,000	1 per 1,500 square feet [3]	120	120
Hotel	1,100 rooms	1 per room	1,100	1,100
Stadium	N / A	N / A [4]	30	490
		Total	22,902	23,362

Notes:
[1] Based on employment yields from *Railyards Specific Plan EIR* (2007).
[2] Based on input provided in an email from Matthew Pruter of ESA dated 1/4/2016, which was based on ESA's studies of employment density at other Kaiser Medical Center facilities.
[3] Based on input provided by ESA in an email from Brian Boxer dated 1/4/2016, which was based on ESA's studies of employment density at other museums.
[4] Based on input provided by ESA in an email from Brian Boxer dated 12/22/2015, which is based on data from Convention Sports & Leisure International who is working on behalf of the applicant.

[4] While this information is not used directly in the transportation impact study, it is used when calculating Vehicle Miles of Travel (VMT) per capita or employee.

II. RSPU Trip Generation – Baseline Conditions

This section presents the estimated trip generation of the RSPU under baseline conditions. However, prior to doing so, a discussion regarding the expected mode split for residents, employees, and retail patrons in transit-oriented developments (TODs) and in downtown Sacramento is presented for context.

Travel Characteristics of TODs

A substantial amount of research has been conducted on the topic of TOD travel behavior. This section highlights the key findings of several research studies that are applicable to the proposed project's travel characteristics. A 2004 research paper entitled "*Travel Characteristics of Transit-Oriented Development in California*" by Cervero, Lund, and Willson analyzed travel behavior of TOD residents, employees, and retail patrons at various TODs located on transit (heavy rail, light rail, and commuter rail) lines in Northern and Southern California. The following summarizes some key findings from that research:

- A total of 624 completed surveys of TOD residents were obtained from 26 different stations. The following summarizes their self-reported transit use (either bus or rail):
  - Home-Based Work Trips: 26.5% via bus or rail
  - Home-Based Non-Work Trips: 8.1% via bus or rail

- A total of 877 completed surveys of TOD employees were obtained from 10 different stations. Transit (either rail or bus) was indicated as the primary commute mode by 18.8% of the surveyed TOD employees.

- Surveys of 1,237 retail patrons were conducted at three major transit-focused shopping centers along the Los Angeles Metro, BART, and San Diego Trolley lines. Approximately 20 percent of those surveyed indicated that they had used transit (either bus or rail) to access the site.

The Cervero, Lund, and Willson (2004) research found that levels of transit usage varied significantly by region and rail type. In general, TODs located closer to central business district or adjacent to rail systems with more frequent headways tended to have greater levels of ridership.

Downtown Sacramento Mode Split

According to the 2010 Census, residents of Sacramento's Central City have the following journey-to-work mode splits:

- 15% walk
- 8% bike
- 7% transit

The walk/bike share of non-commute trips is likely higher. This data suggests that downtown residents may have a non-auto mode split of at least 30 percent. Exhibit 3-19 in Chapter 3 of the *Highway Capacity Manual* (2010) displays the transit share of downtown commuters for several large metropolitan areas.[5] These data, derived from Commuting in America III adapted from Commuting to Downtown in America: Census 2000 report to the Transportation Research Board Subcommittee on Census Data for Transportation Planning 2005, show 12 percent of commuters heading into downtown Sacramento chose transit.[6]

MXD+ Trip Generation Tool

The internalization of trips within the project site was estimated using a Mixed-Use Trip Generation Model (MXD), which was developed for the US Environmental Protection Agency (EPA) to estimate internal trip-making and external trips by non-auto travel modes. This model was developed by consultants and academic researchers to more accurately estimate the external vehicular trip generation of mixed-use land development projects than prior methods (e.g., ITE internalization spreadsheet). The model was developed based on empirical evidence at 240 mixed-use projects located across the U.S. The model considers various built environment variables such as land use density, regional location, proximity to transit, and various design variables when calculating the project's internal trips, and external trips made by auto, transit, and non-motorized modes. The MXD model has been applied in numerous EIRs throughout California. **Appendix A** to this memo contains MXD+ model output for the RSPU under baseline and cumulative conditions.

Table 2 displays the daily, AM peak hour, and PM peak hour trip generation of the proposed project under baseline conditions. It should be noted that the internalization and non-auto external mode split percentages do not apply equally to all land use types. These percentages represent the overall level of reductions based on the MXD+ model results. Some uses, such as office and residential, would have greater reduction levels than others, such as the retail and medical center.

No pass-by reductions have been made because the MXD+ modeling is calibrated to total external trips (including new and pass-by). Accordingly, further reductions for pass-by are not warranted.

Reduction for Internal Trips [3] (12.7% Daily / 17.7% AM / 19.8% PM)			-10,682	-10,682	-21,365	-1,681	-646	-2,328	-1,161	-2,177	-3,338
Shift to Transit Trips [3] (7.3% Daily / 12.8% AM / 12.7% PM)			-6,140	-6,140	-12,280	-1,216	-467	-1,683	-745	-1,397	-2,141
Shift for Walk/Bike [3] (11.9% Daily / 14.5% AM / 11.0% PM)			-10,009	-10,009	-20,019	-1,377	-529	-1,907	-645	-1,210	-1,855
Net External Vehicle Trips			57,281	57,281	114,562	5,223	2,008	7,233	3,313	6,213	9,526

Notes:
[1] Gross trip rates based on *Trip Generation Manual* (Institute of Transportation Engineers, 2012) for all land uses with the exception of the medical center whose trip generation was based on measured trip rates at the Kaiser Morse Avenue facility. Trip rates for office space based on weighted average rate given amount of office space. Trip rates for retail based on fitted curve equation for typical size of 150,000 square-foot retail center.
[2] For this typical weekday condition scenario, no MLS match assumed at proposed stadium. Assumed trips are associated with modest levels of on-site employees (administrative, janitorial, etc.).
[3] Internal trips, and external trips made by transit, walking, and bicycling based on MXD+ model output (see previous page).
Source: Fehr & Peers, 2015.

Table 2 shows that between 13 and 20 percent of project trips (depending on the analysis period) are expected to remain internal to the site. The use of transit varies from 7 to 13 percent of project trips (depending on the analysis period). External travel by walk and bike varies from 11 to 15 percent of project trips (depending on the analysis period). The RSPU (assuming a MLS match is not being played) would generate approximately 114,600 external daily trips, 7,230 AM peak hour trips (72 percent inbound), and 9,530 PM peak hour trips (65 percent outbound).

Under Baseline Plus Stadium (Only) conditions, it is estimated that 90 percent of game attendees would drive to the facility. However, with buildout of the RSPU, opportunities for walking and bicycling would increase substantially due to new nearby land uses. Accordingly, the walk/bike mode split of Stadium attendees is estimated to modestly increase from 3.5 percent (Stadium-only) to 6 percent (Stadium and buildout of RSPU). For a baseline condition analysis, it is not reasonable to assume a substantial redistribution of soccer match attendees to new housing (or employment centers) near the Stadium. Such activity, while likely, would take place over a number of years.

Table 3 displays the RSPU buildout trip generation during the pre-event peak hour assuming an MLS game is being played. The RSPU (assuming a MLS match is being played) would generate approximately 8,320 inbound trips and 2,960 outbound trips during the pre-event peak hour.

Table 3: Pre-Event Peak Hour Trip Generation of RSPU with MLS Match – Baseline Conditions

Land Use	Quantity	Net External Vehicle Trips [1]		
		In	Out	Total
Medical Center Office Retail Multi-Family Residential Hotel Museum	1,168 ksf 4,542.7 ksf 905.4 ksf 6,000 units 1,100 rooms 180 ksf	1,456	2,734	4,190
Stadium [2]	N / A	6,866	229	7,095
Total Net External Vehicle Trips		8,322	2,963	11,285

Notes:
[1] Net external vehicle trips during pre-event peak hour for non-Stadium uses represents 44 percent of the trips generated by these uses during the PM peak hour. This 0.44 factor is based on existing traffic volumes during the weekday pre-event peak hour versus PM peak hour observed on segments of I Street, J Street, 5th, 7th, 12th, and 16th Streets.
[2] Sold-out 25,000-person MLS match with 7:30 PM start time assumed at proposed stadium. Vehicle mode split estimated to be 87.5%.
Source: Fehr & Peers, 2015.

Table 4 presents the estimated external daily trip generation of the RSPU on a weekday when an MLS match is being played.

Table 4: Daily Trip Generation of RSPU with MLS Match – Baseline Conditions				
Land Use	Quantity	Net External Vehicle Trips [1]		
		In	Out	Total
Medical Center Office Retail Multi-Family Residential Hotel Museum	1,168 ksf 4,542.7 ksf 905.4 ksf 6,000 units 1,100 rooms 180 ksf	57,281	57,281	114,562
Stadium [2]	Attendees	10,137	10,137	20,274
	Employees	418	418	836
Total Net External Vehicle Trips		67,836	67,836	135,672

Notes:
[2] Sold-out 25,000-person MLS match at proposed stadium. Vehicle mode split estimated to be 87.5%. MLS match assumed to have 460 employees with an average vehicle occupancy of 1.1 employees (and conservatively assuming all drive to the site).
Source: Fehr & Peers, 2015.

III. RSPU Trip Generation – Cumulative Conditions

This section presents the estimated trip generation of the RSPU under cumulative conditions.

Table 5 displays the daily, AM peak hour, and PM peak hour trip generation of the proposed project under cumulative conditions. As noted in the table, the daily trip generation totals do not assume an MLS match is being played. Daily trips associated with an MLS match are presented later in this section.

Table 5 shows that between 13 and 18 percent of project trips (depending on the analysis period) are expected to remain internal to the site. The use of transit varies from 8 to 14 percent of project trips (depending on the analysis period). External travel by walk and bike varies from 15 to 19 percent of project trips (depending on the analysis period).

Table 6 displays the expected mode split of attendees to the proposed Stadium under cumulative conditions. This table indicated greater levels of transit, bike, and pedestrian usage consistent with enhanced transit service and nearby walkable destinations.

Table 7 displays the RSPU buildout trip generation during the pre-event peak hour assuming an MLS game is being played.

Table 5: Peak Hour and Daily Trip Generation of Railyards Specific Plan Buildout – Cumulative Conditions

Land Use	ITE Land Use Code	Quantity	Trips [1]								
			Daily			AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total	In	Out	Total

Shift to Transit Trips [3] (7.8% Daily / 13.8% AM / 13.8% PM)			-6,561	-6,561	-13,122	-1,311	-504	-1,815	-809	-1,518	-2,327
Shift for Walk/Bike [3] (15.6% Daily / 19.0% AM / 14.6% PM)			-13,122	-13,122	-26,243	-1,804	-694	-2,499	-856	-1,606	-2,462
Net External Vehicle Trips			53,916	53,916	107,833	4,805	1,847	6,653	3,119	5,850	8,969

Notes:
[1] Gross trip rates based on *Trip Generation Manual* (Institute of Transportation Engineers, 2012) for all land uses with the exception of the medical center whose trip generation was based on measured trip rates at the Kaiser Morse Avenue facility. Trip rates for office space based on weighted average rate given amount of office space. Trip rates for retail based on fitted curve equation for typical size of 150,000 square-foot retail center.
[2] For this typical weekday condition scenario, no MLS match assumed at proposed stadium. Assumed trips are associated with modest levels of on-site employees (administrative, janitorial, etc.).
[3] Internal trips, and external trips made by transit, walking, and bicycling based on MXD+ model output.
Source: Fehr & Peers, 2015.

Table 6: Proposed Stadium Mode Split – Cumulative Conditions

Peak Hour	Primary Travel Mode				
	Auto	Light Rail	Bus	Walk	Bike
Pre-Event / Post-Event	83%	10%	1%	3%	3%

Notes: This mode split applies to conditions associated with RSPU buildout. Resulting auto mode of 83 percent is slightly lower than the 87.5% auto mode split under baseline conditions due to greater levels of transit usage corresponding to increased light rail service (i.e., green line extension to Natomas).

Table 7: Pre-Event Peak Hour Trip Generation of RSPU with MLS Match – Cumulative Conditions				
Land Use	Quantity	Net External Vehicle Trips [1]		
		In	Out	Total
Medical Center Office Retail Multi-Family Residential Hotel Museum	1,168 ksf 4,542.7 ksf 905.4 ksf 6,000 units 1,100 rooms 180 ksf	1,372	2,574	3,946
Stadium [2]	N / A	6,513	217	6,730
Total Net External Vehicle Trips		7,885	2,791	10,676

Notes:
[1] Net external vehicle trips during pre-event peak hour for non-Stadium uses represents 44 percent of the trips generated by these uses during the PM peak hour. This 0.44 factor is based on existing traffic volumes during the weekday pre-event peak hour versus PM peak hour observed on segments of I Street, J Street, 5th, 7th, 12th, and 16th Streets.
[2] Sold-out 25,000-person MLS match with 7:30 PM start time assumed at proposed stadium. Vehicle mode split estimated to be 83%.

Stadium [2]	Attendees	9,305	9,305	18,610
	Employees	418	418	836
Total Net External Vehicle Trips		63,639	63,639	127,279

Notes:
[2] Sold-out 25,000-person MLS match at proposed stadium. Vehicle mode split estimated to be 83% (see above text). MLS match assumed to have 460 employees with an average vehicle occupancy of 1.1 employees (and conservatively assuming all drive to the site).
Source: Fehr & Peers, 2015.

Table 9 compares the cumulative net external vehicular trip generation for the RSPU without and with an MLS Match during the AM, PM, and pre-event peak hours and on a daily basis. This table indicates that the MLS match would cause a 170 percent increase in the RSPU trip generation during the pre-event peak hour, and an 18 percent increase in the trip generation on a daily basis.

IV. Proposed RSPU Trip Distribution/Assignment Methods

We will update the base year version of the SACMET model to incorporate the RSPU roadway network (see Tech Memo #1) and land uses. The model will be used to assign vehicle trips through the study intersections and freeway facilities. The project not only includes new trip generating land uses, but also introduces new street connections that cause a redistribution of background traffic. We will review the trip assignment patterns for reasonableness (i.e., congested ramps and other bottlenecks). If necessary, we will reroute trips to shorter paths.

FEHR PEERS

DRAFT TECHNICAL MEMORANDUM #5

Date: February 5, 2016

To: Pelle Clarke & Samar Hajeer – City of Sacramento

From: John Gard – Fehr & Peers

Subject*: *Trip Generation of 2007 Railyards Specific Plan

RS15-3374

This memorandum presents the land uses, estimated employment levels, and trip generation of the 2007 Railyards Specific Plan ("2007 Plan"). This information is important to this study for several reasons. Since the Railyards Specific Plan Update EIR will be a subsequent EIR, it is being compared against the 2007 Plan EIR inputs, analysis methods, and results. Accordingly, the 'cumulative no project' scenario for this EIR is the 2007 Plan.

The *Railyards Specific Plan Draft EIR* (2007) presented trip generation information for the 'Maximum Office' and 'Maximum Residential' scenarios for cumulative (2030) conditions only. Since the technical analysis was based on the more conservative (i.e., greater trip generation) Maximum Office Scenario, it is presented here.

Table 1 shows the employment associated with the non-residential uses for the 2007 Plan (Maximum Office scenario).[1] As shown, the 2007 Plan would consist of approximately 14,140 employees. The project would have a jobs-housing ratio of 1.25, which represents a fairly balanced ratio.

Table 1: Employment Within 2007 Railyards Specific Plan (Maximum Office Scenario)

Land Use	Quantity (square feet)	Employee Ratio	Employees
Office	2,993,000	1 per 300 square feet [1]	9,977
Retail	1,566,000	1 per 400 square feet [1]	3,915
Other [2]	N / A	N / A [2]	250
		Total	14,142

Notes:
[1] Based on unit employment yields from *Railyards Specific Plan EIR* (2007).
[2] 2007 Railyards Specific Plan consisted of museum and performing arts center. Employment estimated as 120 museum employees (consistent with employment for 180,000 square-foot museum in RSPU), and 130 employees for performing arts center, which yields 250 total employees in this category.
Source: Fehr & Peers, 2016.

[1] While this information is not used directly in the transportation impact study, it is used when calculating Vehicle Miles of Travel (VMT) per capita or employee.

The internalization of trips within the project site was estimated using a Mixed-Use Trip Generation Model (MXD), which was developed for the US Environmental Protection Agency (EPA) to estimate internal trip-making and external trips by non-auto travel modes. This model was developed by consultants and academic researchers to more accurately estimate the external vehicular trip generation of mixed-use land development projects than prior methods (e.g., ITE internalization spreadsheet). The model was developed based on empirical evidence at 240 mixed-use projects located across the U.S. The model considers various built environment variables such as land use density, regional location, proximity to transit, and various design variables when calculating the project's internal trips, and external trips made by auto, transit, and non-motorized modes. The MXD model has been applied in numerous EIRs throughout California. **Appendix A** to this memo contains MXD+ model output for the 2007 Plan under cumulative conditions.

Table 2 displays the daily, AM peak hour, and PM peak hour trip generation of the 2007 Plan under cumulative conditions. It should be noted that the internalization and non-auto external mode split percentages do not apply equally to all land use types. These percentages represent the overall level of reductions based on the MXD+ model results. Some uses, such as office and residential, would have greater reduction levels than others. No pass-by reductions have been made because the MXD+ modeling is calibrated to total external trips (including new and pass-by). Accordingly, further reductions for pass-by are not warranted.

Table 2 shows that between 15 and 25 percent of project trips (depending on the analysis period) are expected to remain internal to the site. These internalization percentages reflect the overall well-balanced mix of residential, office, and retail. The use of transit varies from 8 to 13 percent of project trips (depending on the analysis period). External travel by walk and bike varies from 15 to 19 percent of project trips (depending on the analysis period). The 2007 Plan would generate approximately 110,000 external daily trips, 5,400 AM peak hour trips (59 percent inbound), and 8,450 PM peak hour trips (58 percent outbound).

Net External Vehicle Trips			55,013	55,013	110,026	3,197	2,210	5,406	3,555	4,893	8,447

Notes:
[1] Gross trip rates based on *Trip Generation Manual* (Institute of Transportation Engineers, 2012). Trip rates for office space based on weighted average rate given amount of office space. Trip rates for retail based on fitted curve equation for typical size of 150,000 square-foot retail center. Trip generation of 'other' uses (i.e., museum and performing arts center) based on values from 2007 Plan DEIR.
[2] Internal trips, and external trips made by transit, walking, and bicycling based on MXD+ model output (see previous page).
Source: Fehr & Peers, 2016.

The *Railyards Specific Plan Draft EIR* (2007) estimated that the 2007 Plan would generate approximately 150,000 external daily trips, 10,200 AM peak hour trips, and 15,500 PM peak hour trips. Those estimates are not considered valid for several reasons:

1. Those estimates were based on the 2003 version of *Trip Generation*, which has since been updated twice.
2. Over half of the PM peak hour trips are associated with the retail uses, which have an excessively high average trip rate of 6.88 trips per thousand square feet (due to the use of the fitted curve equation even for very small amounts of retail on a given block).
3. Advancements in transportation planning since that time have allowed for more accurate estimations of internal trip-making and external trips made by transit, bus, and walk than existed in 2007.

The proposed RSPU would generate approximately 107,800 external daily trips, 6,650 AM peak hour trips, and 9,000 PM peak hour trips under cumulative conditions. When compared to the 2007 Plan, these totals represent two percent less daily traffic, 23 percent more AM peak hour trips and 6.5 percent more PM peak hour trips. The primary contributor to this increase in the inclusion of more office space (and less residential) in the RSPU, which causes an imbalance in the jobs-housing ratio resulting in the import of larger numbers of employee trips.

We will update the cumulative version of the SACMET model to incorporate the 2007 Railyards Specific Plan including its land uses, roadway network, and any identified mitigation measures. The model will be used to assign vehicle trips through the study intersections and freeway facilities. The project not only includes new trip generating land uses, but also introduces new street connections that cause a redistribution of background traffic. We will review the trip assignment patterns for reasonableness (i.e., congested ramps and other bottlenecks). If necessary, we will reroute trips to shorter paths.

We would respectfully request that City staff review and provide comments on this memorandum by February 10, 2016. If the content is deemed reasonable to share with ESA, we would request that you forward it to them for review as well. We will not begin work on the "Cumulative No Project (2007 Plan)" technical analysis until we receive formal approval on this memo.

FEHR PEERS

TECHNICAL MEMORANDUM #6

Date: April 7, 2016

To: Pelle Clarke & Samar Hajeer – City of Sacramento

Brian Boxer - ESA

From: John Gard – Fehr & Peers

Subject**: **Non-Residential Reduction Factor Analysis – Trip Generation Comparison

RS15-3374

This memorandum presents an analysis that determines the amount of office space within the RSPU that would need to be removed to accommodate additional residential development within the site. An iterative analysis was performed to identify how much reduction in office space is necessary to support an an additional 2,000 and 4,000 multi-family dwelling units in the RSP Area without causing a meaningful increase in the project's external vehicular trip generation. This analysis has been prepared at the request of ESA, who would use the analysis results in other chapters of the Draft EIR.

Table 1 presents the RSPU trip generation under cumulative conditions. These represent the control totals, against which the proposed land use modifications are compared.

Table 1: Peak Hour and Daily Trip Generation of Railyards Specific Plan Buildout – Cumulative Conditions

Source: Fehr & Peers, 2015.

Table 2 shows the net change in external vehicle trip generation on a daily basis and during the AM and PM peak hours associated with Option 1, which consists of adding 2,000 dwelling units and removing 600,000 square feet of office space.[1] The cells shown in red represent revised values relative to Table 1. It is worth noting that eliminating office in favor of additional residential would result in an improved jobs-housing balance, and provide more opportunities for external bicycle/walk trips. The MXD+ results show overall non-vehicular trip generation reductions in the range of one to three percent due to these factors.

Table 2 compares the external vehicle trip generation with the RSPU. As shown, these land uses would generate fewer external vehicle trips than the RSPU in all time periods with the exception of the outbound direction during the AM peak hour, in which the project would generate a net 110 additional trips over the RSPU. However, outbound travel from the RSP Area during the AM peak hour represents a 'reverse commute type' travel pattern (i.e., the majority of AM peak hour trips are inbound).

Source: Fehr & Peers, 2015.

[1] At the request of ESA, this analysis focuses on reductions in office space (versus other uses) needed to accommodate the additional residential units.

Table 3 shows the net change in external vehicle trip generation on a daily basis and during the AM and PM peak hours associated with Option 2, which consists of adding 4,000 dwelling units and removing 1,100,000 square feet of office space. The relationship between Options 1 and 2 is close, but not precisely linear due to changes in trip internalization and non-auto mode split.

Option 2 would generate fewer external vehicle trips than the RSPU on a daily basis and during the peak, directional time periods. However, when compared to the RSPU, it would generate 15.5 percent more traffic in the outbound direction during the AM peak hour and 3.6 percent more traffic in the inbound direction during the PM peak hour. This increases represent 290 additional AM peak hour outbound vehicle trips and 110 additional PM peak hour inbound vehicle trips over the RSPU. However, as noted previously, these movements occur in non-peak travel direction. Further, when these trips are distributed across the variety of external RSP Area gateways, the net increase on a particular roadway or intersection is considered modest.

Notes:
[1] Source: Fehr & Peers, 2015.

Conclusions

This analysis has determined that the following non-residential land use reduction options would cause overall reductions in external vehicular traffic when compared to the cumulative trip generation of the RSPU:

- Option 1 - add 2,000 dwelling units and remove 600,000 square feet of office space
- Option 2 - add 4,000 dwelling units and remove 1,100,000 square feet of office space

As shown in Tables 2 and 3, these options would result in about two percent fewer external daily trips when compared to the RSPU. Since each option would essentially be replacing longer distance work trips with shorter distance residential trips (of all types), the net effect on VMT would be a greater than two percent decrease.

It would also be possible to achieve comparable reductions in trip generation by removing some of the retail uses. However, no such calculations have been presented here because such analyses would require multiple levels of iterations (i.e., more unknowns).

Lastly, while it is noted that these trip generation reductions are generally associated with fewer or less severe transportation impacts, it is worth noting that the land use changes would cause a change in the directionality (i.e., distribution) of project trips. This, in turn, has the potential to cause impacts at certain intersections, roadways, or freeway facilities. A sensitivity analysis (e.g., report Average Daily Traffic volumes on roadways or conduct focused analysis of hot-spot facilities) could be conducted to further assess the extent to which such impacts could be expected.

We hope this information is helpful.

Railyards Specific Plan Update (RSPU), Kaiser Medical Center (KMC) and Major League Soccer Stadium (MLSS) Project – Caltrans Concurrence on I-5 Subregional Impact Fee Commitment from KMC and MLSS

Dear Ms. Hajeer:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the project referenced above. The proposed RSPU includes construction of a 1.2 million square foot KMC, and a MLSS to house a new professional soccer team and up to 25,000 attendees at soccer games and other events. The proposed RSPU will also include refinements to the density and intensity of land uses within the Office/Residential Mixed Use, Residential/Commercial Mixed Use, and Residential Mixed Use zones. The project is located immediately north of downtown Sacramento on both sides of Interstate 5 (I-5), with I-5 providing direct freeway access to the project site via the Richards Blvd., I Street, and J Street interchanges. Due to the project's location, scale of development and potentially significant impacts to mainline I-5 and its interchanges (IC), Caltrans views the project as being of regional and interregional significance.

I-5 Subregional Corridor Mitigation Program (SCMP)

The SCMP is a voluntary impact fee program for new developments within the I-5 corridor between the Cities of Elk Grove and West Sacramento, including Sacramento. The SCMP will help fund a set of transportation improvements that are identified in the Sacramento Area Council of Governments Metropolitan Plan/Sustainable Communities Strategy, including projects that help reduce Vehicle Miles Traveled such as the Sacramento/West Sacramento Streetcar project, the Green Line Extension project, and American River Crossing project. Improvements to the Richards Blvd.

interchange are also included in the SCMP project list.

In April 2016 the City of Sacramento approved the Nexus Study and Environmental Impact Report for, and adopted the SCMP, which authorized the City Manager to establish a new fund to hold voluntary SCMP fee payments. As the SCMP pertains to the development of the Railyards Specific Plan, including main tenant applicants which will be the KMC and MLSS; both have agreed to voluntarily pay into the SCMP. On May 23, 2016 the City informed Caltrans that the main tenant applicants have agreed to pay into the SCMP. The fee applies to the main tenants because separately, the developments may generate mainline traffic volumes on the State Highway System (SHS) within the SCMP corridor which would exceed the threshold of significance as adopted by the City.

Caltrans concurs with the agreement from the main tenant applicants, including the KMC, and MLSS, to pay into the SCMP. Per the SCMP Memorandum of Understanding, Caltrans agrees, and notices herein, payment into the SCMP satisfies Caltrans' requirement for the project's obligation under California Environmental Quality Act to mitigate cumulative mainline traffic volume impacts on the SHS, from the main tenant applicants shown above.

Please provide our office with copies of any further actions regarding this project.

If you have any questions regarding Caltrans' concurrence herein, please contact Arthur Murray by email at: arthur.murray@dot.ca.gov.

Sincerely,

ERIC FREDERICKS, Branch Chief
Office of Transportation Planning – South Branch

APPENDIX J.1.8:

MTP / SCS Tier 1 Project List

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
ELD15610	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	US 50/Silva Valley Pkwy Interchange - Phase 1	New Interchange: Phase 1 includes US 50 on-/off-ramps, overcrossing, and US 50 aux lanes. See ELD19291/CIP71345 for Phase 2. (CIP71328)	Completion by 2020	$56,817,400	$56,817,400
CAL18190	Yes	El Dorado	Caltrans D3	C- Maintenance & Rehabilitation	U.S. 50 - Camino Operational / Safety Improvements	Construct an undercrossing, median barrier, modify local road connections and/or associated operational and safety improvements on and adjacent to U.S. 50. PM 24.521 to 27.027	2021-2036	$51,723,000	$51,723,000
ELD19340	Yes	El Dorado	El Dorado County	C- Maintenance & Rehabilitation	Mosquito Rd/South Fork American River Bridge Replacement	Mosquito Rd, over South Fork American River, 5.7 miles north of US 50: Replace existing structurally deficient 1 lane bridge with new 2 lane bridge. (Toll credits programmed for PE, ROW, & CON. CIP77126.)	Completion by 2020	$32,585,000	$32,585,000
ELD15990	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Diamond Springs Pkwy - Phase 1B	Construct new 2-lane divided arterial roadway from Missouri Flat Rd east of Golden Center Dr to a new T-intersection with SR-49 south of Bradley Dr; includes planning, environmental clearance, grading and right of way for the ultimate 4-lane road, required improvements to SR-49 and three new signals. See ELD19348/CIP72375 for Phase 1A and ELD19203/CIP72368 for Phase 2. (CIP72334)	2021-2036	$28,638,000	$28,638,000
ELD19339	Yes	El Dorado	El Dorado County	C- Maintenance & Rehabilitation	Mt. Murphy Rd/South Fork American River Bridge Replacement	Mt Murphy Rd, over South Fork American River, 0.1 mile east of SR49. Replace existing 1 lane truss bridge with new 2 lane bridge. Toll credits programmed for PE, ROW, and CON. (CIP77129)	Completion by 2020	$20,550,000	$20,550,000
ELD19461	Yes	El Dorado	El Dorado County Transit	E- Transit Capital (Major)	Regional Fueling Station	Develop a regional fueling station near the Sacramento/El Dorado County Line.	2021-2036	$20,310,000	$31,764,000
CAL20476	Yes	El Dorado	Caltrans D3	C- Maintenance & Rehabilitation	SR 49 South Fork American River Bridge Retrofit/Enhancement	In El Dorado County, near Placerville, at South Fork American River Bridge #25-0021 - Cross bracing seismic retrofit and enhancement to provide safe and efficient pedestrian/bicyclist facilities (PM 24.0) [CTIPS STIP ID 107-0000-0878, CTIPS SHOPP ID 107-0000-0907; EFIS ID 0300000078] (Toll Credits for PE, ROW, CON)	Completion by 2020	$19,654,000	$19,654,000
ELD19232	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Latrobe Rd/White Rock Rd Connector (New Road)	New connector road from the El Dorado Hills Business Park to White Rock Rd west of Four Seasons/Stonebriar intersection; Initial work to perform route alignment study and prepare PSR; Subsequent work will include environmental, design and construction; may require coordination with Sacramento County, City of Folsom, Southeast Connector JPA and area developers. (CIP66116)	2021-2036	$19,445,000	$19,445,000
ELD19217	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	U.S. 50 / Bass Lake Rd. (Phase 2)	Add Auxiliary Lane: WB on US 50 between Bass Lake Rd. and Cambridge Rd. interchanges. Includes: additional ramp, road widening. (Phase 2) (See ELD19182 for Phase 1) (CIP GP148)	2021-2036	$19,063,000	$29,813,000
ELD19182	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	US 50/Bass Lake Rd Interchange - Phase 1	Interchange Improvements: this phase includes detailed study to determine complete improvements needed; Phase 1 may include ramp widening, road widening, signals, and WB auxiliary lane between Bass Lake and Silva Valley interchanges; Phase 1 assumes bridge replacement. (See ELD19217 for Phase 2) CIP71330	2021-2036	$16,532,000	$25,855,000
ELD19180	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	US 50/Ponderosa Rd/So. Shingle Rd Interchange Improvements	Interchange Improvements: includes detailed study to identify alternatives and select preferred alternative; widening existing US 50 overcrossing to accommodate 5 lanes, and realignment of WB loop on-ramp, ramp widenings, and widening of Ponderosa Rd, Mother Lode Dr, and So. Shingle Rd; includes PE for all phases; (See ELD19170/CIP71339 and ELD19244/CIP71338). Coordinates with ELD19289/CIP53116, ELD19219/CIP#GP150, ELD19246/CIPGP171, and ELD19250/CIP#GP175. (CIP71333)	2021-2036	$16,307,000	$16,307,000
ELD19225	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Bass Lake Road Improvements - Phase 1B	Widen Bass Lake Road from US 50 to Silver Springs Pkwy to accomodate 4 lanes of traffic (divided), curb, gutter, and sidewalk. (See ELD19224 for Phase 1A) (CIP GP166)	2021-2036	$15,385,000	$24,061,000
ELD19219	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	US 50 Auxiliary Lane Eastbound - Cambridge to Ponderosa	Construct eastbound auxiliary lane on US50 between Cambridge Rd and Ponderosa Rd interchanges. CIPGP150.	2021-2036	$14,550,000	$22,755,000
CAL20649	Project Development Only	El Dorado	Caltrans D3	B- Road & Highway Capacity	US 50 WB Auxiliary Lane	In Placerville, from west of Coloma Road offramp to the Placerville Drive offramp, Construct WB Auxiliary Lane (PM 17.111/17.778)	Completion after 2036	$20,000,000	
ELD15930	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Cameron Park Drive Widening - Palmer Drive to Meder Road	Widen Cameron Park Drive to 4 lanes (divided) from Palmer Drive to Meder Road Includes a curb, gutter, and sidewalk. (CIP GP144)	2021-2036	$12,520,000	$19,580,000
ELD19291	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	US 50/Silva Valley Pkwy Interchange - Phase 2	Final phase of US 50/Silva Valley Parkway Interchange: construction of eastbound diagonal and westbound loop on-ramps to US 50. (See ELD15610/CIP71328 for Phase 1). CIP71345	2021-2036	$12,070,000	$18,877,000
ELD16010	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Saratoga Wy Ext - Phase 1	Construct new 2-lane arterial to extend Saratoga Wy from current terminus near Finders Wy to Sacramento County Line; includes median, 6-ft shoulders, right-turn pocket onto Finders Way, asphalt path, drainage system, environmental clearance and secure ROW for future 4-lane road from County Line to El Dorado Hills Blvd. (Phase 2 CIP#GP147-See ELD19234 in MTP.) CIP71324	2021-2036	$11,541,350	$18,050,000
ELD19326	Yes	El Dorado	El Dorado County	C- Maintenance & Rehabilitation	Green Valley Rd/Weber Creek Bridge Replacement	Green Valley Rd, over Weber Creek, 0.7 miles west of Placerville Dr.: Replace existing structurally deficient 2 lane bridge with new 2 lane bridge bridge. Widen and realign Green Valley Rd at bridge approaches, and drainage improvements. (CIP77114)	Completion by 2020	$11,126,000	$11,126,000
ELD19245	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Headington Rd Ext - Missouri Flat to El Dorado	Construct new 2-lane arterial with median extension of Headington Rd from Missouri Flat Rd to El Dorado Rd. Does not include curb, gutter or sidewalk. (CIP71375)	2021-2036	$10,417,000	$16,292,000
ELD19410	Yes	El Dorado	City of Placerville	B- Road & Highway Capacity	Placerville Drive Widening - Ray Lawyer Drive to Cold Springs Road	Widen Placerville Drive from Ray Lawyer Drive to Cold Springs Road to accomodate 4 lanes of traffic, a dual left turn lane, sidewalks, and bike lanes on both sides.	2021-2036	$10,352,000	$16,190,000
ELD19168	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	El Dorado Hills Boulevard / Francisco Drive - Realignment	Realign existing El Dorado Hills Boulevard / Francisco Drive / Brittany Way intersection and approach roadways to result in a new 4-way intersection with extensions and signal installation. Northern portion of El Dorado Hills Boulevard (at this intersection) will become new minor traffic way, and current Francisco Drive between El Dorado Hills Boulevard and Green Valley Road will become new major traffic way. CIP72332	2021-2036	$9,452,000	$14,782,000
ELD19237	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Latrobe Rd.	Widen: 6 lanes (divided with 4-foot shoulders) from White Rock Rd. to Carson Creek (Suncast Ln.) (CIP GP154)	2021-2036	$8,987,000	$14,055,000
ELD19222	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Silver Springs Pkwy to Bass Lake Rd (South Segment)	Construct new 2-lane divided road to Bass Lake Rd; includes median, curb, gutter, sidewalk, shoulders, and bike lanes. Coordinates with ELD19221/CIP76107 (CIP76108)	Completion by 2020	$8,605,534	$8,605,534
ELD19411	Project Development Only	El Dorado	City of Placerville	B- Road & Highway Capacity	Cold Springs Road Connector	Construct a new 2-lane road connecting Cold Springs to Placerville Drive for future Fair Lane Road Extension.	Completion after 2036	$3,865,000	
ELD19412	Yes	El Dorado	City of Placerville	B- Road & Highway Capacity	Ray Lawyer Drive Extension East	Ray Lawyer Drive Extension East - Construct a new 2,500 ft. 2-lane road to City collector street standards from Forni Road southeast to the City Limit (US 50 to Main Street)	2021-2036	$8,122,000	$12,702,000
ELD19441	Project Development Only	El Dorado	City of Placerville	B- Road & Highway Capacity	Emigrant Ravine Road Extension	Construct a new 4,200-foot 2-lane roadway with sidewalk to extend Emigrant Ravine Road from the Carson Road to the proposed Clay Street Extension	Completion after 2036	$15,422,000	
CAL20493	Yes	El Dorado	Caltrans D3	C- Maintenance & Rehabilitation	SR 49 - Lotus Road to Cool CAPM	In El Dorado County, on SR 49, near Placerville, from Coloma to Cool - Pavement rehabilitation (PM 23.9/35.0) [Toll Credits] (CTIPS ID 107-0000-0930)	Completion by 2020	$7,932,000	$7,932,000
ELD19495	Yes	El Dorado	El Dorado County	G- System Management, Operations, and ITS	State Route 49 Shoulder Widening	State Route 49 Widening from Pleasant Valley Road to Missouri Flat Road	2021-2036	$7,879,000	$12,322,000
ELD19420	Project Development Only	El Dorado	City of Placerville	B- Road & Highway Capacity	Main Street Realignment	Construct 700-foot of new 2-lane road. Includes sidewalks to City collector street standards between Broadway and Main Street. New road will extend Main Street down Spanish Ravine Road.	Completion after 2036	$8,121,768	
ELD19422	Project Development Only	El Dorado	City of Placerville	B- Road & Highway Capacity	Mallard Lane Extension	Build a new 2-lane roadway connecting Mallard Lane to Placerville Drive.	Completion after 2036	$3,756,000	

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. ELD19308	Yes	El Dorado	El Dorado County	G- System Management, Operations, and ITS	Cold Springs Rd at Mt. Shasta Ln - Realignment	Cold Springs Rd at Mt. Shasta Ln-Realign/superelevate curve between MP 3.4 and MP 3.55, widen roadway, add shoulders, drainage improvements, and add flashing beacon warning signs. Coordinates with ELD19344. (CIP73360) (HSIP3-03-008)	Completion by 2020	$1,147,447	$1,147,447
ELD19227	Yes	El Dorado	El Dorado County	B- Road & Highway Capacity	Country Club Drive Extension - Bass Lake Road to Silver Dove Road	Construct 2-lane extension of Country Club Drive from Bass Lake Road to Silver Dove Road. Roadway includes 6-foot paved shoulders and new intersection at Bass Lake Road. (Curb, gutter and sidewalk may be included.) CIP#GP124	2021-2036	$1,121,000	$1,753,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST

CAL20654	**Yes**	Multiple Counties	Caltrans D3	G- System Management, Operations, and ITS	Upgrade CMS panels to LED	In Sacramneto, Butte, Colusa, El Dorado, Glenn, Nevada, Placer, Sierra, Sutter, Yolo and Yuba Counties on Routes 5, 50 and 80 at various locations. Upgrae Changeable Message Sign (CMS)	2021-2036	$5,320,000	$6,492,000
CAL20516	**Yes**	Multiple Counties	Caltrans D3	A- Bike & Ped	Upgrade Pedestrian Facilities @ Various Locations	In Yuba, Sacramento, Placer, El Dorado and Butte counties on Various Routes at Various Locations - Upgrade pedestrian facilities [EFIS ID 0312000071; CTIPS ID 107-0000-0974] [Total Project Cost $3,482,000 in 17/18 FY] (Toll Credits for PE, ROW, CON)	Completion by 2020	$3,482,000	$3,482,000
CAL20519	**Yes**	Multiple Counties	Caltrans D3	G- System Management, Operations, and ITS	Upgrade Traffic Monitoring Stations	In Sacramento, Placer, Yolo and Yuba counties, on Routes 5, 50, 51, 65, 70, 80, 99 and 113, at Various Locations - Upgrade Traffic Monitoring Stations (TMS) [EFIS ID 0313000198; CTIPS ID 107-0000-0967] (Toll Credits for PE, ROW, CON)	Completion by 2020	$5,226,000	$5,226,000
CAL20566	**Yes**	Multiple Counties	Caltrans HQ	F- Transit O&M (General)	FTA 5310 - Paratransit, Inc. Mobility Management Travel Training	Mobility management activities and travel training to assist current and potential paratransit/demand response users who are senior and/or persons with disabilities to learn to use the fixed route transit systems in the SACOG region. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.	Completion by 2020	$400,000	$400,000
CAL20562	**Yes**	Multiple Counties	Caltrans HQ	E- Transit Capital (Vehicles)	FTA 5310 - Pride Industries Replacement Buses	Replace three existing buses that provide transportation to persons with developmental and other disabilities in Placer and Sacramento counties. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$229,500	$229,500
CAL20553	**Yes**	Multiple Counties	Caltrans HQ	F- Transit O&M (Demand Response)	FTA 5310 - Sacramento County DHHS Senior Companions Transportation Program	Provide mileage reimbursement and stipends for low-income volunteers to transport low-income isolated and frail seniors and people with disabilities where traditional transit and paratransit services are otherwise insufficient or inappropriate. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$160,000	$160,000
CAL20558	**Yes**	Multiple Counties	Caltrans HQ	E- Transit Capital (Minor)	FTA 5310 - United Cerebral Palsy Bus Video Monitoring Equipment	Video monitoring equipment for four replacement buses requested by UCP that will transport people with developmental disabilities. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$8,000	$8,000
CAL20556	**Yes**	Multiple Counties	Caltrans HQ	E- Transit Capital (Vehicles)	FTA 5310 - United Cerebral Palsy Replacement Buses	Replace four of the existing 16 passenger buses that provide transportation services to people with developmental disabilities. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$306,000	$306,000
CAL20561	**Yes**	Multiple Counties	Caltrans HQ	E- Transit Capital (Minor)	FTA 5310 - United Christian Centers Replacement Computers & Software	Replace computers and software used to operate existing transportation services to seniors and people with disabilities in Yolo and Sacramento counties. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$2,599	$2,599
CAL20560	**Yes**	Multiple Counties	Caltrans HQ	E- Transit Capital (Vehicles)	FTA 5310 - United Christian Centers Replacement Minivan	Replace an existing minivan used to transport seniors and people with disabilities in Yolo and Sacramento counties. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$48,000	$48,000
CAL20555	**Yes**	Multiple Counties	Caltrans HQ	F- Transit O&M (Demand Response)	FTA 5310 - Yolo County Transportation District Beyond ADA Service	Provide paratransit/demand response services to ADA eligible individuals that go beyond what is required under the Americans with Disabilities Act. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$300,000	$300,000
VAR56128	**Yes**	Multiple Counties	Capital Southeast Connector JPA	D- Programs & Planning	Capital Southeast Connector Project - Project Development	Prepare the Project Approval and Environmental Document (PA/ED) for Segment D2 of the Capital Southeast Connector: Grant Line Rd., from Jackson Highway to White Rock Road: Widen from 2 to 4 lanes as an expressway including a Class I multi-modal trail. Also includes intersection improvements at Kiefer Blvd. and Douglas Road, and 5 new proposed intersections: Rancho Cordova Parkway, University Blvd., Chrysanthy Blvd., North Loop Rd (potential temporary access), and Centennial Dr. (Phase 1). (PE ONLY. MTP Project: SAC24193)	Completion by 2020	$2,259,121	$2,259,121
TBD	**Yes**	Multiple Counties	Capital Southeast Connector JPA	D- Programs & Planning	Capital SouthEast Connector – Segment B3	Segment B3: Widen Grant Line Road from 2 to 4 lanes (thoroughfare), from Bradshaw Road to Bond Road. Complete project development efforts, as needed, to identify and implement improvements along the corridor segment in the near-term, as needed. Improvements may include intersection improvements and frontage improvements that benefit travel for automobiles and commercial vehicles. The project listing also allows for other near-term planned project development activities to advance, including environmental clearance, so the corridor segment can eventually become a four lane facility in a manner that is consistent with the Project Design Guidelines for the corridor.	Completion after 2036	$23,600,000	$36,909,000
TBD	**Yes**	Multiple Counties	Capital Southeast Connector JPA	D- Programs & Planning	Capital SouthEast Connector – Segment C	Segment C: Widen Grant Line Road from 2 to 4 lanes (thoroughfare), from Bond Road to Calvine Road. Complete project development efforts, as needed, to identify and implement improvements along the corridor segment in the near-term, as needed. Improvements may include intersection improvements and frontage improvements that benefit travel for automobiles and commercial vehicles. The project listing also allows for other near-term planned project development activities to advance, including environmental clearance, so the corridor segment can eventually become a four lane facility in a manner that is consistent with the Project Design Guidelines for the corridor.	Completion after 2036	$34,800,000	$54,425,000
TBD	**Yes**	Multiple Counties	Capital Southeast Connector JPA	D- Programs & Planning	Capital SouthEast Connector – Segment D1	Segment D1: Construct 4 lanes (Expressway), from Calvine Road to SR 16 (Jackson Hwy). Complete project development efforts, as needed, to identify and implement improvements along the corridor segment in the near-term, as needed. Improvements may include intersection improvements and frontage improvements that benefit travel for automobiles and commercial vehicles. The project listing also allows for other near-term planned project development activities to advance, including environmental clearance, so the corridor segment can eventually become a four lane facility in a manner that is consistent with the Project Design Guidelines for the corridor.	Completion after 2036	$47,200,000	$73,818,000
VAR56133	**Yes**	Multiple Counties	Capital SouthEast Connector JPA, City of Rancho Cordova, Sacramento County	B- Road & Highway Capacity	Capital SouthEast Connector - Segment D2 - From Douglas Road to White Rock Road.	Partial Construction of Segment D2: Construct 4 lanes (Expressway), from Douglas Road to White Rock Road.	2021-2036	$24,847,500	$30,321,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
VAR56131	Yes	Multiple Counties	Capital SouthEast Connector JPA ,City of Folsom, Sacramento County	B- Road & Highway Capacity	Capital SouthEast Connector - Segment D3 - Prairie City Road to Sacramento/El Dorado County Line	Segment D3: Construct 4 lanes (Expressway), from Prairie City Road to the Sacramento County Line.	Completion by 2020	$48,000,000	$50,347,000
ELD19468	Yes	Multiple Counties	Capital SouthEast Connector JPA, El Dorado County	B- Road & Highway Capacity	Capital SouthEast Connector - Segment E1- From Sacramento/El Dorado County Line to Latrobe Road	Segment E1: Widen White Rock Road from 2 to 4 lanes (thoroughfare), from the Sacramento-El Dorado County line to Latrobe Road.	2021-2036	$6,200,000	$9,696,000
ELD19469	Yes	Multiple Counties	Capital SouthEast Connector JPA, El Dorado County	B- Road & Highway Capacity	Capital SouthEast Connector - Segment E2 - From Latrobe Road to the US 50/Silva Valley Pkwy Interchange	Segment E2: Widen White Rock Road from 2 to 4 lanes (thoroughfare), from Latrobe Road to the US 50/Silva Valley Parkway Interchange.	2021-2036	$9,900,000	$15,483,000
SAC24962	Yes	Sacramento	City of Elk Grove	E- Transit Capital (Major)	Hi Bus from CRC to Elk Grove	This project is to develop an enhanced bus corridor 8.5 miles along Bruceville Rd to Big Horn to Kammerer to 99 between Cosumnes River College and Elk Grove.	2021-2036	$37,813,160	$59,137,000
CAL18320	Yes	Multiple Counties	Capitol Corridor JPA	E- Transit Capital (Major)	Roseville Third Track	On the UP mainline, from Elvas Tower in Sacramento County to Roseville Station in Placer County: Construct third track. Project involves: extension of freight lead track; construction of track and signal improvements; construction of satellite maintenance facility and other associated improvements; and possible relocation of the Roseville rail station to address conflicting train movements that affect capacity. Project improvements will permit service capacity increases for Capitol Corridor in Placer County, with up to ten round trips to Roseville.	2021-2036	$250,800,000	$250,800,000
SAC24420	Project Development Only	Multiple Counties	City of Sacramento and City of West Sacramento	B- Road & Highway Capacity	Sacramento River Crossing	New Northern Bridge: from Sacramento to West Sacramento across the Sacramento River. Includes: Auto, transit, bicycle and pedestrian facilities. The Sacramento River Crossings Alternatives Study analyzed a new crossing at either Richards Blvd or C Street, but final alignment options will be studied in subsequent planning efforts.	Completion after 2036	$150,000,000	
YOL19328	Yes	Multiple Counties	City of West Sacramento	B- Road & Highway Capacity	Broadway Bridge	From West Sacramento to Sacramento, across the Sacramento River, construct the Broadway Bridge, a new southern crossing of the Sacramento River. Project includes: Auto, transit, bicycle and pedestrian facilities. (Local funding is split between the Cities of Sacramento and West Sacramento)	2021-2036	$254,500,000	$254,500,000
Regional Lump Sum 2	Yes	Multiple Counties	Multiple Lead Agencies	A- Bike & Ped	Regional Bicycle and Pedestrian Improvements	Lump sum for bicycle and pedestrian projects throughout the region 2011-2035.	Lump Sum or Ongoing	$2,100,000,000	$2,759,664,000
Regional Lump Sum 4	Yes	Multiple Counties	Multiple Lead Agencies	D- Programs & Planning	Regional Planning, Programs, and Project Analysis	Lump sum for programs, planning, and project analysis throughout the region 2011-2036.	Lump Sum or Ongoing	$1,650,000,000	$2,168,308,000
Regional Lump Sum 3	Yes	Multiple Counties	Multiple Lead Agencies	C- Maintenance & Rehabilitation	Road and Highway Maintenance and Rehabilitation	Lump sum for road and highway maintenance and rehabilitation throughout the region 2011-2036.	Lump Sum or Ongoing	$8,640,000,000	$11,354,048,000
Regional Lump Sum 1	Yes	Multiple Counties	Multiple Lead Agencies	F- Transit O&M (General)	Transit Operations	Transit operations and maintenance 2015-2036	Lump Sum or Ongoing	$5,910,000,000	$7,766,484,000
Regional Lump Sum 5	Yes	Multiple Counties	Multiple Lead Agencies	E- Transit Capital (Vehicles)	Transit Vehicle Replacements	Lump-sum for transit vehicle (light rail, bus, demand response, and shuttles).	Lump Sum or Ongoing	$1,200,000,000	$1,576,951,000
PCT10503	Yes	Multiple Counties	Placer County Transit	E- Transit Capital (Vehicles)	PCT Bus Replacements - 2015	Replace two CNG powered buses currently in use by Placer County Transit. The new CNG buses will be used on regional transit routes connecting Rocklin, Lincoln, Loomis, Auburn and Placer County to Roseville and the Watt/I-80 Light Rail Station. (Emission Benefits in kg/day: 1.49 NOx)	Completion by 2020	$1,082,000	$1,082,000
VAR56126	Yes	Multiple Counties	SACOG	A- Bike & Ped	Bike Share	Implement bike share system in three cities (Davis, Sacramento, and West Sacramento) and provide planning efforts for potential regional expansion of a Bike Share pilot program and create a comprehensive Equity Action Plan. (SACOG Managed Funds are used on preliminary work separate from the federal project.) (Toll Credits for ENG, CON). Toll Credits for ENG, CON	Completion by 2020	$3,905,000	$3,905,000
VAR56028	Yes	Multiple Counties	SACOG	E- Transit Capital (Minor)	Connect Card	Connect Card (previously known as Universal Transit Fare Card): Implement Connect Card in the SACOG region, including hiring a consultant. (Emission Benefits in kg/day: 0.06 ROG, 0.12 NOx) (Project in conjunction with VAR56081, RT On-Board Survey for Connect Card)	Completion by 2020	$11,590,696	$11,590,696
VAR56113	Yes	Multiple Counties	SACOG	D- Programs & Planning	JARC Connect Card Marketing	This project will promote the "Connect Card" universal transit fare card system in the SACOG Region to low-income individuals and those that qualify for reduced fares. The Connect Card will help fulfill the goal of creating more integrated, coordinated, and seamless regional transit systems by allowing users, especially those who cross jurisdictional and transit operator boundaries, in traveling to employment and/or training. ($17,344 in toll credits are being used for the CON match.)	Completion by 2020	$69,376	$69,376
VAR56121	Yes	Multiple Counties	SACOG	D- Programs & Planning	MTP/SCS 2035 Implementation	Planning in SACOG Region: Implement strategies from the Metropolitan Transportation Plan/Sustainable Communities Strategy (MTP/SCS) 2035. Work includes modeling, data gathering, consulting, and support for local jurisdictions in pursuing SB 375 CEQA benefits. (Toll Credits for CON)	Completion by 2020	$265,000	$265,000
VAR56117	Yes	Multiple Counties	SACOG	F- Transit O&M (Demand Response)	Paratransit, Inc. - New Freedom Mobility Management	Mobility Management Grant. Paratransit, Inc., will provide travel training to low income and limited English speaking persons throughout the SACOG region.	Completion by 2020	$312,500	$312,500
VAR56101	Yes	Multiple Counties	SACOG	D- Programs & Planning	Planning Programming and Monitoring (RSTP) Phase 2	Conduct necessary planning work to prepare 2016 MTP/SCS. Perform state and federal programming and monitoring activities, including revisions to the MTIP and STIP, ensuring timely delivery of projects using state and federal funds, coordination with FHWA, FTA, Caltrans, CTC, transit operators, and local project sponsors. Ongoing. (Programming and Monitoring work is eligible for RSTP per 23 CFR, Part 450, section 133.) (Phase 1, VAR56008)	Completion by 2020	$1,152,040	$1,152,040
VAR56125	Yes	Multiple Counties	SACOG	D- Programs & Planning	Regional Bicycle and Pedestrian Data Collection	In the SACOG Region: develop regional standards for evaluating bicycle/pedestrian projects, procure automated bicycle/pedestrian counters, and develop a smartphone application for collecting user's bicycle/pedestrian travel data (Toll Credits for CON).	Completion by 2020	$559,510	$559,510
VAR56081	Yes	Multiple Counties	SACOG	D- Programs & Planning	Regional Transit On-Board Survey for Connect Card	Pre and post on-board survey of transit riders to determine current market and subsequent availability and usage of the Connect Card (VAR56028). This will identify needs for outreach and develop strategies to increase Connect Card availability and usage for underrepresented transit riders.	Completion by 2020	$450,000	$450,000
VAR56096	Yes	Multiple Counties	SACOG	D- Programs & Planning	Roseville Transit Mobility Management	The proposed mobility management services would enhance the ability of passengers to successfully ride transit in multiple areas (Placer County, Loomis, Rocklin,Lincoln, Auburn and Roseville). The goal of the program would include providing travel training from transit staff, trip planning training, and practice trips with staff.	Completion by 2020	$47,500	$47,500
VAR56130	Yes	Multiple Counties	SACOG	F- Transit O&M (General)	SACOG Technical Assistance to Transit Operators	Support small Transit operators in preparation of the National Transit Database in order to maximize the amount of funds generated in the region. Support operators in developing transit asset management (TAM) plans which would include capital asset inventories and condition assessments. The asset inventory and condition data must also be reported to the NTD. Continue to provide ongoing grants management support as well as planning and programming activities necessary to submit transit grant applications to the FTA. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5307 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$130,000	$130,000
VAR56118	Yes	Multiple Counties	SACOG	F- Transit O&M (Demand Response)	Sacramento County Dept. of Human Assistance - New Freedom Operating Assistance	Provide mileage reimbursements to low-income seniors who provide rides to fellow seniors to non-emergency medical appointments and other necessary travel not served by transit.	Completion by 2020	$200,000	$200,000
YCT18198	Yes	Multiple Counties	SACOG	E- Transit Capital (Major)	Sacramento-West Sacramento Downtown/Riverfront Streetcar Project (Phase 1)	Construction of the Phase 1 of the Downtown/Riverfront Streetcar. The alignment runs from West Sacramento Civic Center/Riverfront Street to the Midtown entertainment, retail, and residential district of Sacramento.	Completion by 2020	$150,000,000	$150,000,000
YCT18199	Yes	Multiple Counties	Multiple Lead Agencies	E- Transit Capital (Major)	Sacramento-West Sacramento Downtown/Riverfron Streetcar Extension	An extension of the Phase 1 Downtown/Riverfront streetcar in Downtown Sacramento and West Sacramento.	2021-2036	$272,700,000	$426,485,000

Appendix A1: 2016 MTP/SCS Project List

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
VAR56184	Yes	Multiple Counties	SACOG	D- Programs & Planning	Transportation Demand Management (TDM) Phase 3	TDM is a general term for strategies that result in more efficient use of transportation resources. SACOG's TDM program promotes alternative mode use in the SACOG region (rideshare, carpooling, vanpooling, public transit, bicycling, walking, and telecommuting. Outreach is done through partners (TMAs, and public agencies working with employers). Provide funding for 12 Transportation Management Organizations (TMOs) in region through grants. (Emission Benefits: ROG 0.54 and NOx 0.5 kg/day) (This is a continuation of Phase 2, VAR56025)	Completion by 2020	$1,554,999	$1,554,999
VAR56116	Yes	Multiple Counties	SACOG	F- Transit O&M (Bus)	WPCTSA - New Freedom Operating Assistance	Western Placer Consolidated Transportation Services Agency: Operating assistance for "Health Express," a low-to-no cost, scheduled, door-to-door, shared ride service for Placer County residents needing transportation to non-emergency medical appointments.	Completion by 2020	$600,000	$600,000
VAR56119	Yes	Multiple Counties	SACOG	F- Transit O&M (Demand Response)	YCTD - New Freedom Operating Assistance	Provide Yolobus Special (paratransit) service to Yolo Co. residents to/from medical appointments beyond YCTD's ADA required area.	Completion by 2020	$240,000	$240,000
SAC24669	Yes	Multiple Counties	Sacramento County	F- Transit O&M (Bus)	Sacramento County Department of Human Assistance JARC	2007 JARC CA-37-X114 ($52,119) Senior Volunteers' Foster Grandparents/Senior Companion Program. 2008 JARC CA-37-X119 ($814,880) 1. Senior Volunteers Transportation Reimbursement Foster Grandparents and Senior Companion Programs. 2. Mather Community Campus Shuttle Services. 3. Program Administration.2009 New Freedom CA-57-X043 ($152,275) 1. Senior Volunteers Senior Companion Program and the Asian Community Center (ACC) Meals on Wheels Program. 2. ACC Meals on Wheels shuttle service. 3. Program Administration.	Completion by 2020	$1,983,961	$1,983,961
SAC24694	Yes	Multiple Counties	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	City of Folsom Stage Lines Replacement of Low Floor Buses	City of Folsom (subrecipient): Replace one 30-foot bus including related equipment and spare parts.	Completion by 2020	$419,046	$419,046
REG18010	Yes	Multiple Counties	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	Paratransit Vehicle Replacement FY10/11 to FY13/14	Purchase replacement and some expansion vehicles and communication equipment to be used by Paratransit, Inc to provide complementary ADA paratransit service on behalf of RT.	Completion by 2020	$7,297,205	$7,297,205
PAR10032	Yes	Multiple Counties	Sacramento Regional Transit District	F- Transit O&M (Demand Response)	Paratransit, Inc. Travel Training and Mobility Management	Paratransit, Inc. (Subrecipient): Provide regional travel training and mobility management services.	Completion by 2020	$437,500	$437,500
REG17954	Yes	Multiple Counties	Sacramento Regional Transit District	F- Transit O&M (Light Rail)	South Sacramento Corridor Phase II Operating Assistance	Provide operating assistance for the operation of 4.3 mile extension of the Blue Line light rail from Meadowview Station to Cosumnes River College.	Completion by 2020	$12,000,000	$12,000,000
VAR56006	Yes	Multiple Counties	SMAQMD	D- Programs & Planning	Spare the Air Phase 2	Sacramento Federal Non-attainment Area: Spare The Air Voluntary Driving Curtailment Program. [Continued from SAC21080, Larger MTP project is VAR56022] (Emission Benefits in kg/day: ROG 0.2, NOx 0.2)	Completion by 2020	$8,106,627	$8,106,627
ELD19367	Yes	Multiple Counties	USFS El Dorado National Forest	D- Programs & Planning	Motorized Recreation Map	Update and reprint Forest Motorized Opportunity Guides. (RM-13-013)	Completion by 2020	$53,500	$53,500
PLA25511	Yes	Multiple Counties	Western Placer CTSA	F- Transit O&M (Bus)	New Freedom (Rural) Operating Assistance	Operating Assistance for the rural portion of the "Health Express." This service is being provided as a new transportation alternative to traditional public transit fixed route and dial-a-ride services. The service is a low-to-no-cost scheduled door-to-door transportation service to non-emergency medical appointments for rural Placer County residents. Service operates Monday through Friday, 8:00 a.m. to 5:00 p.m., and Thursdays, 10:00 a.m. to 2:00 p.m. in Sacramento.	Completion by 2020	$416,176	$416,176
PLA25510	Yes	Multiple Counties	Western Placer CTSA	F- Transit O&M (Demand Response)	Western Placer CTSA Operations	The Western Placer CTSA operates non-emergency medical transportation demand-response paratransit service; volunteer door-to-door transportation; & voucher program within western Placer County.	Completion by 2020	$4,900,000	$4,900,000
YST10444	Yes	Multiple Counties	Yuba Sutter Transit	E- Transit Capital (Vehicles)	Fixed Route Fleet Replacement & Minor Fleet Expansion	Purchase 13 heavy-duty, low-floor, clean diesel, local fixed route buses (30' - 35') to replace 11 buses and expand the local fixed route fleet from 22 to 24 buses.	Completion by 2020	$5,525,000	$5,525,000
YST10441	Yes	Multiple Counties	Yuba Sutter Transit	F- Transit O&M (Bus)	JARC Small Urban & Rural Operating Assistance	Operating assistance to provide transit services for low income and transit dependent riders to employment and training outlets. Hours of operation are Monday through Friday, 7:55 am to 3:30 pm; 6:00 pm to 9:30 pm; and Saturdays 8:30 am to 5:30 pm. Services will be extended one weekday to downtown Sacramento and extended one hour on Saturdays. (Small Urban is $303,050, Rural is $12,700.) (This amount includes $150,000 of JARC funds transferred to the 5307 account.) An additional $150,000 in small urban JARC funds were awarded to support the continuation and expansion of existing weekday and evening Dial-A-Ride services.	Completion by 2020	$781,500	$781,500
YST10442	Yes	Multiple Counties	Yuba Sutter Transit	F- Transit O&M (Bus)	Operating Assistance for FY 2015	Yuba-Sutter Transit Operating Assistance for FY 2015	Completion by 2020	$6,600,000	$6,600,000
YST10443	Yes	Multiple Counties	Yuba Sutter Transit	F- Transit O&M (Bus)	Operating Assistance for FY 2016	Yuba-Sutter Transit Operating Assistance for FY 2016	Completion by 2020	$6,930,000	$6,930,000
CAL20497	Yes	Placer	Caltrans D3	G- System Management, Operations, and ITS	Alpine Meadows Road Traffic Signal	Placer County, about 9.3 miles south of Truckee at Alpine Meadows Road - Construct signalized intersection at SR 89 [FCO Only] (Pla-89-12.1/12.5) [SHOPP Minor A 201.310] (Toll Credits for CON)	Completion by 2020	$974,000	$974,000

CAL20541	Yes	Placer	Caltrans D3	C- Maintenance & Rehabilitation	SR 49 Bridge Rehab	In Auburn, SR 49, from 0.1 mile south of Routes 49/80 separation to 0.1 mile north of Dry Creek Road - Rehabilitate Pavement (PM 3.1/7.5) [CTIPS ID 107-0000-0992] [EFIS ID 0300020616] (Toll Credits for PE, ROW, and CON)	Completion by 2020	$29,400,000	$29,400,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
CAL20628	Yes	Placer	Caltrans D3	A- Bike & Ped	SR 49 Class II Bike Lane	On SR 49, construct Class II bicycle lane from Bell Rd to Dry Creek Rd.	2021-2036	$480,000	$751,000
CAL20651	Yes	Placer	Caltrans D3	A- Bike & Ped	SR 49 Class II Bike Lane	On SR 49, construct Class II bicycle lane from Lincoln Way to Luther Rd.	2021-2036	$960,000	$1,501,000
CAL20573	Yes	Placer	Caltrans D3	G- System Management, Operations, and ITS	SR 49 Signal Coordination	Install signal at Shale Ridge Rd., coordinate to the north on Dry Creek Rd. and to the south on Bell Rd. (PM 6.38/7.427)	2021-2036	$2,000,000	$2,441,000
CAL20531	Yes	Placer	Caltrans D3	C- Maintenance & Rehabilitation	SR 65 Pavement Rehab	On SR 65, in and near Roseville, from I-80 to Twelve Bridges Drive - Pavement rehabilitation (PM 4.8/12.5) [EFIS ID 0314000010; CTIPS ID 107-0000-0991] (Toll Credits for PE, ROW, CON)	Completion by 2020	$10,445,000	$10,445,000
CAL20583	Project Development Only	Placer	Caltrans D3	G- System Management, Operations, and ITS	SR89 UPRR Undercrossing	Widening of SR89 (mousehole) under UPRR tracks	Completion after 2036	$42,000,000	
CAL20637	Project Development Only	Placer	Caltrans D3	G- System Management, Operations, and ITS	System Management/Traffic Operations System on SR49	Operational Improvements: traffic monitoring stations, closed circuit television, highway advisory radio, changeable message signs, and other system management infrastructure in Placer County.	Completion after 2036	$4,000,000	
CAL20639	Project Development Only	Placer	Caltrans Division of Rail	E- Transit Capital (Major)	Auburn to Donner Summit Track Improvements Phases 1 & 2	Upgrade Donner Pass Summit (UP Line) double track: including addition of crossovers, notching of tunnels, reactivation & replacement of second mainline track between Auburn & Reno, Nevada	Completion after 2036	$86,000,000	
CAL20640	Project Development Only	Placer	Caltrans Division of Rail	E- Transit Capital (Major)	UP Over/Under Crossing	Build over/undercrossing at Union Pacific crossing of Sierra College Boulevard	Completion after 2036	$30,000,000	
CAL20563	Yes	Placer	Caltrans HQ	F- Transit O&M (General)	FTA 5310 - City of Roseville Mobility Management Program	Transit Ambassador and Mobility Training programs. Assist new transit and paratransit/demand response transportation riders that are seniors and persons with disabilities in Placer County, as well as the South Placer County "One Stop" Call Center that distributes transit and paratransit/demand response transportation information and handles reservations/transfers for paratransit/demand response transportation users in Placer County. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$234,000	$234,000
CAL20565	Yes	Placer	Caltrans HQ	E- Transit Capital (Minor)	FTA 5310 - City of Roseville South Placer Call Center Equipment	Purchase training equipment (a laptop and LCD projector) for Call Center employees and Transit Ambassadors to use, as well as replacement digital recording system and TDD equipment for the South Placer Call Center. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.. Toll Credits for CON	Completion by 2020	$28,100	$28,100
CAL20564	Yes	Placer	Caltrans HQ	E- Transit Capital (Minor)	FTA 5310 - City of Roseville Transit Vehicle Navigation Units	Purchase 25 global positioning system (GPS) navigation units to assist demand response drivers serving seniors and people with disabilities. Transportation Development Credits/Toll Credits are being used as match, and as allowable under FTA Section 5310 federal funds will fund 100% of this project.	Completion by 2020	$6,900	$6,900
VAR56134	Project Development Only	Placer	Capitol Corridor Joint Powers Authority	F- Transit O&M (Rail)	Capitol Corridor Operations & Maintenance	Capitol Corridor operations & equipment maintenance, funded by the State of California/ Caltrans Division of Rail. (Total Cost: $728,000,000)	Completion after 2036	$58,181,760	
VAR56135	Project Development Only	Placer	Capitol Corridor Joint Powers Authority	E- Transit Capital (Minor)	Capitol Corridor Rail Replacement & Expansion	Lump-sum of capital improvements between Colfax & Davis (Total Cost: $120,720,000)	Completion after 2036	$9,647,942	
PLA25353	Yes	Placer	City of Auburn	E- Transit Capital (Minor)	Auburn Multi Modal Station - Rail Platform Extension	At the existing Auburn Multi Modal Station: Obtain right-of-way and install rail platform extension . (Emission Benefits in kg/day: 0.93 ROG, 1.18 NOx, 0.43 PM10)	Completion by 2020	$1,416,480	$1,416,480
PLA25569	Yes	Placer	City of Auburn	E- Transit Capital (Vehicles)	Auburn Transit Bus Replacement	Replace one bus.	Completion by 2020	$408,469	$408,469
PLA25234	Project Development Only	Placer	City of Auburn	B- Road & Highway Capacity	Baltimore Ravine Development	Construct New Road: various roadways in the Baltimore Ravine area of Auburn. Includes: widening and construction of new local roadways as a result of new development.	Completion after 2036	$200,000	
PLA25547	Yes	Placer	City of Auburn	F- Transit O&M (Bus)	City of Auburn Non-Urbanized Transit Operations	For the ongoing operation of transit within the non-urbanized area of Auburn and a portion of non-urbanized Placer County.	Completion by 2020	$1,584,934	$1,584,934
PLA25639	Yes	Placer	City of Auburn	A- Bike & Ped	Marguerite Mine Road Pedestrian and Bikeway Facilities	Marguerite Mine Road, from Marguerite Mine Road/State Route 49 intersection to the north and Marguerite Mine Road/Auburn Ravine Road intersection, approximately 2,200 feet: install curb, gutter sidewalk on west side segments and install Class II Bike Lane for the entire length. (Toll Credits for CON). Toll Credits for CON	Completion by 2020	$448,710	$448,710
PLA25471	Yes	Placer	City of Auburn	A- Bike & Ped	Nevada Street Pedestrian & Bicycle Facilities	Class 2 bike lane and adjacent sidewalks along Nevada St from Placer St to Fulweiler Ave to allow for continuous pedestrian and bicycle access from Old Town Auburn to the Auburn Station and EV Cain Middle School. (Emission reductions in kg/day: ROG 0.01, NOx 0.01.)	Completion by 2020	$1,700,645	$1,700,645
PLA25146	Project Development Only	Placer	City of Colfax	G- System Management, Operations, and ITS	Grass Valley St./UPRR Overcrossing	Rail Crossing Project; above-grade crossing of UP Tracks from east side (S Auburn)to west side (Main)	Completion after 2036	$300,000	
PLA25439	Yes	Placer	City of Colfax	C- Maintenance & Rehabilitation	Grass Valley Street Railroad Crossing Pedestrian and Bike Improvements	Construct of pedestrian improvements across UP railroad tracks to improve pedestrian safety, road rehabilitation, and bike lane/route along Grass Valley St west of South Auburn St.	Completion by 2020	$537,100	$537,100
PLA20420	Project Development Only	Placer	City of Colfax	G- System Management, Operations, and ITS	I-80/Canyon Wy. Intersection Improvements	Intersection Improvements at Canyon Wy. / I-80 Overpass, to include signalization, intersection realignment and striping.	Completion after 2036	$50,000	
PLA25591	Yes	Placer	City of Colfax	G- System Management, Operations, and ITS	I-80/SR174 Interchange Improvements (Construction funds)	Reconstruct I-80/SR 174 Interchange	2021-2036	$15,000,000	$23,459,000
PLA25490	Project Development Only	Placer	City of Colfax	G- System Management, Operations, and ITS	I-80/SR174 Road Widening and Signal Improvements	Roadway Operational Improvements at Hwy. 174 & I-80, to include 2 new signals and intersection widening with sidewalks and curb ramps	Completion after 2036	$100,000	
PLA25466	Project Development Only	Placer	City of Colfax	G- System Management, Operations, and ITS	Main and Grass Valley Signal Improvements	Design and construction of a new traffic signal and turn-lane at the intersection of Main Street and Grass Valley Street. (Emission reductions: ROG .02 kg/day; NOx .01 kg/day)	Completion after 2036	$200,000	
PLA25577	Yes	Placer	City of Colfax	A- Bike & Ped	North Main Street Bike Route	Along N. Main Street, from the Depot Transit Center to Highway 174: Construct class III bike route and associated improvements. Improvements include tree trimming, road repairs, non-capacity road widening, re-striping, drain inlet upgrade, bike rack, and barrier curb. (Requesting state-only ATP.)	Completion by 2020	$299,333	$299,333
PLA25237	Project Development Only	Placer	City of Colfax	A- Bike & Ped	S Auburn Street Bicycle Improvements	Add bike routes lanes on both sides of South Auburn Street from Mink Creek to Grass Valley UP Tracks.	Completion after 2036	$36,000	
PLA25235	Project Development Only	Placer	City of Colfax	G- System Management, Operations, and ITS	S. Auburn/Central/Hwy.174 Intersection Improvements	Intersection improvements on S. Auburn St. at Central Ave./Hwy. 174 intersection, to include widening, signalization, and pedestrian improvements.	Completion after 2036	$60,000	
PLA25161	Yes	Placer	City of Lincoln	B- Road & Highway Capacity	12th St.	Widen: 4 lanes from East Ave. to Harrison Ave.	Completion by 2020	$48,700	$51,000
PLA20740	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Airport Rd.	Construct New Road: 2 lanes from Weco Access Rd. to Wise Rd.	Completion after 2036	$550,000	
PLA25022	Yes	Placer	City of Lincoln	A- Bike & Ped	Auburn Ravine Bike/Ped Bridge Phase 1	In Lincoln: Construction of multi-use bridge across Auburn Ravine: Preliminary Engineering, Environmental Documentation, Permitting, and Construction of bicycle and pedestrian bridge crossing Auburn Ravine.	Completion by 2020	$987,193	$1,035,000
PLA18650	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Aviation Blvd.	Widen Aviation Blvd. from 2 to 4 lanes from Venture Dr. to terminus 0.5 miles north of Venture Dr.	Completion after 2036	$850,000	
PLA25304	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Aviation Blvd.	Road Extension: 4 lanes from Venture Dr. to Wise Rd.	Completion after 2036	$1,500,000	
PLA18760	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	E. Joiner Pkwy.	Widen: 6 lanes from Ferrari Ranch Rd. to Sterling Pkwy. Includes: Hwy. 65 / UPRR overcrossing.	Completion after 2036	$700,000	
PLA25515	Yes	Placer	City of Lincoln	A- Bike & Ped	East Ave. and East Joiner Pkwy. Sidewalks (SRTS)	East side East Ave. between SR 93 (McBean Park Dr.) and 12th St.; east side E. Joiner Pkwy. between 12 Bridges Dr. and Westview Dr.: Construct sidewalk, curb and gutter, curb ramps; install bike lanes. SRTS3-03-005	Completion by 2020	$519,600	$519,600

PLA25531	Yes	Placer	City of Lincoln	G- System Management, Operations, and ITS	Lincoln Blvd. Signal Upgrade and Lighting	Lincoln Blvd. (Old 65) between Sterling Pkwy. and 7th St.: Upgrade traffic signals; install safety lighting and bike lanes. (HSIP5-03-006)	Completion by 2020	$1,080,000	$1,080,000
PLA25464	Yes	Placer	City of Lincoln	A- Bike & Ped	Lincoln Blvd. Streetscape - Phase 1	In Lincoln: Between 7th Street and McBean Park Drive; construct various pedestrian, bicycle, NEV, and ITS improvements along Lincoln Boulevard (old Highway 65 / G Street). Improvements will consist of gap sidewalk construction, pedestrian improvements to railroad crossings, pedestrian crossings along Lincoln Boulevard, bicycle and NEV lanes, connection to the existing trail along Auburn Ravine east of Highway 65, roadway narrowing through the construction of landscape medians and frontage improvements where appropriate, and traffic signal interconnection and coordination along the corridor. (Emission Benefits in kg/day: ROG 0.58, NOx 0.41, PM10 0.08)	Completion by 2020	$3,278,812	$3,278,812
PLA25554	Yes	Placer	City of Lincoln	A- Bike & Ped	Lincoln Blvd. Streetscape - Phase 2	Lincoln Blvd, First Street to McBean Park Drive: Provide a more pedestrian, bicycle and Neighborhood Electric Vehicle (NEV) friendly environment along the main street through the city. Pedestrian improvements include wider sidewalks, bulb-outs at intersections and crosswalks. Bicycle and NEV improvements include Class 2 lanes on each side of the street. (Emission Benefits in kg/day: ROG 0.16, NOx 0.11, PM10 0.06) (Toll Credits for PE and CON)	Completion by 2020	$1,019,639	$1,019,639
PLA25540	Yes	Placer	City of Lincoln	C- Maintenance & Rehabilitation	McBean Park Bridge Rehabilitation	McBean Park Dr. over Auburn Ravine, east of East Ave.: Rehabilitate existing 2 lane bridge. No added lane capacity.	Completion by 2020	$8,083,000	$8,083,000
	Yes	Placer	City of Lincoln	B- Road & Highway Capacity	McBean Drive Widening - Phase 1	Widen McBean Drive to four lanes from Ferrari Ranch to Oak Tree Lane	2021-2036	$7,047,977	$8,600,000
	Yes	Placer	City of Lincoln	B- Road & Highway Capacity	McBean Drive Widening - Phase 2	Widen McBean Drive from Oak Tree Lane to N/S Connector Loop	2021-2036	$5,971,878	$7,287,000
PLA25162	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	McCourtney Rd.	Widen: 4 lanes from 12th St. to north Lincoln city limits.	Completion after 2036	$48,800	
PLA25595	Yes	Placer	City of Lincoln	B- Road & Highway Capacity	Nelson Lane Extension	Extend Nelson Lane south of SR-65 Bypass	2021-2036	$25,000,000	$39,098,000
PLA25509	Yes	Placer	City of Lincoln	B- Road & Highway Capacity	Nelson Ln/Markham Ravine Bridge Replacement	Nelson Ln, over Markham Ravine, 0.25 mi south of Nicolaus Rd. Replace existing functionally obsolete 2 lane bridge with a new 4 lane bridge.	Completion by 2020	$8,212,828	$8,212,828
PLA15970	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Nicolaus Rd.	Widen Nicolaus Rd. from 2 to 4 lanes from Airport Rd. to Aviation Blvd.	Completion after 2036	$2,250,600	
PLA25305	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Oak Tree Extension	Construct New Road: 2 lanes between Sierra College Blvd. and Wise Rd. / Hwy. 65	Completion after 2036	$1,500,000	
PLA19020	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Twelve Bridges Dr.	Twelve Bridges Dr.from Industrial Blvd. to SR 65 Interchange: widen from 2 to 4 lanes, including interchange improvements.	Completion after 2036	$2,817,000	
PLA25166	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Twelve Bridges Dr.	Widen: 6 lanes from Hwy. 65 Interchange to Lincoln Pkwy. Includes: interchange improvements.	Completion after 2036	$225,200	
PLA25553	Yes	Placer	City of Lincoln	C- Maintenance & Rehabilitation	Twelve Bridges Drive & Joiner Parkway rehabilitation	In Lincoln, street rehabilitation of (1) Twelve Bridges Drive from Industrial Avenue east to Sierra College Boulevard and (2) Joiner Parkway from the southern city limits to First Street. (Toll Credits for CON)	Completion by 2020	$1,332,655	$1,332,655
PLA20760	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Venture Drive	In Lincoln: from Aviation Blvd. to Lakeside Dr., widen Venture Dr. from 2 to 4 lanes.	Completion after 2036	$90,000	
PLA25315	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Village 1-7, SUD A-C local streets	Construct New Road: Local roads for various villages and SUD. Includes: street enhancements.	Completion after 2036	$11,800,000	
PLA25163	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Virginiatown Rd.	Widen: 4 lanes from McCourtney Rd. to east Lincoln city limits.	Completion after 2036	$50,200	
PLA25310	Project Development Only	Placer	City of Lincoln	B- Road & Highway Capacity	Wise Rd.	Road Realignment: between Hwy. 65 Lincoln Bypass and existing Hwy. 65. Includes: overcrossing.	Completion after 2036	$6,000,000	
PLA25566	Yes	Placer	City of Rocklin	C- Maintenance & Rehabilitation	Bridge Preventive Maintenance Program	Bridge Preventive Maintenance Program, various locations in City of Rocklin. See Caltrans Local Assistance HBP web site for backup list of bridges.	Completion by 2020	$600,000	$600,000
PLA19260	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Dominguez Road	In Rocklin, Dominguez Road: extend with 2 lanes from Granite Drive to Sierra College Boulevard, including new bridge over I-80.	2021-2036	$11,000,000	$17,203,000
PLA25635	Yes	Placer	City of Rocklin	G- System Management, Operations, and ITS	Granite Drive at Rocklin Road Roundabout	At Rocklin Rd/Granite Dr., between east of Meyers St to the Caltrans WB on-ramp/right of way on Rocklin Road. : Replace the existing four lane signalized intersection with a two lane roundabout (Toll Credits for PE, ROW, CON).. Toll Credits for ENG, ROW, CON	Completion by 2020	$2,707,607	$2,707,607
PLA25373	Project Development Only	Placer	City of Rocklin	E- Transit Capital (Minor)	Midas Ave. Grade Separation	Midas Ave., from Pacific St. to Third St., construct 2 lane grade separation of UP tracks including right of way.	Completion after 2036	$5,650,000	
PLA25272	Project Development Only	Placer	City of Rocklin	B- Road & Highway Capacity	Pacific St.	Widen: 6 lanes from SW of Sunset Blvd. to NE of Sunset Blvd.	Completion after 2036	$240,000	
PLA17820	Yes	Placer	City of Rocklin	G- System Management, Operations, and ITS	Pacific Street	On Pacific Street: Construct downtown improvements.	Completion by 2020	$8,000,000	$8,391,000
PLA25552	Yes	Placer	City of Rocklin	A- Bike & Ped	Pacific Street-Bikeway/Neighborhood Electric Vehicle Expansion Project	Construct & add striped median ,striping, pavement markings and signage on both NB and SB lanes of Pacific Street. The project will also construct a Class II bike path on the northwest portion of Pacific Street from Town of Loomis border to Del Mar Ave.(Emission Benefits in kg/day: ROG 0.16; NOx 0.13; PM10 0.08)	Completion by 2020	$1,698,542	$1,698,542
PLA19400	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Rocklin Rd. Widening	In Rocklin, Rocklin Road: widen to 6 lanes from Granite Drive to westbound I-80 ramps.	Completion by 2020	$1,320,000	$1,320,000
PLA19401	Project Development Only	Placer	City of Rocklin	B- Road & Highway Capacity	Rocklin Road	In Rocklin, Rocklin Road from Aguilar Road / Eastbound I-80 on-ramps to Sierra College Blvd: widen from 4 to 6 lanes.	Completion after 2036	$1,534,000	
PLA25273	Project Development Only	Placer	City of Rocklin	B- Road & Highway Capacity	Rocklin Road Widening	Widen Rocklin Road from 2 to 4 lanes from Loomis town limits to east of Sierra College Boulevard.	Completion after 2036	$372,266	
PLA25345	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Rocklin Road/I-80 Interchange	In Rocklin: from Rocklin Rd. onto both WB and EB I-80; construct roundabouts at ramp EB/WB ramp terminus.	Completion by 2020	$26,150,000	$26,150,000
PLA15400	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Sierra College Blvd. Widening	In Rocklin, widen Sierra College Boulevard from 4 to 5 lanes from I-80 to Aguliar Tributary.	2021-2036	$3,800,000	$4,637,000
PLA20460	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Sierra College Blvd. Widening	In Rocklin, Sierra College Boulevard from Aguilar Tributary to Nightwatch: widen from 4 to 5 lanes.	2021-2036	$2,750,000	$3,356,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
PLA19330	Project Development Only	Placer	City of Rocklin	B- Road & Highway Capacity	Sierra College Boulevard	In Rocklin, Sierra College Boulevard: widen to 4 lanes from intersection with Valley View Parkway to Loomis Town limits (SPRTA Segment #2a).	Completion after 2036	$8,650,000	
PLA25551	Yes	Placer	City of Rocklin	C- Maintenance & Rehabilitation	Sunset Blvd Reconstruction	Reconstuct Sunset Blvd from Fairway Drive to Stanford Ranch Road. (Toll credits for CON.)	Completion by 2020	$876,500	$876,500
PLA25156	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Sunset Blvd. Widening	Sunset Boulevard: Widen from 4 to 6 lanes from north bound SR 65 ramp to West Stanford Ranch Road.	2021-2036	$1,100,000	$1,342,000
PLA15620	Project Development Only	Placer	City of Rocklin	B- Road & Highway Capacity	Sunset Boulevard	Widen Sunset Boulevard from 4 to 6 lanes, from Standford Ranch Road to Pacific Street	Completion after 2036	$4,177,406	
PLA17910	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Sunset Boulevard	Widen Sunset Boulevard bridge at UPRR from 4 to 6 lanes from South Whitney Blvd. to Pacific St.	2021-2036	$2,600,000	$4,066,000
PLA19360	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Sunset Boulevard	Widen Sunset Boulevard from 4 to 6 lanes from Stanford Ranch Rd. to Topaz.	2021-2036	$2,600,000	$4,066,000
PLA25268	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	University Avenue Phase 1	University Avenue: Construct new four lane roadway from the intersection of Whitney Ranch Parkway north to the extension of West Ranch View Drive. One or more phases of this project may require federal permitting.	Completion by 2020	$2,500,000	$2,500,000
PLA19250	Project Development Only	Placer	City of Rocklin	B- Road & Highway Capacity	Valley View Parkway	Valley View Parkway: Construct 2 lanes from Park Drive to Sierra College Blvd.	Completion after 2036	$9,575,000	
PLA25151	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	West Oaks Boulevard	West Oaks Boulevard: Construct new 4-lane extension from terminus to 4-lane portion to Whitney Ranch Parkway.	2021-2036	$3,500,000	$4,271,000
PLA19290	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Whitney Ranch Parkway	Whitney Ranch Parkway, construct new 4-lane facility from east of Wildcat Blvd. to Whitney Oaks Dr.	2021-2036	$12,428,000	$15,166,000
PLA25025	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Whitney Ranch Parkway	In Rocklin, Whitney Ranch Parkway: construct four-lane facility from SR 65 to east of Wildcat Boulevard.	Completion by 2020	$1,730,000	$1,730,000
PLA25521	Yes	Placer	City of Rocklin	B- Road & Highway Capacity	Whitney Ranch Parkway Interchange Phase 1A	At SR 65 and Whitney Ranch Parkway: Construct Phase 1A of the Whitney Ranch Interchange by constructing NB on- and off-ramps, overcrossing structure, and southbound loop on-ramp.	Completion by 2020	$3,800,000	$3,800,000
PLA25578	Yes	Placer	City of Roseville	C- Maintenance & Rehabilitation	2015 RSTP Arterial Microsurfacing Project	In Roseville, resurface the following arterial roadways - Pleasant Grove Blvd from Hartley Wy to Fiddyment Rd & from Michner Dr to Foothills Blvd; Fiddyment Rd from Pleasant Grove Blvd to Blue Oaks Blvd; Foothills Blvd from Pleasant Grove Blvd to Junction Blvd & from Baseline Rd to Atkinson St; Galilee Rd from Industrial Ave to Pleasant Grove Blvd; Vineyard Rd from Brady Ln to Atkinson St; Denio Loop from Foothills Blvd to Atkinson St; E Roseville Parkway from Douglas Blvd to Sierra College Blvd; Atlantic St from Wills Rd to I-80 WB On Ramp; Eureka Rd from Sunrise Ave to Douglas Blvd; Sunrise Ave from Smith Ln to Kensington Dr; N. Sunrise Ave from Frances Dr to Lead Hill Blvd; Sierra Gardens Dr from Santa Clara Dr to Douglas Blvd; Santa Clara Dr from Sierra gardens Dr to Douglas Blvd; and Douglas Blvd from N. Sunrise Ave to Sierra Gardens. (Toll credits for CON.)	Completion by 2020	$6,374,233	$6,374,233
PLA25581	Yes	Placer	City of Roseville	A- Bike & Ped	2017 Pedestrian Facilities Improvement	In Roseville, upgrade ADA pedestrian ramps along various arterial and collector roadways for safety and to meet current ADA standards. (Emission Benefits in kg/day: 0.10 ROG; 0.06 NOx; 0.02 PM2.5)	Completion by 2020	$815,925	$815,925
PLA19810	Project Development Only	Placer	City of Roseville	B- Road & Highway Capacity	Atkinson St./PFE Rd. Widening	In Roseville, Atkinson St./PFE Rd.: widen from two to four lanes from Foothills Blvd to just south of Dry Creek, including connector road from Foothills to Atkinson (mirror image of existing Denio Loop connector on N/E side of Foothills) and signal removal.	Completion after 2036	$7,000,000	
PLA15660	Yes	Placer	City of Roseville	B- Road & Highway Capacity	Baseline Rd. Widening	In Roseville, Baseline Rd., from Brady Lane to Fiddyment Road: widen from 3 to 4 lanes.	Completion by 2020	$6,106,889	$6,106,889
PLA15100	Yes	Placer	City of Roseville	B- Road & Highway Capacity	Baseline Road	In Roseville, Baseline Road from Fiddyment Road to Sierra Vista Western edge west of Watt Avenue: widen from 2 to 6 lanes.	Completion by 2020	$7,852,055	$7,852,055
PLA25528	Yes	Placer	City of Roseville	B- Road & Highway Capacity	Blue Oaks Blvd Extension - Phase 1	In Roseville, Extend 2 lanes of Blue Oaks Blvd from Hayden Parkway to Westside Dr., Including south half of a 6-lane bridge over Kaseberg Creek.	Completion by 2020	$6,000,000	$6,000,000
PLA25539	Yes	Placer	City of Roseville	B- Road & Highway Capacity	Blue Oaks Blvd. Extension Phase 2	In Roseville, Blue Oaks Blvd., from Westbrook Dr. to Santucci Blvd. (formerly Watt Ave.), extend 2 lanes.	Completion by 2020	$6,350,000	$6,350,000
PLA25465	Yes	Placer	City of Roseville	A- Bike & Ped	Downtown Pedestrian Bridge	In Roseville, improve access to Civic Center transit transfer facility by constructing transit/bicycle/pedestrian related improvements, including pedestrian bridge and Class I trail improvements. (Emission benefits in kg/day: ROG 0.55, NOx 0.34, PM2.5 0.11)	Completion by 2020	$3,217,000	$3,217,000
PLA25318	Project Development Only	Placer	City of Roseville	B- Road & Highway Capacity	Dry Creek	Bikeway Facilities: from Darling Wy. to western Roseville City limits along Dry Creek.	Completion after 2036	$550,000	
PLA19910	Yes	Placer	City of Roseville	A- Bike & Ped	Dry Creek Greenway Trail	In Roseville, along Dry Creek, Cirby Creek and Linda Creek, construct class 1 bike trail. (Emission Benefits in kg/day: 0.09 ROG, 0.07 NOx, 0.03 PM2.5)	Completion by 2020	$3,268,629	$3,268,629
PLA25496	Project Development Only	Placer	City of Roseville	B- Road & Highway Capacity	Foothills Boulevard	Widen: 6 lanes from Cirby to Vineyard and from Switchman to Pilgrims.	Completion after 2036	$2,390,000	
PLA15740	Project Development Only	Placer	City of Roseville	B- Road & Highway Capacity	Galleria Blvd.	Widen: 6 lanes from Berry to Roseville Pkwy.	Completion after 2036	$150,000	
PLA25211	Project Development Only	Placer	City of Roseville	B- Road & Highway Capacity	Galleria Blvd.	Interchange Modification: Hwy. 65 / Galleria Blvd. Interchange. Includes: re-stripe Galleria/ Stanford Ranch to 6 lanes; modify 3 NB & SB off ramps and SB Stanford Ranch Rd. to NB 65 on ramp; add 2nd N/B Galleria to NB Hwy. 65 left-turn lane (Phase II).	Completion after 2036	$400,000	
PLA25209	Project Development Only	Placer	City of Roseville	B- Road & Highway Capacity	Galleria Blvd./SR 65 Interchange Phase II Improvements	In Roseville, at existing interchange on State Route 65/Galleria Blvd/Stanford Ranch Rd.: modify all on and off ramps to provide improved operations.	Completion after 2036	$5,000,000	
PLA25386	Yes	Placer	City of Roseville	A- Bike & Ped	I-80 To Royer Park Bikeway Phase 2 - Segment 3	Roseville, Harding Blvd @ Dry Creek, I-80 to Royer Park: Construct class 1 bikeway in 2 phases. Phase 1 from I-80 to Harding Blvd completed in 2004 (PLA20870). Phase 2 construction is separated into 3 segments: Segment 3 is located from Folsom Road to Lincoln Street/Royer Park. (Emission benefits in kg/day: 0.25 ROG, 0.2 NOx 0.09 PM10)	Completion by 2020	$870,909	$870,909
PLA25507	Yes	Placer	City of Roseville	C- Maintenance & Rehabilitation	Industrial Ave/Pleasant Grove Creek Bridge Replacement	Industrial Ave, over Pleasant Grove Creek, 0.7 mi S Placer Blvd. Replace the existing 2 lane functionally obsolete bridge with a new 2 lane bridge.	Completion by 2020	$4,960,000	$4,960,000
REG17928	Yes	Placer	City of Roseville	E- Transit Capital (Minor)	Louis/Orlando Transfer Point Improvements	In Roseville, on Louis Blvd at Orlando Ave.: Develop and construct an improved transfer point and intermodal facility with a 35-space park and ride facility. (Includes previously programmed PLA16080.)	Completion by 2020	$4,738,000	$4,738,000
PLA25377	Yes	Placer	City of Roseville	B- Road & Highway Capacity	Market St.	City of Roseville, Market St., from approx. 800 feet north of Baseline Road to Pleasant Grove: Extend 2 lanes.	Completion by 2020	$8,500,000	$8,500,000
PLA25571	Yes	Placer	City of Roseville	B- Road & Highway Capacity	Market Street South	In Roseville, Market Street South, from Baseline Road to approx. 800 feet north: construct 2-lane road.	Completion by 2020	$500,000	$500,000
PLA25508	Yes	Placer	City of Roseville	C- Maintenance & Rehabilitation	Oak Ridge Dr/Linda Creek Bridge Replacement	Oak Ridge Dr, over Linda Creek, 0.2 mi N Cirby Way. Replace the existing functionally obsolete 2 lane bridge with a new 2 lane bridge. 11/8/2010: (Toll Credits programmed for PE, ROW, and & CON.)	Completion by 2020	$3,250,000	$3,250,000
PLA25469	Yes	Placer	City of Roseville	A- Bike & Ped	Oak Street Extension of Miners Ravine Trail	In Roseville, Miners Ravine Trail, from Lincoln Street to Royer Park along the Dry Creek corridor: Extend class 1 trail, including relocation and safety upgrades to existing Ice House Bridge. From transit stop at Downtown Roseville Library to existing class 1 trail in Royer Park: provide bicycle and pedestrian improvements including replacement of Taylor Street Bridge. (Emission benefits in kg/day: ROG 0.13, NOx 0.09, PM10 0.04) (FTA 5307 to be used on Taylor Street bridge and bike/ped improvements leading to transit stop at library.)	Completion by 2020	$3,046,159	$3,046,159
PLA25500	Yes	Placer	City of Roseville	A- Bike & Ped	Pedestrian Facilities Improvement Project	In Roseville, reconstruct ADA pedestrian ramps along various arterial and collector roadways to current ADA standards. (Emission Benefits in kg/day: 0.10 ROG, 0.06 NOx, 0.02 PM2.5) (Toll Credits for CON)	Completion by 2020	$562,525	$562,525
PLA25337	Yes	Placer	City of Roseville	B- Road & Highway Capacity	Placer Parkway Phase 2	Construct New Road: 4 lane divided Hwy. between Foothills Boulevard and Fiddyment Road. Includes signalized intersections at Fiddyment Rd.	2021-2036	$14,500,000	$22,677,000

PLA25638	Yes	Placer	PCTPA	B- Road & Highway Capacity	SR 65 Capacity & Operational Improvements Phase 3	SR 65, from Galleria Blvd. to Lincoln Blvd., make capacity and operational improvements. Phase 3: From Blue Oaks Blvd. to Lincoln Blvd., construct auxiliary lanes both northbound and southbound.	2021-2036	$12,000,000	$18,767,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
	Project Development Only	Placer	PCTPA	B- Road & Highway Capacity	SR 65 Capacity & Operational Improvements Phase 4	SR 65, from Galleria Blvd. to Lincoln Blvd., make capacity and operational improvements. Phase 4: From Lincoln Blvd. to Blue Oaks Blvd., widen southbound in median to add lane; and from north of Galleria Blvd. (end of the I-80/SR 65 Interchange project) to Lincoln Blvd., widen northbound in median to add lane. Future environmental document will be completed to determine if widening in median will be carpool or general purpose lanes.	Completion after 2036	$57,000,000	
PLA25631	**Yes**	Placer	PCTPA	F- Transit O&M (Bus)	Transit Operating & Maintenance	Lump-sum annual Operating & Maintenance costs for fiscal years 2019-2036; does not account for expansion of service	Lump Sum or Ongoing	$224,910,000	$295,560,000
PLA25519	**Yes**	Placer	PCTPA	B- Road & Highway Capacity	I-80 Eastbound Auxiliary Lane: SR 65 to Rocklin Rd.	In Rocklin: Between SR 65 (PM 4.5) and Rocklin Rd. (PM 5.9); Construct eastbound I-80 auxiliary lane, including two-lane off-ramp, concrete barrier/retaining walls, and shoulder improvements. (Toll credits for PE, ROW, and CON)	Completion by 2020	$4,990,000	$4,990,000
PLA25576	**Yes**	Placer	PCTPA	B- Road & Highway Capacity	I-80 Westbound 5th Lane	In Roseville: Between east of Douglas Blvd. off-ramp to west of Riverside Ave.; Extend I-80 westbound auxiliary lane (PLA25542) to the east and west to create continuous 5th lane on westbound I-80. The Douglas Boulevard off-ramp would be reduced from a 2-lane off-ramp to a 1-lane off-ramp.	Completion by 2020	$3,700,000	$3,700,000
PLA25542	**Yes**	Placer	PCTPA	B- Road & Highway Capacity	I-80 Westbound Auxiliary Lane - Douglas Blvd. to Riverside Ave.	In Roseville: Between Douglas Blvd.(PM 2.0) and Riverside Ave. (PM 0.2); Construct westbound I-80 auxiliary lane and shoulder improvements. (Toll credits for PE, ROW, and CON)	Completion by 2020	$5,910,000	$5,910,000
PLA25440	**Yes**	Placer	PCTPA	B- Road & Highway Capacity	I-80/SR 65 Interchange Improvements Phase 1A	In Placer County: Between I-80 and Galleria Blvd./Stanford Ranch Rd.; Reconfigure I-80/SR 65 interchange to widen northbound SR 65 from 2 to 3 lanes, including widening Galleria Boulevard/Stanford Ranch Road northbound off-ramp and on-ramp, and southbound on-ramp (PA&ED, PS&E, ROW, and CON to be matched with Toll Credits) SHOPP funding (EA 03-0H260) for auxiliary lane on northbound SR 65 between I-80 and Galleria Boulevard/Stanford Ranch Road.	2021-2036	$37,099,700	$37,099,700
PLA25648	**Yes**	Placer	PCTPA	B- Road & Highway Capacity	I-80/SR 65 Interchange Improvements Phase 1B	In Placer County: Between Galleria Boulevard/Stanford Ranch Road and Pleasant Grove Boulevard; Reconfigure I-80/SR 65 interchange to widen northbound SR 65 from 2 to 3 lanes, and widen I-80 westbound to SR 65 northbound ramp from 1 to 2 lanes.	2021-2036	$17,500,000	$17,500,000
PLA25649	**Yes**	Placer	PCTPA	B- Road & Highway Capacity	I-80/SR 65 Interchange Improvements Phase 1C	In Placer County: Between I-80 and Pleasant Grove Boulevard; Reconfigure I-80/SR 65 interchange to widen southbound SR 65 from 2 to 3 lanes.	2021-2036	$11,500,000	$11,500,000
PLA25468	**Yes**	Placer	PCTPA	D- Programs & Planning	Placer County Congestion Management Program	Provide educational and outreach efforts regarding alternative transportation modes to employers, residents, and the school community through the Placer County Congestion Management Program (CMP). CMP activities will be coordinated with the City of Roseville and SACOG's Regional Rideshare / TDM Program. (KG/day ROG 54.00; NOx 60.00; PM10 39.00)	Completion by 2020	$955,429	$955,429
PLA25543	**Yes**	Placer	PCTPA	G- System Management, Operations, and ITS	Placer County Freeway Service Patrol	In Placer County: provide motorist assistance and towing of disabled vehicles during am and pm commute periods on I-80 (Riverside Ave to SR 49) and SR 65 (I-80 to Twelve Bridges Dr). (Emission Benefits in kg/day: ROG 7.35; NOx 1.10; PM10 1.16)	Completion by 2020	$550,000	$550,000
PLA25413	**Yes**	Placer	PCTPA	D- Programs & Planning	Planning, Programming, Monitoring 2011-2015	PCTPA plan, program, monitor (PPM) for RTPA related activities.	Completion by 2020	$1,455,000	$1,455,000
PLA25529	**Yes**	Placer	PCTPA	B- Road & Highway Capacity	SR 65 Capacity & Operational Improvements Phase 1	SR 65, from Galleria Blvd. to Lincoln Blvd., make capacity and operational improvements. Phase 1: From Galleria Blvd. to Pleasant Grove Blvd., construct auxiliary lanes on northbound and southbound SR 65, including widening Galleria Blvd. southbound off-ramp.	Completion by 2020	$16,520,000	$16,520,000
PLA25479	**Project Development Only**	Placer	Placer County	B- Road & Highway Capacity	16th St.	Construct New Road: 4 lanes from Sacramento/Placer County Line to Baseline Rd.	Completion after 2036	$12,955,800	
PLA25477	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Alpine Meadows Rd Bridge Rehabilitation	Alpine Meadows Rd over Truckee River, 0.1 miles west of SH 89: Replace the existing structurally deficient 2 lane bridge with a new 2 lane bridge. (Toll Credits programmed for ROW & CON)	Completion by 2020	$22,625,063	$22,625,063
PLA25472	**Yes**	Placer	Placer County	A- Bike & Ped	Auburn Folsom Rd Class II Bike Lane	On Auburn-Folsom Rd between Douglas Blvd and Joe Rodgers Rd, construct a Class II Bike lane on both sides of the road, including signing and striping; construct sidewalk on both sides of Auburn-Folsom Rd from Wilcox Place north to Joe Rodgers. (Emission benefits in kg/day: ROG 0.06, NOx 0.04, PM10 0.03) [Toll Credits for CON]	Completion by 2020	$1,227,674	$1,227,674
PLA25533	**Yes**	Placer	Placer County	A- Bike & Ped	Auburn Folsom Rd. Safety Improvements	Auburn Folsom Rd. from approximately 60' N of Willow Ln. to Robin Hood Ln.: Construct sidewalks, curb ramps, curb and gutter; install mid-block crosswalk; improve pavement friction; provide dynamic speed sign.(HSIP5-03-013)	Completion by 2020	$746,300	$746,300
PLA15070	**Yes**	Placer	Placer County	B- Road & Highway Capacity	Auburn Ravine Road at I-80 Overcrossing	Auburn Ravine Road overcrossing over I-80 between Bowman Road to Lincoln Way: widen overcrossing from 2 to 4 lanes.	2021-2036	$29,000,000	$45,354,000
PLA15080	**Yes**	Placer	Placer County	B- Road & Highway Capacity	Auburn-Folsom Rd Widening	From Placer / Sacramento County line to Douglas Blvd, : Widen to 4 lanes. Install signal at Auburn-Folsom Blvd and Fuller Dr.	Completion by 2020	$28,300,000	$28,300,000
PLA20680	**Yes**	Placer	Placer County	B- Road & Highway Capacity	Baseline Road Four to Six Lane Widening (East Portion)	Widen From 4 to 6 lanes from Watt Avenue to Fiddyment/Walerga Road.	2021-2036	$11,270,000	$17,626,000
PLA25127	**Project Development Only**	Placer	Placer County	B- Road & Highway Capacity	Baseline Road Four to Six Lane Widening (West Portion)	Placer County, Baseline Road from Watt Avenue to Sutter County Line, widen from 4 to 6 lanes.	Completion after 2036	$2,400,000	
PLA15105	**Yes**	Placer	Placer County	B- Road & Highway Capacity	Baseline Road Widening Phase 1 (West Portion)	Baseline Rd. from Watt Avenue to future 16th street: Widen from 2 to 4 lanes.	Completion by 2020	$19,200,000	$19,200,000
PLA25463	**Yes**	Placer	Placer County	B- Road & Highway Capacity	Baseline Road Widening Phase 2 (West Portion)	Baseline Road from Sutter County Line to Future 16th Street. Widen from 2 to 4 lanes.	2021-2036	$29,000,000	$29,000,000
PLA25447	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Bowman Rd Bridge	Bowman Rd, over UP Railroad, BNSF RR and AMTRAK, 0.1 miles south of 19C-62: Rehabilitate the existing bridge without adding additional lanes.	Completion by 2020	$2,230,002	$2,230,002
PLA25448	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Bowman Rd Bridge	Bowman Rd, over UP Railroad, BNSF Railyards & AMTRAK, 0.1 miles north of 19C-61: Rehabilitate the existing bridge without adding additional lanes.	Completion by 2020	$2,230,002	$2,230,002
PLA25518	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Brewer Rd. Bridge Replacement	Brewer Rd., over Pleasant Grove Creek, 4.2 miles north of Baseline Rd.: Replace 2-lane bridge with a new 2-lane bridge. (Toll Credits for PE, ROW, & CON.)	Completion by 2020	$5,518,500	$5,518,500
PLA25559	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Bridge Approach and Non-HBP Partipating Costs	In Placer County, bridge approach and non-HBP participating costs at Alpine Meadows @ Truckee River and Dowd Road @ Yankee Slough. (Toll Credits for CON)	Completion by 2020	$1,000,000	$1,000,000
PLA25458	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Bridge Preventive Maintenance	In various location ins Placer County, perform preventive maintenance on bridges.1. Squaw Valley Rd., over Squaw Creek, 2 mi west of SH 89, Bridge Rail Replacement, Deck Rehab.2. Donner Pass Rd., over S. Yuba River, north of Yuba Dr., Bridge Rail Replacement, Deck Rehab.3. Cisco Rd., over S. Yuba River, near Hampshire Rocks Rd., Replace Joint Seals, Deck Rehab.4. Alpine Meadows Rd., over Bear Creek, 0.9 mi west of SH 89, Polyester Concrete Deck Overlay.5. Fowler Rd., over Auburn Ravine, 0.6 mi north of SH 193, Methacrylate Deck Overlay.6. Gold Hill Rd., over Doty Ravine, 0.3 mi south of Wise Rd., Methacrylate Deck Overlay.7. Develop Bridge Preventive Maintenance Plan.	Completion by 2020	$1,356,000	$1,356,000
PLA25583	**Yes**	Placer	Placer County	E- Transit Capital (Vehicles)	CNG Bus	Replace one CNG bus with one new cleaner CNG Bus for Placer County Transit. (Emissions Benefits in kg/day: NOx 0.75.)	Completion by 2020	$530,000	$530,000
PLA25565	**Yes**	Placer	Placer County	A- Bike & Ped	Cook Riolo Road Pathway	Pedestrian Pathway along Cook Riolo Rd from existing sidewalk at Creekview Ranch Middle School North (Emission Benefits in kg/day: ROG 0.04, NOx 0.02, PM10 0.01) [Toll Credits for PE, ROW, CON]	Completion by 2020	$2,190,157	$2,190,157
PLA25536	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Crosby Harold Rd. Bridge	Crosby Harold Rd. Over Doty Creek, 0.9 mi N of Wise Rd.: Replace an existing 1 lane bridge with a new 2 lane bridge. (Toll Credits for PE, ROW, CON)	Completion by 2020	$2,790,000	$2,790,000
PLA25453	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Dowd Rd at Yankee Slough Bridge Replacement	Dowd Rd. over Yankee Slough, just south of Dalby Rd.: Replace existing structurally deficient 1 lane bridge with new 2 lane bridge. (Toll Credits for CON)	Completion by 2020	$4,812,511	$4,812,511
PLA25449	**Yes**	Placer	Placer County	C- Maintenance & Rehabilitation	Dowd Rd Bridge Replacement at Coon Creek	Dowd Rd over Coon Creek, 0.4 miles north of Wise Rd.: Replace existing 2 lane bridge with a new 2 lane bridge. (Toll Credits programmed for ROW & CON)	Completion by 2020	$5,675,000	$5,675,000

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
PLA25474	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	Dowd Rd Bridge Replacement at Markham Ravine	Dowd Rd, over Markham Ravine, 0.5 miles south Nicolaus Rd: Replace existing 2 lane structurally deficient bridge with a new 2 lane bridge. (Toll credits for CON.)	Completion by 2020	$5,050,000	$5,050,000
PLA18390	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	Dyer Lane Extension	Extend Dyer Lane west/north to Baseline Road at Brewer Road and east/north to Baseline Road west of Fiddyment Road and widen to four lanes in accordance with the Placer Vineyards Specific Plan.	Completion after 2036	$18,247,600	
PLA25130	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	Fiddyment Road Widening	Widen Fiddyment Road from 2 lanes to 4 lanes from Roseville City Limits to Athens Road.	Completion after 2036	$11,550,000	
PLA15220	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	Foothills Boulevard	Foothills Blvd.: Construct as a 2 lane road from the City of Roseville to Sunset Blvd.	Completion after 2036	$4,062,300	
PLA25541	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	Gold Hill Rd. Bridge Replacement	Gold Hill Rd. over Auburn Ravine, 0.65 mi north of SR 193: Replace existing 2 lane bridge with a new 2 lane bridge. (Toll credits for PE, ROW, CON)	Completion by 2020	$5,018,250	$5,018,250
PLA25475	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	Haines Rd Bridge Replacement	Haines Rd, over Wise Canal, 0.45 miles North of Bell Rd: Replace the existing functionally obsolete 2 lane bridge with a new 2 lane bridge. (Toll Credits for PE, ROW, & CON)	Completion by 2020	$5,180,000	$5,180,000
PLA25562	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	HMA Overlay, Various County Roads (Yr2)	In Placer County, hot mix asphalt (HMA) overlay on various County roads: (1) Douglas Boulevard from Barton to Auburn-Folsom, (2) Dry Creek Road from Joeger to HWY 49, (3) Richardson Drive from Atwood Rd to Bell Rd, (4) Nevada Street from 150' east of Nevada Way to Auburn City Limits, (5) Edgewood Road from SR49 to Edgewood Place (Toll Credits for CON). Toll Credits for CON	Completion by 2020	$2,809,435	$2,809,435
PLA25563	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	HMA Overlay, Various County Roads (Yr3)	In Placer County, hot mix asphalt (HMA) overlay on various County roads: (1) Sierra College Boulevard from Olympus Rd to Eureka Rd, (2) Old State Highway from Taylor Rd to HWY 193, (3) Fruitvale Road from Fowler Rd to Gold Hill Rd, (4) West Wise Road from HWY 65 to Lincoln-Sheridan Blvd (Toll Credits for CON)	Completion by 2020	$2,299,047	$2,299,047
PLA25512	Yes	Placer	Placer County	D- Programs & Planning	King Rd. Safety Lane Widening	King Rd. between Auburn Folsom Rd. and Sudor Ln.: Widen travel lanes; construct drainage improvements. HSIP4-03-007 [Toll Credits for CON]	Completion by 2020	$1,200,000	$1,200,000
PLA20350	Yes	Placer	Placer County	B- Road & Highway Capacity	Local Roads in Auburn	In and near Auburn - adjacent to Route 49 between I-80 and Dry Creek Road - three new local connector roads; 1)Quartz Drive Connector from Route 49 to Locksley Lane, 2) Willow Creek Drive Connector from Route 49 to 1st Street in Dewitt Center, and 3)Edgewood Road Conector from Route 49 to Alta Mesa Drive (City of Auburn) - state and local funding only. LIMITS: Auburn and north of Auburn, three connector roads intersecting with State Route 49. (1) Quartz Drive Connector, (2) Willow Creek Drive Connector (3) Edgewood Road Connector. STREET NAME: Local Roads in Auburn	Completion by 2020	$3,671,000	$3,851,000
PLA25549	Yes	Placer	Placer County	A- Bike & Ped	Martis Valley Trail	Complete a 10' wide paved Class I multipurpose trail connecting Northstar Village roundabout to the southerly border of Army Corps property. (Emission Benefits in kg/day; ROG 0.02;NOx 0.01;PM10 0.01)	Completion by 2020	$4,700,000	$4,700,000
PLA15270	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	North Antelope Rd.	North Antelope Rd: Widen from 2 to 4 lanes from Sacramento County line to PFE Rd.	Completion after 2036	$1,551,000	
PLA15300	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	Parallel Rd.	In Placer County, east of Route 49, from Dry Creek Rd to Quartz Rd, construct a 2 lane road. Name of road shall be determined in the future.	Completion after 2036	$6,025,000	
PLA25532	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	Pavement Markings	Various locations throughout Placer County: Install pavement markings (HSIP5-03-011, HSIP5-03-012)	Completion by 2020	$1,251,500	$1,251,500
PLA25564	Yes	Placer	Placer County	A- Bike & Ped	Pedestrian Improvements along Hwy 49, Education Street, and Town Court	Along Hwy 49 on the westside from Bell Rd to Education St. South side of Education St. west to connect to existing sidewalk and improve ADA ramps & crosswalks along Town Court (Emissions Benefits in kg/day: ROG 0.07, NOx 0.04, PM10 0.02) (Toll Credits for PE, ROW, CON)	Completion by 2020	$925,000	$925,000
PLA20690	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	PFE Rd.	Widen: 4 lanes from North Antelope Rd. to Roseville City Limits.	Completion after 2036	$2,215,100	
PLA18490	Yes	Placer	Placer County	B- Road & Highway Capacity	PFE Rd. Widening	PFE Rd, from Watt Ave. to Walerga Rd: Widen from 2 to 4 lanes and realign.	Completion by 2020	$13,085,000	$13,085,000
PLA25299	Yes	Placer	Placer County	B- Road & Highway Capacity	Placer Parkway Phase 1	In Placer County: Between SR 65 and Foothills Boulevard; Construct phase 1 of Placer Parkway, including upgrading the SR 65/Whitney Ranch Parkway interchange to include a southbound slip off-ramp, southbound loop on-ramp, northbound loop on-ramp, six-lane bridge over SR 65, and four-lane roadway extension from SR 65 (Whitney Ranch Parkway) to Foothills Boulevard.	Completion by 2020	$70,000,000	$70,000,000
PLA25567	Yes	Placer	Placer County	G- System Management, Operations, and ITS	Safety Surface Treatment	At 18 various locations throughout Placer County: install high friction surface treatment. (HSIP6-03-010)	Completion by 2020	$1,537,600	$1,537,600
PLA15390	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	Sierra College Blvd.	Widen Sierra College Blvd. from 2 to 4 lanes from Route 193 to Loomis Town Limits.	Completion after 2036	$13,000,000	
PLA25568	Yes	Placer	Placer County	G- System Management, Operations, and ITS	Signage Upgrades	Various corridors throughout Placer County: Conduct a Roadway Safety Signing Audit and upgrade signs. (HSIP6-03-011)	Completion by 2020	$1,658,522	$1,658,522
PLA25598	Project Development Only	Placer	Placer County	B- Road & Highway Capacity	SR 49	Widen from Bell Road to Dry Creek Road (total construction cost is $10,000,000)	Completion after 2036	$1,000,000	
PLA25628	Yes	Placer	Placer County	B- Road & Highway Capacity	SR 49	Widen from 4 lanes to 6 lanes from Luther Road to Nevada Street.	2021-2036	$1,000,000	$1,220,000
PLA25630	Yes	Placer	Placer County	G- System Management, Operations, and ITS	SR49 Signalizations/ Improvements	Signalizations and Improvements along SR 49 in Auburn/North Auburn.	Completion by 2020	$13,000,000	$13,636,000
PLA25170	Yes	Placer	Placer County	B- Road & Highway Capacity	Sunset Blvd Phase 2	Sunset Blvd, from Foothills Boulevard to Fiddyment Rd: Construct a 2-lane road extension [PLA15410 is Phase 1.]	Completion by 2020	$6,365,000	$6,365,000
PLA25044	Yes	Placer	Placer County	B- Road & Highway Capacity	Sunset Blvd. Widening	Widen Sunset Boulevard from State Route 65 to Cincinnati Avenue from 2 to 4 lanes. Project includes widening Industrial Blvd / UPRR overcrossing from 2 to 4 lanes.	Completion by 2020	$8,675,000	$8,675,000
PLA25584	Yes	Placer	Placer County	A- Bike & Ped	Truckee River Trail	Along SR89, from Squaw Valley Road to the USFS Silver Creek Campground: construct 1.4 miles of multi-use trail . (Emission Benefits in kg/day; ROG 0.01; NOx 0.01)	Completion by 2020	$4,500,000	$4,500,000
PLA25506	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	Walerga Rd/Dry Creek Bridge Replacement	Walerga Rd, over Dry Creek, 1.1 mi S Base Line Rd. Rehabilitate the existing 2 lane bridge without adding additional lanes. High Cost Project agreement required.	Completion by 2020	$21,870,000	$21,870,000
PLA15420	Yes	Placer	Placer County	B- Road & Highway Capacity	Walerga Road	Walerga Rd: Widen and realign from 2 to 4 lanes from Baseline Rd. to Placer / Sacramento County line.	Completion by 2020	$13,781,700	$13,781,700
PLA25535	Yes	Placer	Placer County	B- Road & Highway Capacity	Watt Ave. Bridge Replacement	Watt Ave./Center Joint Ave., over Dry Creek, 0.4 mi north of P.F.E. Rd.: Replace existing 2 lane bridge with a 4 lane bridge.	Completion by 2020	$19,892,750	$19,892,750
PLA20700	Yes	Placer	Placer County	B- Road & Highway Capacity	Watt Avenue	Watt Avenue, from Baseline Rd. to Sacramento County Line: Widen from 2 to 4 lanes.	2021-2036	$13,270,800	$16,194,000
PLA25513	Yes	Placer	Placer County	C- Maintenance & Rehabilitation	Wise Rd Bridge Replacement	Wise Rd, over Doty Creek, 0.5 miles east of Garden Bar: Replace existing 1-lane functionally obsolete bridge with a new 2-lane bridge.	Completion by 2020	$4,759,200	$4,759,200
PLA25505	Yes	Placer	Placer County	B- Road & Highway Capacity	Yankee Jim's Rd Bridge at North Fork American River	Bridge No. 19C0002, Yankee Jim's Rd over North Fork American River, 1.5MI W of Shirttail Cyn Rd, Replace structurally deficient 1 lane bridge with a new 2 lane bridge. (Toll credits programmed for PE, ROW & CON.)	Completion by 2020	$14,999,400	$14,999,400
PCT10494	Yes	Placer	Placer County Transit	E- Transit Capital (Minor)	CNG Station Upgrade Phase 2	Dewitt Center in Auburn: Increase of CNG compressor capacity at Placer County CNG fueling station in Auburn. (Emissions Benefits in kg/day: 3.46 NOx, 0.12 PM10.) *Local Funds are Air District Funds*	Completion by 2020	$576,809	$576,809
PLA25550	Yes	Placer	Placer County Transit	F- Transit O&M (Bus)	Lincoln Transit (Subrecipient) Operating Assistance	Lincoln Transit (Subrecipient)- Operating assistance and preventive maintenance for transit services within the City of Lincoln. Sacramento Urbanized Area.FFY 2014 operating assistance: $149,108FFY 2014 preventive maintenance: $12,281	Completion by 2020	$1,616,076	$1,616,076

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

PCT10504	Yes	Placer	Placer County Transit	E- Transit Capital (Vehicles)	T.A.R.T Bus Purchase	Replace one 35-foot bus for Tahoe Area Reginal Transit.	Completion by 2020	$525,000	$525,000
PCT10505	Yes	Placer	Placer County Transit	F- Transit O&M (Bus)	TART Operations	TART operations (lump sum) on SR89 amd SR267 corridors within Placer County/SACOG region.	Lump Sum or Ongoing	$22,000,000	$28,911,000
VAR56123	Yes	Placer	Pride Industries/CTSA	E- Transit Capital (Vehicles)	Pride Industries One, Inc. 5310 Replacement Bus and Cameras	FTA 5310 funds will be used to purchase one (1) Medium Bus that accommodates up to 14 passengers (incl. 2 wheelchair positions) & a driver and thirty-eight (38) cameras for Pride Industries. (Uses Toll Credits for local match).	Completion by 2020	$105,989	$105,989
VAR56109	Yes	Placer	SACOG	F- Transit O&M (Bus)	Roseville Transit JARC Operating Assistance	Use FY 2011 & 2012 Urbanized Area JARC funds to operate two fixed route buses to extend routes A & B from 6:30 to 9:30 PM M-F, and 1 DAR bus to extend service from 7:00 to 9:30 PM.	Completion by 2020	$371,680	$371,680
PLA20721	Project Development Only	Placer	South Placer Regional Transportation Authority	B- Road & Highway Capacity	Placer Parkway	New 4 lane connector (ultimate 6 lanes freeway) in 500'- to 1,000'-wide corridor connecting SR 70/99 (between Riego Road & Sankey Road) to Watt Avenue. (Note: as the project proceeds, Parkway segments will be administered by different lead agencies depending upon location of the segment. In Placer County, it will be SPRTA or Roseville and/or Placer County; in Sutter County it will be Sutter County.)	Completion after 2036	$295,000,000	
PLA25592	Yes	Placer	South Placer Regional Transportation Authority	B- Road & Highway Capacity	Placer Parkway Phase 3	Construct New Road: 4 lane divided Hwy. between Fiddyment Rd and Watt Avenue. Includes signalized intersections at Watt Avenue.	2021-2036	$85,000,000	$132,934,000
PLA25579	Yes	Placer	Town of Loomis	C- Maintenance & Rehabilitation	2017 CIP Road Maintenance Project	Asphalt overlay and reconstruction repair of various streets in the Loomis Downtown Core Area covered under the Capital Improvement Program Schedule for 2017.	Completion by 2020	$500,000	$500,000
PLA25264	Project Development Only	Placer	Town of Loomis	A- Bike & Ped	Antelope Creek	Bikeway Facilities: In Loomis along Antelope Creek, construct Class I bike and pedestrian facility. Federal permitting may be required as part of this project.	Completion after 2036	$50,000	
PLA25278	Project Development Only	Placer	Town of Loomis	G- System Management, Operations, and ITS	Antelope Creek	Roadway Operational Improvements: Expand/ replace culvert along Antelope Creek at King Rd. from Sierra College Blvd. to Vet Clinic. Includes: ancillary road work.	Completion after 2036	$60,000	
PLA25260	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Barton Rd. Widening	Widen: from Brace Rd. to S. Town limits to standard lane widths. Includes: bike lanes.	Completion after 2036	$210,000	
PLA25259	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Brace Rd.	Widen from Sierra College Blvd. to Horseshoe Bar Rd. to standard lane widths. Includes: bike lanes.	Completion after 2036	$100,000	
PLA25258	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Brace Rd. / Horseshoe Bar Rd.	Road Realignment: two existing intersections into one intersection. Includes: related signalization improvements.	Completion after 2036	$60,000	
PLA25277	Project Development Only	Placer	Town of Loomis	C- Maintenance & Rehabilitation	Brace Rd. Bridge Improvements	Replace Bridge: at Secret Ravine creek. Includes: ancillary road work.	Completion after 2036	$50,000	
PLA15290	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Doc Barnes Dr.	Road Extension: 2 lanes, landscaped median and bike lanes from Horseshoe Bar Rd. to King Rd.	Completion after 2036	$200,000	
PLA16350	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Horseshoe Bar Road at I-80 Overcrossing Widening	Widen Horseshoe Bar Rd. @ I-80 overcrossing 2 to 4 lanes and improve ramps.	Completion after 2036	$15,000,000	
PLA25597	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Horseshoe Bar Road Widening	Widen from Taylor Rd. to Highway 80 Interchange 2000 feet of two-way left turn lanes/landscaped median, bike lanes, sidewalk, curb, gutter & underground Drainage system	Completion after 2036	$800,000	
PLA25261	Project Development Only	Placer	Town of Loomis	C- Maintenance & Rehabilitation	I-80	Modify Bridge: Brace Rd. Bridge to Caltrans standards.	Completion after 2036	$1,000,000	
PLA25262	Project Development Only	Placer	Town of Loomis	G- System Management, Operations, and ITS	King Rd.	Interchange Modification: existing King Rd. overcrossing to accommodate freeway access for traffic from King Rd. onto WB I-80. Includes: a transition auxiliary lane on I-80 from King Rd. to Horseshoe Bar interchange.	Completion after 2036	$500,000	
PLA25279	Project Development Only	Placer	Town of Loomis	G- System Management, Operations, and ITS	King Rd.	Roadway Operational Improvements: at Sucker Ravine and King Rd. expand culvert. Includes: ancillary road work. Federal permitting may also be required as part of this project.	Completion after 2036	$10,000	
PLA15350	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Rocklin Rd. Widening	In Loomis, Rocklin Rd. from Barton Rd. to west town limits: widen from 2 to 4 lanes.	Completion after 2036	$1,200,000	
PLA25274	Project Development Only	Placer	Town of Loomis	G- System Management, Operations, and ITS	S. Holly Area	Roadway Operational Improvements: Storm drain extension in the South Holly area. Includes: ancillary road work. Federal permitting may also be required as part of this project.	Completion after 2036	$40,000	
PLA25263	Project Development Only	Placer	Town of Loomis	A- Bike & Ped	Secret Ravine	Bikeway Facilities: Along Secret Ravine creek system from north Loomis town limits to south Loomis town limits, construct Class I bike and pedestrian facility.	Completion after 2036	$60,000	
PLA25280	Project Development Only	Placer	Town of Loomis	G- System Management, Operations, and ITS	Sierra College Blvd.	Roadway Operational Improvements: Culvert expansion at Loomis Tributary and Sierra College Blvd. Includes: ancillary road work.	Completion after 2036	$40,000	
PLA20510	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Sierra College Blvd. Railroad Crossing Improvements	Construct 4 lane overcrossing/undercrossing at UPRR Tracks.	Completion after 2036	$3,000,000	
PLA20890	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Sierra College Blvd. Widening	In Loomis, Sierra College Blvd. from railroad tracks (Taylor Rd.) to the north town limits: widen from 2 to 4 lanes and construct turn lanes, bike lanes, and landscaped median.	Completion after 2036	$5,899,180	
PLA20960	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Sierra College Boulevard Widening	In Loomis, Sierra College Blvd. from Granite Drive to Taylor Road: widen from 4 to 6 lanes.	Completion after 2036	$3,600,000	
PLA25276	Project Development Only	Placer	Town of Loomis	G- System Management, Operations, and ITS	Sunrise-Loomis Subdivision	Roadway Operational Improvements: Upgrade storm drain facilities in the Sunrise-Loomis subdivision. Includes: ancillary road work.	Completion after 2036	$50,000	
PLA25269	Project Development Only	Placer	Town of Loomis	G- System Management, Operations, and ITS	Taylor Rd.	Roadway Operational Improvements: Construct storm drain facility from King Rd. to Sierra College Blvd. Includes: ancillary road work. Federal permitting may also be required as part of this project. Phase 1 is King Rd. to Walnut Street, $800,000.	Completion after 2036	$230,000	
PLA15940	Yes	Placer	Town of Loomis	A- Bike & Ped	Taylor Road Complete Streets	Taylor Rd. complete streets improvements from Horseshoe Bar Road to King Road.	2021-2036	$425,000	$519,000
PLA25530	Yes	Placer	Town of Loomis	C- Maintenance & Rehabilitation	Taylor Road Overlay Maintenance Project	Taylor Road: Asphalt overlay.	Completion by 2020	$460,000	$460,000
PLA25548	Yes	Placer	Town of Loomis	D- Programs & Planning	Town Center Implementation Plan Improvements Phase 2	Taylor Road, Horseshoe Bar Road to Walnut Street: streetscape improvements. (Emissions in kg/day: 0.06 ROG, 0.04 NOx, 0.02 PM10)	Completion by 2020	$791,000	$791,000
PLA25600	Project Development Only	Placer	Town of Loomis	B- Road & Highway Capacity	Webb St. Extension	Extend from Laird St. to future Doc Barnes Dr. 1800 feet of two-way left turn lanes/landscaped median, bike lanes, sidewalk, curb, gutter & underground Drainage system	Completion after 2036	$1,000,000

CAL20376	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 99 Corridor Native Planting	In Sacramento County, from the San Joaquin County line to Mack Road - Install native planting at various locations (PM 0.0/17.7) [CTIPS ID 107-0000-0731; EFIS ID 0300020406] (Toll Credits for PE, ROW, & CON)	Completion by 2020	$1,197,000	$1,197,000
CAL20467	Project Development Only	Sacramento	Caltrans D3	B- Road & Highway Capacity	I-5 HOV Lanes - Phase 2	In Sacramento County on I-5, from just north of Morrison Creek to south of Stone Lake Creek - Add high-occupancy vehicle (HOV) lanes (i.e., bus/carpool lanes) (PM 9.7/13.1) [EFIS ID 0312000171]; see 03-3C001 (CAL20466) for Phase 1 [PA&ED being done under 03-3C000 (CAL17840)].	Completion after 2036	$70,600,000	
CAL20544	Yes	Sacramento	Caltrans D3	G- System Management, Operations, and ITS	SR 99 Median Barrier Gap Closure	In Sacramento County, on SR 99, at PM 35.1/36.8; also in Sutter County, on SR 99, at PM 0.0/0.1 - Install double thrie beam median barrier [CTIPS ID 107-0000-0997] (Toll credits for PE, ROW, CON)	Completion by 2020	$1,596,000	$1,596,000
CAL20517	Yes	Sacramento	Caltrans D3	G- System Management, Operations, and ITS	SR 99 Weigh in Motion (WIM) Facilities	Near Elk Grove on SR 99, from 0.1 to 0.2 mile south of Badger Creek Bridge - Replace Weigh in Motion (WIM) station sensors and associated electronics (PM 6.8/6.9) [EFIS ID 0313000143; CTIPS ID 107-0000-0964] (Toll Credits for PE, ROW, CON)	Completion by 2020	$2,098,000	$2,098,000
SUT16950	Yes	Sutter	Caltrans D3	B- Road & Highway Capacity	SR 99 / Riego Road Type L-9 Interchange	In Sutter and Sacramento Counties, SR-99 at Riego Road, construct Type L-9 partial cloverleaf interchange with 8-lane overcrossing structure (Sut-99-0.0/1.6; Sac-99-36.3/36.9) (project will use tapered match funding) [ID changed from CAL16950] [CTIPS ID 107-0000-0494; EFIS ID 0300000614]	Completion by 2020	$30,790,000	$30,790,000
CAL20535	Yes	Yolo	Caltrans D3	C- Maintenance & Rehabilitation	I-5/SR 113 Bridge Deck Rehab	In and near Woodland, on I-5 and SR 113 at various locations - Place polyester overlay or methacrylate seal [EFIS ID 0314000029; CTIPS ID 107-0000-0988]	Completion by 2020	$3,579,000	$3,579,000
CAL18801	Project Development Only	Sacramento	Caltrans D3	B- Road & Highway Capacity	I-5/US 50 Riverfront Interchange Reconstruction	Reconstruct I-5/US50 Riverfront Interchange, including bus/carpool lane connectors	Completion after 2036	$100,000,000	
YOL19290	Yes	Yolo	City of Woodland	B- Road & Highway Capacity	I-5 / CR 102 Interchange Landscaping	In Woodland, within the limits of the I5/CR102 Interchange project: Construct landscaping and irrigation associated with the I-5 / CR 102 Interchange Project (SACOG ID# YOL17300) (Toll Credits for CON.)	Completion by 2020	$1,151,989	$1,151,989
CAL18450	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	I-80 HOV Across the Top	Sacramento County, on I-80 from RT Station (Longview) to the Sacramento River - construct high occupancy vehicle lanes (Emissions Benefits: ROG 67, NOx 62, PM10 55 kg/day) [Project using "tapered match," matching CMAQ funds with bond funds during later phases] (PM M0.3/M10.4) [EFIS ID 0300000434]. Project was combined with 03-0A931 (CAL20378) for construction using EA 03-3797U.	Completion by 2020	$63,037,000	$63,037,000
CAL20378	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	I-80 Rehabilitation	In Sacramento on Interstate 80, from the Sacramento River Bridge and Overhead to Norwood Avenue - Rehabilitate roadway (PM M0.3/M8.9) [CTIPS ID 107-0000-0768; EFIS ID 0300000011]. Project was combined with 03-37970 (CAL18450) for construction using EA 03-3797U.	Completion by 2020	$69,998,000	$69,998,000
CAL20646	Yes	Sacramento	Caltrans D3	G- System Management, Operations, and ITS	ITS - RTMC Video Wall Upgrade	Upgrade video wall at Regional Transportation Management Center (RTMC).	Completion by 2020	$1,000,000	$1,049,000
CAL20496	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	Natoma Overhead Widening and On-Ramp Improvements	In Folsom, Sacramento County, along US 50 at Natoma Overhead #24-120 (PM 16.9/17.4) - Widen Natoma Overhead by two lanes to accommodate EB loop on-ramp weave and new transition lane for congestion relief [EB loop on-ramp includes an HOV bypass lane and ramp metering] (CTIPS ID 107-0000-0975)	Completion by 2020	$8,500,000	$8,500,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
CAL20669	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SAC 05/80 Bridge Deck Rehab and Rail Upgrade	I-5, Florin Road OC (Br #24-0264) and on I-80 Del Paso OH Bridges R/L (Br #24-0193R/L) - Perform deck maintenance and rehab of three bridges	2021-2036	$10,230,000	$12,483,000
CAL20659	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	Sac Roadway Rehabilitation	In Sacramento, from Florin Road OC (Br #24-264) to American River Bridge (#24-68) - Preserve and extend life of existing pavement and improve ride quality	2021-2036	$92,000,000	$112,266,000
CAL20505	Yes	Sacramento	Caltrans D3	G- System Management, Operations, and ITS	Sac/Gle ITS Safety Improvements	In Sacramento and Glenn counties on various routes/locations - Install and/or modify signals and signs (6 locations in Sacramento county and 1 location in Glenn county) [CTIPS ID 107-0000-0958]	Completion by 2020	$1,118,000	$1,118,000
CAL20512	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	Sac-50 Roadside Safety Improvement	Near Sacramento on US 50, from Watt Avenue overcrossing to Sacramento/El Dorado county line - Pave narrow areas, install vegetation control and construct roadside signs (PM R5.3/23.1) [EFIS ID 0313000240; CTIPS ID 107-0000-0962] (Toll Credits for PE)	Completion by 2020	$1,651,000	$1,651,000
CAL20471	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	Sacramento Seismic Retrofit on 4 Bridges	In the city of Sacramento, on Sac-160, at Sacramento River Bridge #24-0053 and North Sacramento Undercrossing #24-0111L; also in San Joaquin County, at Mokelumne River Bridge #29-0197R/L - Seismic retrofit (PM 20.9) [CTIPS ID 107-0000-0908] (Toll Credits)	Completion by 2020	$10,463,000	$10,463,000
CAL20507	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 12 Bridge Rehab Near Rio Vista	In Sacramento and Solano counties, near Rio Vista, at Sacramento River Bridge #23-0024 - Clean and repaint steel surfaces (PM 0.0/0.4) [EFIS ID 0313000139; CTIPS ID 107-0000-0961] [Total Project Cost $22,705,000 in 16/17 FY] (Toll Credits for PE)	Completion by 2020	$22,705,000	$22,705,000
CAL20427	Yes	Sacramento	Caltrans D3	G- System Management, Operations, and ITS	SR 12 Operational Improvements	SR 12 Roadway Operational and Safety Improvements: Rio Vista to San Joaquin County line. Improvements will be coordinated with San Joaquin and Solano counties and anticipated corridor improvements.	2021-2036	$10,000,000	$12,203,000
CAL20498	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 160 at Sherman Island Levee Repair	Sacramento County, on SR 160, approximately 6.0 miles south of the City of Rio Vista at Sherman Island - Improve and repair portion of the levee on which SR 160 is located [FCO Only] (Sac-160-L4.1/L4.5) [SHOPP Minor A 201.150] (Toll Credits for CON)	Completion by 2020	$435,000	$435,000
CAL20540	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 160 in Isleton AC Overlay	On SR 160, in Isleton, from 1.4 miles south of Sherman Island Road to SR 12 - Rehabilitate pavement (PM L4.2/L10.8)[CTIPS ID 107-0000-0993; EFIS ID 0300020595] (Toll Credits for PE, ROW, CON)	Completion by 2020	$6,875,000	$6,875,000
CAL20490	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 160 Pavement Rehab	In Sacramento County, near Rio Vista, SR 160, from SR 12 to 0.5 mile north of SR 220 in Ryde - Pavement rehabilitation (PM R0.0/12.0) [Toll Credits] (CTIPS ID 107-0000-0933)	Completion by 2020	$8,340,000	$8,340,000
CAL20657	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 160 Slab replacement	SR 160 from American River Bridge #24-01R/L to Junction SR 51 - Grind PCC pavement	2021-2036	$11,500,000	$14,033,000
CAL20492	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 160 South of Rio Vista HMA Overlay	In Sacramento County on SR 160, near Rio Vista, from Antioch Bridge (No. 28-0009) to Sherman Island Road - Pavement preservation (PM L1.2/L4.4) [Toll Credits] (CTIPS ID 107-0000-0934)	Completion by 2020	$4,240,000	$4,240,000
CAL20481	Yes	Sacramento	Caltrans D3	C- Maintenance & Rehabilitation	SR 160 Three Mile Slough Bridge	SR 160, near Isleton, at Three Mile Slough Bridge #24-121 - Paint entire bridge (PM L7.0) (Toll Credits for PE, ROW, CON) [EFIS ID 03-1200-0219]	Completion by 2020	$12,475,000	$12,475,000
CAL20595	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	SR 51 Auxiliary Lane	SR 51 Auxiliary Lane: SB, from Exposition Blvd. to E St. Includes bridge replacements for the following locations: B Street Underpass (#24-0023), A Street Overcrossing (#24-0131) and Elvas Underpass (#24-0031). The project cost includes temporary bridge costs for the B Street and Elvas Underpasses.	2021-2036	$84,200,000	$102,748,000
CAL20597	Project Development Only	Sacramento	Caltrans D3	B- Road & Highway Capacity	SR 51 Transition Lane	Construct a transition lane on SR 51 SB from Exposition Blvd. slip off-ramp to Exposition Blvd. loop on-ramp.	Completion after 2036	$12,500,000	
CAL20594	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	SR 51 Auxiliary Lane	SR 51: Widen structure over Arden Way to 8 lanes plus 2 bus/carpool lanes and construct a Transition Lane: NB, from SR160 off ramp to Arden Way on ramp	2021-2036	$46,000,000	$56,133,000
	Project Development Only	Sacramento	Caltrans D3	B- Road & Highway Capacity	SR 51 Bus/Carpool Lanes: Arden to I-80	Bus/Carpool Lanes: Arden to I-80 in both directions	Completion after 2036	$265,000,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

SAC24640	**Yes**	Sacramento	City of Elk Grove	A- Bike & Ped	Laguna Creek Trail - Camden North Spur	This project is a combination class I bike trail and class II bike lane project, connecting Camden neighborhoods to existing and future trails in Elk Grove. (Emission Benefits in kg/day: 0.14 ROG, 0.12 NOx, 0.03 PM10) (Toll credits for CON)	Completion by 2020	$791,000	$791,000
CAL20589	**Yes**	Sacramento	Caltrans D3	B- Road & Highway Capacity	I-5 Connector Ramp Extension	I-5: Extend Southbound connector ramp from U.S. 50 connector-ramp to the Sutterville Rd. off-ramp (PM 20.726 to 21.55).	2021-2036	$4,746,000	$5,791,000
SAC20320	**Yes**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Whitelock Parkway Widening	In Elk Grove, from Big Horn Blvd to West Stockton Blvd: Widen to 4 lane roadway.	2021-2036	$520,280	$814,000
SAC24631	**Yes**	Sacramento	City of Elk Grove	A- Bike & Ped	Elk Grove Schools AWARE SRTS Program	Multiple Schools in the Elk Grove Unified School District: Implement Project AWARE (Advancing Walk and Roll Environments); needs assessment for each school/community through parent surveys and walk audits; hire a full-time SRTS Coordinator to train staff and parents. SRTS3-03-004	Completion by 2020	$472,837	$472,837
SAC24096	**Yes**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Waterman Road	Widen Waterman Road from Sheldon Road to Bond Road from 2 to 4 lanes.	2021-2036	$357,540	$559,000
SAC24792	**Yes**	Sacramento	City of Elk Grove	G- System Management, Operations, and ITS	Bruceville Rd. and Poppy Ridge/Quail Run Intersection	Install a trafic signal at the Bruceville Rd. and Poppy Ridge/Quail Run intersection.	Completion by 2020	$338,100	$355,000
SAC24685	**Yes**	Sacramento	City of Elk Grove	C- Maintenance & Rehabilitation	Elk Grove Bridge Preventive Maintenance Program	Various bridges in the City of Elk Grove: perform preventive maintenance. See Caltrans Local Assistance HBP website for backup list of projects: http://www.dot.ca.gov/hq/LocalPrograms/hbrr99/HBP_MPO.html#SACOG	Completion by 2020	$330,000	$330,000
SAC24791	**Yes**	Sacramento	City of Elk Grove	G- System Management, Operations, and ITS	Bond Rd./Bader Rd. Intersection	Install a trafic signal at the Bond Rd./Bader Rd. intersection	Completion by 2020	$295,000	$309,000
SAC24675	**Yes**	Sacramento	City of Elk Grove	G- System Management, Operations, and ITS	Signal Upgrades	Franklin Blvd. between Elk Grove Blvd. and Big Horn Blvd.; Bruceville Rd. between Elk Grove Blvd. and Big Horn Blvd.: Upgrade traffic signals. (HSIP5-03-005)	Completion by 2020	$150,000	$150,000
SAC24709	**Yes**	Sacramento	City of Elk Grove	G- System Management, Operations, and ITS	Shoulder Safety Improvements - Various Locations	Various locations on Grant Line Rd, Bradshaw Rd., Kammerer Rd., and Waterman Rd.: Modify shoulders. (HSIP6-03-002)	Completion by 2020	$130,000	$130,000
VAR56132	**Project Development Only**	Multiple Counties	Capital SouthEast Connector JPA, City of Elk Grove, Rancho Cordova, Folsom, Sacarmento County, El Dorado County	B- Road & Highway Capacity	Capital SouthEast Connector- Phase 2	Capital SouthEast Connector Phase 2 will include adding HOV lanes as needed and constructing interchanges at various locations.	Completion after 2036	$209,300,000	
SAC24955	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Willard Parkway	Center Lanes & Widen Median from South Bilby Rd. to New Kammerer Rd.	Completion after 2036	$26,187,200	
SAC20340	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Willard Parkway Extension	In Elk Grove, Willard Parkway from Bilby Road to Kammerer Road, construct new four lane roadway.	Completion after 2036	$15,000,000	

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SAC24084	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Calvine Road	Widen Calvine Road from Vineyard Road to Grant Line Road from 2 to 4 lanes	Completion after 2036	$14,000,000	
SAC24086	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Elk Grove-Florin Road	Widen Elk Grove-Florin Road from 4 to 6 lanes from Calvine Road to Bond Road	Completion after 2036	$7,900,000	
SAC19160	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Sheldon Road Widening	Widen Sheldon Road from Elk Grove-Florin Road to Waterman Road: widen from 2 to 4 lanes.	Completion after 2036	$7,651,500	
SAC24112	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Waterman Road	In Elk Grove, from Elk Grove Blvd to Grant Line Road: Widen from 2 to 4 lanes.	Completion after 2036	$7,500,000	
SAC24098	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Whitelock Pkwy./SR99 Interchange	Construct New Interchange: Hwy 99 / Whitelock Pkwy, including pedestrian bridge over SR99	Completion after 2036	$4,000,000	
SAC24095	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Waterman Road	Widen Waterman Road from Calvine Road to Sheldon Road: Widen from 2 to 4 lanes	Completion after 2036	$3,000,000	
SAC24951	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Elk Grove Blvd	Center 2 lanes & median; Frontage imp. Allowance from Bradshaw Rd. to Grant Line Rd.	Completion after 2036	$2,661,500	
SAC24954	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Willard Parkway	Widen from 4 to 6 lanes from Whitelock Pkwy. to South Bilby Rd.	Completion after 2036	$1,854,100	
SAC24081	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bruceville Rd.	Widen: 6 lanes from Whitelock Pkwy. to Bilby Rd.	Completion after 2036	$1,845,900	
SAC24949	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bruceville Rd.	Widen from 4 to 6 lanes from Elk Grove Blvd. to Whitelock Parkway	Completion after 2036	$1,683,600	
SAC24103	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bradshaw Road Widening	In Elk Grove, from Grant Line Road to Bond Road, widen from 2 to 4 lanes.	Completion after 2036	$1,043,550	
SAC24788	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Hi Bus from I-5 to Bradshaw Rd	Develop an East-West enhanced bus corridor in Elk Grove along Elk Grove Blvd. from I-5 to Bradshaw Road.	Completion after 2036	$1,000,000	
SAC24963	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	State Route 99 Auxillary Lanes	Northbound Auxilary Lane on SR99 from Northbound On Ramp to SR99	Completion after 2036	$724,600	
SAC24102	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bradshaw Road Widening	In Elk Grove, between Bond Road and Sheldon Road: Widen from 2 to 4 lanes.	Completion after 2036	$696,120	
SAC24101	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bond Road Widening	In Elk Grove, between Bradshaw Road and Grant Line Road: Widen from 2 to 4 lanes.	Completion after 2036	$648,170	
SAC24076	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bradshaw Rd.	Widen: 4 to 6 lanes from Grant Line Rd. to Bond Rd.	Completion after 2036	$620,000	
SAC24120	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Sheldon Road Widening	In Elk Grove, from Waterman Road to Bradshaw Road: Widen from 2 to 4 lanes.	Completion after 2036	$572,930	
SAC24074	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bradshaw Rd.	Widen: 4 to 6 lanes from Sheldon Rd. to Calvine Rd.	Completion after 2036	$380,000	
SAC24088	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Willard Pkwy.	Widen: 6 lanes from Bilby Rd. to Kammerer Rd.	Completion after 2036	$370,800	
SAC24075	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bradshaw Rd.	Widen: 4 to 6 lanes from Bond Rd. to Sheldon Rd.	Completion after 2036	$370,000	
SAC24082	**Project Development Only**	Sacramento	City of Elk Grove	B- Road & Highway Capacity	Bruceville Rd.	Widen: 6 lanes from Bilby Rd. to Kammerer Rd.	Completion after 2036	$83,420	
SAC22060	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	East Natoma Street Widening	In Folsom, East Natoma St from Fargo Way to Folsom Lake Crossing: widen from 2 to 4 lanes and construct bicycle trail undercrossing.	2021-2036	$3,150,000	$3,844,000
SAC24331	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	Easton Valley Pkwy.	Construct New Road: 4 lanes from Prairie City Rd. to Empire Ranch Rd. Extension south of U.S. 50.	2021-2036	$45,000,000	$54,913,000
SAC24327	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	Empire Ranch Rd.	Road Extension: 4 lanes from U.S. 50 to White Rock Rd.	2021-2036	$18,000,000	$28,151,000
SAC24616	**Yes**	Sacramento	City of Folsom	A- Bike & Ped	Empire Ranch Road Interchange Bikeway Connection Project	Project includes the construction of a Class I bikeway adjacent to Empire Ranch Road and Highway 50 from Saratoga Road in El Dorado Hills to Iron Point Road. (Toll Credits for PE, ROW, CON.)	Completion by 2020	$1,440,000	$1,440,000
SAC24400	**Yes**	Sacramento	City of Folsom	A- Bike & Ped	Folsom Blvd. Bike/Ped Overcrossing	In Folsom, at Folsom Blvd. and Humbug-Willow Creek Parkway, construct a bicycle and pedestrian overcrossing of Folsom Blvd. Includes connections to existing trails on both sides of Folsom Blvd.	Completion by 2020	$2,500,000	$2,622,000
SAC24686	**Yes**	Sacramento	City of Folsom	C- Maintenance & Rehabilitation	Folsom Bridge Preventive Maintenance Program	Various bridges in the City of Folsom: perform preventive maintenance. See Caltrans Local Assistance HBP website for backup list of projects. http://www.dot.ca.gov/hq/LocalPrograms/hbrr99/HBP_MPO.html#SACOG	Completion by 2020	$1,110,000	$1,110,000
SAC24399	**Yes**	Sacramento	City of Folsom	A- Bike & Ped	Folsom Lake Bicycle/Pedestrian Trail & Overcrossing	In Folsom, along the Folsom Lake Trail corridor from the main Folsom Prison Road to the existing trail along Folsom Lake Crossing Road. Project includes the construction of approximately 1 mile of Class I Bike Trail, including a bike/pedestrian overcrossing at Folsom Dam Road. (Other State funds are State EEM and BTA Grant funds.) (Emission Benefits: 0.1 kg/day ROG)	Completion by 2020	$4,610,650	$4,610,650
SAC24324	**Yes**	Sacramento	City of Folsom	A- Bike & Ped	Folsom Lake Trail	In Folsom, along the Folsom Lake Trail corridor from the Folsom Lake Crossing Bike/Pedestrian overcrossing to Green Valley Road, construct approx 2-miles of class 1 bike trail.	Completion by 2020	$2,500,000	$2,622,000
SAC24542	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	Folsom Plan Area Street A	Construct New Road: 4 lanes, East-West arterial for SOI development.	2021-2036	$11,500,000	$14,033,000
SAC22930	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	Folsom-Auburn Rd.	Add Turn Lanes: Folsom-Auburn Rd. / Oak Ave. Includes: left and right turn lanes and intersection signal modifications.	Completion by 2020	$2,000,000	$2,098,000
SAC21280	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	Green Valley Road Widening	On Green Valley Road, from East Natoma Street to Sophia Parkway: widen from 2 lanes to 4 lanes and provide Class II bicycle paths. (Toll Credits for PE and CON.)	Completion by 2020	$3,600,000	$3,600,000
SAC24506	**Yes**	Sacramento	City of Folsom	C- Maintenance & Rehabilitation	Greenback Lane Bridge Rehabilitation	Greenback Lane, over the American River, 0.2 miles east of Folsom-Auburn Rd.: Structural rehabilitation of the 2 lane bridge.	Completion by 2020	$8,644,000	$9,067,000
SAC22920	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	Greenback Ln. and Folsom-Auburn Rd.	Add Turn Lanes: left and right turn lanes at Folsom-Auburn Rd. and Greenback Ln. Includes: signal inprovements.	2021-2036	$1,200,000	$1,464,000
SAC20220	**Yes**	Sacramento	City of Folsom	G- System Management, Operations, and ITS	Historic District Parking	Provide parking within the Folsom Historic District bounded by Leidesdorff Street, Sutter Street, Riley Street, and Folsom Boulevard.	Completion by 2020	$555,000	$555,000
SAC24483	**Yes**	Sacramento	City of Folsom	A- Bike & Ped	Historic Powerhouse/Folsom Lake Regional Trail	In Folsom, construct class I bike/ped trail from existing terminus of the Historic Powerhouse Trail near the Historic Truss Bridge to the soon to be constructed bike/ped overcrossing at the new Folsom Lake Crossing Rd. Also construct class I trail connection from the main trail to the Folsom State Prison employee entrance. (Emission Benefits in kg/day: 0.03 ROG, 0.02 NOx, 0.01 PM10)	Completion by 2020	$3,428,000	$3,428,000
SAC24692	**Yes**	Sacramento	City of Folsom	A- Bike & Ped	Humbug-Willow Creek Trail/Lake Natoma Trail Connection	Approximately 1,000 linear feet south of the intersection of Blue Ravine Road and Folsom Blvd. to the intersection with the existing Lake Natoma Trail: Construct approximtely 2,200 linear feet of Class I trail connecting the Humbug-Willow Creek (HBWC) Trail with the Lake Natoma Trail.	Completion by 2020	$344,000	$344,000
SAC21210	**Yes**	Sacramento	City of Folsom	B- Road & Highway Capacity	Iron Point Rd.	Widen: 6 lanes from Black Diamond Dr. to Prairie City and Outcropping to Broadstone Pkwy.	2021-2036	$5,000,000	$7,820,000

SAC24947	Yes	Sacramento	City of Isleton	G- System Management, Operations, and ITS	Main Street Solar street lights	Install Solar Powered Street Lights as part of City's Green Program	Completion by 2020	$150,000	$157,000
SAC24944	Yes	Sacramento	City of Isleton	C- Maintenance & Rehabilitation	Street Repairs	Remove & replace existing street surface & subgrade due to degradation	Completion by 2020	$1,000,000	$1,049,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SAC24316	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	ADA Transition Plan	In Rancho Cordova: Continue ADA Transition Plan project delivery including reconstructing curb ramps, repairing sidewalks, installing new curb ramps and new sidewalks, sidewalk bus pad modifications, removal of walkway barriers and traffic signal retrofits.	Lump Sum or Ongoing	$2,300,000	$3,022,000
SAC24185	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Americanos Rd.	Construct New Road: 2 lanes from Kiefer Blvd. to Chrysanthy Blvd. Includes: intersection improvements at Keifer Blvd. and Chrysanthy Blvd.	Completion after 2036	$3,276,000	
SAC24376	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Americanos Rd.	Construct New Road: 2 lanes from Douglas Rd. to International Dr. Includes: intersection improvements at International Dr. and Villagio (Phase III)	Completion after 2036	$8,849,000	
SAC24375	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Americanos Road, Phase I	New 4 lane roadway from Chrysanthy to North of Douglas Road. (Phase 1)	2021-2036	$2,969,000	$3,623,000
SAC24676	Yes	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Aramon Dr./Coloma Rd. Signals	Aramon Dr. (Studarus Dr.)/Coloma Rd.: Install traffic signals. (HSIP5-03-014)	Completion by 2020	$532,200	$532,200
SAC24971	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Centennial Drive	New 2 lane road off International Drive South connecting to Grant Line Road including intersection improvements at International, Americanos and Grant Line Rd.	Completion after 2036	$9,903,710	
SAC24187	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Chrysanthy Blvd	Construct New Road: 4 lanes from Sunrise Blvd. to Rancho Cordova Parkway.	Completion by 2020	$3,690,000	$3,870,000
SAC24988	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Chrysanthy Blvd	Construct New Road: 4 lanes from Rancho Cordova Parkway to Americanos and new 2 lanes from Americanos to Grant Line Rd. Includes: intersection improvements at Rancho Cordova Pkwy., Americanos, and Grant Line Rd.	2021-2036	$10,091,000	$12,314,000
SAC24996	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Class I Bike Trails	Add new Class I bike trails consistent with the City Bike Master Plan	Completion by 2020	$5,000,000	$5,245,000
SAC24677	Yes	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Coloma Rd. Signals	Coloma Rd. between Folsom Blvd. and Sunrise Blvd.: Upgrade traffic signals (interconnect) and install traffic cameras. (HSIP5-03-015)	Completion by 2020	$935,500	$935,500
SAC24824	Yes	Sacramento	City of Rancho Cordova	C- Maintenance & Rehabilitation	Complete Streets Rehabilitation - Sunrise Blvd	Rehabilitate Sunrise Blvd. from Folsom Blvd. to Douglas Rd. And construct bicycle and pedestrian improvements.	Completion by 2020	$5,495,000	$5,764,000
SAC24473	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Douglas Rd. Widening	Widen Douglas Rd. from 2 to 4 lanes from Sunrise Blvd. to the West City Limit. Includes the addition of a new bridge over the Folsom South Canal adjacent to the existing bridge. (See SAC20240)	Completion by 2020	$13,000,000	$13,000,000
SAC24678	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Douglas Rd./Grant Line Rd. Safety Improvements	Douglas Rd./Grant Line Rd.: Install traffic signal; widen roadway (to accommodate left-turn and right-turn pockets and bike lanes)(HSIP5-03-016)	Completion by 2020	$1,040,600	$1,040,600
SAC24628	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Douglas Road Phase 2	Douglas Rd, from Rancho Cordova Parkway to Americanos Blvd.: Widen from 2 to 5 lanes with striping for three eastbound lanes and two westbound lanes. New signals will be installed at the intersections of Rancho Cordova Parkway, Timberlands Drive and an interim signal at Americanos Blvd.	Completion by 2020	$2,600,000	$2,600,000
SAC24629	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Douglas Road Phase 3	Widen Douglas Road from 2 to 4 lanes from Americanos Blvd to Grant Line Rd and intersection improvements at Grant Line Road.	2021-2036	$6,488,000	$7,917,000
SAC24183	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Easton Valley Pkwy Phase 1	Construct Easton Valley Parkway as a new 4-lane road from Rancho Cordova Parkway to the City Limits including intersection improvements at Rancho Cordova Parkway.	Completion by 2020	$9,758,000	$9,758,000
SAC24372	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Easton Valley Pkwy.	Widen: from 4 to 6 lanes from Rancho Cordova Pkwy. to Hazel Ave. with enhanced intersection improvements at Rancho Cordova Pkwy. and Hazel Ave. (Phase II)	Completion after 2036	$47,090,000	
SAC24717	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Folsom Blvd. Complete Streets (Phase 4)	Folsom Blvd., from Horn to Rod Beaudry, and from Sunrise Blvd. to Kilgore Rd.: provide streetscape improvements by installing new and bifurcated sidewalks and landscaped medians.	Completion by 2020	$5,095,135	$5,095,135
SAC24825	Project Development Only	Sacramento	City of Rancho Cordova	A- Bike & Ped	Folsom Blvd. Enhancements Phase 5	Streetscape Project: On Folsom Blvd from Bradshaw Rd. to Sunrise Blvd. Includes: landscape and safety improvements for bicycle and pedestrian access to transit. (Phase IV)	Completion after 2036	$34,703,000	
SAC24993	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Folsom South Canal Bike Trail Amenities	Amenities including, but not limited ot, way finding signs, bike repair stations, shade strictures, striping, and other amenities as appropriate	Completion by 2020	$300,000	$315,000
SAC24243	Project Development Only	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Grade Separate RT Gold Line At Bradshaw Road	Rail Crossing Project: at Bradshaw Road, plan and construct a rail grade seperation for RT s Gold line.	Completion after 2036	$12,500,000	
SAC24245	Project Development Only	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Grade Separate RT Gold Line At Mather Field Road	Rail Crossing Project: at Mather Field Road, plan and Construct a Rail Grade Seperation for RT s Gold line.	Completion after 2036	$25,000,000	
SAC24244	Project Development Only	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Grade Separate RT Gold Line At Routier Road	Rail Crossing Project: at Routier Road, plan and Construct a Rail Grade Seperation for RT s Gold line.	Completion after 2036	$25,000,000	
SAC24247	Yes	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Grade Separate RT Gold Line At Zinfandel Drive	Rail Crossing Project: at Zinfandel Drive plan and Construct a Rail Grade Seperation for RT s Gold line.	2021-2036	$25,000,000	$39,098,000
SAC24276	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	International Dr.	Construct New Road: 4 lanes from Sunrise Blvd. to Rancho Cordova Parkway Includes: intersection improvements at Sunrise Blvd.	Completion after 2036	$31,289,000	
SAC24471	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	International Dr.	Construct New Road: 4-lanes from Luyung Drive (western Rio Del Oro Specific Plan Boundary) to White Rock Rd. Includes: intersection improvements at Rancho Cordova Parkway, and White Rock Road.	2021-2036	$7,513,341	$11,750,000
SAC24989	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	International Dr.	Construct New Road: International Drive northern 4-lane loop from White Rock Road back to Rancho Cordova Parkway. Includes: intersection improvements at Rancho Cordova Parkway.	Completion after 2036	$5,025,000	
SAC24707	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Kiefer Blvd Extension	In Rancho Cordova, extend Kiefer Blvd from Rancho Cordova Pkwy to Grant Line as 4 lane road. Includes intersection improvements at Americanos and Grant Line. Developer will deliver project	2021-2036	$5,621,000	$5,621,000
SAC24374	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Kiefer Boulevard, Phase 2	Widen Kiefer Blvd. from 2-4 lanes from Sunrise Blvd. to Rancho Cordova Parkway.	Completion by 2020	$3,510,000	$3,510,000
SAC24201	Yes	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Kilgore Rd.	Roadway enhancements from International Dr. to White Rock Rd.	2021-2036	$693,000	$1,084,000
SAC24202	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Mather Blvd.	Construct New Road:4 lanes from Rockingham Rd. to Zinfandel Dr. Includes: widening existing roadway to 4 lanes.	2021-2036	$17,266,000	$27,003,000
SAC24204	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Mather Field Rd.	Widen: 6 lanes from Rockingham Rd. to Folsom Blvd. Includes: intersection improvements at Rockingham Rd.	Completion after 2036	$2,514,000	
SAC24219	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Mather Field Rd./U.S. 50 Interchange	Interchange Modification: at U.S. 50/Mather Field Rd.	Completion after 2036	$20,000,000	
SAC24990	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Mather Field Rd./U.S. 50 Interchange	Construct intersection modification at Mather Field Road., modify on and off ramp configuration and turn pockets, and improve pedestrian connectivity	2021-2036	$2,000,000	$2,441,000
SAC24455	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Mather Railroad Spur Rails to Trails	This project will provide a Class 1 bike trail along the rail corridor between Folsom and Rockingham Drive. This project will add sidewalks and enhance pedestrian and disabled access on the west side of Mather Field Road, between Folsom Boulevard and Rockingham Drive. This will allow for greater access to the historic "Mills Station" Light Rail Station and enhance access to both bus transit. (2010 Demo ID CA859)	Completion by 2020	$2,777,715	$2,777,715
SAC24550	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Old Placerville Rd.:International Drive	Widen to 4 lanes from Bradshaw Rd. to Peter McCuen Blvd. Includes: intersection improvements at Routier Rd. & Mather Blvd.	Completion after 2036	$9,389,000	
SAC24991	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Old Placerville Rd.:International Drive	Widen to 6 lanes from Bradshaw Rd. to Peter McCuen Blvd. Includes: intersection improvements at Routier Rd. & Mather Blvd.	Completion after 2036	$30,886,000	
SAC24317	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Pedestrian Facilities and Sidewalk Gap program	Pedestrian Improvements: Throughout Rancho Cordova, construct new pedestrian facilities based on Pedestrian Master Plan. Continue Sidewalk Gap project delivery. Includes: grade separations at key locations.	Lump Sum or Ongoing	$12,200,000	$16,032,000

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SAC24997	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Pedestrian Overcrossing at Folsom Lake College	Bicycle and pedestrian overcrossing of Folsom Bouleard connecting the Mather Field/Mills SACRT Lght Rail Station to the Bicycle and pedestrian overcrossing of Folsom Bouleard connecting the new Folsom Lake College campus to the Mather Field/Mills SACRT Lght Rail Station to the new	Completion by 2020	$4,000,000	$4,196,000
SAC24180	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Pedestrian Promenade	Bicycle and pedestrian overcrossing of U.S. 50 connecting Olsen Drive to Prospect Park Drive as defined in The Promenade: Connecting and Revitalizing Rancho Cordova Planning Study (reference SAC24157).	Completion by 2020	$8,500,000	$8,916,000
SAC24586	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Peter A. McCuen Blvd.	Widen to 4 lanes from Mather Blvd. to International Dr. (including Femoyer St). Includes: intersection improvements at Mather Boulevard, Mather Field Road, Femoyer Street/Air Park Dr. and International Dr.	2021-2036	$17,571,000	$21,442,000
SAC24826	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Promenade Stage 2, Transit Bridges	This project consists of constructing two Bridge structures directly adjacent to the bike/ped Bridge (Pedestrian Promenade). Each of these new Bridge structures will accommodate a transit way (rubber tired or fixed guideway streetcar) in addition to bike and pedestrian movements if desired. The project would provide directl transit linkage between the town center and the employment and residential areas south of Hwy 50.	Completion after 2036	$21,600,000	
SAC24239	Yes	Sacramento	City of Rancho Cordova	E- Transit Capital (Vehicles)	Purchase or Lease 23 Shuttles	Replace contracted shuttle fleet with city owned or leased fleet, including three back-up vehicles (23 shuttles total)	2021-2036	$5,750,000	$7,017,000
SAC24718	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Rancho Cordova Elementary School Bicycle and Pedestrian Improvements	Along Chasella Wy. and Pedro Wy. between Malvasia Dr. and Zinfandel Dr., on Malaga Wy. and Sarda Wy. between Vernaccia Wy. and Furmint Wy., and on Furmint Wy. between Malaga Wy. and north of Saltana Wy.: Fill in gaps in sidewalks, crosswalks, and bicycle routes. (Emission Benefits in kg/day: 0.02 ROG, 0.01 NOx, 0.01 PM10, 0.01 PM2.5)	Completion by 2020	$1,848,456	$1,848,456
SAC22980	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Rancho Cordova Parkway - Douglas to White Rock	Construct Rancho Cordova Parkway as a six lane roadway from White Rock to Villagio and a 4 lane roadway from Villagio to Douglas Road, including intersection improvements at Villagio and White Rock Road.	2021-2036	$17,000,000	$20,745,000
SAC24630	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Rancho Cordova Parkway, Chrysanthy Blvd to Kiefer Road	Rancho Cordova Parkway: Widen existing road 2-4 lanes from Chrysanthy Blvd to Kiefer Road	2021-2036	$3,654,348	$4,459,000
SAC24511	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Rancho Cordova Parkway, Douglas Road to Chrysanthy Boulevard	Construct a new 4 lane road Rancho Cordova Parkway, from Douglas Road to Chrysanthy Boulevard.	Completion by 2020	$3,426,000	$3,426,000
SAC24295	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Rancho Cordova Pkwy, Grant Line to Kiefer	Construct New Road: 4 lanes from Grant Line Rd. to Kiefer Blvd. Includes intersection improvement at Grant Line Rd.	2021-2036	$3,709,000	$4,526,000
SAC24181	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Rio Del Oro Pkwy	Rio Del Oro Parkway: New 2 lane road from Rancho Cordova Parkway to White Rock Road including intersection improvements at Rancho Cordova Parkway, Americanos Blvd., and White Rock Road (CP09-2070)	Completion after 2036	$8,211,000	
SAC24371	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Rio Del Oro Pkwy.	Widen: from 2 to 4 lanes from Rancho Cordova Pkwy. to White Rock Rd. (Phase III)	Completion after 2036	$3,000,000	
SAC24995	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Rod Beaudry Cycle Track Improvements	Projects includes a raised barrier to protec t cyclists from traffic, painted bike lane or other identifier	Completion by 2020	$250,000	$262,000
SAC24221	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Routier Rd.	Widen: from Old Placerville Rd. to Folsom Blvd. including structure over U.S. Hwy. 50.	2021-2036	$8,743,000	$13,673,000
SAC24994	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Routier Road Cycle Track Improvements	Projects includes a raised barrier to protec t cyclists from traffic, painted bike lane or other identifier	Completion by 2020	$500,000	$524,000
SAC24468	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Sunrise Blvd - Kiefer Blvd to SR16	Widen Sunrise Boulevard: 2 to 4-lanes from Kiefer Boulevard to State Route 16 (Jackson Highway) and construct partial intersection improvements at Sunrise Boulevard and State Route 16. The project includes modifications to the bridge on Sunrise Boulevard over Laguna Creek. (The $5,227,000 of local agency funds is Sac County funding. City will advance costs and enter into MOU with County for reimbursement for County share.)	Completion by 2020	$12,000,000	$12,000,000
SAC24349	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Sunrise Blvd. and Jackson Hwy. Intersection	Construct 6x6 intersection with two bridge sections over the creek at Sunrise Boulevard and Jackson Highway.	2021-2036	$10,355,460	$16,195,000
SAC24635	Yes	Sacramento	City of Rancho Cordova	C- Maintenance & Rehabilitation	Sunrise Blvd. Complete Streets Rehabilitation	Sunrise Blvd., from Coloma to 762 feet north of Gold Express Drive: rehabilitate northbound and southbound lanes with a minimum of 2 inches of asphalt. Complete streets improvements include new crosswalks as well as other bike and pedestrian improvements.	Completion by 2020	$3,359,000	$3,359,000
SAC24210	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Sunrise Complex Improvements	On Sunrise Blvd, construction intersection modifications and pedestrian improvements and include road widening along Sunrise or capacity increasing improvements and modifications at US 50.	Completion after 2036	$50,000,000	
SAC24710	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Traffic Management Center & ITS Upgrades	In the City of Rancho Cordova: install a traffic management center. At various locations on Sunrise Blvd, Folsom Blvd, Zinfandel Dr, Mather Field and Rockingham and White Rock Rd.: Install new traffic signal controllers, expand the existing coordinated signal system, and install fiber to connect to traffic operations center. Intelligent Transportation System (ITS).(HSIP6-03-013, Toll credits for PE and CON)	Completion by 2020	$4,000,000	$4,000,000
SAC24220	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	US 50 / Rancho Cordova Parkway Interchange	At US 50 and Rancho Cordova Pkwy.: Construct new interchange including auxiliary lanes on U.S. 50 between Hazel Ave. and Sunrise Blvd. and a four lane arterial connection to US 50 of Rancho Cordova Pkwy. to White Rock Rd.(CP05-2003)	Completion by 2020	$100,000,000	$100,000,000
SAC24182	Project Development Only	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	Villagio	Construct New Road: 2 lanes from Douglas Rd. to White Rock Rd. Includes: intersection improvements at Douglas Rd., Rancho Cordova Pkwy., International Dr., Americanos Rd., and White Rock Rd.	Completion after 2036	$2,496,000	
SAC24470	Yes	Sacramento	City of Rancho Cordova	B- Road & Highway Capacity	White Rock Rd. - Construct Sunrise Blvd. to City Limits; Environmental Sunrise to Grant Line	Environmental will be for both this project and the County of Sacramento project SAC24249. Enviornmental will be done for White Rock Road Sunrise Blvd to Grant Line Road. Construction will include: On existing 6-lane White Rock Rd., from Sunrise Blvd. to Luyung Dr.: construct improvements, including Class II bikeway. On White Rock Rd from Luyung Dr. to eastern City Limits: widen and reconstruct from 2 to 4 lanes and construct Class II bikeway. (CMAQ funds only to be used for new bicycle facilities.) (Emission Benefits in kg/day: 0.03 ROG, 0.03 NOx, 0.02 PM10). Additional construction will be completed under the Sacramento County project SAC24662.	Completion by 2020	$18,366,000	$18,366,000
SAC24703	Yes	Sacramento	City of Rancho Cordova	G- System Management, Operations, and ITS	Zinfandel Complex Improvements	On Zinfandel Blvd, modify US 50 ramp intersections, lengthen turn pockets, add additional overhead signage, and build pedestrian refuge islands.	Completion by 2020	$5,410,000	$5,410,000
SAC24828	Yes	Sacramento	City of Rancho Cordova	A- Bike & Ped	Zinfandel Complex Improvements - Phase2	Construct intersection and pedestrian improvements on Zinfandel Drive between White Rock Road and Folsom Blvd, including modifications at US 50/Zinfandel to improve safety and ease congestion along the corridor, including bridge widenings, ramp and intersection reconstruction and reconstruction of intersections.	2021-2036	$45,968,000	$71,891,000
SAC24500	Yes	Sacramento	City of Sacramento	G- System Management, Operations, and ITS	12th St. Signal Upgrades	12th St. between Richards Blvd. and L St.: Upgrade traffic signal system; repair conduit infrastructure between signals; provide dynamic train and vehicle signs; improve signing and striping. HSIP3-03-001 (T15115000)	Completion by 2020	$1,300,000	$1,300,000
SAC24610	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	14th Ave. Extension Phase 1	Sacramento. Extension of 14th Avenue from Power Inn Rd to Florin-Perkins. Phase I includes environmental/PE for four lane roadway and construction of two-lane roadway with class II bicycle lanes and landscape planter/sidewalks on the south side of the roadway. Also includes new water and drainage facilities, new streetlights, new traffic signal at 14th Ave/Florin Perkins Rd, and modification to existing traffic signal. (Phase 2 SAC24656, Phase 3 SAC24657)	Completion by 2020	$7,058,000	$7,058,000
SAC24656	Project Development Only	Sacramento	City of Sacramento	B- Road & Highway Capacity	14th Ave. Extension Phase 2	Sacramento. 14th Ave., from Power Inn Road to Florin Perkins, widen from 2 to 4 lanes. Construction includes bike lanes, landscaped center median, landscaping and sidewalk on north side of street. Retaining wall along north side of project. (PE/ENV included in Phase 1, SAC24610)	Completion after 2036	$3,750,000	
SAC24657	Project Development Only	Sacramento	City of Sacramento	B- Road & Highway Capacity	14th Ave. Extension Phase 3	Sacramento. 14th Avenue from Florin-Perkins Rd to Watt Ave: extend as a four lane road.	Completion after 2036	$8,500,000

SAC18580	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	East Commerce Way	Extend East Commerce Way from planned Natomas Crossing Drive to San Juan Rd. as a 4 lane road.	2021-2036	$4,000,000	$4,881,000
SAC18740	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	El Centro Rd.	New Overcrossing: El Centro Rd. overcrossing.	2021-2036	$11,000,000	$13,423,000
SAC23690	Project Development Only	Sacramento	City of Sacramento	B- Road & Highway Capacity	Elder Creek Rd.	Widen: 4 lanes from Power Inn Rd. and Florin Perkins Rd.	Completion after 2036	$1,900,000	
SAC23680	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Elder Creek Rd.	Widen: 4 lanes from Florin Perkins Rd. to South Watt Ave.	2021-2036	$7,000,000	$10,948,000
SAC18510	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Elkhorn Boulevard	In Sacramento, Elkhorn Boulevard from SR 99 to east city limits: widen from 2 to 6 lanes.	2021-2036	$7,073,566	$11,063,000
SAC24711	Yes	Sacramento	City of Sacramento	G- System Management, Operations, and ITS	Flashing Beacons	9 locations throughout the City of Sacramento: Install flashing beacon. (HSIP6-03-014) T15145800	Completion by 2020	$1,665,967	$1,665,967
SAC24402	Yes	Sacramento	City of Sacramento	A- Bike & Ped	Folsom Blvd Operations and Maintenance	Folsom Blvd. from Power Inn Road to Watt Avenue; streetscape project including pedestrian and bicycle improvements, a raised landscaped median, landscaped planters, improvements to signal operations, frontage landscaping, and enhanced connections to transit facilities.	Completion by 2020	$19,500,000	$20,454,000
SAC24535	Yes	Sacramento	City of Sacramento	A- Bike & Ped	Folsom Blvd.	Streetscape Project: Folsom Blvd from Power Inn. to 65th St.	2021-2036	$18,500,000	$28,933,000
SAC24636	Yes	Sacramento	City of Sacramento	C- Maintenance & Rehabilitation	Folsom Blvd. Complete Streets Rehabilitation	Folsom Blvd., from 65th St. to the Union Pacific Railroad underpass: rehabilitate roadway. Complete streets features include new bicycle lanes and new sidewalks to fill in missing sections. (Emission Benefits in kg/day: 0.13 ROG, 0.1 NOx, 0.06 PM10) - T15135100	Completion by 2020	$1,997,000	$1,997,000
SAC22610	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Folsom Blvd./Power Inn Rd. Intersection (Ramona Ave Phase I)	Near intersection of Folsom Blvd. and Power Inn: Ramona Ave., extend northward from Brighton Ave. to connect to Folsom Blvd. This will improve the operations of the Folsom Blvd./Power Inn Intersection. (Phase 2, SAC24654)	Completion by 2020	$8,629,889	$8,629,889
SAC24704	Yes	Sacramento	City of Sacramento	C- Maintenance & Rehabilitation	Freeport Blvd. Road Diet	On Freeport Blvd., from Sutterville Rd. to 4th Ave./21st St.: reduce travel lanes from 4 to 2 with median turn pockets, add Class II bike paths, install transit turnouts, and rehabilitate pavement. (Emission Benefits in kg/day: 0.02 ROG, 0.01 NOx) K15125100	Completion by 2020	$2,059,200	$2,059,200
YOL19286	Yes	Yolo	City of Woodland	C- Maintenance & Rehabilitation	I-5 / CR 102 Interchange (Phase 2)	Interchange Reconstruction: on I-5 at County Rd. 102 including overcrossing of I-5.	2021-2036	$7,000,000	$8,542,000
SAC24683	Yes	Sacramento	City of Sacramento	C- Maintenance & Rehabilitation	I St. Bridge Replacement	I Street Bridge, over Sacramento River and complex of bridge approach structures. Replace existing 2 lane bridge with a 2 lane bridge on a new alignment. Project includes bridge approaches 22C0154, 24C0006, 24C0364L, 24C0364R, 24C0351J.	Completion by 2020	$86,620,900	$86,620,900
CAL20586	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	I-5 Bus/Carpool Lanes	Bus/Carpool Lanes: J St. to I-80 in both directions, including a new Class I bike path over the American River	2021-2036	$116,000,000	$141,552,000
CAL20600	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	SR 99 Auxiliary Lane	SR 99 auxiliary lane: NB from WB Florin Rd. slip on ramp to EB 47th Ave. slip off ramp. Right-of-way aquisition required. Soundwall relocation required.	2021-2036	$3,000,000	$3,661,000
CAL20601	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	SR 99 Auxiliary Lane	SR 99 Auxiliary Lane extension: SB, from Martin Luther King Blvd on ramp. to WB 47th Ave. slip off ramp. Right-of-way aquisition required. Soundwall relocation required.	2021-2036	$3,000,000	$3,661,000
CAL20599	Yes	Sacramento	Caltrans D3	B- Road & Highway Capacity	SR 99 Transition Lane	SR 99 Transition Lane: NB, from WB 47th Ave. slip on ramp to EB Fruitridge Rd. slip on ramp, and from WB Fruitridge Rd. loop off ramp to WB Fruitridge Rd. slip on ramp. Right-of-way aquisition required. Soundwall relocation required.	2021-2036	$3,000,000	$3,661,000
SAC18650	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	I-80 @ West El Camino Interchange	Expand the West El Camino interchange on I-80 from 2 to 4 lanes and modify ramps.	2021-2036	$22,000,000	$34,407,000
SAC16040	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Jackson Hwy. (SR 16)	Road Realignment: 4 lane Rd. from Power Inn Rd. to South Watt Ave.	2021-2036	$25,000,000	$39,098,000
SAC24886	Yes	Sacramento	City of Sacramento	G- System Management, Operations, and ITS	K Street Streetscaping	Streetscape improvements along K Street	Completion by 2020	$2,000,000	$2,098,000
SAC23410	Project Development Only	Sacramento	City of Sacramento	B- Road & Highway Capacity	Kiefer Blvd.	Widen: 4 lanes from Florin-Perkins Rd. to S. Watt Ave.	Completion after 2036	$1,000,000	

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SAC24539	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Lower American River Crossing	New all-modal Bridge: between downtown Sacramento and South Natomas across the Lower American River. Includes: Auto, transit, bicycle, and pedestrian facilties. Scale and features to be determined through need and purpose study anticipated to begin in 2012.	2021-2036	$150,000,000	$183,042,000
SAC24679	Yes	Sacramento	City of Sacramento	G- System Management, Operations, and ITS	Mack Rd./Valley Hi Dr. Signal Upgrade	Mack Rd./Valley Hi Dr. (La Mancha Way): Upgrade traffic signals; install right-turn lane. (HSIP5-03-018) T15146400	Completion by 2020	$550,955	$550,955
SAC23430	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Main Ave.	Widen: 4 lanes from Norwood Ave. to Rio Linda Blvd.	2021-2036	$7,000,000	$10,948,000
SAC24536	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Main Ave.	Road Extension: 2 lanes from Rio Linda Blvd. to Marysville Blvd.	2021-2036	$2,000,000	$3,128,000
SAC24541	Project Development Only	Sacramento	City of Sacramento	B- Road & Highway Capacity	Main Ave.	Widen: 4 lanes from Norwood Ave to Marysville Blvd.	Completion after 2036	$4,000,000	
SAC23440	Yes	Sacramento	City of Sacramento	A- Bike & Ped	Mangan Park	Bikeway Facilities: 0.6 mile in City of Sacramento Mangen Park from 24th St. to Freeport Blvd. Bike trail south in Executive Airport right-of-way.	2021-2036	$800,000	$976,000
SAC24742	Yes	Sacramento	City of Sacramento	A- Bike & Ped	Meadowview Rd. Streetscape Project	Meadowview Rd. from the light rail station to I-5 and along 24th St from Meadowview Rd. to Florin Rd. including medians, sidewalk treatments, and crosswalks. T15145500	Completion by 2020	$3,700,395	$3,700,395
SAC18720	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Natomas Crossing Dr.	New Overcrossing: Natomas Crossing Dr. at I-5.	2021-2036	$11,000,000	$13,423,000
SAC18560	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Natomas Crossing Drive	In City of Sacramento, build new Natomas Crossing Drive as 2 lane road from Duckhorn Drive to El Centro Rd.	2021-2036	$4,340,715	$6,789,000
SAC24743	Yes	Sacramento	City of Sacramento	A- Bike & Ped	North 12th St. Streetscape Project	North 12th St. between North B St. and Richards Blvd., construct six to eight feet sidewalks, drainage, and adding wrought iron fencing to separate pedestrians from light rail tracks. T15136200	Completion by 2020	$1,355,473	$1,355,473
SAC18700	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Northgate Blvd.	On/Off Ramp Improvement: Extend existing I-5 WB off-ramp at Northgate Blvd. / I-80 Interchange. Includes: auxiliary lane to WB on-ramp.	2021-2036	$10,000,000	$12,203,000
SAC16070	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Power Inn Rd.	Widen: 6 lanes from Fruitridge Rd. to 14th.	2021-2036	$25,000,000	$39,098,000
SAC24472	Yes	Sacramento	City of Sacramento	A- Bike & Ped	R Street Market Plaza (16th to 18th St)	Sacramento, R Street between 16th & 18th Streets, develop pedestrian pathway, streetscape improvements, community gathering place, and reconstruct roadway. T15068300 (Emission Benefits in kg/day: 0.03 ROG, 0.02 NOx, 0.01 PM10)	Completion by 2020	$4,215,000	$4,215,000
SAC24673	Yes	Sacramento	City of Sacramento	A- Bike & Ped	R Street Phase 3	Sacramento, construct streetscape improvements, streetlighting, landscaping, hardscaping, and pedestrian enhancements on R Street between 13th Street and 16th Street T15135900	Completion by 2020	$4,822,950	$4,822,950
SAC24615	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Railyard Boulevard Extension	Railyard Boulevard, between Jibboom Street and Bercut Street: construct approximately 200 feet of new roadway (one lane each direction) to provide access to Downtown Railyards. (See MTP Project SAC24537.)	Completion by 2020	$1,000,000	$1,000,000
SAC24537	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Railyards Streets	Construct New Road: various roads in the Railyards Redevelopment Area.	2021-2036	$154,200,000	$188,167,000
SAC19550	Project Development Only	Sacramento	City of Sacramento	B- Road & Highway Capacity	Raley Blvd.	Widen: 4 lanes from Santa Ana Ave. to Ascot Ave.	Completion after 2036	$1,200,000	
SAC24654	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Ramona Avenue Phase II	Ramona Avenue: Widen and add new frontage improvements from Cucamonga to Brighton. Environmental review completed under SAC22610. (No new travel lanes.)	2021-2036	$3,000,000	$4,692,000
SAC24538	Yes	Sacramento	City of Sacramento	G- System Management, Operations, and ITS	Rio Linda & Main Intersection Improvements	Intersection Improvements: at Rio Linda Blvd. and Main Ave. Includes: traffic signal installation and intersection re-configuration.	Completion by 2020	$4,500,000	$4,720,000
SAC24517	Yes	Sacramento	City of Sacramento	C- Maintenance & Rehabilitation	Rio Linda Blvd. Bridge Rehab	Rio Linda Blvd., Over Magpie Creek, 0.92 miles north of FAI 880: Rehabilitate the existing 2 lane bridge.	Completion by 2020	$4,000,000	$4,000,000
SAC24705	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Riverfront Reconnection Project-Phase I	At Capitol Mall and Second St,. build a new ramp to Old Sacramento. On Capitol Mall, build a new traffic signal at Second St., build new sidewalks and add Class II bicycle paths. Extend design phase to accommodate potential Streetcar Transit Service. (Toll Credits for CON, CMAQ funds for new bike/ped facilities only. Emissions in kg/day: 0.04 ROG, 0.03 NOx, 0.02 PM10. See delivered project SAC24497 for PE work. Project included in the MTP/SCS as SAC22530, Bridging I-5.) T15998100	Completion by 2020	$10,225,400	$10,225,400
SAC23530	Project Development Only	Sacramento	City of Sacramento	B- Road & Highway Capacity	Roseville Rd.	Widen: 4 lanes from Connie Dr. to Sacramento limits.	Completion after 2036	$3,000,000	
SAC24516	Yes	Sacramento	City of Sacramento	C- Maintenance & Rehabilitation	Roseville Rd. Bridge Replacement	Roseville Rd. Over Arcade Creek, 0.4 miles south of S.R 80.: Replace existing structurally deficient 2 lane bridge with new 2 lane bridge. T15068500	Completion by 2020	$6,710,029	$6,710,029
SAC24461	Yes	Sacramento	City of Sacramento	A- Bike & Ped	Sacramento City College Bike/Ped Overcrossing	Sacramento, Sacramento City College/UPRR line. Bike/ped overcrossing of railroad to provide access to Sacramento City College Light Rail Station from existing and future development to the east.(T15065700) (Toll Credits for CON)	Completion by 2020	$11,107,958	$11,107,958
SAC24658	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Sacramento Intermodal Circulation Phase 2 (3rd & I)	Design and construct access improvements at 3rd & I (HPP #2788 and #3784). Feasibility Studies, preliminary design included in Phase 1.	2021-2036	$2,417,165	$2,417,165
SAC20350	Yes	Sacramento	City of Sacramento	E- Transit Capital (Major)	Sacramento Intermodal Trans. Facility - Phase 2	Sacramento Intermodal Transportation Facility Valley Station: Improvements to the existing station including: relocating the existing LRT station to a north-south alignment; relocating (repave/restripe) the existing RT and Amtrak bus berths; providing enhanced passenger connections; relocating passenger vehicle and bicycle parking; upgrading the Depot's electrical system; providing a transit way.	Completion by 2020	$40,663,140	$40,663,140
SAC24883	Yes	Sacramento	City of Sacramento	E- Transit Capital (Major)	Sacramento Intermodal Trans. Facility - Phase 2b	Sacramento Intermodal Transportation Facility Valley Station: Intermodal Facility Phase 2B project is a complete makeover and rehabilitation of the historic Depot to make the facility fully usable and attractive, arrest deterioration and meet code. The project elements will consist of repair and upgrade to the interior and exterior sections of the building including architectural, structural, plumbing, mechanical, electrical, energy, internal circulation, access and other work. Historic rehabilitation will involve features such as façades, canopies, openings, windows, doors, the mural and decorative treatments, finishes and other items.	2021-2036	$27,000,000	$32,948,000
SAC24414	Yes	Sacramento	City of Sacramento	E- Transit Capital (Major)	Sacramento Intermodal Transportation Facility - Phase 1	Sacramento Intermodal Transportation Facility: Realign and straighten the existing mainline UPRR freight and passenger rail tracks, provide passenger facilities that connect the Depot to the relocated platforms. (Project includes Prelim. Engineering for both Phase 1 and Phase 2 of the Sac. Intermodal Transp. Facility). Between Old Sacramento, the Central Business District, and the Railyards Development and River District: Construct a 247-foot pedestrian/bicycle tunnel beneath the re-aligned mainline Union Pacific tracks. (Other Fed-Project of National & Regional Significance is Section 1301 and are Earmarked funds from SAFETEA-LU. CMAQ funds are being used for straightening and realigning a 3,300-foot-long section of the UPRR mainline. The project will allow UPRR's trains to operate at higher speeds and reduce train idling. Emission Benefits in kg/day: NOx 1.2, CO 0.1, PM10 0.1)	Completion by 2020	$97,348,821	$97,348,821
SAC24898	Yes	Sacramento	City of Sacramento	E- Transit Capital (Major)	Sacramento Intermodal Transportation Facility - Phase 3	Intermodal Facility Phase 3 project is the creation of a larger multi-modal transportation center that can meet the region's expanded transportation needs and accommodate high speed trains, commuter rail, light rail, streetcars, transit bus lines, and intercity buses. It will involve expansion of the terminal facilities including passenger amenities and spaces, transportation operations areas, site and circulation improvements and joint development	2021-2036	$225,000,000	$351,885,000
SAC18710	Yes	Sacramento	City of Sacramento	B- Road & Highway Capacity	Snowey Egret Wy.	New Overcrossing: for the planned Snowey Egret Wy. that will run east-west from El Centro Rd. to Commerce Wy. crossing over I-5.	2021-2036	$11,000,000	$17,203,000

(Toll Credits for CON).	Completion by 2020	$73,000	$73,000
PAR10020	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Vehicles)	Bus Expansion	Purchase up to fourteen CNG powered large buses for fleet expansion. (Uses Toll Credits for local match).	Completion by 2020	$980,000	$980,000
PAR10027	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Vehicles)	CTSA Vehicle Purchase	Purchase of three CTSA vehicles for Paratransit, Inc. Included in the project cost shall be purchase of the vehicles, radios, cameras, zonar and other necessary equipment to put the vehicle into service. Costs shall also include vehicle line assembly inspection.	Completion by 2020	$161,406	$161,406
PAR10030	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Minor)	Paratransit, Inc. Ranger 4 Implementation Project	Purchase and Installation of 150 Personal/Mobile Data Terminals (Ranger 4) and associated wiring, hardware, software and administrative costs	Completion by 2020	$592,500	$592,500
PAR10029	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Vehicles)	Purchase of 6 CNG Buses (including data/maintenance terminal Ranger units)	Purchase up to six CNG powered buses including related equipment to include data/maintenance terminal Trapeze Ranger units. (Uses Toll Credits for local match).	Completion by 2020	$525,867	$525,867
PAR10019	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Vehicles)	Replacement Buses and Associated Equipment	Replace up to thirty-nine demand response with Type III vehicles including related equipment to include mobile data terminals, cable assembly mounts, mobile radios, and zonar systems.	Completion by 2020	$3,750,000	$3,750,000
PAR10022	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Vehicles)	State of Good Repair 25 Replacement Vehicles	Replace up to twenty-five paratransit vehicles including related equipment.	Completion by 2020	$2,125,000	$2,125,000
PAR10025	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Minor)	Transit Asset Management System	Tracking system for capital assets.	Completion by 2020	$311,250	$311,250
PAR10021	Yes	Sacramento	Paratransit Inc.	E- Transit Capital (Minor)	Transit Operating Equipment	Purchase transit related equipment including 14 mobile radios, Zonar, and Fleetlink software. (Uses Toll Credits for local match).	Completion by 2020	$76,300	$76,300
VAR56129	Yes	Sacramento	Pride Industries/CTSA	E- Transit Capital (Vehicles)	Pride Industries CA 5310 Larger Bus Replacement	FTA 5310 funds to replace one (1) Larger Bus that can accommodate 20 passengers (incl. two wheelchair positions) and a driver.	Completion by 2020	$105,001	$105,001
VAR56107	Yes	Sacramento	SACOG	F- Transit O&M (Bus)	e-tran (Elk Grove) JARC Operating Assistance	FY 2011 & 2012 JARC funds will allow e-tran to serve the downtown Sacramento to Elk Grove reverse commute by creating two new routes using buses that previously operated as "deadhead" or closed door from downtown to Elk Grove.	Completion by 2020	$304,000	$304,000
VAR56106	Yes	Sacramento	SACOG	F- Transit O&M (Bus)	Paratransit, Inc. JARC Operating Assistance	Wheels to Work program providing transportation to social service, educational, and training opportunities as well as connections with fixed route transit and mobile "office resource bus." FY 2011 & 2012 funds will allow completion of this project.	Completion by 2020	$500,000	$500,000
SAC21710	Yes	Sacramento	SACOG	D- Programs & Planning	Sacramento County PPM	Plan, program and monitor for Sacramento County.	Completion by 2020	$6,971,000	$6,971,000
VAR56115	Yes	Sacramento	SACOG	E- Transit Capital (Minor)	Sacramento Regional Transit District - New Freedom Capital Assistance	Construct shelters over disabled access ramps (mini-high platforms) at light rail stations.	Completion by 2020	$287,500	$287,500
VAR56037	Yes	Sacramento	SACOG	D- Programs & Planning	SECAT Program Phase 2	Phase 2 of Sacramento Emergency Clean Air Transportation Program (SECAT), Heavy-Duty NOx control strategies. (Phase 1 SAC22090) (Emission Benefits in kg/day: 236 NOx, 21 PM10, 9 ROG. And in kg/day for each $3m increment: 835 NOx, 109 ROG)	Completion by 2020	$33,271,133	$33,271,133
VAR56103	Yes	Sacramento	SACOG	F- Transit O&M (Light Rail)	SRTD JARC Operating Assistance	The requested FFY 2011 & 2012 JARC funding would restore evening service to both of RT's light rail lines, as well as five major connecting bus routes (1, 23, 51, 56, & 80) and paratransit service within three quarter miles of this service.	Completion by 2020	$1,820,000	$1,820,000
SAC24389	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	16th St.	Widen: 4 lanes from Ascot Blvd. to Sacramento/Placer County Line.	2021-2036	$44,500,000	$54,302,000
SAC21530	Yes	Sacramento	Sacramento County	D- Programs & Planning	ADA Transition Plan	Facilities Plan: In Sacramento County, various locations, construct ADA compliant improvements in accordance with the county DOTs ADA Transition Plan.	Lump Sum or Ongoing	$15,000,000	$19,712,000
SAC24839	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Aerojet Rd	Construct New 4 lane road between Easton Valley Parkway and Folsom Blvd.	2021-2036	$10,000,000	$12,203,000
SAC24280	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Alta Florin Rd.	Construct New Road: 4 lanes from Power Inn Rd. to Florin-Perkins Rd. (Runs parallel and north of Florin Rd.) Includes: Railroad grade separation.	Completion after 2036	$5,000,000	
SAC24618	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Alta Mesa Rd Bridge Replacement	Alta Mesa Rd over Laguna Creek, 0.4 mi north of SR 104: Replace existing structurally deficient 2-lane bridge with a new 2-lane bridge.	Completion by 2020	$7,980,321	$7,980,321
SAC22020	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Antelope North Road Widening	In Sacramento County, Antelope North Road, from Poker Ln. to Olive Ave.: Realign and widen to 4 lanes.	2021-2036	$3,020,000	$4,723,000
SAC24264	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Antelope Rd.	Widen: 4 lanes from Watt Ave. to Elverta Rd and 6 lanes from Elverta Rd. to Roseville Rd. Project addresses: congestion, safety and aesthetics, and mobility for bicycles, pedestrians and transit.	2021-2036	$9,307,473	$14,556,000
SAC19790	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Antelope Road Widening	In Sacramento County, Antelope Road from Don Julio Boulevard to Roseville Road Antelope Road North, widen from 4 to 6 lanes.	Completion after 2036	$4,000,000	
SAC24608	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Apple Rd/Fruit Channel Bridge Replacement	Apple Rd, over Fruit Channel, 0.65 mi SE/O Dillard Rd. Replace the existing 2 lane functionally obsolete bridge with a new 2 lane bridge. (Toll credits for PE, ROW & CON.)	Completion by 2020	$1,400,000	$1,400,000
SAC19840	Yes	Sacramento	Sacramento County	A- Bike & Ped	Bike/Ped Improvements	Bikeway Facilities: In various Sacramento County locations. Includes: 2010 Bikeway Master Plan Implementation.	Lump Sum or Ongoing	$50,000,000	$65,706,000
SAC24840	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Birkmont Drive	Construct New 4 lane road between Easton Valley Parkway and Folsom Blvd.	2021-2036	$10,000,000	$12,203,000
SAC24224	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Bradshaw Rd.	Widen: 6 lanes between Old Placerville Rd. and Florin.	2021-2036	$37,500,000	$58,648,000
SAC22030	Yes	Sacramento	Sacramento County	A- Bike & Ped	Commercial Corridor Enhancements	Safety Enhancement: in Sacramento County, various locations. Includes: streetscaping, lighting, and other safety enhancements to enhance bicycle and pedestrian use.	Lump Sum or Ongoing	$50,000,000	$65,706,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SAC24729	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Complete Streets Rehabilitation	1. Sunrise Ave. from 700 ft. north of Gold Express to American River Bridge: Rehabilitate Sunrise Ave., multi-use path crossings, install bicycle detection and curb ramps, and repair damaged and discontinuous sidewalks.2. Eastern Ave. from El Camino Ave. to Marconi Ave.: rehabilitate damaged and discontinuous sidewalks, add new bicycle lanes, and install bicycle detection and curb ramps.3. El Camino Ave. from Howe Ave. to Fulton Ave.: rehabilitate damaged and discontinuous sidewalks, install bicycle detection at traffic signals, install curb ramps, and close bicycle lane gaps.4. Marconi Ave. from Highway 80 to Howe Ave.: rehabilitate road, add new bicycle lanes, repair damaged and discontinuous sidewalks, install curb ramps, and add bicycle detection at traffic signals.	Completion by 2020	$4,196,205	$4,196,205
SAC24726	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Complete Streets Rehabilitation - Folsom Blvd.	Folsom Blvd. from Butterfield Wy. to Bradshaw Rd.,: Rehabilitate Folsom Blvd. and fill a sidewalk gap, fill bicycle lane gaps and upgrade the existing bicycle lanes.	Completion by 2020	$443,465	$443,465
SAC24730	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Complete Streets Rehabilitation of Fulton Avenue - 1	Fulton Avenue from Marconi Avenue to Auburn Boulevard: Rehabilitate pavement and re-stripe with on-street bike lanes.	Completion by 2020	$872,850	$872,850
SAC24731	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Complete Streets Rehabilitation of Fulton Avenue - 2	Fulton Avenue from Arden Way to Auburn Boulevard: add bike lanes, construct new sidewalks, repair and infill damaged/discontinuous sidewalks, install curb ramps and the required ADA improvements, and modify traffic signals. Rehabilitate pavement between Arden Way and Marconi Avenue.	Completion by 2020	$3,332,995	$3,332,995
SAC24841	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 4 lane roadway on North Loop Road from Grant Line Road to Street "F" with NEV/Bike lanes, median, landscaping, sidewalks, 4 traffic signals at Town Center Blvd, Street "D" and Primary Residential Street between Street "D" and Street "F" and Street "F", roundabout at Street "A"	Completion after 2036	$20,990,000	
SAC24842	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 4 lane roadway on University Blvd from Grant Line Road to Street "A" with NEV/Bike lanes, median, landscaping, sidewalks, 3 traffic signals (at Town Center Blvd, and 2 between Town Center Blvd and Street "A"), roundabout at Street "A"	Completion after 2036	$12,056,000	
SAC24843	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from University Blvd to North Loop Rd with Class 2 Bike Lines, NEV Compact, median, landscaping, sidewalks, 3 traffic signals and 2 roundabouts	Completion after 2036	$6,875,000	
SAC24844	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 4 lane roadway on Chrysanthy Blvd Ext. from Grant Line Road to Town Center Blvd with median, landscaping, sidewalks, 1 traffic signals at Town Center Blvd	Completion after 2036	$2,160,000	
SAC24845	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from Street "A" to Street "F" with NEV/Bike lanes, median, landscaping, sidewalks	Completion after 2036	$7,651,000	
SAC24846	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from Street "E" to North Loop Rd with Class 2 Bike Lines, NEV Compact, median, landscaping, sidewalks, traffic signal at Street "B" and 1 roundabout at Street "D"	Completion after 2036	$7,334,000	
SAC24847	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from Street "A" (south of St. "B") to Street "A" (south of North Loop Rd.) with Class 2 Bike Lines, NEV Compact, landscaping, sidewalks	Completion after 2036	$5,800,000	
SAC24848	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from Street "A" to Street "C" with Class 2 Bike Lines, NEV Compact, landscaping, sidewalks	Completion after 2036	$1,160,000	
SAC24849	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from Street "A" to North Loop Rd with Class 2 Bike Lines, NEV Compact, median, landscaping, sidewalks, and 2 roundabouts at Street "A" and University Blvd	Completion after 2036	$8,167,500	
SAC24850	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from Street "A" to University Ave with Class 2 Bike Lines, NEV Compact, landscaping, sidewalks	Completion after 2036	$3,480,000	
SAC24851	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cordova Hills	New 2 lane roadway from University Ave to North Loop Rd with Class 2 Bike Lines, NEV Compact, landscaping, sidewalks	Completion after 2036	$2,320,000	
SAC24713	Yes	Sacramento	Sacramento County	A- Bike & Ped	Cottage Way Road Diet	On Cottage Way between Cortez Lane and Watt Ave: Install bike lanes, a "road diet" (reduce travel lanes from 4 to 3), and modify intersections. (HSIP6-03-016)	Completion by 2020	$700,000	$700,000
SAC19610	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Cypress Ave.	Widen: 4 lanes from Pasadena Ave. to Manzanita Ave.	Completion after 2036	$10,441,000	
SAC24520	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Dillard Rd. Bridge Scour Countermeasures	Dillard Rd., over Cosumnes river, 0.2 miles south of S.R. 16: Install scour countermeasures on scour critical bridge.	Completion by 2020	$1,278,751	$1,278,751
SAC24663	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Douglas Rd. - Zinfandel Dr. to Rancho Cordova City Limit	Widen Douglas Road, from Zinfandel Drive to Rancho Cordova west City Limits, from 2 to 4 lanes.	2021-2036	$2,400,000	$3,753,000
SAC22410	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Douglas Road Extension	In Sacramento County, Douglas Road from Zinfandel Drive to Kiefer Boulevard; new 4 lane roadway with raised landscaped median, curb, gutter and sidewalk, improvements also include installation of traffic signals at Douglas/Kiefer and Douglas/Excelsior Road. No R/W acquisition, only conveyance/process costs.	2021-2036	$19,837,200	$31,024,000
SAC24975	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Eagles Nest Road Widening	In Sacramento County, Zinfandel Drive from Jackson Road (State Route 16) to Kiefer Boulevard, construct and widen from 2 to 4 lanes with curb, gutter, sidewalk, raised landscaped median and traffic signal modification at Jackson Road (State Route 16).	Completion after 2036	$4,800,000	
SAC22430	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Eagles Nest Road Zinfandel Drive Widening	In Sacramento County, Eagles Nest Road Zinfandel Drive from Kiefer Boulevard to Douglas Road, construct and widen from 2 to 4 lanes with curb, gutter, sidewalk, raised landscaped median; improvements also include the installation of a box culvert and traffic signal at Eagles Nest Road/Kiefer Boulevard.	2021-2036	$11,800,000	$18,454,000
SAC24529	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Easton Valley Pkwy.	Construct New Road: 4 lanes from Hazel Ave. to Prairie City Rd.	2021-2036	$36,000,000	$56,302,000
SAC24766	Yes	Sacramento	Sacramento County	A- Bike & Ped	El Camino Avenue Phase 2 - Street and Sidewalk Improvements	In Sacramento County, on El Camino Avenue from Watt Avenue to Verna Way; Project features include sidewalk and walkway construction, installation of bicycle lanes, improvements to existing signalized and unsignalized intersections, drainage improvements, transit stops, and other improvements to benefit bicycle and pedestrian access and safety.	Completion by 2020	$2,250,000	$2,250,000
SAC24973	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	El Centro Rd.	4 lanes from I-80 to Arena Blvd (City of Sacramento Limits)	Completion after 2036	$8,500,000	
SAC24943	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Elder Creek Rd.	Widen: 4 lanes from South Watt Ave. to Excelsior Rd.	2021-2036	$2,100,000	$3,284,000
SAC24380	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Elk Grove-Florin Rd. Bridge	Elk Grove-Florin Rd, over Elder Creek, 0.1 mi north of Gerber Rd.: Rehabilitate functionally obsolete 2 lane bridge and widen to 6 lanes.	Completion by 2020	$6,097,301	$6,097,301
SAC15170	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Elk Grove-Florin Rd. Widening	In Sacramento County, Elk Grove-Florin Road from North of Elder Creek to Florin Road: widen from 2 to 4 lanes. (Existing Elder Creek bridge is being replaced and widened to 6 lanes SAC24380)	Completion by 2020	$6,215,000	$6,215,000
SAC24525	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Elkhorn Blvd.	Widen: 4 lanes from Lone Tree Rd. to Hwy. 99.	Completion after 2036	$210,000	
SAC24526	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Elkhorn Blvd.	Widen: 6 lanes from Lone Tree Rd. to Hwy. 99.	Completion after 2036	$110,000	
SAC24527	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Elkhorn Blvd.	Construct New Road: 2 lanes from Airport Blvd. / Crossfield Dr. to Power Line Rd. Includes: landscaped medians.	2021-2036	$8,200,000	$10,006,000
SAC24531	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Elkhorn Blvd.	Widen: 4 lanes from Sacramento City limit east to 2nd Street.	2021-2036	$3,065,000	$4,793,000
SAC24938	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Elkhorn Blvd.	Widen: 6 Lanes from Metro Air Parkway to Lone Tree Rd	Completion after 2036	$640,000

SAC19690	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Gerber Road Widening	In Sacramento County, Gerber Road from Bradshaw Road to Vineyard Road: widen from 2 to 4 lanes.	2021-2036	$6,688,000	$10,460,000
SAC24035	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Gerber Road Widening	Widen Gerber Road between Elk Grove-Florin Road and Bradshaw Road from 3 to 4 lanes. (This road is already 3 lanes (two westbound and one eastbound)from Elk Grove-Florin Road to about 1/4-mile west of Bradshaw Road.)	Completion by 2020	$3,854,000	$3,854,000
SAC24852	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Glenborough Drive	Construct New 4 lane road between Easton Valley Parkway and Folsom Blvd.	2021-2036	$26,000,000	$31,727,000
SAC19090	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Greenback Lane Widening	Widen Greenback Lane from Fair Oaks Blvd to Hazel Ave from 4 to 6 lanes.	Completion after 2036	$3,550,200	
SAC24255	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Hazel Ave - U.S. 50 to Folsom Blvd	In Sacramento County, Hazel Avenue, between Folsom Boulevard and US Highway 50: multi-modal corridor improvements, interchange improvements, and widening of Hazel Avenue between Folsom Boulevard and US Highway 50.	2021-2036	$66,418,000	$66,418,000
SAC24626	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Hazel Ave Widening Phase 3	Sacramento County, Hazel Avenue, from Sunset Ave. to Madison Ave.: Widen from 4 to 6 lanes. New traffic signals at Roediger Lane and Phoenix Avenue. Improve existing and projected traffic congestion; enhance pedestrian and bicycle mobility in the corridor, address safety concerns, and improve the aesthetics of the corridor.	Completion by 2020	$14,649,000	$14,649,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SAC24625	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Hazel Ave Widening, Phase 2	Sacramento County between Curragh Downs Drive and Sunset Avenue; Widen Hazel Avenue from four to six lanes. Includes appraisals and acquisitions of necessary right of way adjacent to the proposed improvements. Traffic signal modifications at Curragh Downs Drive, Winding Way, Sunset Avenue, and La Serena Drive. Improvements also include new facilities for pedestrians and bicycles including class II bike lanes and separated sidewalks. (CMAQ to only fund new bicycle and pedestrian facilities)	Completion by 2020	$23,518,000	$23,518,000
SAC23160	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Hazel Ave. extension	Construct New Road: 4 lane limited access Rd. through Aerojet s property between Easton Valley Pkwy. and Grant Line Rd./White Rock Rd.	Completion after 2036	$18,000,051	
SAC24268	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Hazel Ave. Improvements	In Sacramento County and City of Rancho Cordova: Between Easton Valley Parkway and Folsom Boulevard; joint project with the City of Rancho Cordova to construct a new 6-lane expressway with special treatment.	Completion by 2020	$15,000,000	$15,000,000
SAC23080	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Hazel Avenue	In Sacramento County, Hazel Avenue from Madison to Sacramento/Placer County line: Widen from 4 to 6 lanes.	Completion after 2036	$105,000,000	
SAC24681	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Howe Ave. Road Diet	This is phase 1 of a two-phase project. NEPA is done in Phase 1 and covers the whole project scope (both phases). The project is designed and constructed in two phases:Phase 1- between El Camino Avenue and Red Robin Drive/Tallac Street: reduce travel lanes from 4 to 2 lanes with a center two-way left-turn lane, new bike lanes and sidewalks, curb and gutter. Modify mid-block pedestrian signal. (HSIP5-03-020)Phase 2 - between Red Robin Drive/Tallac Street and Marconi Avenue: reduce travel lanes from 4 to 2 lanes with a center two-way left-turn lane, new bike lanes and sidewalks, curb and gutter. Modify the intersection of Howe Avenue and Marconi Avenue. (SAC24760)	Completion by 2020	$1,614,660	$1,614,660
SAC24760	Yes	Sacramento	Sacramento County	A- Bike & Ped	Howe Avenue Bike & Ped (Road Diet) Phase 2	Howe Avenue between Red Robin Drive/Tallac Street and Marconi Avenue: reduce travel lanes from 4 to 2 lanes with a center two-way left-turn lane (Road Diet); install new bike lanes, sidewalks, curb and gutter. Modify the intersection of Howe Avenue and Marconi Avenue. (ATP# 0092)(Toll Credits for PE, ROW, CON) (NEPA done in Phase 1, SAC24681)	Completion by 2020	$1,853,000	$1,853,000
SAC22290	Yes	Sacramento	Sacramento County	A- Bike & Ped	I-80 Bicycle / Pedestrian Crossing	In Sacramento County, conduct studies, and environmental work for a bicycle/pedestrian crossing of I-80 west of Madison Avenue.	2021-2036	$550,000	$671,000
SAC24682	Yes	Sacramento	Sacramento County	G- System Management, Operations, and ITS	Intersection Dilemma Zone Protection	Ten (10) signalized intersections throughout the city: Provide advanced "dilemma zone" protection for the high speed main street approaches at ten existing signalized intersections. (HSIP5-03-021)	Completion by 2020	$313,800	$313,800
SAC24604	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Ione Rd/Buckeye Creek Bridge Replacement	Ione Rd, over Buckeye Creek, 0.2 mi S of Meiss Rd. Replace the existing structurally deficient 2 lane bridge with a new 2 lane bridge. (Toll credits for PE, ROW, CON.)	Completion by 2020	$1,990,000	$1,990,000
SAC24606	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Ione Rd/Willow Creek Bridge Replacement	Ione Rd, over Willow Creek, 0.5 mi S Carbondale Rd. Replace the existing structurally deficient 2 lane bridge with a new 2 lane bridge. (Toll credits for PE, ROW & CON)	Completion by 2020	$2,842,000	$2,842,000
SAC24884	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Jackson Hwy (SR 16) @ Watt Ave.	Construct a new roadway grade separation interchange at the intersection of Jackson Hwy and Watt Ave.	Completion after 2036	$25,000,000	
SAC24940	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Jackson Hwy. (SR 16)	Widen: 4 Lanes from Grant Line Rd. to Murrieta Parkway	Completion after 2036	$30,000,000	
CAL15410	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Jackson Hwy. (SR 16)	Widen: 4 lanes from South Watt Ave. to Excelsior Rd. Includes: continuous left turn lane.	2021-2036	$60,000,000	$73,217,000
SAC24287	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Jackson Hwy. (SR 16)	Widen: 6 lanes from South Watt Ave. to Excelsior Rd.	Completion after 2036	$40,000,000	
SAC24688	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Jibbom St. Bridge Rehabilitation	Jibboom St. over American River, 0.1 miles north or Richards Blvd.: Rehabilitate bridge, no added lane capacity. (Toll credits for PE & CON)	Completion by 2020	$10,117,000	$10,117,000
SAC24801	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Kenneth Avenue	4 Lanes from Madison Ave to Oak Ave	Completion after 2036	$10,300,000	
SAC24769	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Kiefer blvd Over Deer Creek	Kiefer Blvd over Deer Creek, 0.7 Mi NW State Rte 16. Replace the existing functionally obsolete one lane structure with a new two lane bridge. (Toll Credits for PE & CON)	Completion by 2020	$1,820,000	$1,820,000
SAC22320	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Kiefer Blvd.	Construct New Road: 4 lanes from Bradshaw Rd. to Sunrise Blvd. Includes: bicycle and pedestrian facilities.	Completion after 2036	$51,200,000	
SAC15200	Yes	Sacramento	Sacramento County	G- System Management, Operations, and ITS	Left Turn Lanes	In Sacramento County, various locations, installation of left turn lanes.	Completion by 2020	$705,000	$739,000
SAC24570	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Lone Tree Rd.	Widen: 4 lanes from Meister Wy. to Elverta Rd.	Completion after 2036	$9,125,000	
SAC24257	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Madison Ave Widening	This project will widen Madison ave from 4 to 6 lanes between Hazel Ave and Greenback Lane in the Fair Oaks area. The project proposes to widen the roadway to accommodate two additional traffic lanes, a raised landscaped median, bicycle and pedestrian facilities, traffic signal modifications and traffic operations system upgrades, landscaping and streetscape enhancements, and soundwalls.	Completion after 2036	$22,361,626	
SAC16500	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Madison Avenue Widening	Madison Avenue from Fair Oaks Blvd. to Hazel Ave.: Widen from 4 to 6 lanes.	2021-2036	$28,246,752	$28,246,752
SAC24802	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Main Avenue	4 Lanes from Madison Ave to Oak Ave	Completion after 2036	$7,900,000	
SAC24571	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Manzanita Ave.	Widen: 6 lanes from Fair Oaks to Cypress; 4 lanes from Cypress to Madison Ave.	Completion after 2036	$1,600,000	
SAC24605	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	McKenzie Rd/Laguna Creek Bridge Replacement	McKenzie Rd, over Laguna Creek, 0.9 mi S of Arno Rd. Replace the existing structurally deficient 2 lane bridge with a new 2 lane bridge. (Toll credits for PE,R/W & CON.)	Completion by 2020	$4,994,000	$4,994,000
SAC24573	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Meister Way Rd.	Construct New Road: 4 lane Rd. from Metro Air Pkwy. to Lone Tree Rd.	Completion after 2036	$2,500,000	
SAC24574	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Meister Way Road	Construct New Road: 4 lanes from Lone Tree Rd. to Hwy. 99.	Completion after 2036	$3,640,000	
SAC24512	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Metro Air Parkway	In Sacramento County, Metro Air Parkway from north of I-5 to Elverta Road: Widen roadway from 2 to 4 lanes.	Completion by 2020	$5,320,000	$5,320,000
SAC24937	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Metro Air Parkway	Widen: from 4 to 6 Lanes from I-5 to Elverta Rd	Completion after 2036	$2,350,800	
CAL20607	Yes	Sutter	Caltrans D3	C- Maintenance & Rehabilitation	SR 99 Passing Lanes	Passing Lanes: Yuba City to Butte County Line.	2021-2036	$20,000,000	$24,406,000
SAC24609	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Michigan Bar Rd/Cosumnes River Bridge Replacement	Michigan Bar Rd, over Cosumnes River, 1.2 mi north of SR 16. Replace the existing one lane structurally deficient bridge with a new 2 lane bridge. (Toll credits for PE, ROW, & CON)	Completion by 2020	$13,783,000	$13,783,000
SAC24620	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	New Hope Rd Bridge Replacement	New Hope Rd over Grizzley Slough, 0.5 mi north of San Joaquin/Sacramento County Line: replace existing structurally deficient 2-lane bridge with a new 2-lane bridge.	Completion by 2020	$5,683,403	$5,683,403
SAC24251	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Oak Ave.	Widen: 4 lanes from Hazel Ave. to Folsom City Limits.	Completion after 2036	$16,400,000	
SAC24753	Yes	Sacramento	Sacramento County	A- Bike & Ped	Old Florin Town Streetscape Phase 2	Florin Rd. out to Power Inn Rd. to the west and Florin Perkins Rd/French Rd. to the east.,: Augment phase 1 of the streetscape by installing continuous separated sidewalks, bicycle lanes, improved transit facilities, median channelization, and improved street lighting. (CMAQ Emission Reductions in kg/day: 0.02 ROG, 0.02 NOx 13, 0.01 PM10)	Completion by 2020	$4,516,947	$4,516,947
SAC24714	Yes	Sacramento	Sacramento County	A- Bike & Ped	Pedestrian Improvements, Various Locations	Various locations throughout Sacramento County: Construct sidewalks, curb ramps, curbs and gutters. (HSIP6-03-017)	Completion by 2020	$1,265,000	$1,265,000

SAC24632	Yes	Sacramento	Sacramento County	A- Bike & Ped	Stevenson Ave. Sidewalks (SRTS)	Stevenson Ave. from the southeast corner of Anna Kirchgater Elementary School to the existing sidewalk near Marjon Way: Construct sidewalk, curb, gutter, and curb ramps. SRTS3-03-007	Completion by 2020	$768,700	$768,700
SAC19700	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Stockton Blvd.	Widen: 6 lanes from 65th Ave. to Hwy. 99.	Completion after 2036	$23,800,000	
SAC19710	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Sunrise Blvd.	In Sacramento County: Sunrise Blvd. between Jackson Highway and Grantline Road; Widen from 2 to 4 lanes	2021-2036	$12,000,000	$18,767,000
SAC24261	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Sunrise Blvd.	Widen: from Madison Ave. to Gold Country Blvd. ITS Strategies and partial grade separation at Fair Oaks Blvd and transit enhancements	Completion after 2036	$6,162,807	
SAC24808	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Sunset Ave	4 Lanes from San Juan Avenue to Fair Oaks Blvd	Completion after 2036	$6,100,000	
SAC24716	Yes	Sacramento	Sacramento County	G- System Management, Operations, and ITS	Traffic Signal Upgrades	At 32 intersections throughout Sacramento County: Upgrade traffic signals. (HSIP6-03-019)	Completion by 2020	$1,060,900	$1,060,900
SAC24522	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Twin Cities Rd Bridge Replacement	Twin Cities Rd, over Snodgrass Slough: Replace the existing 2 lane structurally deficient structure with a new 2 lane structure.	Completion by 2020	$17,550,002	$17,550,002
SAC24772	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Tyler Rd Over Georgiana Slough	Tyler Is Br Rd over Georgiana Slough, 1.5 Mi E of Isleton. Replace the existing 2 lane bridge with a new 2 lane bridge. Toll Credits for PE & CON.	Completion by 2020	$13,618,000	$13,618,000
SAC24283	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Vineyard Rd.	Construct New Road: Enhanced 2 4 lanes from Gerber Rd. to Jackson Hwy.	Completion after 2036	$2,900,000	
SAC24036	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Vineyard Road Bridge Replacement	Vineyard RD, over Laguna Creek, 0.8 MI North of Calvine RD. Replace existing 2 lane bridge with new 2 lane bridge. [See also SAC24156]	Completion by 2020	$4,141,360	$4,141,360
SAC24809	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	W. 6th Street - Rio Linda	4 Lanes from Elkhorn Blvd to Elverta Rd	Completion after 2036	$1,000,000	
SAC24687	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Walnut Grove Bridge Rehab	In Walnut Grove, Walnut Grove crossing, over Sacramento River: Rehabilitate existing bridge.	Completion by 2020	$2,769,375	$2,769,375
SAC24285	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Waterman Road Widening	In Sacramento County: Between Vintage Park Drive to Florin Road; widen existing roadway to 4 lanes and extend roadway from Gerber Road to Florin Road with an at-grade rail road crossing.	2021-2036	$20,000,000	$31,279,000
SAC24885	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Waterman Road Widening	In Sacramento County: Between Florin Rd. to Jackson Rd.; construct roadway to 4 lanes	2021-2036	$16,500,000	$25,805,000
SAC24939	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Watt Ave	Widen: 6 Lanes from Antelope Rd Elverta Rd to Placer County Line	Completion after 2036	$327,000	
SAC24352	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Watt Ave.	Construct New Interchange: Watt Ave. / Folsom Blvd.	Completion after 2036	$7,500,000	
SAC24585	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Watt Ave.	Widen: 6 lanes from I-80 to Palm Ave. Don Julio Blvd.	2021-2036	$16,250,000	$19,830,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SAC15750	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Watt Avenue Couplet	In Sacramento County, Watt Ave: Between Palm Ave. Don Julio Blvd. and Antelope Rd. Elkhorn Blvd. widen to 6 lanes; 3 lanes north bound on Watt Ave and 3 lanes southbound on 34th St; smart growth st. with proposed BRT/HI Bus - exclusive lanes.	2021-2036	$15,600,000	$19,036,000
SAC15720	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Watt Avenue Widening	In Sacramento County, Watt Ave.: Between Elkhorn Blvd and Antelope Rd widen from 4 to 6 lanes	2021-2036	$9,641,800	$15,079,000
SAC24662	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	White Rock Road - Grant Line Rd. to Rancho Cordova City Limits	Widen White Rock Road, from Grant Line Road to Rancho Cordova easterly City limits, from 2 to 4 lanes. Environmental to be cleared as part of SAC24470.	Completion by 2020	$10,000,000	$10,000,000
SAC24936	Project Development Only	Sacramento	Sacramento County	B- Road & Highway Capacity	Winding Way	Widen: 4 Lanes from Auburn Blvd to San Juan Ave Garfield Ave	Completion after 2036	$1,432,500	
SAC24619	Yes	Sacramento	Sacramento County	C- Maintenance & Rehabilitation	Winding Way Bridge Replacement	Winding Way over Chicago Creek, 0.1 mi west of Chicago Ave: Replace existing functionally obsolete 2-lane bridge with a new 2-lane bridge.	Completion by 2020	$2,787,800	$2,787,800
SAC24622	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Zinfandel Drive Extension & Realignment	In Sacramento County: Zinfandel Drive, from Douglas Rd. to 7,100 ft south of Douglas Rd.: reconstruct Zinfandel Drive as a two lane road. From 7,100 ft south of Douglas Rd. to Kiefer Blvd.: extend Zinfandel Dr. as a two lane road on a slightly different alignment than the existing dirt road. Construct concrete box culvert over creek just north of Kiefer Blvd.	Completion by 2020	$5,873,000	$5,873,000
SAC20240	Yes	Sacramento	Sacramento County	B- Road & Highway Capacity	Zinfandel Road Widening	Zinfandel Drive, from Southern boundary of the Villages of Zinfandel to Douglas Road: Widen from 2 to 4 lanes with a raised landscaped median. (For other phases see SAC24473 and SAC24467)	2021-2036	$1,050,000	$1,642,000
SAC24222	Yes	Sacramento	Sacramento County and City of Rancho Cordova	D- Programs & Planning	Jackson Hwy. (SR 16) from Excelsior to Grant Line Road: Project Development and Operational Improvements	Complete project analysis efforts, as needed, to identify and implement operational improvements to improve safety and traffic flow along the corridor in the near-term. Improvements to study may include intersection improvements, access management strategies, and traffic signalization enhancements that benefit travel for automobiles and commercial vehicles. The project listing also allows other project development activities to advance so the corridor segment can eventually become a four lane facility in a manner that is consistent with the City and County's design guidelines. Rancho Cordova would contribute to portions of work between Sunrise and Grant Line within the city's limits.	2021-2036	$5,000,000	$6,101,000
SAC24976	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	LRV Cab Cameras	Install new in cab surveillance camers in RT's light rail fleet to comply with CPUC General Ofer 172	Completion by 2020	$305,482	$320,000
SAC24860	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	12th & I Street Light Rail Station ADA Improvements	This project would make ADA improvements at the 12th & I Street Light Rail Station. Scope includes constructing a new platform and realigning the track.	2021-2036	$11,222,078	$13,694,000
REG17953	Yes	Sacramento	Sacramento Regional Transit District	A- Bike & Ped	29th St. Light Rail Station Enhancements	29th St. Light Rail Station, located at R St. between 29th St. and 30th St.: Add two shelters, a surveillance camera, flashing pedestrian crossing signs, two visible message signs, and other transit amenities. (Emission Benefits in kg/day: ROG 0.15, NOx 0.15, PM10 0.06)	Completion by 2020	$280,500	$280,500
REG18019	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	ADA Rehabilitation/ Renovation	Rehabilitation/ Renovation to Enhance ADA Accessibility at Transit Stops/Stations. Provide enhanced system access for persons with disabilities.	Completion by 2020	$356,643	$356,643
REG18011	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	ADA Service Vehicle Replacement	Replace fifty paratransit vehicles to provide complementary ADA services within the Regional Transit District area.	Completion by 2020	$4,335,000	$4,335,000
REG17962	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	ADA Transition Plan Improvements	Passenger Amenities: Complete facility modifications, as required, in order to make all RT facilities accessible.	2021-2036	$3,281,885	$5,133,000
SAC24977	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Amtrak-Folsom Limited Stop Service	Enhance light rail capacity on the Gold Line to the city of Folsom, light rail system modifications that will give RT the capacity to provide limited stop express service.	Completion by 2020	$12,000,000	$12,587,000
SAC24858	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Artwork at Light Rail Stations	This project is to maintain existing artwork at light rail stations	2021-2036	$70,000	$109,000
SAC24869	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Automatic Passenger Counters	Passenger counters for 97 LRVs to facilitate NTD reporting. 8 counters per LRV.	2021-2036	$1,052,070	$1,284,000
SAC24810	Yes	Sacramento	Sacramento Regional Transit District	D- Programs & Planning	Bicycle/Pedestrian Improvements Study	Conduct study determining amenities to be provided at each stop, design choices, maintenance of waiting areas, safe, attractive access to stops.	Completion by 2020	$300,000	$315,000
SAC24978	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Biennial Bridge Inspection Repairs	Inspection and repair of Bridge stucture elements as found in the periodic inspection.	2021-2036	$1,295,843	$2,027,000
SAC24979	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Building Access System Upgrade	Upgrade card based building access system	Completion by 2020	$111,507	$117,000
SAC24874	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Bus Maintenance Facility #1 Rehabilitation	Rehabilitate the District's existing Bus Maintenance Facility.	Completion by 2020	$10,000,000	$10,489,000
REG18012	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Bus Stop Improvements- Citrus Heights	Bus turn outs and associated improvements.	Completion by 2020	$1,976,604	$1,976,604
SAC24596	Yes	Sacramento	Sacramento Regional Transit District	F- Transit O&M (Bus)	City of Folsom Stage Lines Operating Assistance FFY 2011-2014	City of Folsom (Subrecipient) Operating assistance, preventive maintenance, and ADA operating assistance for transit services within the City of Folsom. Sacramento Urbanized Area.FFY 2011 preventive maintenance: $265,000FFY 2011 ADA operations: $130,000FFY 2012 preventive maintenance: $278,000FFY 2012 ADA operations: $136,000FFY 2014 operating assistance: $184,538FFY 2014 preventive maintenance: $137,446FFY 2014 ADA operations: $89,395	Completion by 2020	$1,663,877	$1,663,877
SAC24637	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	City of Folsom Stagelines Replacement of Cutaway Buses	City of Folsom Stagelines (Subrecipient) Replace up to six 22-foot Cutaway Buses including related equipment and spare parts.	Completion by 2020	$542,475	$542,475
REG18025	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	CNG Paratransit Vehicle Replacement	Replace up to eleven CNG powered paratransits vehicles to provide services to elderly and disabled passengers. (Toll Credits for CON. Emission Benefits in kg/day: 0.07 ROG, 1.45 NOx, 0.03 PM10.)	Completion by 2020	$1,571,200	$1,571,200
REG18014	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	CNG Replacement Buses & Related Spare Parts	Replace up to twenty 40-foot CNG buses including related equipment and spare parts. Procurment for buses and parts to be in three phases. (Uses Toll Credits for local match). (Emission Benefits: 77 kg/day NOx)	Completion by 2020	$28,393,427	$28,393,427
SAC24777	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Communication Equipment Replacement	Replace radio communication equipment as needed. These funds will be used to purchase hand held radios, vehicle radios, rail car radios, MDCs, radio batteries, and equipment that is used to charge these radios.	2021-2036	$1,455,000	$2,276,000
SAC24778	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Data Center Redundancy & Reliability Equipment	Construct secondary data center @ RT's Light Rail Facility (Academny Way) as a backup in the event of a failure at the primary data center at 1225 R St	Completion by 2020	$53,709	$56,000
REG17812	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Data Warehouse Upgrade	Technology Upgrade: Upgrade the Data Warehouse that is currently used by RT staff for enterprise reporting, data analysis, and application data storage and presentation services. Once upgraded, the new data warehouse will provide significant new functionality and performance for RT staff for analysis, reporting, and business intelligence.	2021-2036	$175,000	$214,000
REG18023	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Dos Rios Light Rail Station	On Blue Line light rail, on the east side of 12th St., south of Richards Blvd.: build new light rail station. The station is part of the redevelopment of Twin Rivers public housing development. (Emission Benefits in kg/day: 1.02 ROG, 0.97 NOx, 0.58 PM10)	Completion by 2020	$9,500,000	$9,500,000
REG17983	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Enhance Public Web Based Services (Phase II)	Technology Upgrade: Portal for Real Estate for acquisitions and asset management.	2021-2036	$108,363	$169,000
SAC24779	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	ERP System Disaster Response	Upgrade RT's Enterprise Mgmt System	Completion by 2020	$245,000	$257,000
REG17980	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	FIBER Infrastructure Management Application	Technology Upgrade: Develop a FIBER Infrastructure Management Application.	2021-2036	$120,000	$146,000
REG17952	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Fulton Ave. Bus Shelters	Along Fulton Ave., from Arden Wy. to Auburn Blvd.: Design and install 8 to 11 bus shelters, including easements. (Emission Benefits in kg/day: ROG 0.13, NOx 0.13, PM10 0.05)	Completion by 2020	$169,435	$169,435
REG17816	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	General Facilities Maintenance & Improvements	Transit Capital/Operations: Implement general facility improvements and maintain facilities throughout the district as needed.	2021-2036	$12,724,439	$19,900,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
REG18009	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	General Facility Improvements	Sacramento Regional Transit District: provide for various minor upgrades and improvements to district facilities, such as roof replacement, better lighting, security systems, ventilation, accessibility modifications, and safety enhancements.	Completion by 2020	$764,241	$764,241
REG17943	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Green Line (DNA) Light Rail - Overall	This project will redefine a Minimum Operable Segment (MOS) 2 and a MOS 3. REG17935 includes the Final Design and Construction for the project (excluding MOS-1).This phase of the Green Line to the Airport (DNA) Light Rail Project will consist of two discreet, yet connected efforts. For the segment of the Green Line near and adjacent to the Sacramento Intermodal Transfer Center (SITF), the effort will entail the preparation of Draft EIS (and EIR), its circulation for public review and comment, addressing the comments and will culminate with a Final EIS (and EIR). The segment of the project adjacent to the SITF will be coordinated with on-going Sacramento Streetcar planning, environmental review, and design development. For the remainder of the 13-mile corridor, the effort will entail the preparation of a Draft EIS (and EIR) only and its circulation for public review and comments. An MOS will also be identified for this segment. The effort will also evaluate low-floor LRT vehicles and their integration into the RT system, evaluate LRT vehicle maintenance locations for the Green Line, evaluate downtown Sacramento rail/traffic effects of the proposed service, prepare the necessary technical information and for a New Starts evaluation under MAP-21, and involve the community and stakeholders in an outreach program for both efforts. Advanced conceptual engineering and preliminary engineering in key areas with potential for environmental impacts that may require mitigation strategies for the EIS will be completed.	Completion by 2020	$14,810,336	$14,810,336
REG17935	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Green Line: MOS2 & MOS3	Extend rail from Richards Blvd. to Sacramento International Airport	2021-2036	$698,286,782	$1,092,075,000
SAC24780	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Handheld Smart Card Reader	Purchase hand held smart card readers	Completion by 2020	$116,000	$122,000
SAC24817	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Arden Way	Develop 9-mile enhanced bus corridor on Arden Way. Include 7 artic buses	2021-2036	$20,635,000	$25,180,000
SAC24813	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Auburn Blvd	Develop an enhanced bus corridor along 6.5 miles along Auburn Boulevard between Watt/I-80 and Citrus Heights. Include 5 artic buses. (precursor to LRT to Citrus Heights).	Completion by 2020	$14,700,000	$15,419,000
SAC24879	Project Development Only	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Easton Valley Pkwy	Develop 10.5-mile BRT corridor on Easton Valley Pkwy. Include 8 artic buses	Completion after 2036	$48,226,000	
SAC24814	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on El Camino Ave	Develop an enhanced bus corridor along 15.5 miles Sunrise Mall to the Royal Oaks station. Include 11 artic buses	2021-2036	$34,315,000	$41,874,000
SAC24815	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Florin Rd	Develop Hi Bus corridor on Florin Road with enhanced bus from JFK High School to Old Town Florin (8 miles), and BRT from Old Town Florin to Bradshaw (3.5 miles). Include 9 artic buses	2021-2036	$34,547,000	$42,157,000
SAC24877	Project Development Only	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Freeport Blvd	Develop 8-mile enhanced bus corridor on Freeport blvd. Include 6 artic buses	Completion after 2036	$18,085,000	
SAC24878	Project Development Only	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Jackson Rd	Develop 10-mile BRT corridor along the Jackson Hwy Corridor. Include 8 artic buses	Completion after 2036	$46,371,000	
SAC24816	Project Development Only	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Marconi Ave	Develop 11-mile enhanced bus corridor on Marconi Ave from American River College to the Power Inn light rail station. Include 8 artic buses	Completion after 2036	$24,577,000	
SAC24870	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Stockton Blvd	Develop an enhanced bus corridor along 12 miles along Stockton Boulevard between Downtown Sacramento and Cosumnes River College. Include 9 artic buses	Completion by 2020	$27,127,000	$28,454,000
SAC24818	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Sunrise South	Develop 8-mile enhanced bus corridor on Sunrise Blvd. Include 6 artic buses	2021-2036	$18,085,000	$28,284,000
SAC24812	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Hi-bus on Watt Ave	Develop a 12.5 mile Hi Bus corridor on Watt Avenue between Watt/Manlove station to Placer County Line. Include 9 artic buses	Completion by 2020	$56,804,000	$59,582,000
REG18024	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Horn Light Rail Station	On the Gold Line, between Butterfield and Mather/Mills stations, at Horn Rd. and Old Winery Pl, construct new light rail station. (Emission Benefits in kg/day: 0.27 ROG, 0.26 NOx, 0.15 PM10)	Completion by 2020	$3,600,000	$3,600,000
REG17991	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Implement Document Archival System	Technology Upgrade: Implement a document archival system that converts financial and engineering documents to an electronic and/or microfilm format.	Completion by 2020	$224,000	$235,000
REG17832	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Integrated Contract Admin System (ICAS) Replacement	Technology Upgrade: Replace the Integrated Contract Administration System (ICAS).	Completion by 2020	$160,150	$168,000
REG17833	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Intelligent Transportation Systems	Minor ITS Improvement: Support the Intelligent Transportation Systems Strategic Deployment Plan for the Sacramento Region being coordinated by the Sacramento Area Council of Governments (SACOG).	2021-2036	$9,048,000	$14,150,000
REG18022	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Landscaping - ROW Improvements	Landscaping improvements to existing sound walls located along Folsom Boulevard and the south side of the Sacramento Regional Transit light rail Gold Line within the City of Rancho Cordova.	Completion by 2020	$120,803	$120,803
SAC24781	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	LED Lighting Retrofil	This project is to replace existing High intensity Discharge (metal halide or high pressure sodium) pole lights with LED lighting at light rail stations, park-and-ride lots, light rail Metro yard, and bus and administrative parking lots.	Completion by 2020	$1,880,000	$1,972,000
SAC24862	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Light Rail Control Center Upgrade (LRCC)	This project is to improve the Light Rail Control Center. Scope includes physical upgrades, probably new control center, computers displays, and external interfaces to Passenger Information Signs + RR interlocking SCADA, and communications system upgrades	2021-2036	$4,500,000	$5,491,000
REG17999	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Light Rail Crossing Enhancements	Transit Capital/Operations: Purchase and install, as needed, a variety of components in the grade crossing mechanisms.	2021-2036	$1,826,624	$2,857,000
SAC24782	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Light Rail Digital Messaging control System	Develop new central management software system for RT's digital Light Rail public messaging systems	Completion by 2020	$103,250	$108,000
REG17966	Yes	Sacramento	Sacramento Regional Transit District	A- Bike & Ped	Light Rail Station Pedestrian Improvements	Pedestrian Improvements: At the Fruitridge, Cosumnes River College, and City College light rail stations, improve pedestrian access.	2021-2036	$8,852,113	$10,802,000
REG18008	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Light Rail Station Shelter Improvement Program	Passenger Amenities: Add and improve light rail station shelters.	2021-2036	$1,136,000	$1,386,000
REG17940	Yes	Sacramento	Sacramento Regional Transit District	A- Bike & Ped	Light Rail Station/Bus Stop Enhancements	Enhancement of Sacramento Regional Transit District bus stops including but not limited to: addition of i-stops; benches and trash cans; security improvements, and installation of braille signage. Enhancement of Light Rail Stations including but not limited to: lighting improvements; replacing braille signage; improved pedestrian access to stations; security improvements; and audio enhancements to signage.	Completion by 2020	$1,186,250	$1,186,250
SAC24859	Yes	Sacramento	Sacramento Regional Transit District	D- Programs & Planning	Light Rail Vehicle Specification Development	Develop procurement specifications for the light rail vehicles prior to planned replacements and purchases for light rail extensions.	Completion by 2020	$86,261	$90,000
REG15880	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	LRV Mid-Life Overhaul	SRTD mid-life overhaul of light rail vehicles. (FFY 2007 funds will rehabilitate 6 to 8 vehicles.) (FTA 5307 funds are unused funds from FFY 2005)	Completion by 2020	$9,946,412	$9,946,412
REG17930	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Major LRT Station Enhancements	Passenger Amenities: Light rail stations. Includes:parking lot/sidewalk repairs, mini high shelters, slurry seal, restriping, curb replacement, planter construction, landscape replanting, drainage improvements, and fencing repairs.	2021-2036	$31,768,589	$49,684,000
SAC24783	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Metro Light Rail Yard Expansion	Modify, reconfigure and expand the Metro light rail yard (or other terminal yards). Add storage yard tracks at Academy Way site	2021-2036	$10,521,000	$12,839,000
REG18005	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Metro West LR Maintenance Facility (Specialty Steel)	Transit Capital/Operations: Renovate building at 2531 Land Avenue for use as a light rail body shop.	Completion by 2020	$1,026,660	$1,077,000
REG18028	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Vehicles)	Neighborhood Ride Vehicle Replacement	Purchase 14 Neighborhood Ride CNG Vehicles to replace vehicles which have surpassed their useful lives.	Completion by 2020	$1,919,114	$1,919,114

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
REG17975	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Network Backup and Data Archive Upgrade	Technology Upgrade: Upgrade/replace RT's data backup and archive system.	Completion by 2020	$104,320	$109,000
REG17967	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Network Firewall Upgrade	Technology Upgrade: Upgrade RT's network security infrastructure by retiring and replacing the aging and obsolete network firewall.	2021-2036	$32,030	$39,000
SAC24864	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	New Light Rail Stations	Project is to build stations previously deferred during construction of the light rail system: such as Dos Rios, Horn, T St, Mineshaft, Ramona or others.	2021-2036	$17,000,000	$26,587,000
SAC24811	Yes	Sacramento	Sacramento Regional Transit District	D- Programs & Planning	New Transit Oriented Development-Related Professional Services	Assistance and approvals in developing TOD projects on RT property	2021-2036	$225,000	$352,000
REG17959	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Minor)	Noise Attenuation Soundwalls	Transit Capital/Operations: construct soundwalls at various locations along the light rail system.	2021-2036	$1,722,245	$2,693,000
REG16470	Yes	Sacramento	Sacramento Regional Transit District	E- Transit Capital (Major)	Northeast Corridor Enhancements	Double track existing single track sections and improve alignment of Northeast Corridor LRT, upgrade the traction power system and signaling to provide limited-stop service, make enhancements to yard track and maintenance facility, and installation of communications infrastructure. (Local Agency Funds are from selling a parcel of land.)	Completion by 2020	$40,000,000	$40,000,000
SAC24784	Yes	Sacramento	Sacramento Regional Transit District	G- System Management, Operations, and ITS	Operations Computer Systems Upgrades	Computer Upgrades and replacements for various RT operating/support departments	Completion by 2020	$205,000	$215,000

SUT18887	Yes	Sutter	City of Live Oak	A- Bike & Ped	Live Oak Community Trail	Construct New Class I Bikeway along O St. from Pennington Rd. to Kola St. (Phase 3)	2021-2036	$520,000	$635,000
SUT18917	Yes	Sutter	City of Live Oak	A- Bike & Ped	Live Oak Community Trail	Construct New Class I Bikeway along the abandon Sacramento Northern Railroad right-of-way from Elm St. to the Pennington Rd./O St. Intx. (Phase 2)	2021-2036	$885,000	$1,080,000
SUT16987	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Luther Rd.	Road Reconstruction: from the current existing city boundary to Riviera Rd. Includes: drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$5,887,000	$9,207,000
SUT18884	Project Development Only	Sutter	City of Live Oak	B- Road & Highway Capacity	N St.	Construct New Road: 2 lane collector from current City Limit to Paseo Ave. Includes: drainage, curb, gutter, sidewalk, and bike lanes.	Completion after 2036	$6,786,000	
SUT18885	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	N St.	Road Reconstruction: from Fir St. to Apricot St. Includes drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$1,418,000	$2,218,000
SUT17017	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	N St.	Road Reconstruction: from Kola St. to Epperson Way. Includes: curb, gutters, sidewalks, drainage improvements, and bike lanes.	2021-2036	$1,256,000	$1,533,000
SUT18883	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	N St.	Road Reconstruction: from Pennington Road to Fir St. Includes drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$623,000	$760,000
SUT17019	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Nevada St.	Road Reconstruction: from Hwy. 99 to Larkin Rd. Includes: curb, gutter, sidewalk, and drainage improvements.	2021-2036	$600,000	$938,000
SUT18890	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	P St.	Road Reconstruction: from Pennington Road to Apricot St. Includes drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$1,870,000	$2,925,000
SUT18889	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	P St.	Road Reconstruction: from Park St. to Pennington Road Includes drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$567,000	$692,000
SUT18891	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Paseo Ave.	Reconstruct roadway from Hwy. 99 to Township Road, realign west 0.5 mi. Includes: drainage improvements, curb, gutter, sidewalk, and bike lanes.	2021-2036	$11,150,000	$17,438,000
SUT16985	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd.	Road Reconstruction: from Township Rd. to Luther Rd. Includes: drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$3,973,000	$6,214,000
SUT18892	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd.	Road Reconstruction from K St. to Sinnard Ave. Includes: curb and gutter, sidewalk, drainage improvements, bike lanes and underground utilities.	2021-2036	$1,800,000	$2,815,000
SUT16992	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd.	Road Reconstruction from Larkin Rd. to K St. Includes: curb and gutter, sidewalk, drainage improvements, bike lanes and underground utilities.	2021-2036	$1,500,000	$1,830,000
SUT17004	Project Development Only	Sutter	City of Live Oak	B- Road & Highway Capacity	Pennington Rd.	Widen and Reconstruct: add 2 traffic lanes from Hwy. 99 to N Street. Includes: center median with turn pockets, drainage improvements, bike lanes, and underground utilities.	Completion after 2036	$1,500,000	
SUT17010	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd.	Road Reconstruction from Connecticut Ave. to Luther Rd. Includes: drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$1,370,000	$1,672,000
SUT16997	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd.	Road Reconstruction: from Sinnard Ave. to Sheldon Ave. Includes: drainage, curb, gutter, sidewalk, and bike lanes.	2021-2036	$1,079,000	$1,687,000
SUT17012	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd.	Road Reconstruction from Hwy. 99 to Larkin Rd. Includes: curb and gutter, sidewalk, drainage improvements, bike lanes and underground utilities.	2021-2036	$1,000,000	$1,220,000
SUT17008	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd.	Road Reconstruction from P St. to Connecticut Ave. Includes: drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$415,000	$506,000
SUT18858	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Pennington Rd. Complete Streets Rehabilitation	Pennington Rd., from Connecticut Ave. to Broadway: reconstruct roadway and restripe existing bicycle lanes.	Completion by 2020	$1,094,776	$1,094,776
SUT17006	Yes	Sutter	City of Live Oak	B- Road & Highway Capacity	Pennington Road Widening Phase 2	In Live Oak: Pennington Road from N Street to P Street, reconstruct adding 2 new traffic lanes and center median with turn pockets, drainage improvements, bike lanes and undergrounding utilities.	2021-2036	$243,100	$380,000
SUT16990	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Riviera Rd.	Road Reconstruction: from Township Rd. to Hwy. 99. Includes: drainage, curb and gutter, sidewalk, and bike lanes. (Phase II)	2021-2036	$7,332,000	$11,467,000
SUT16983	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Riviera Road	In Live Oak, Riviera Road from SR99 to Larkin Road reconstruct road and install drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$4,518,000	$5,513,000
SUT18898	Project Development Only	Sutter	City of Live Oak	B- Road & Highway Capacity	Road 9	Construct New Road: 2 lane collector from Richard Ave. to Linda St. Includes: drainage, curb, gutter, sidewalk, and bike lanes.	Completion after 2036	$2,808,000	
SUT18900	Yes	Sutter	City of Live Oak	B- Road & Highway Capacity	Road E	Construct New Road: 2 lane collector from SR 99 to Riviera Rd. Includes: drainage, curb, gutter, sidewalk, and bike lanes.	2021-2036	$3,822,000	$5,977,000
SUT18902	Yes	Sutter	City of Live Oak	B- Road & Highway Capacity	Sean Drive	Construct New Road: 2 lane collector from Luther Rd. to Road C. Includes: drainage, curb, gutter, sidewalk, and bike lanes.	2021-2036	$2,028,000	$3,172,000
SUT16991	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Sinnard Ave.	Road Reconstruction: from Fir St. to Pennington Rd. Includes: drainage, curb and gutter, sidewalk, and bike lanes.	2021-2036	$542,700	$849,000
SUT16981	Project Development Only	Sutter	City of Live Oak	B- Road & Highway Capacity	South Loop Road	In Live Oak, phase-1 Township to Sinnard, construct South Loop Road, a new 4 lane connector including drainage, curb and gutter, sidewalk, and bike lanes	Completion after 2036	$1,581,650	
SUT16989	Yes	Sutter	City of Live Oak	C- Maintenance & Rehabilitation	Township Rd.	Road Reconstruction: from Pennington Road to Riviera Road. Includes drainage, curb, gutter, sidewalk, and bike lanes.	2021-2036	$9,436,000	$14,757,000
SUT16988	Project Development Only	Sutter	City of Live Oak	B- Road & Highway Capacity	Township Road	In Live Oak, Phase-1 from Paseo Road to Pennington Road construct Township Road a new 4 lane connector including drainage, curb and gutter, sidewalk, and bike lanes.	Completion after 2036	$17,083,000	
SUT18864	Yes	Sutter	City of Yuba City	A- Bike & Ped	Bike Lane Striping Upgrades	At 14 intersections within the City limits: Upgrade bike lane striping. (HSIP5-03-025)	Completion by 2020	$128,600	$128,600
SUT16956	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Bogue Rd.	Widen: 4 lanes from Harter Pkwy. to Garden Hwy.	Completion after 2036	$15,991,800	
SUT16957	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Bogue Rd.	Widen: 4 lanes from George Washington Blvd. to Harter Pkwy.	Completion after 2036	$140,720	
SUT16976	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Bogue Rd.	Widen: 4 lanes from Township Rd. to George Washington Blvd.	Completion after 2036	$437,390	

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
SUT18859	Yes	Sutter	City of Yuba City	C- Maintenance & Rehabilitation	Bogue Rd. Complete Streets Rehabilitation	Bogue Rd., from Railroad Ave. to Garden Highway: rehabilitate roadway, widen shoulders to accommodate new bicycle lanes and add bicycle video detection at intersection of Bogue Rd. and Garden Highway.	Completion by 2020	$514,100	$514,100
SUT16953	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Bridge St.	Widen: 4 lanes from Western Pkwy. to Walton Ave.	2021-2036	$14,633,100	$22,885,000
SUT10250	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Bridge Street Widening	In Yuba City, Widen Bridge Street from Cooper Street to Gray Avenue: widen to 4 lanes.	2021-2036	$9,393,543	$9,393,543
SUT16961	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Butte House Rd.	Widen: 4 lanes from Township Rd. to Tharp Rd.	Completion after 2036	$1,348,640	
SUT16963	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Clark Ave.	Roadway Operational Improvements: from Richland Rd. to Franklin Ave. add a continuous left-turn lane and bike lanes.	2021-2036	$6,016,405	$9,409,000
SUT16969	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	El Margarita Rd.	Roadway Operational Improvements: from Hwy. 20 to Franklin Rd. add a continuous left turn lane and bike lanes.	2021-2036	$2,689,965	$4,207,000
SUT10828	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Feather River Bridge at 5th St	5th St/Bridge St crossing over the Feather River/2nd St, between Marysville and Yuba City: Replace two-lane bridge with 4-lane bridge. (HPP# 3631)	Completion by 2020	$94,391,864	$94,391,864
SUT16977	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Franklin Ave.	Widen: 4 lanes from Plumas Blvd. to Garden Hwy.	Completion after 2036	$558,443	
SUT10530	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Franklin Avenue	Widen Franklin Avenue from 2 to 4 lanes from Route 99 to Clark Avenue.	2021-2036	$5,224,500	$8,171,000
SUT16954	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Franklin Rd.	Widen: 4 lanes from Township Rd. to Hwy. 99.	Completion after 2036	$2,368,460	
SUT18874	Yes	Sutter	City of Yuba City	A- Bike & Ped	Franklin Road Improvements	Yuba City on Franklin Road, between Harding Road and Walton Avenue: Install a mid-block high visibility crosswalk, fill in sidewalk gaps, add full length Class II Bicycle Lanes, update all pedestrian access ramps, and provide associated road improvements.	Completion by 2020	$393,000	$393,000
SUT18837	Yes	Sutter	City of Yuba City	A- Bike & Ped	Garden Highway Bicycle Lanes and Sidewalks	Garden Highway, from Lincoln Rd to Winship Rd: Construct class II bike lanes and sidewalks. (Emission Benefits in kg/day: 0.03 ROG, 0.02 NOx, 0.01 PM10)	Completion by 2020	$814,101	$814,101
SUT10540	Yes	Sutter	City of Yuba City	A- Bike & Ped	Garden Hwy.	Bike Lane Facilities: From Franklin Ave. to Second St provide bicycle facilities. Includes: on-street improvements .	2021-2036	$1,100,000	$1,342,000
SUT16970	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	George Washington Blvd.	Widen: 4 lanes from Hwy. 20 to Bogue Rd.	Completion after 2036	$17,356,800	
SUT16971	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	George Washington Blvd.	Construct New Road: 4 lanes from Pease Rd. to Hwy. 20.	2021-2036	$13,911,100	$21,756,000
SUT10260	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Harter Road	In Yuba City, construct 4 lanes, Harter Road between Lassen Boulevard and Bridge Street.	Completion after 2036	$1,644,201	
SUT18871	Yes	Sutter	City of Yuba City	D- Programs & Planning	Highway 20 Opportunity Based Implementation Plan	Highway 20 corridor in Yuba City.,: identify specific improvements including sidewalks, lighting, and signage.	Completion by 2020	$100,000	$100,000
SUT16964	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Highway 99	Widen: 6 lanes from Hwy. 20 to Bogue Rd.	Completion after 2036	$31,434,000	
SUT16955	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Lincoln Rd.	Widen: 4 lanes from Township Rd. to Garden Hwy.	Completion after 2036	$3,276,290	
SUT16962	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Pease Rd.	Widen: 4 lanes from Township Rd. to Hwy. 99	Completion after 2036	$3,317,690	
SUT16974	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Pease Rd.	Construct New Interchange: 4 lanes at Pease Rd. / Hwy 99. Includes: overcrossing and connecting ramps at Hwy 99.	2021-2036	$57,880,554	$90,521,000
SUT16975	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Percy Ave.	Widen: 4 lanes from Franklin Ave. to Garden Hwy. Includes: landscaped medians.	2021-2036	$6,632,500	$10,373,000
SUT16960	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	State Route 20 - Stabler Lane to State Route 99	Widen State Route 20 from 4 to 6 lanes from Stabler Lane to State Route 99	Completion after 2036	$874,540	
SUT16958	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Sunsweet Blvd.	Construct New Road: 2 lanes from Hwy. 99 to Gray Ave.	2021-2036	$8,675,500	$13,568,000
SUT16966	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Tharp Rd.	Widen: 4 lanes from Hwy. 20 to Butte House Rd.	2021-2036	$2,351,734	$3,678,000
SUT10241	Yes	Sutter	City of Yuba City	B- Road & Highway Capacity	Walton Avenue Widening	Widen Walton Ave from Lincoln Rd. to Franklin Rd. from 2-3 lanes to 5 lanes including upgrades to bike lanes, sidewalks, curbs, gutters, and drainage.	2021-2036	$13,762,794	$21,524,000
SUT16965	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Walton Avenue Widening	Widen Walton Avenue to 4-lanes from Bogue Road to Augusta Lane	Completion after 2036	$9,879,408	
SUT10813	Project Development Only	Sutter	City of Yuba City	B- Road & Highway Capacity	Western Parkway	Construct Western Parkway (4 lanes) from State Route 20 to Butte House Road	Completion after 2036	$10,000,000	
CAL18590	Project Development Only	Sutter	PCTPA	B- Road & Highway Capacity	Route 99, New Interchange	Sutter County, north of Sacramento: along Route 99 between Riego Road and Sankey Road, construct new interchange	Completion after 2036	$1,100,000	
SUT10450	Yes	Sutter	SACOG	D- Programs & Planning	Sutter County PPM	Plan, program and monitor for Sutter County.	Completion by 2020	$708,000	$708,000
SUT18850	Yes	Sutter	Sutter County	C- Maintenance & Rehabilitation	Bridge Preventive Maintenance Program	Bridge Preventive Maintenance Program, Various locations.: See http://www.dot.ca.gov/hq/LocalPrograms/hbrr99/HBP_MPO.html#SACOG web site for backup list of locations.	Completion by 2020	$685,000	$685,000
SUT18869	Yes	Sutter	Sutter County	A- Bike & Ped	Brittan Elementary School Pedestrian Improvements	Brittan Elementary School.: Provide six-feet wide sidewalks around the perimeter. (Emission Benefits in kg/day: 0.01 ROG)	Completion by 2020	$527,505	$527,505
SUT18876	Project Development Only	Sutter	Sutter County	B- Road & Highway Capacity	Howsley Rd Widening	Widen Howsley Rd between Pleasant Grove Rd and Natomas Rd	Completion after 2036	$3,960,000	
SUT18875	Yes	Sutter	Sutter County	C- Maintenance & Rehabilitation	Kent Road Bridge at Sutter Butte Canal.	Kent Road over Sutter Butte Canal, 0.2 Mi South of McDonald Ave.: Replace two lane bridge with two lane bridge. (Toll credits for ROW & CON.)	Completion by 2020	$1,220,000	$1,220,000

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

YOL19377	**Yes**	Yolo	City of West Sacramento	A- Bike & Ped	I Street to Indian Heritage Bike Trail	Construct Bike Trail under I Street Bridge and new C Street Bridge then continue atop levee to Indian Heritage Center	2021-2036	$2,000,000	$2,441,000
YOL15891	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	I-80 Enterprise Boulevard	In West Sacramento, I-80 at Enterprise Boulevard: construct eastbound on-ramp.	Completion by 2020	$4,800,000	$4,800,000
YOL15670	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	I-80/Reed Ave. Interchange	I-80 at Reed Ave. interchange: widen ramps at the intersection with Reed Avenue, widen Reed Avenue, and limit some local street access. Add ramp metering to the on-ramps.	2021-2036	$12,350,000	$15,070,000
YOL15160	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	Industrial Boulevard Widening	In West Sacramento, Industrial Boulevard from the Palamidessi Bridge at the Barge Canal to Harbor Boulevard: widen from 4 to 6 lanes.	2021-2036	$16,440,000	$25,711,000
YOL15940	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	Lake Washington Blvd.	Widen Lake Washington Blvd. from 2 to 6 lanes from Jefferson Blvd. to the new Palamidessi Bridge at the barge canal.	2021-2036	$4,000,000	$4,881,000
YOL15950	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	Lake Washington Blvd.	Lake Washington Blvd.: Widen the Palamidessi Bridge over the barge canal from 4 to 6 lanes.	2021-2036	$10,100,000	$15,796,000
YOL19329	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	Pioneer Bluff Bridge Phase 2 - Village Parkway Extension	In West Sacramento, South River Rd., 0.42 miles, from the new Pioneer Bluff Bridge across the old barge canal to the Stone Lock facility: Build 2 lane road roadway, sidewalk, bike lane, landscaping, water and storm drain utilities, and will accommodate a future north-south streetcar line that would extend from Stone Lock north to the Bridge District. (see YOL19317 for Phase 1)	Completion by 2020	$4,900,000	$4,900,000
YOL19361	**Yes**	Yolo	City of West Sacramento	G- System Management, Operations, and ITS	Port of West Sacramento Entrance	This project includes the construction of a new port entrance, including the installation of a new rail crossing near Beacon and Industrial Boulevards. This project will increase the efficiency and safety of travel to, from and within the Port, and is required prior to the construction of a new area project. This project will improve transportation operations, and is likely to lead to significant positive economic benefits.	2021-2036	$2,400,000	$2,929,000
YOL19288	**Yes**	Yolo	City of West Sacramento	D- Programs & Planning	Rail relocation & reconfiguration study	Service Plan: Study rail relocation and reconfiguration through West Sacramento. The intent of the study will be to seek implementing a proposed solution and leveraging public and private funding for implementation.	Completion by 2020	$1,000,000	$1,049,000
YOL19223	**Yes**	Yolo	City of West Sacramento	G- System Management, Operations, and ITS	Sacramento River Deep Water Ship Channel Deepening	Dredge remainder of 35 miles of 43 mile ship channel an additional 5' to 35' in depth. This 15% increase in channel depth will allow larger ships and thus will increase allowable ship capacity by 40% (from 25,000 tons to 35,000 tons). Ship channel boundaries are from Collinsville (just above Suisun Bay) up to West Sacramento.	2021-2036	$157,464,000	$246,263,000
YOL19351	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	Seaway Property Infrastructure	Construct internal roadway, utilities and storm drainage network for Port Property Development	2021-2036	$5,000,000	$6,101,000
YOL15180	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	South River Rd. Widening	Reconstruct and widen South River Road to 4-lanes from US50 on-ramp to Stonegate Boulevard, including restriping the 4-lane bridge from 2-lanes to 4-lanes over barge canal.	2021-2036	$16,250,000	$16,250,000
YOL19335	**Yes**	Yolo	City of West Sacramento	A- Bike & Ped	Sycamore Trail/Westacre and Bryte Bicycle Routes	Rice Ave. to West Capitol Ave., Harbor Blvd. and 3rd St., Jefferson Blvd. to Michigan Rd.,: construct 0.5 miles of a multi-use path, street crossing enhancements, and two bicycle routes. (Emission Benefits in kg/day: 0.12 ROG, 0.06 NOx, 0.03 PM 2.5, 0.03 PM 10)	Completion by 2020	$905,324	$905,324
YOL19378	**Yes**	Yolo	City of West Sacramento	A- Bike & Ped	Sycamore Trail-Phase 2	Construction of Bike Trail from Tony Lopes Park to Stone Boulevard. Includes Bike/Ped Bridge over US Hwy 50.	Completion by 2020	$10,000,000	$10,489,000
YOL19349	**Yes**	Yolo	City of West Sacramento	A- Bike & Ped	Sycamore Trail-Phase 3	Construction of Bike Trail from Sacramento Avenue to Westfield School	2021-2036	$5,000,000	$6,101,000
YOL15900	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	U.S. 50/Jefferson Blvd. Interchange	Jefferson Blvd interchange--expand the ramps and signals from 1 to 2 lanes, add ramp metering and turn lanes, and related street closures.	2021-2036	$26,450,000	$41,366,000
YOL15680	**Yes**	Yolo	City of West Sacramento	G- System Management, Operations, and ITS	U.S. 50/South River Road	U.S. 50: Install ramp meters and modify ramp design at South River Rd interchange.	2021-2036	$23,625,000	$23,625,000
YOL19360	**Yes**	Yolo	City of West Sacramento	B- Road & Highway Capacity	Village Parkway Southern Extension	This project includes the design of, procurement of right of way for and construction of Village Parkway from Stonegate Drive to Davis Road. This new street will serve the Northeast and Southeast villages of the Southport area, improve circulation in the eastern portion of the city, and relieve traffic congestion on Jefferson Boulevard. This segment will provide the primary connection to the planned South River Road Bridge across the Barge Canal, thereby connecting the Stone Lock, Pioneer Bluff and redevelopment areas to the growing residential areas to the south. Flood program to construct interim improvements from Lake Washington to Gregory.	2021-2036	$10,500,000	$12,813,000
YOL19297	**Yes**	Yolo	City of West Sacramento	A- Bike & Ped	Washington School District Partent Corps SRTS	Multiple Schools in the Washington Unified School District in West Sacramento: Create citywide (Safe Routes to Schools) SRTS Parent Corps by training one parent champion to implement education and encouragement programs at their schools; provide pedestrian and bicycle safety skills training; implement walk- and bike-to-school events, frequent walker/rider miles contests, and distribution of safe routes to school maps. SRTS3-03-008	Completion by 2020	$496,000	$496,000
YOL19348	**Yes**	Yolo	City of West Sacramento	A- Bike & Ped	West Capitol Ave Cycle Track	West Capitol Avenue between 5th St. and Garden St.: Pedestrian improvements and raised "cycle track" (a physically separated bike path within the public right of way), convert the travel way from two-way to one-way, and reconfigure the two intersections at 5th St. and at Garden St., including removing a signalized intersection.	Completion by 2020	$87,000	$87,000
YOL19284	**Yes**	Yolo	City of West Sacramento	A- Bike & Ped	West Capitol Avenue Streetscape Improvements - Phase 3	In West Sacramento on West Capitol Avenue from Westacre Road to Sycamore Avenue, construction of streetscape improvements, including wider sidewalks, flatter road cross-section, reconfigure lanes, roundabout, utility relocation, new lighting, and substantial planting and hardscape treatments.	2021-2036	$12,420,000	$15,156,000

YOL17310	**Project Development Only**	Yolo	City of Woodland	B- Road & Highway Capacity	County Rd. 102	Widen: 4 lanes from Beamer St. to East Main St.	Completion after 2036	$2,896,851	
YOL17330	**Project Development Only**	Yolo	City of Woodland	B- Road & Highway Capacity	County Rd. 102	In Woodland, from Kentucky Ave to Beamer St, on CR102: widen from 2 to 4 lanes.	Completion after 2036	$2,896,851	

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
YOL17550	Yes	Yolo	City of Woodland	B- Road & Highway Capacity	County Rd. 102	Widen: 4 lanes from Gibson Rd. to Heritage Pkwy.	2021-2036	$4,000,000	$6,256,000
YOL19287	Project Development Only	Yolo	City of Woodland	B- Road & Highway Capacity	County Rd. 25A	Construct New Road: 2 lanes from Pioneer Ave. to County Rd. 102	Completion after 2036	$4,500,000	
YOL19281	Yes	Yolo	City of Woodland	A- Bike & Ped	Downtown Streetscape (Main St.)	In Woodland on Main St., between Third St. and Sixth St.: Construct streetscape improvements, including improved sidewalks, landscaping, trees, bulb-outs, A.D.A. ramps, a pedestrian actuated signal, etc. Also construct frontage improvements at Freeman Park. (Toll Credits for CON)	Completion by 2020	$1,065,000	$1,065,000
YOL19305	Yes	Yolo	City of Woodland	A- Bike & Ped	East Main St. Improvements	In the City of Woodland along East Main Street, from East Street to east of Pioneer Avenue. Construct sidewaks, 10-foot off-street bike path and associated landscape and irrigation, class II bike lanes and bus turnouts. Project will also construct safety improvements to include medians, updated freeway and local street signage and lane striping changes to improve traffic flow near the freeway entrances/exits. (Toll credits for PE and CON)	Completion by 2020	$2,880,000	$2,880,000
YOL17560	Project Development Only	Yolo	City of Woodland	B- Road & Highway Capacity	East St.	Widen: 4 lanes from County Rd. 24A to 1320' south of Gibson Rd.	Completion after 2036	$1,900,000	
YOL19321	Yes	Yolo	City of Woodland	B- Road & Highway Capacity	Farmer's Central Road - Harry Lorenzo to Pioneer	In Woodland, Farmer's Central Road, from Harry Lorenzo Ave to Pioneer Avenue: Construct new 2-lane road.	Completion by 2020	$1,600,000	$1,600,000

YUB16035	Yes	Yuba	Yuba County	B- Road & Highway Capacity	Hammonton Smartville Rd. Shoulder Widening	Hammonton Smartville Rd between South Golden Parkway and approx. 1 mile west: Widen and pave shoulder, including installation of safety edge. (HSIP6-03-022)	Completion by 2020	$665,000	$665,000
YUB15939	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Hammonton-Smartsville Rd. / Goldfields Pkwy.	Traffic Signalization: at Hammonton-Smartsville Rd/Goldfields Pkwy.	2021-2036	$300,000	$366,000
YUB15940	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Hammonton-Smartsville Rd. / Griffith Ave.	Traffic Signalization: at Hammonton-Smartsville Rd/Griffith Ave.	2021-2036	$300,000	$366,000
YUB16030	Yes	Yuba	Yuba County	B- Road & Highway Capacity	Hammonton-Smartsville Rd. Shoulder Improvements	Hammonton-Smartsville Rd. from 0.18 mile E of Doolittle Gate Rd. to 2.28 miles E of Doolittle Gate Rd.: Widen and pave shoulders, curve corrections. (HSIP5-03-026)	Completion by 2020	$1,123,600	$1,123,600
YUB15938	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Hammonton-Smartville Rd. / Dantoni Rd.	Traffic Signalization: at Hammonton-Smartsville Rd/Dantoni Ave.	2021-2036	$300,000	$366,000
YUB15867	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Highway 70	Widen: overpass at McGowan Pkwy. Includes: new traffic signals.	2021-2036	$4,200,000	$5,125,000
YUB16032	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Iowa City Rd. Bridge Replacement	Iowa City Rd. over Jack Slough, 0.35 miles east of Fruitland Rd.: Replace existing 2 lane bridge with a new 2 lane bridge. (Toll credits for PE, ROW, CON)	Completion by 2020	$903,000	$903,000
YUB15942	Yes	Yuba	Yuba County	B- Road & Highway Capacity	La Porte Rd.	Widen and Realign: from Butte County to Willow Glen Rd.	2021-2036	$3,200,000	$5,005,000
YUB15944	Project Development Only	Yuba	Yuba County	B- Road & Highway Capacity	Links Parkway Extension to County Club Road	From Plumas Arboga Rd to Country Club Rd., construct new extension of Links Parkway.	Completion after 2036	$12,000,000	
YUB15943	Project Development Only	Yuba	Yuba County	B- Road & Highway Capacity	Links Pkwy.	Construct New Road: 4 lane arterial from Ella Ave. to Plumas Arboga Rd.	Completion after 2036	$850,000	
YUB15906	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Links Pkwy. / Anderson Rd.	Traffic Signalization: at Links Pkwy/Anderson Rd.	2021-2036	$267,000	$326,000
YUB15945	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Loma Rica Rd.	Roadway Operational Improvements: Widen and construct turn pockets at various locations. Includes: shoulder widening.	Completion by 2020	$2,650,000	$2,780,000
YUB15946	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Loma Rica Rd.	Traffic Signalization: at Hwy. 20 / Loma Rica Rd.	2021-2036	$300,000	$366,000
YUB16031	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Los Verjeles Rd. Bridge Replacement	Los Verjeles Rd., over South Honcut Cr., at Butte County Line: Replace existing 2 lane bridge with a new 2 lane bridge.	Completion by 2020	$3,151,000	$3,151,000
YUB15949	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Marysville Rd.	Roadway Operational Improvements: Construct turn pockets and widen shoulders at various intersections from Hwy. 20 to Willow Glen Rd.	Completion by 2020	$3,955,000	$4,148,000
YUB16040	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Mathews Ln. and Ramirez Rd. Farm-to-Market Project	Matthews Ln., from Woodruff Ln. to Ramirez. Rd., and Ramirez Rd., from Matthews Ln. to Fruitland Rd.,: Rehabilitate lanes and improve intersection to connect to Farm-to-Market truck destinations.	Completion by 2020	$2,460,400	$2,460,400
YUB15950	Yes	Yuba	Yuba County	B- Road & Highway Capacity	McGowan Parkway	Construct 3-lane collector McGowan Parkway from Arboga Road to Union Pacific Railroad.	2021-2036	$1,300,000	$2,033,000
YUB15871	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	McGowan Parkway and Arboga Road Traffic Signalization	Install new Traffic Signal at the intersection of McGowan Parkway and Arboga Road.	Completion by 2020	$250,000	$262,000
YUB15951	Project Development Only	Yuba	Yuba County	B- Road & Highway Capacity	McGowan Pkwy.	Widen: 4 lanes from UPRR to Hwy. 65. Includes: turn lane, curb, gutter, sidewalk, and landscaping.	Completion after 2036	$278,000	
YUB15868	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	McGowan Pkwy. / UPRR	Rail Crossing Project: Upgrade the existing at grade intersection at the UPRR tracks.	2021-2036	$810,000	$988,000
YUB15886	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	N. Beale Rd. / Griffith Rd.	Traffic Signalization: at the intersection of North Beale Rd. / Griffith Rd.	2021-2036	$215,000	$262,000
YUB16018	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	New York House Rd Bridge Replacement	New York House Rd over Dry Creek, 0.2 miles northeast of Frenchtown Rd: Replace the existing structurally deficient 2 lane bridge with a new 2-lane bridge. (Toll Credits for PE, ROW & CON). Toll Credits for ENG, Toll Credits for ROW, Toll Credits for CON	Completion by 2020	$1,680,000	$1,680,000
YUB16041	Yes	Yuba	Yuba County	A- Bike & Ped	North Beale Rd. Complete Streets Phase 2	North Beal Rd.,from Hammonton Smartsville Rd. to Linda Ave.: construct bicycle lanes, curb and gutter, sidewalks, drainage facilities, lighting and other improvements.	Completion by 2020	$3,233,138	$3,233,138

Appendix A1: 2016 MTP/SCS Project List

Projects listed as "Project Development Only" are anticipated to begin early stages of development including project planning, design, preliminary engineering, environmental clearance, and ROW acquisition by 2036. These projects remain eligible to seek federal and state funding, but under the financial constraint requirements for projecting revenues, the construction phase is not included in the DPS. If/when additional revenues for these projects become available to cover full construction costs, these projects can be considered as part of an amendment to the MTP/SCS following a technical analysis and consistency with plan requirements. While total costs are shown for these projects, for budgeting purposes, no more than 10% of the total project costs are anticipated to be captured within the MTP/SCS planning period. Year of expenditure costs are not provided since construction of these projects is not part of the financially constrained project list.

Project ID	Included in DPS	COUNTY	LEAD AGENCY	CATEGORY	TITLE	PROJECT DESCRIPTION	Completion Timing	TOTAL COST (2015 Dollars)	YEAR OF EXPENDITURE COST
YUB16027	Yes	Yuba	Yuba County	A- Bike & Ped	North Beale Rd. Complete Streets Revitalization Phase 1	Construct complete streets improvements for a one-mile stretch on North Beale Rd. from Lindhurst Ave. to Hammonton Smartsville Rd. in the community of Linda. The project will construct curbs, gutters, sidewalks, ADA compliant corner ramps, transit stop enhancements, intersection improvements and several other streetscape features. (PE is programmed on YUB16008) (Toll Credits for CON)	Completion by 2020	$1,995,000	$1,995,000
YUB16029	Yes	Yuba	Yuba County	A- Bike & Ped	North Beale Rd. Complete Streets Revitalization Phase 3	Construct complete streets improvements for a 9400 ft stretch on North Beale Rd. from Linda Avenue. to Griffith Ave. in the community of Linda. The project will construct curbs, gutters, sidewalks, ADA compliant corner ramps, transit stop enhancements, intersection improvements and several other streetscape features. (PE is programmed on YUB16008)	Completion by 2020	$11,450,000	$12,010,000
YUB15877	Yes	Yuba	Yuba County	B- Road & Highway Capacity	North Beale Road Improvements	Widen Roadway from 2-lanes to 4-lanes and install curb gutter and sidewalk from Linda Ave to Griffith Rd.	Completion by 2020	$2,000,000	$2,000,000
YUB15892	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Olivehurst Ave. / McGowan Pkwy.	Traffic Signalization: at the intersection of McGowan Pkwy. and Olivehurst Ave.	Completion by 2020	$215,000	$226,000
YUB16012	Yes	Yuba	Yuba County	A- Bike & Ped	Olivehurst Ave. Complete Street	Olivehurst Ave., from 7th Ave. to McGowan Pkwy: Install curbs, gutters, sidewalks, bicycle lanes, center turn lane, improved transit stops, and associate drainage improvements.	Completion by 2020	$1,820,000	$1,820,000
YUB16042	Yes	Yuba	Yuba County	A- Bike & Ped	Olivehurst Ave. Roundabout	At intersection of Olivehurst Ave. and Powerline Rd.: construct a roundabout, widen sidewalks to facilitate pedestrians and bicyclists around the perimeter of the roundabout, install lighting and provide refuge islands at Powerline Rd. to the east and Oliverhurst Ave. to both the north and south.	Completion by 2020	$810,000	$810,000
YUB15913	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Plumas Arboga Rd.	Rail Crossing Project: Upgrade at the Union Pacific Railroad.	2021-2036	$815,000	$995,000
YUB15915	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Plumas Arboga Rd.	Traffic Signalization: at Plumas Arboga Rd. / Arboga Rd.	2021-2036	$267,000	$326,000
YUB15917	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Plumas Arboga Rd.	Traffic Signalization: at Plumas Arboga Rd. / Feather River Blvd.	2021-2036	$267,000	$326,000
YUB15918	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Plumas Arboga Rd.	Traffic Signalization: at Plumas Arboga Rd. / Links Pkwy.	2021-2036	$267,000	$326,000
YUB15908	Yes	Yuba	Yuba County	B- Road & Highway Capacity	Plumas Arboga Rd.	Widen 2 to 3 lane collector from Arboga Rd. to UPRR.	2021-2036	$2,000,000	$3,128,000
YUB15909	Project Development Only	Yuba	Yuba County	B- Road & Highway Capacity	Plumas Arboga Rd.	Widen from 2 to 3 lane collector from UPRR to Algodon Rd.	Completion after 2036	$8,700,000	
YUB15916	Yes	Yuba	Yuba County	B- Road & Highway Capacity	Plumas Arboga Rd.	Widen 2 to 3 lane collector from Feather River Blvd. to Arboga Rd.	2021-2036	$2,500,000	$3,910,000
YUB15958	Project Development Only	Yuba	Yuba County	B- Road & Highway Capacity	Plumas Arboga Rd. Ext	Plumas Arboga Rd. Extension to the new interchange at SR 65	Completion after 2036	$2,675,000	
YUB15919	Yes	Yuba	Yuba County	B- Road & Highway Capacity	Plumas Lake Blvd.	Construct New Road: 4 lanes from Plumas Lake Blvd. Interchange to Plumas Arboga Rd. Includes: a structure over the RR tracks.	2021-2036	$2,700,000	$4,223,000
YUB16006	Yes	Yuba	Yuba County	A- Bike & Ped	Powerline Rd Bike/Ped Improvements Phase 2	Olivehurst, on Powerline Rd, from 15th Ave. to 9th Ave.: Construct new sidewalks and bicycle lanes. (Emission Benefits: 0.01 ROG kg/day.)	Completion by 2020	$1,342,800	$1,342,800
YUB16034	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Rices Crossing Rd. Bridge	Rices Crossing Rd, Over Oregon House Creek, 0.04 MI S/E Marysville Rd., replace structurally deficient 2 lane bridge with a new 2 lane bridge. (Toll Credits for PE, R/W, & CON.)	Completion by 2020	$921,000	$921,000
YUB15920	Yes	Yuba	Yuba County	B- Road & Highway Capacity	River Oaks Blvd	Construct new 4-lane modified arterial from Algodon Rd to Draper Ranch South development.	2021-2036	$7,500,000	$11,730,000
YUB15925	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	River Oaks Blvd.	Traffic Signalization: at River Oaks Blvd. / Broadway St.	2021-2036	$270,000	$329,000
YUB15921	Yes	Yuba	Yuba County	B- Road & Highway Capacity	River Oaks Blvd.	Road Extension: 4 lanes from Broadway St. to Draper Ranch South development.	Completion by 2020	$6,300,000	$6,608,000
YUB15923	Yes	Yuba	Yuba County	B- Road & Highway Capacity	River Oaks Blvd.	Road Extension: 2 inner lanes of 4-lane arterial from Feather River Blvd. to Lateral 16.	2021-2036	$2,000,000	$3,128,000
YUB16017	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Scales Rd Bridge Widening	Scales Rd, over Slate Creek, 3 miles northeast of La Porte Rd.: replace existing 1 lane bridge with a new 2 lane bridge. (Toll Credits for PE, ROW & CON)	Completion by 2020	$3,076,000	$3,076,000
YUB16033	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Spring Valley Rd. Bridge Replacement	Spring Valley Rd. over Little Dry Creek, 0.3 miles west of Marysville Rd.: Replace existing 2 lane bridge with a new 2 lane bridge. (Toll credits for PE, ROW, CON)	Completion by 2020	$1,703,000	$1,703,000
YUB16022	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Spring Valley Rd/ Browns Valley Ditch Bridge Replacement	Spring Valley Rd, over Browns Valley Ditch, 2 mi NE of SH 20. Replace the existing functionally obsolete 2 lane bridge with a new 2 lane bridge. (Toll credits programmed for PE, ROW, & CON.)	Completion by 2020	$1,506,000	$1,506,000
YUB15580	Yes	Yuba	Yuba County	B- Road & Highway Capacity	SR 65 Interchange at Forty Mile Road	South of Marysville, SR 65 at Forty Mile Road Interchange: construct interchange to accommodate traffic from the Yuba County Motorplex.	2021-2036	$2,070,000	$3,237,000
YUB15965	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Timbuctoo Rd. Bridge Replacement	In Yuba County: Timbuctoo Road, over Deep Ravine No.1, 1 mile NW/O SR 20. Replace the existing structurally deficient one lane bridge with a new two lane bridge. (Toll Credits for ROW & CON)	Completion by 2020	$1,946,000	$1,946,000
YUB16023	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Waldo Rd/Dry Creek Bridge Replacement	Waldo Rd, over Dry Creek. Replace the existing one lane truss bridge with a new two lane bridge. (Toll credits for PE, ROW, & CON.)	Completion by 2020	$2,868,000	$2,868,000
YUB15956	Yes	Yuba	Yuba County	G- System Management, Operations, and ITS	Woodruff Ln.	Roadway Safety Improvements: Widen shoulders on each side of road from Hwy. 70 to Hwy. 20.	2021-2036	$2,300,000	$2,807,000
YUB15967	Yes	Yuba	Yuba County	C- Maintenance & Rehabilitation	Woodruff Ln.	Pavement Rehabilitation: from Hwy. 70 to Jack Slough Rd.	Completion by 2020	$600,000	$629,000
YST10440	Yes	Yuba	Yuba Sutter Transit	E- Transit Capital (Minor)	New Freedom Accessible Path in Linda	Construction of an ADA accessible path to a currently inaccessible, but high use bus stop on North Beale Road in the unincorporated community of Linda. Includes curbs, gutters, and sidewalks; accessible curb cuts; accessible pedestrian signals; and other accessibility features as necessary and appropriate for the selected bus stops. (Toll Credits for CON)	Completion by 2020	$200,000	$200,000
YST10435	Yes	Yuba	Yuba Sutter Transit	E- Transit Capital (Minor)	North Beale Rd & Lowe Ave Transit Accessibility	At North Beale Rd & Lowe Ave: Construct an ADA accessible path to a high use Yuba-Sutter Transit bus stop including the curbcuts, sidewalks, accessible pedestrian signals and other accessibility features as necessary. (FFY 2007 and FFY 2008 FTA Section 5317 funds programmed in 2008 with Yuba County General Funds for the local match.)	Completion by 2020	$57,500	$57,500

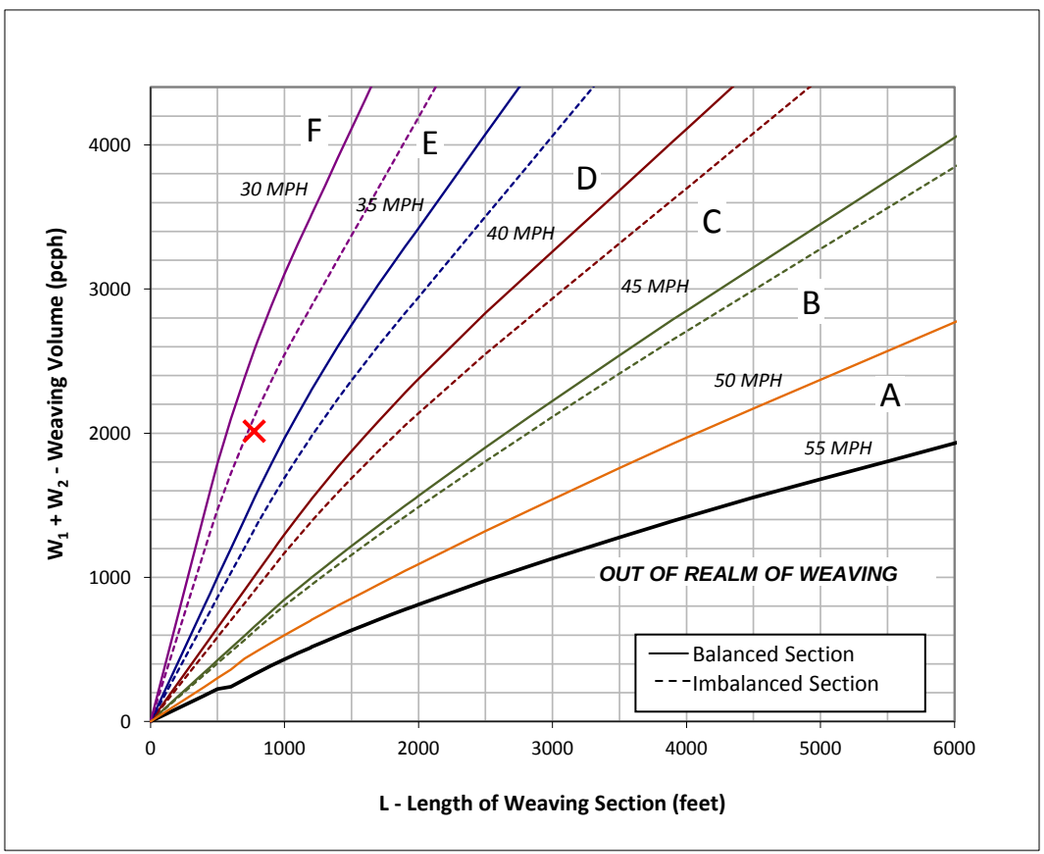
Leisch Method for Weaving Analysis

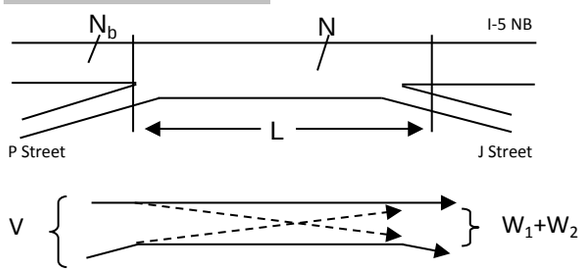
Data Input		
Number of Entering Mainline Lanes	N_b	4
Number of Lanes in Weaving Section	N	5
Length of Weaving Section (feet)	L	775

Project Information	
Project	Railyards / MLS Stadium / Kaiser
Scenario	Baseline No Project AM Peak Hour
Freeway	I-5 NB
On-ramp	P Street
Off-ramp	J Street

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	8,391	Volume (vph)*	339	Volume (vph)*	1,635
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	8,794	Volume (pcph)	346	Volume (pcph)	1,668



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**30 MPH** and **35 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	32.7
4. Weaving Intensity Factor (k)	3.00
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,897
6. Level of Service (LOS)	E

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

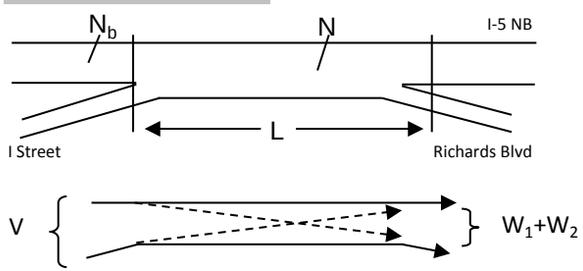
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**35 MPH** and **40 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	36.7
4. Weaving Intensity Factor (k)	2.73
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,506
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
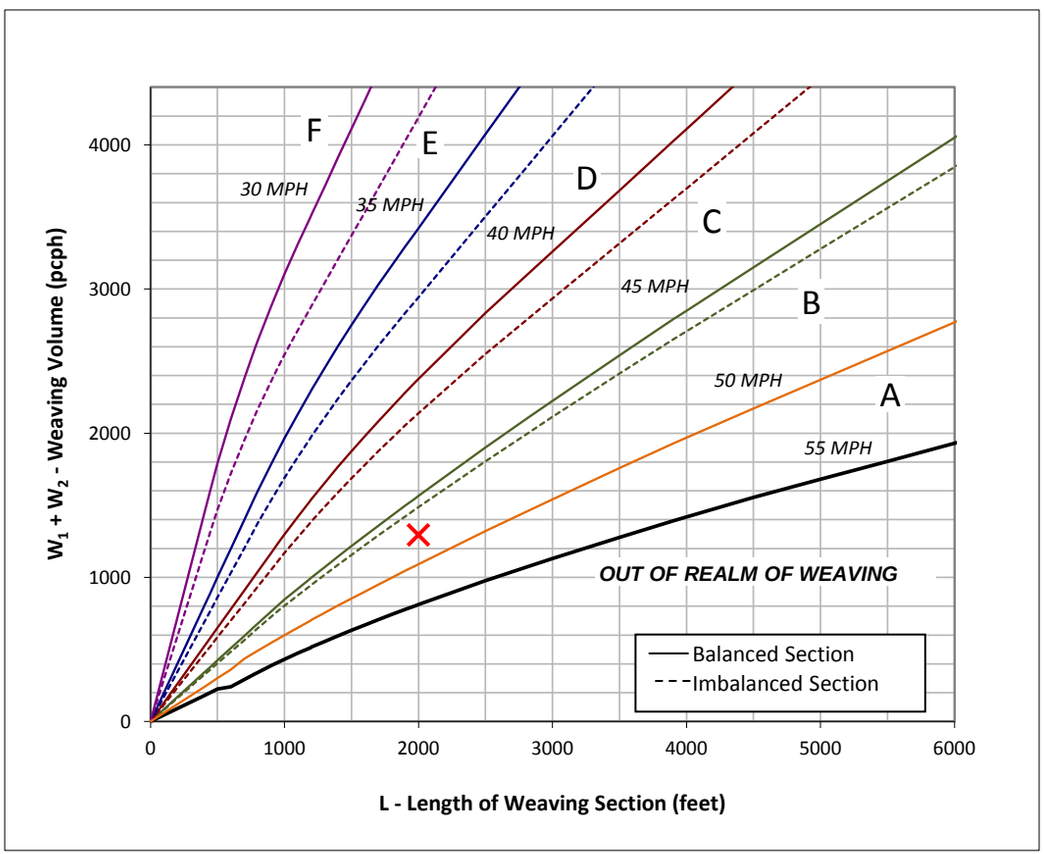
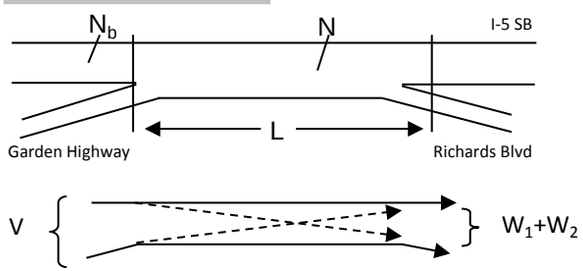
Volume (vph)*	6,996	Volume (vph)*	747	Volume (vph)*	521
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	7,332	Volume (pcph)	762	Volume (pcph)	531



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? **N**
   If optional exit lane, then "Y". Otherwise "N".
2. In the chart to the left, which two speed curves is the red "x" between?
   45 MPH and **50 MPH**
   If left of the 30 MPH curve, LOS is F. Select "-".
   If below the 55 MPH curve, out of the realm of weaving.
3. Interpolated Weaving Speed (S_w, mph) **47.5**
4. Weaving Intensity Factor (k) **1.32**
5. Service Volume (SV, pcph)
   $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$ **1,501**
6. Level of Service (LOS) **D**

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

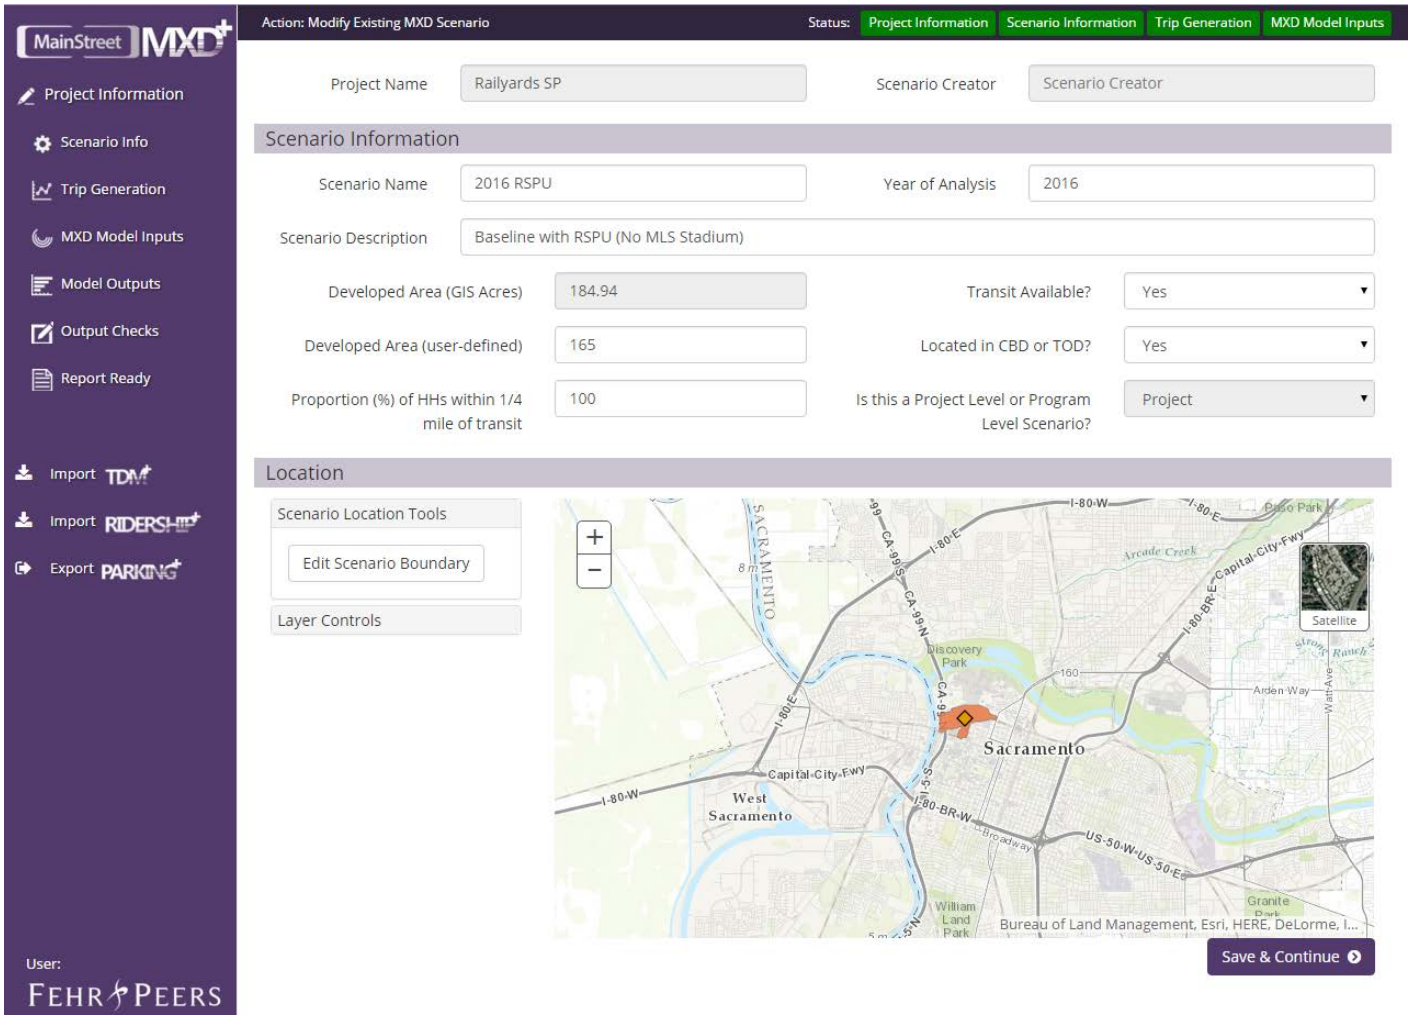
RSPU, 2007 Plan, and Land Use Variant Trip Generation

RSPU Trip Generation – Baseline Conditions

MODEL INPUTS



Railyards Specific Plan Update (RSPU) Trip Generation

	FP Category	ITE Land Use	ITE Code	Units	Quantity	Daily Total	AM In	Am Out	AM Total	PM In	PM Out	PM Total
⊗	Office	(610) - Hospital (Pk Hr of Generator, AM & PM)	610	1000 sq ft gross floor area	658	8699	373	259	632	305	458	763
⊗	Office	(720) - Medical-Dental Office Building (Adj Streets, 7-9A, 4-6P)	720	1000 sq ft gross floor area	510	18426	963	256	1219	510	1311	1821
⊗	Retail	Custom	000	Custom	905.36	53416	746	456	1204	2173	2354	4527
⊗	Hotel	(310) - Hotel (Adj Streets, 7-9A, 4-6P)	310	Rooms	1100	8987	344	239	583	337	323	660
⊗	Residential	(232) - High-Rise Residential Condominium/Townhouse(Pk Adj Streets, 7-9A, 4-6P)	232	Dwelling Units	6000	25080	388	1652	2040	1414	866	2280
⊗	Other	(580) - Museum (Adj Streets, 7-9A, 4-6P)	580	1000 sq ft gross floor area	180	0	138	22	160	17	87	104
⊗	Office	(710) - General Office Building (Pk Hr, AM & PM)	710	1000 sq ft gross floor area	4542.73	50106	6237	850	7087	1151	5618	6769
TOTAL						164714	9189	3734	12925	5907	11017	16924

Notes on ITE trip rate estimates above:

- General Office – average rate used given amount of office space
- Retail – custom rate of 59 daily trips, 1.33 AM peak hour trips, and 5.00 PM peak hour trips per ksf used based on average size of approximately 150,000 square feet of retail per block area of the plan.
- Kaiser Medical Center generates 1,850 AM peak hour trips and 2,580 PM peak hour trips using ITE rates. This approximatley matches the project's unadjusted trip generation (see Table 4 of Tech Memo #2) of 2,056 AM peak hour trips and 2,500 PM peak hour trips.
- Museum land use does not include a daily trip rate. Accordingly, we have manually added 1,600 daily trips to the total trip generation.
- Trips associated with proposed Stadium are handled outside of the MXD+ Model.

MODEL OUTPUT (BASELINE PLUS RSPU CONDITIONS)

MXD+ Vehicle Trip Generation Reduction Percent			
	Daily	AM	PM
Internal Capture	12.7%	17.7%	19.8%
Shift to Transit	7.3%	12.8%	12.7%
Shift to Walk/Bike	11.9%	14.5%	11%

RSPU Trip Generation – Cumulative Conditions

TOTAL						177461	6646	4594	11240	7345	10109	17454

Notes on ITE trip rate estimates above:

- General Office – average rate used given amount of office space (i.e., consistent with approach used for trip generation of RSPU Buildout)
- Retail – custom rate of 59 daily trips, 1.33 AM peak hour trips, and 5.00 PM peak hour trips per ksf used based on average size of approximately 150,000 square feet of retail per block area of the plan. This approach maintains consistency with methodology used for RSPU Buildout.

- MXD+ allows for only one 'custom land use'. Therefore, trip generation of 'other uses' (i.e., museum and performing arts center) were added to the other retail category. Trips for these categories were assumed to be 4,819 daily, 645 AM peak hour, and 869 PM peak hour per 2007 Railyards DEIR.

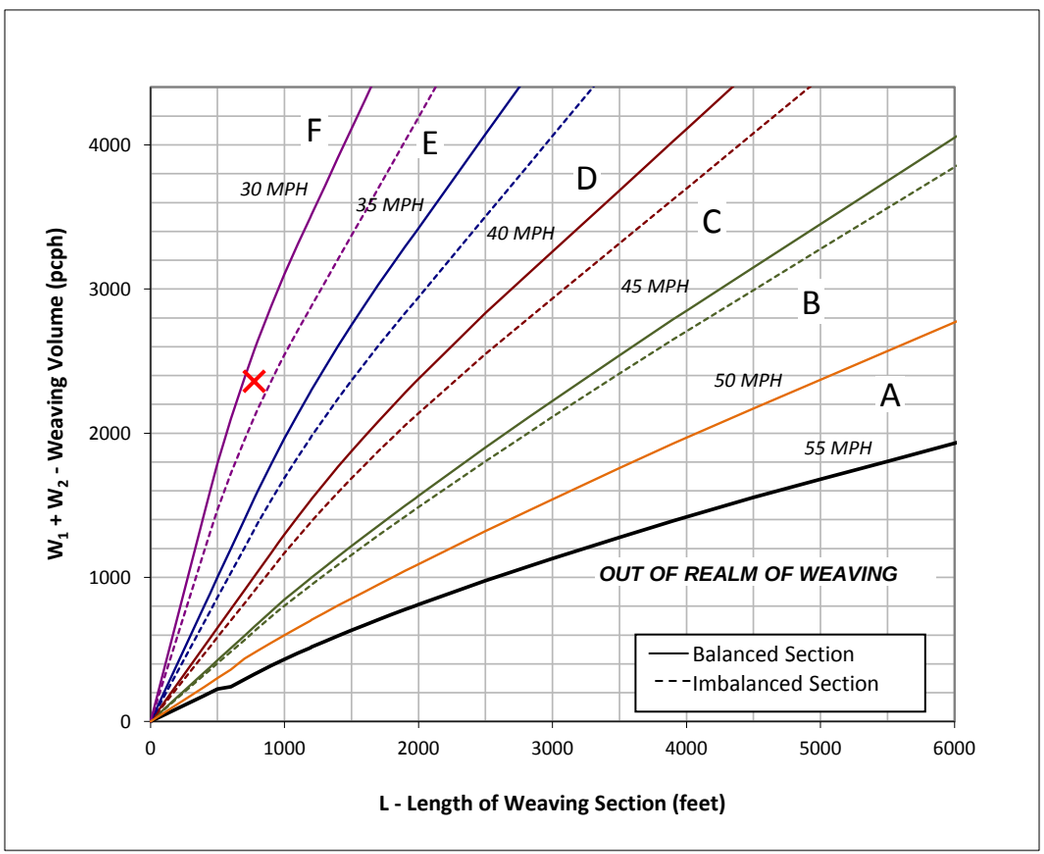
Leisch Method for Weaving Analysis

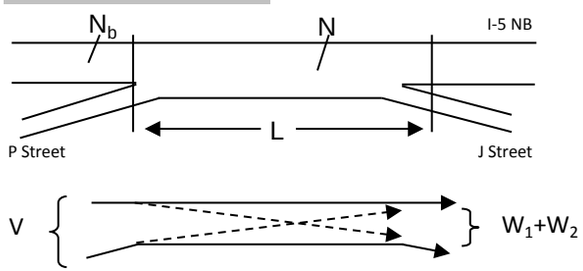
Data Input		
Number of Entering Mainline Lanes	N_b	4
Number of Lanes in Weaving Section	N	5
Length of Weaving Section (feet)	L	775

Project Information	
Project	Railyards / MLS Stadium / Kaiser
Scenario	Baseline Plus RSPU AM Peak Hour
Freeway	I-5 NB
On-ramp	P Street
Off-ramp	J Street

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	9,065	Volume (vph)*	339	Volume (vph)*	1,974
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	9,500	Volume (pcph)	346	Volume (pcph)	2,013



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)?	Y
If optional exit lane, then "Y". Otherwise "N".	
2. In the chart to the left, which two speed curves is the red "x" between?	**30 MPH** and **35 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	31.1
4. Weaving Intensity Factor (k)	3.00
5. Service Volume (SV, pcph)	
SV = (1/N)*[V + (k - 1)*min(W_1, W_2)]	2,038
6. Level of Service (LOS)	F

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

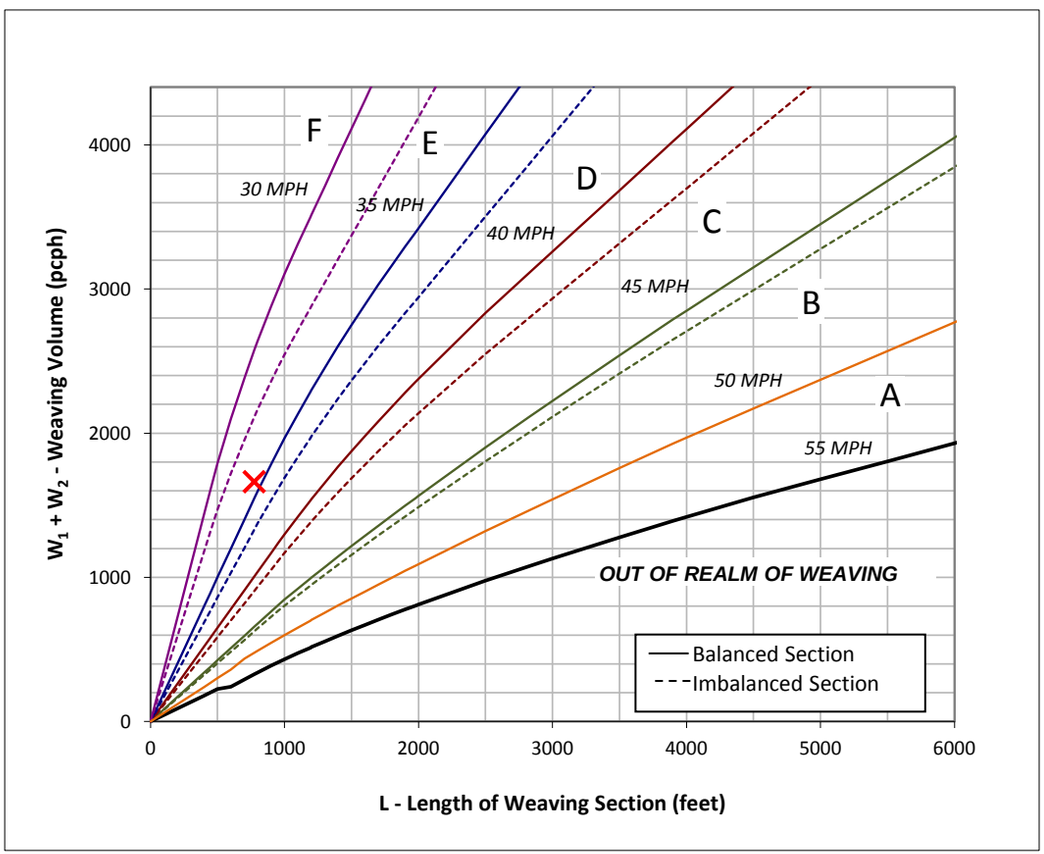
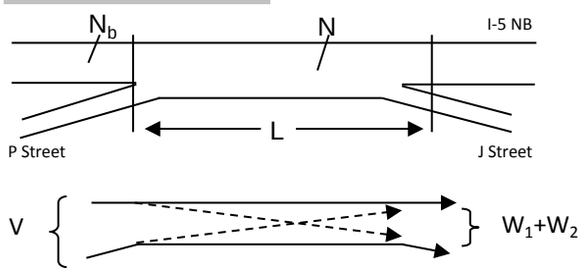
Volume (pcph)	7,451	Volume (pcph)	1,091	Volume (pcph)	572



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**30 MPH** and **35 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	34.4
4. Weaving Intensity Factor (k)	2.82
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,698
6. Level of Service (LOS)	E

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

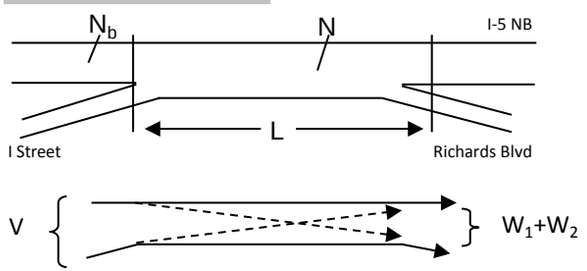
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	N
2. In the chart to the left, which two speed curves is the red "x" between?	**35 MPH** and **40 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	35.2
4. Weaving Intensity Factor (k)	2.78
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	2,415
6. Level of Service (LOS)	F

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

Freeway	I-5 NB
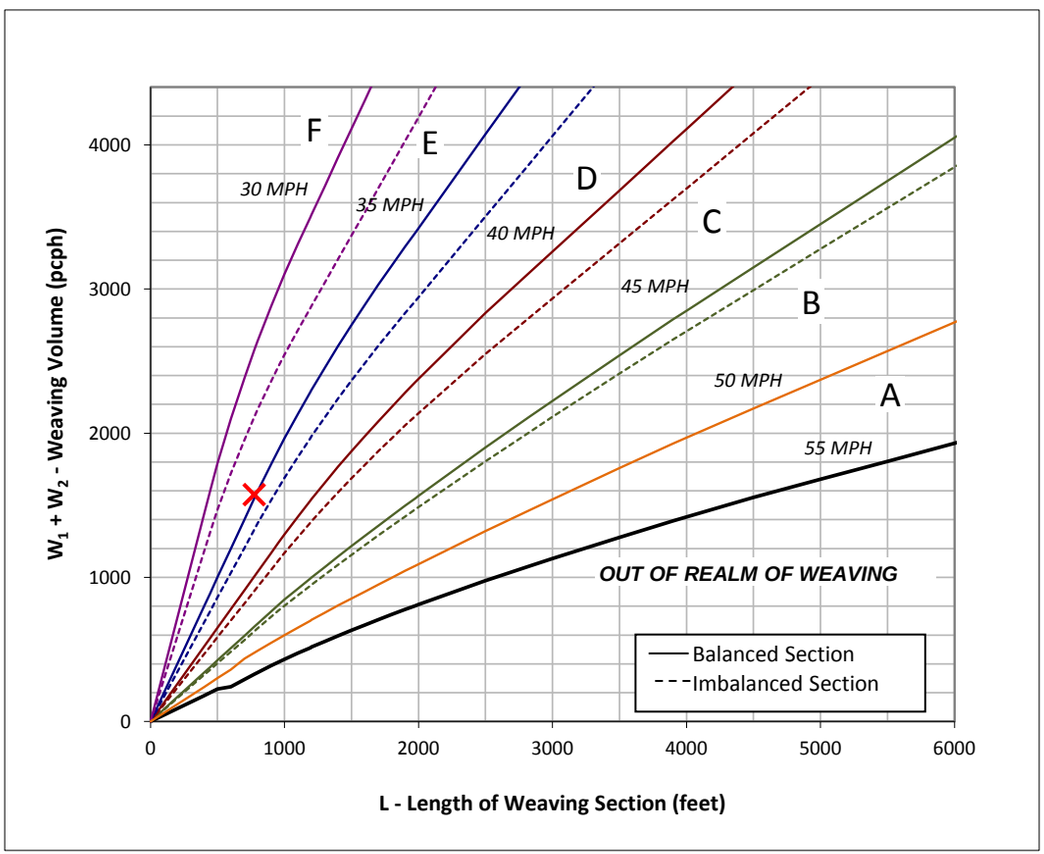
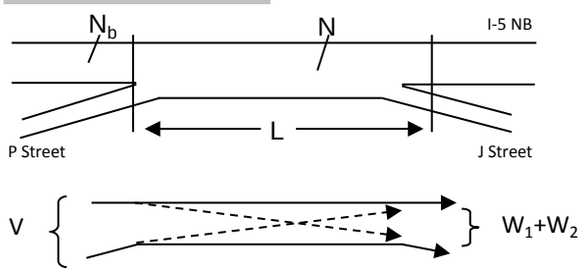
On-ramp	P Street
Off-ramp	J Street



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? **Y**

   If optional exit lane, then "Y". Otherwise "N".

2. In the chart to the left, which two speed curves is the red "x" between?

   30 MPH and **35 MPH**

   If left of the 30 MPH curve, LOS is F. Select "-".

   If below the 55 MPH curve, out of the realm of weaving.

3. Interpolated Weaving Speed (S_w, mph) **34.9**
4. Weaving Intensity Factor (k) **2.80**
5. Service Volume (SV, pcph)

   $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$ **1,630**
6. Level of Service (LOS) **D**

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

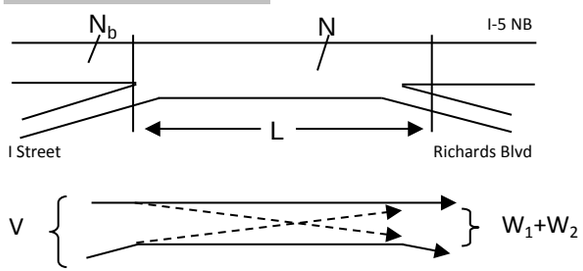
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**30 MPH** and **35 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	31.0
4. Weaving Intensity Factor (k)	3.00
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,930
6. Level of Service (LOS)	F

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

2. In the chart to the left, which two speed curves is the red "x" between?	**40 MPH** and **45 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	41.3
4. Weaving Intensity Factor (k)	2.41
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,474
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

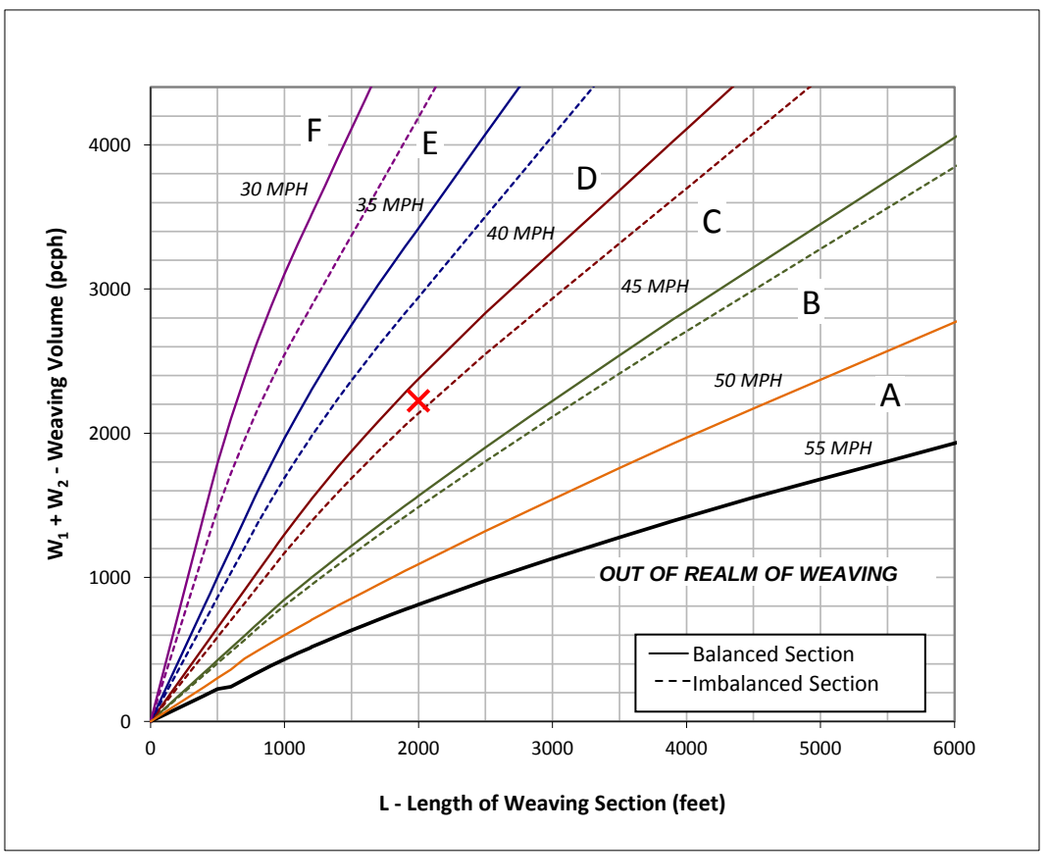
Leisch Method for Weaving Analysis

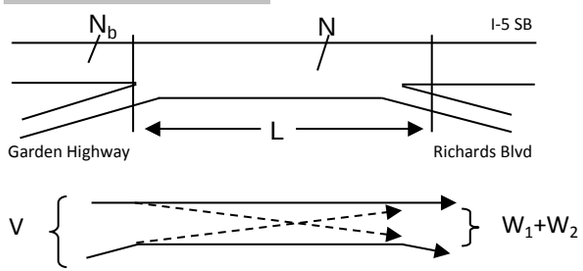
Data Input		
Number of Entering Mainline Lanes	N_b	4
Number of Lanes in Weaving Section	N	5
Length of Weaving Section (feet)	L	2,000

Project Information	
Project	Railyards / MLS Stadium / Kaiser
Scenario	Baseline Plus Medical Center AM Peak Hour
Freeway	I-5 SB
On-ramp	Garden Highway
Off-ramp	Richards Blvd

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	8,500	Volume (vph)*	700	Volume (vph)*	1,480
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	8,908	Volume (pcph)	714	Volume (pcph)	1,510



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)?	N
If optional exit lane, then "Y". Otherwise "N".	
2. In the chart to the left, which two speed curves is the red "x" between?	**40 MPH** and **45 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	39.4
4. Weaving Intensity Factor (k)	2.56
5. Service Volume (SV, pcph)	
SV = (1/N)*[V + (k - 1)*min(W_1, W_2)]	2,005
6. Level of Service (LOS)	F

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

Leisch Method for Weaving Analysis

Data Input		
Number of Entering Mainline Lanes	N_b	4
Number of Lanes in Weaving Section	N	5
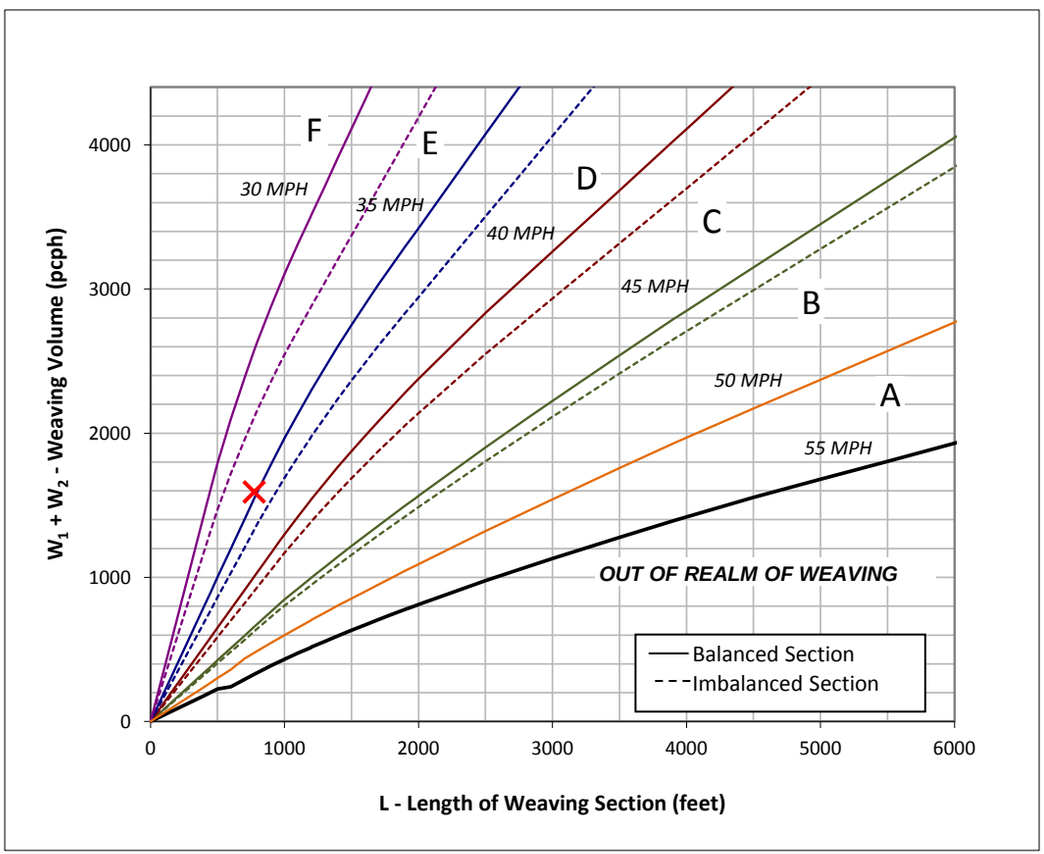
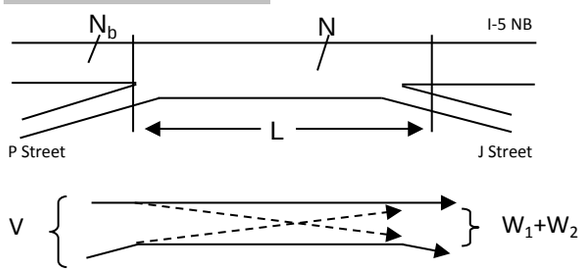
Length of Weaving Section (feet)	L	775

Project Information	
Project	Railyards / MLS Stadium / Kaiser
Scenario	Baseline No Project PM Peak Hour
Freeway	I-5 NB
On-ramp	P Street
Off-ramp	J Street

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	6,872	Volume (vph)*	1,070	Volume (vph)*	491
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	7,202	Volume (pcph)	1,091	Volume (pcph)	501



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**35 MPH** and **40 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	34.6
4. Weaving Intensity Factor (k)	2.81
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,622
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

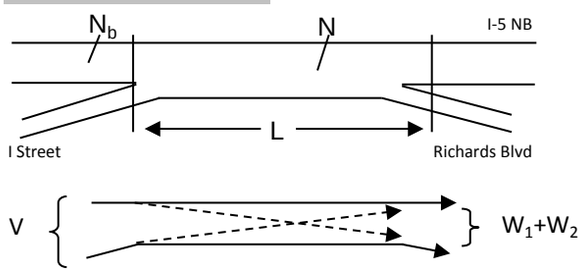
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**30 MPH** and **35 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	33.7
4. Weaving Intensity Factor (k)	2.85
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,617
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

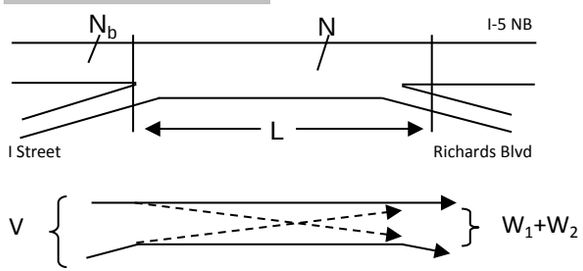
Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**30 MPH** and **35 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	30.8
4. Weaving Intensity Factor (k)	3.00
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,897
6. Level of Service (LOS)	E

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

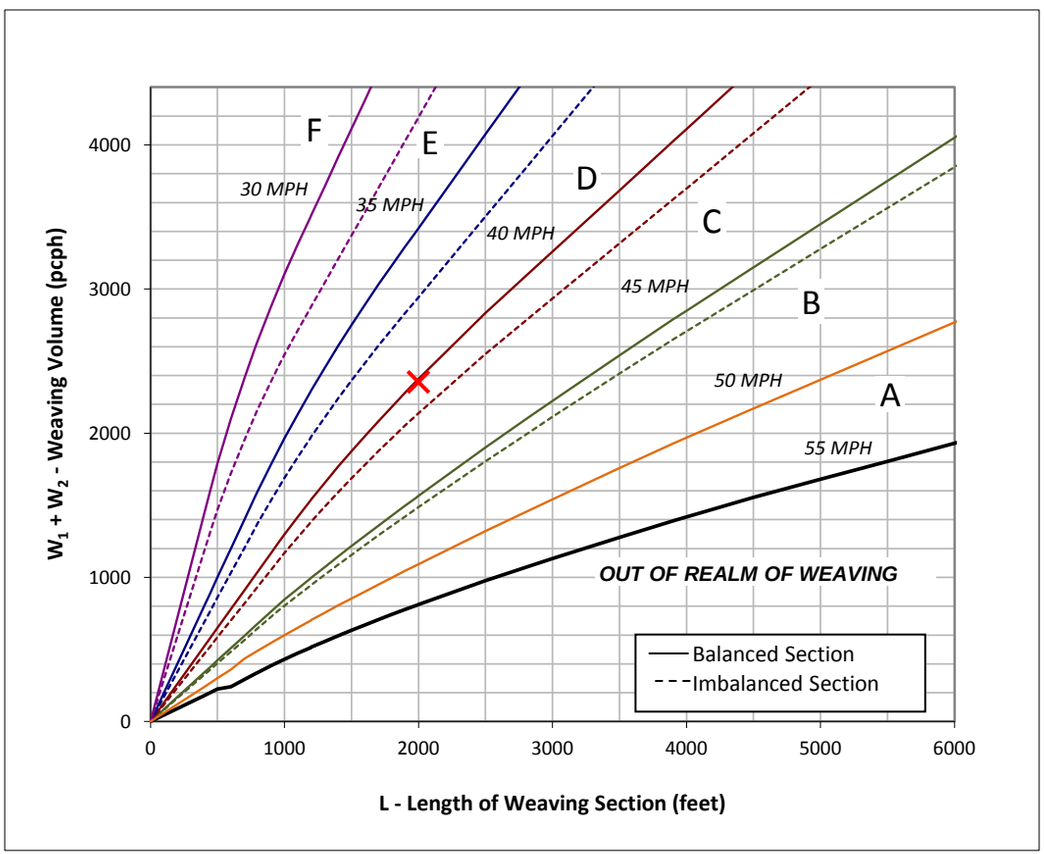
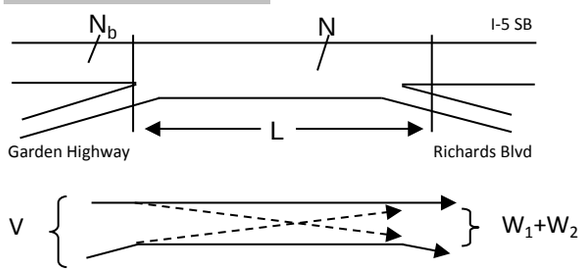
Length of Weaving Section (feet)	L	2,000

Project Information	
Project	Railyards / MLS Stadium / Kaiser
Scenario	Cumulative No Project AM Pk Hour
Freeway	I-5 SB
On-ramp	Garden Highway
Off-ramp	Richards Blvd

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	8,011	Volume (vph)*	635	Volume (vph)*	1,674
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	8,396	Volume (pcph)	647	Volume (pcph)	1,708



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? **Y**
   If optional exit lane, then "Y". Otherwise "N".
2. In the chart to the left, which two speed curves is the red "x" between?
   40 MPH and **45 MPH**
   If left of the 30 MPH curve, LOS is F. Select "-".
   If below the 55 MPH curve, out of the realm of weaving.
3. Interpolated Weaving Speed (S_w, mph) **40.1**
4. Weaving Intensity Factor (k) **2.52**
5. Service Volume (SV, pcph)
   $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$ **1,876**
6. Level of Service (LOS) **E**

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

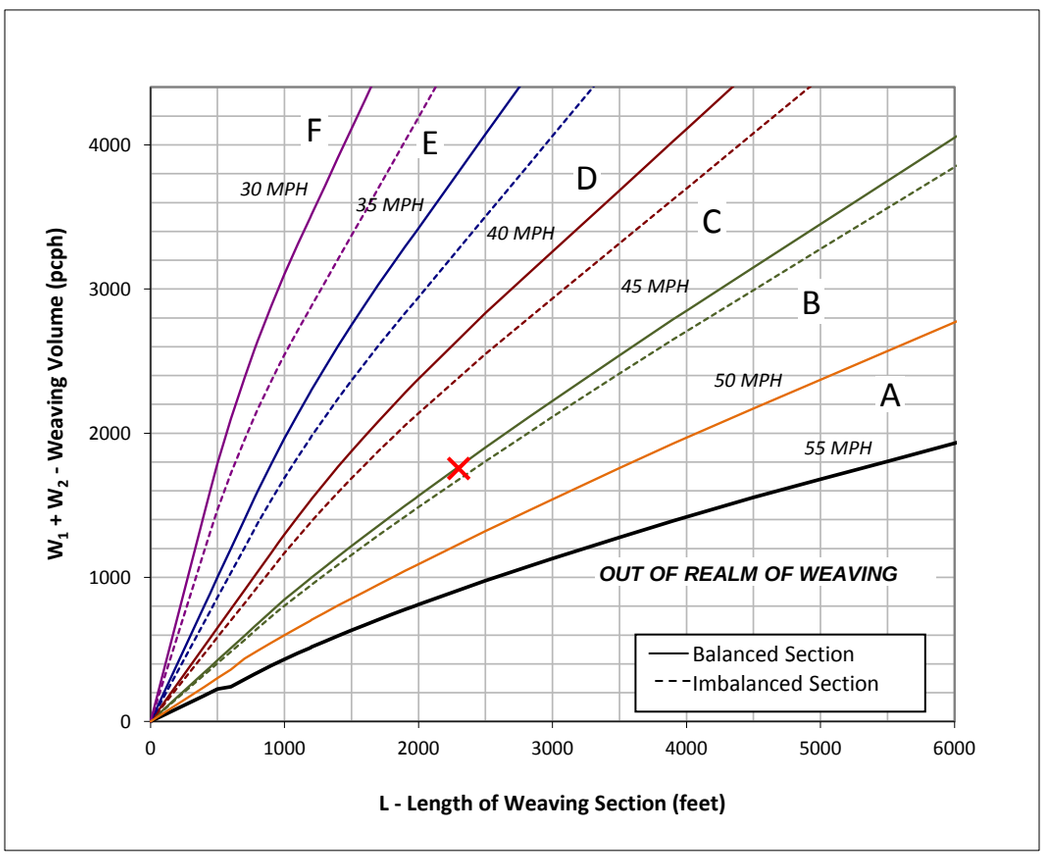
Leisch Method for Weaving Analysis

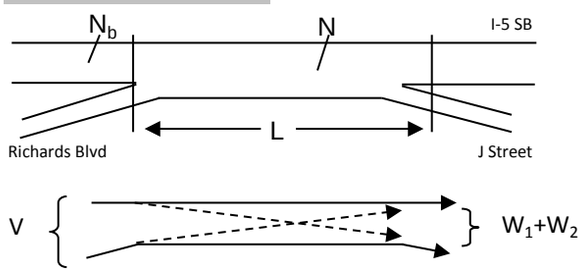
Data Input		
Number of Entering Mainline Lanes	N_b	4
Number of Lanes in Weaving Section	N	5
Length of Weaving Section (feet)	L	2,300

Project Information	
Project	Railyards / MLS Stadium / Kaiser
Scenario	Cumulative No Project AM Pk Hour
Freeway	I-5 SB
On-ramp	Richards Blvd
Off-ramp	J Street

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	6,308	Volume (vph)*	521	Volume (vph)*	1,199
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	6,611	Volume (pcph)	532	Volume (pcph)	1,223



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**45 MPH** and **50 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	45.1
4. Weaving Intensity Factor (k)	1.81
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,408
6. Level of Service (LOS)	C

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

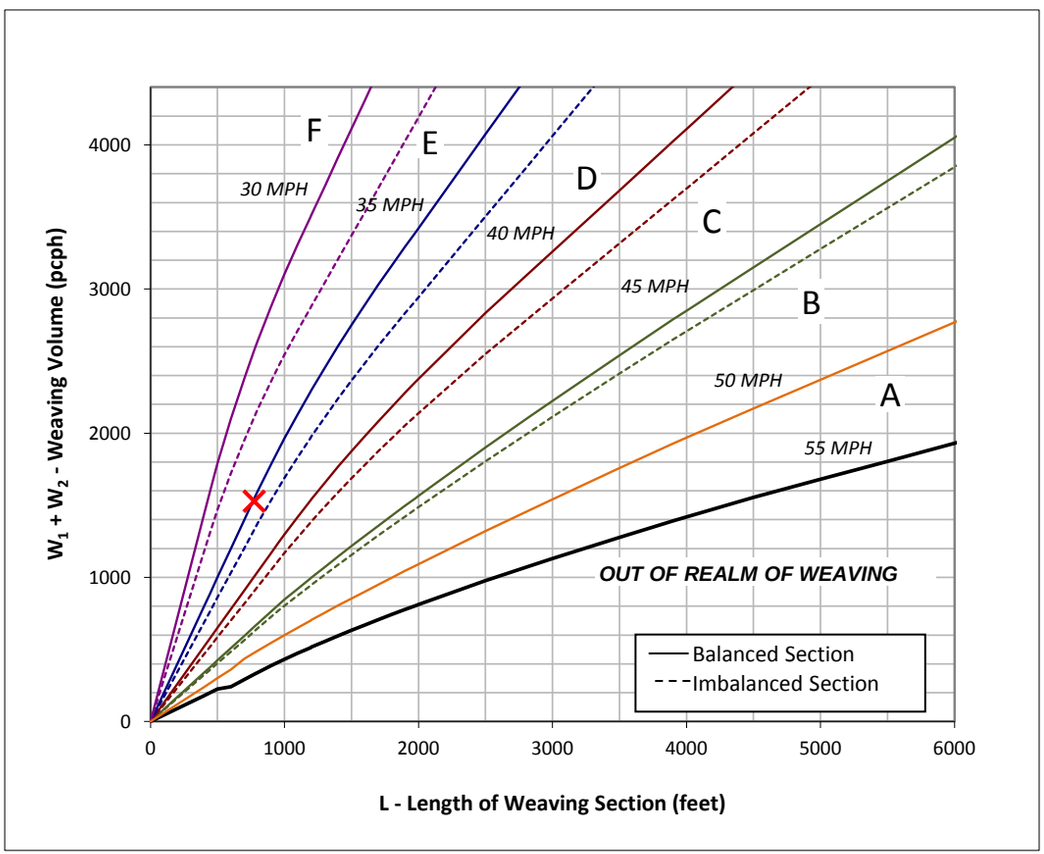
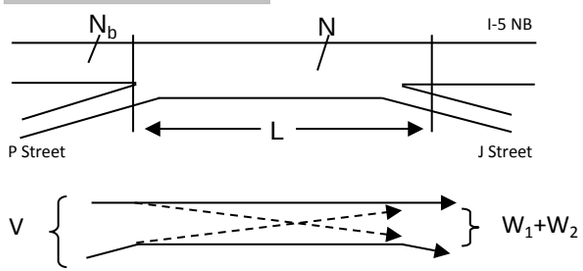
Project	Railyards / MLS Stadium / Kaiser
Scenario	Cumulative No Project PM Pk Hour
Freeway	I-5 NB
On-ramp	P Street
Off-ramp	J Street

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	6,321	Volume (vph)*	687	Volume (vph)*	812
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	6,624	Volume (pcph)	701	Volume (pcph)	828



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**35 MPH** and **40 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	35.2
4. Weaving Intensity Factor (k)	2.78
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,575
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
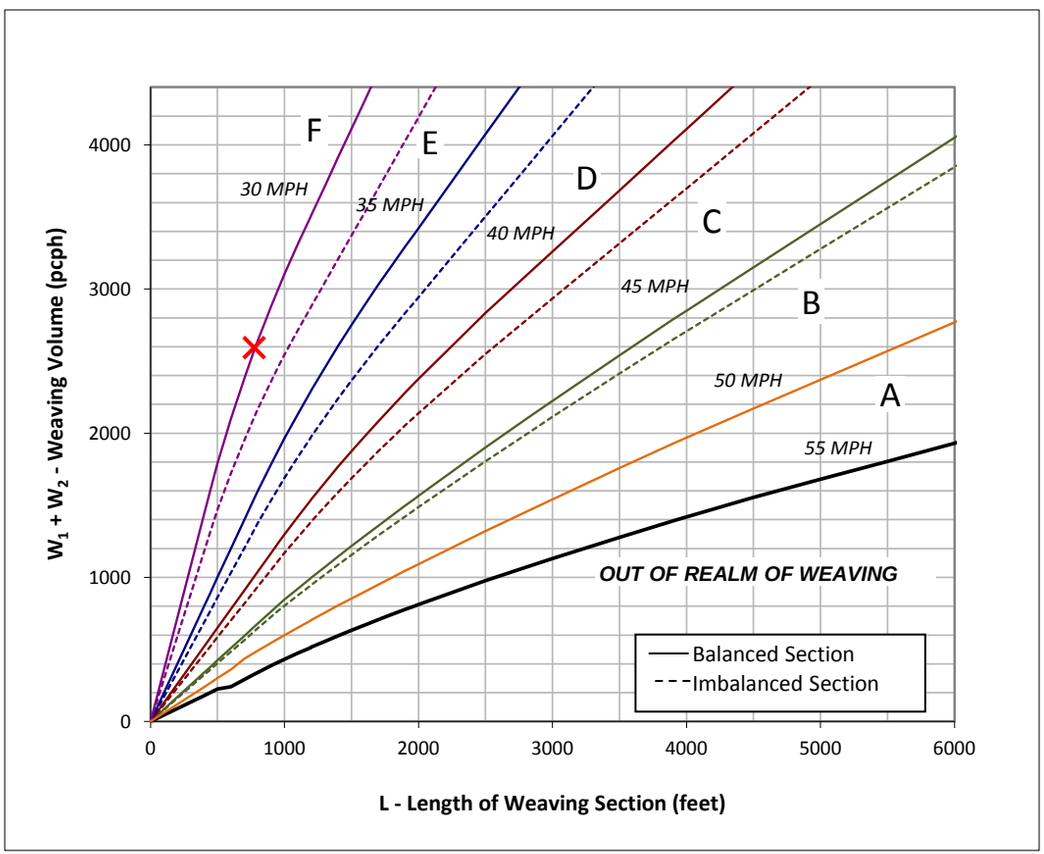
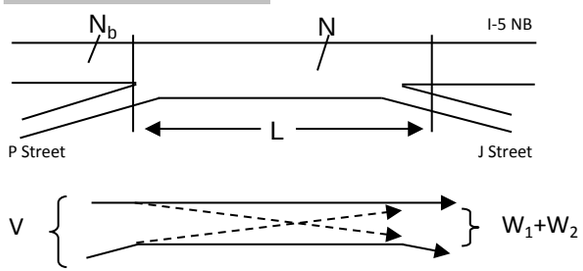
Volume (pcph)	8,734	Volume (pcph)	347	Volume (pcph)	2,246



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**30 MPH** and **35 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	29.9
4. Weaving Intensity Factor (k)	3.00
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,886
6. Level of Service (LOS)	E

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

Project	Railyards / MLS Stadium / Kaiser
Scenario	Cumulative Plus Project PM Pk Hr
Freeway	I-5 NB
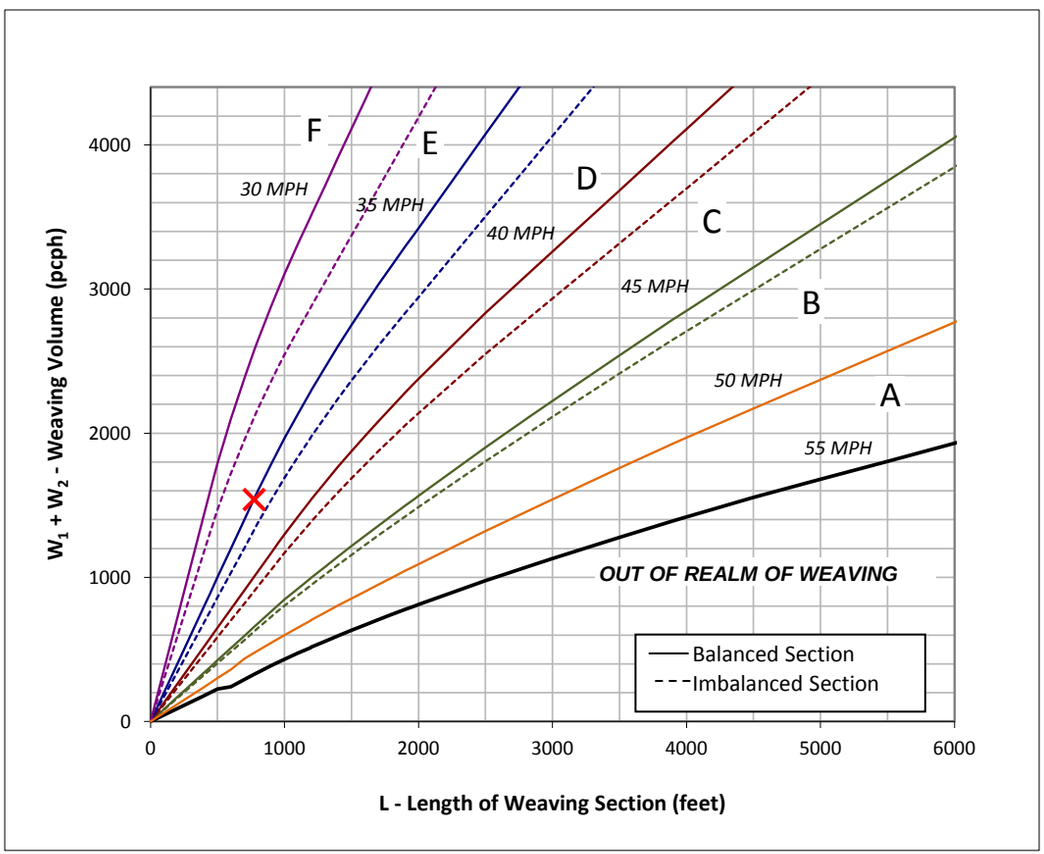
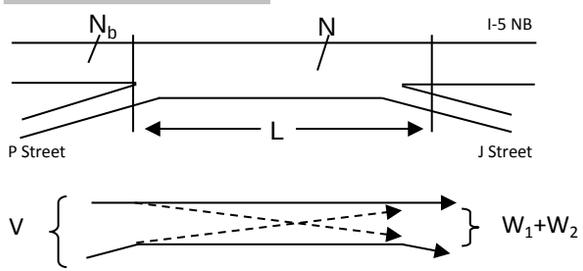
On-ramp	P Street
Off-ramp	J Street

Total Weaving Section (V)		On-ramp to Mainline (W_1)		Mainline to Off-ramp (W_2)	
Volume (vph)*	6,294	Volume (vph)*	690	Volume (vph)*	819
Truck Percentage	10%	Truck Percentage	4%	Truck Percentage	4%
PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
Volume (pcph)	6,596	Volume (pcph)	704	Volume (pcph)	835



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**35 MPH** and **40 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	35.1
4. Weaving Intensity Factor (k)	2.79
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,571
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

PCE for Trucks	1.5	PCE for Trucks	1.5	PCE for Trucks	1.5
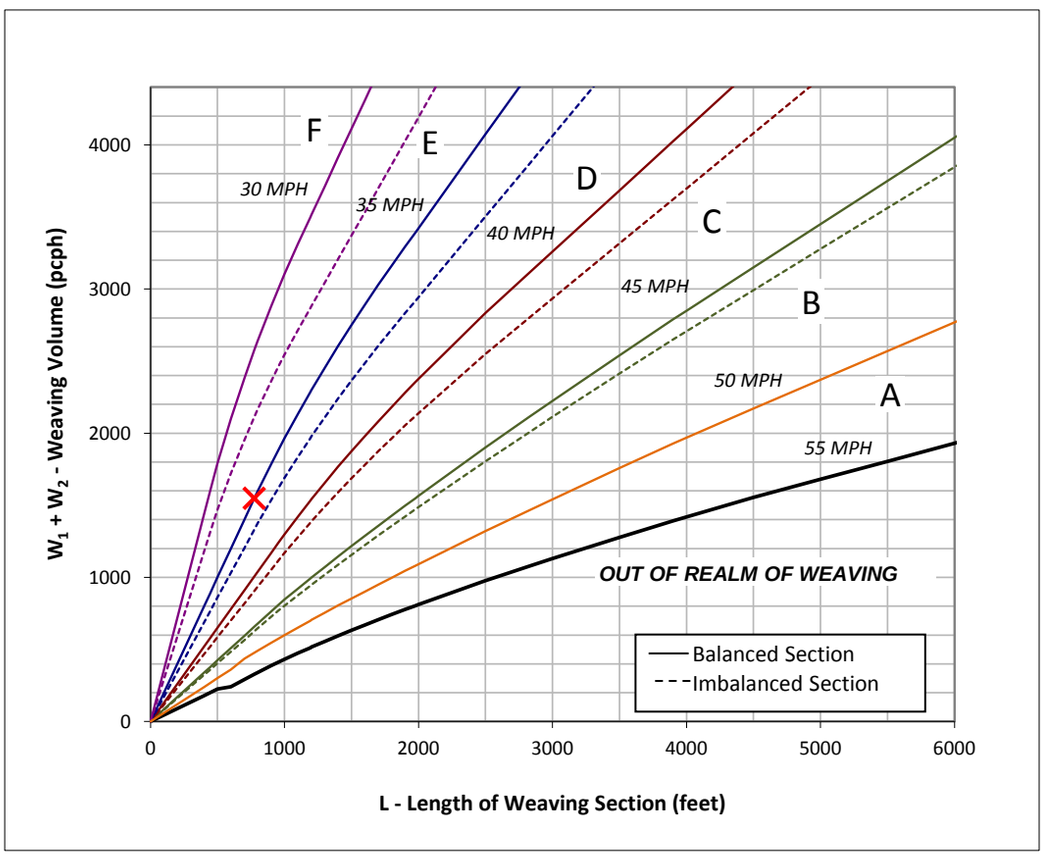
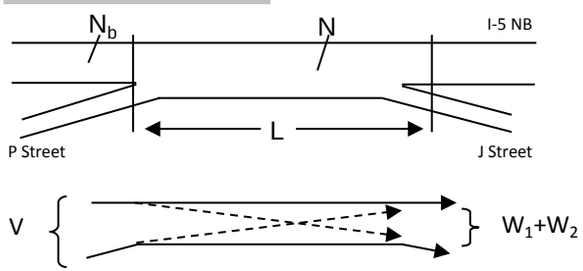
Volume (pcph)	6,864	Volume (pcph)	379	Volume (pcph)	1,169



Figure



Capacity Analysis

1. Is the weaving section balanced (Y / N)? *If optional exit lane, then "Y". Otherwise "N".*	Y
2. In the chart to the left, which two speed curves is the red "x" between?	**40 MPH** and **45 MPH**
If left of the 30 MPH curve, LOS is F. Select "-".	
If below the 55 MPH curve, out of the realm of weaving.	
3. Interpolated Weaving Speed (S_w, mph)	32.2
4. Weaving Intensity Factor (k)	2.99
5. Service Volume (SV, pcph) $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$	1,524
6. Level of Service (LOS)	D

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

Capacity Analysis

1. Is the weaving section balanced (Y / N)? **N**
   If optional exit lane, then "Y". Otherwise "N".
2. In the chart to the left, which two speed curves is the red "x" between?
   45 MPH and **50 MPH**
   If left of the 30 MPH curve, LOS is F. Select "-".
   If below the 55 MPH curve, out of the realm of weaving.
3. Interpolated Weaving Speed (S_w, mph) **48.7**
4. Weaving Intensity Factor (k) **1.13**
5. Service Volume (SV, pcph)
   $SV = (1/N)*[V + (k - 1)*\min(W_1, W_2)]$ **1,344**
6. Level of Service (LOS) **C**

The LOS in the chart above refers to the capacity of weaving traffic only; through and ramp to ramp traffic is not included.

* Note: **Do not adjust by a Peak Hour Factor (PHF).** The methodology incorporates the PHF in the Service Volume tables.

1. INTRODUCTION

TMP PURPOSE

The purpose of the Event TMP is to outline strategies to provide safe, convenient, and efficient access for all modes of travel to and from the proposed MLS Stadium. It seeks to minimize conflicts between vehicles, pedestrians, bicycles, and transit providers, while providing access to the project via each of these travel modes.

The Draft EIR analyzed an MLS Stadium that was assumed to consist of 25,000 seats. However, the initial design is now anticipated to provide seating for 19,621 attendees, which is a 21.5 percent decrease. Because the Draft EIR is conducting an environmental review for a facility with 25,000 seats, this TMP evaluates the transportation management strategies needed to accommodate this size of facility. However, in light of the opening day decrease in seating capacity, there may be certain operating conditions that could be beneficially affected by the reduction.

The TMP is intended to be a flexible document, which would be amended by the City as conditions change, and based on experience and input from additional parties, including the City, MLS Stadium operator, police/fire, and local transit agencies. It is likely that this TMP will need to be updated one or more times in response to the following:

- Changes in number of seats within MLS Stadium
- Changes in background roadway network (which would influence traffic management)
- Development of adjacent parcels (which would influence available parking and pedestrian flows)
- In response to vehicular congestion and pedestrian crowding observed during monitoring of soccer matches and other events.

ROLES AND RESPONSIBILITIES

Table 1 describes the roles and responsibilities for key agencies and entities that would play important roles in implementing the TMP.

Similar to other entertainment venues, it is expected that the MLS Stadium operator will enter into agreement(s) with various agencies and/or vendors to provide the improvements necessary to implement this Event TMP. Since the City's Police and Public Works Departments are responsible for maintaining and operating the roadway system in the immediate project vicinity, they will have responsibility for collaboratively working with the MLS Stadium operator to implement, operate, and/or oversee many of the recommended strategies contained in this TMP.

This document purposefully does not identify the specific entity which will carry out certain actions because the contractual, logistical, and other details have not yet been finalized. However, the TMP has been prepared at this time because the Draft EIR incorporates the performance standards contained herein, which must be achieved through implementation of various mitigation measures including this

TMP. In many instances, responsibilities are assigned to "the City or Stadium operator". This generalization reflects that a number of departments ranging from Police, to Public Works, to Parking may have lead responsibility. Alternatively, the responsibility could be placed on the Stadium operator or a subcontractor hired by either the City or operator for a certain task.

TABLE 1: ROLES AND RESPONSIBILITIES

Agency or Entity	Roles and Responsibilities
MLS Stadium Operator	The MLS Stadium operator (the entity responsible for the operation and maintenance of the MLS Stadium) is the project sponsor and is responsible, along with the City, for implementing the TMP and complying with its performance standards.
City of Sacramento Department of Public Works (DPW)	The City of Sacramento DPW has jurisdiction over the City's public right-of-way (ROW), traffic operations, and on street parking. It manages all surface transportation infrastructure and systems in the City, including roads, sidewalks, bicycle lanes, parking, and traffic control. Recommendations related to physical or operational changes to the ROW and/ or traffic operations or circulation have to be reviewed / approved by the DPW.
City of Sacramento Police Department (Sac PD)	The Sacramento Police Department is responsible for emergency response, preparation/implementation of traffic control plans, incident management, and coordination with the Sacramento Fire Department and the California Highway Patrol as needed.
City of Sacramento Fire Department (SFD)	The Sacramento Fire Department provides fire suppression and emergency medical services to the residents, visitors, and workers within Sacramento.
City of Sacramento Parking Services	Parking Services is a division within the DPW that manages all aspects of the City's parking assets including lots, garages, and on-street spaces.
Sacramento Regional Transit District (RT)	Sacramento RT provides transit service to the Sacramento region with a combination of light rail transit (LRT), bus, and shuttle bus routes. The LRT Green line operates along 7th Street less than ¼-mile from the proposed MLS Stadium site. Recommendations related to physical or operational changes to transit facilities or operations must be approved by RT.

REPORT ORGANIZATION

The remainder of this report consists of the following chapters, which have ordered such that discussions in later chapters build upon data and findings from earlier chapters.

- Chapter 2 (Project Description) – discusses the MLS Stadium including its location, project site plan, anticipated annual activities, and general vehicular, transit, pedestrian, and bicycle access.
- Chapter 3 (Travel Characteristics of MLS Stadium) – discusses the expected use of bicycle, pedestrian, transit, and vehicular travel modes to access the MLS Stadium during events.
- Chapter 4 (Transit Element) – discusses existing and planned transit services during MLS Stadium events.
- Chapter 5 (Bicycle Element) – discusses existing and planned bicycle facilities that may be used to access the MLS Stadium and on-site bicycle parking.
- Chapter 6 (Parking Element) – presents the anticipated parking demand and supply under near-term and long-term conditions. This chapter also presents anticipated pedestrian flows during the busiest hour before the start of an MLS Stadium soccer match.
- Chapter 7 (Traffic, Parking, and Pedestrian Management) – Due to the complex inter-relationship between arriving traffic, parking within the Railyards Specific Plan (RSP) Area, and techniques needed to manage the flow of traffic, this chapter simultaneously discusses these topics and presents recommendations.
- Chapter 8 (Performance Standards and Monitoring) – This chapter presents a set of performance standards that describe the desired level of operating standards that should be achieved during MLS Stadium soccer matches. It also discusses the mitigation monitoring plan that should be implemented once the MLS Stadium is constructed and open to ensure that standards are met.

This draft TMP purposefully does not address items such as communications and wayfinding. These topics, while clearly important, would require not yet available detailed planning/operational information for the MLS Stadium and input from agencies, the MLS Stadium operator, and individual property owners. Subsequent updates to the TMP, including a comprehensive update prior to the MLS Stadium's initial opening, will be necessary and will need to address communications and wayfinding (among a variety of other topics).

2. PROJECT DESCRIPTION

PROJECT LOCATION AND SITE PLAN

The MLS Stadium site is located in the southeasterly portion of the Railyards Specific Plan (RSP) Area. It would be bounded by the extension of Railyards Boulevard on the south, North B Street on the north, 8th Street on the west, and 10th Street on the east. The project site is illustrated on **Figure 1**.

Figure 2 shows the most recent project site plan provided HNTB, the stadium architect. Key aspects of it include the following:

- The project site plan does not include any off-street parking within its boundary. As is discussed in Chapter 6, parking would initially be provided by a series of designated parking lots within the RSP Area along with additional parking to the north, south, and east. Once the properties within the RSP Area are developed, parking would be provided by various public and private garages in the RSP Area.
- The project site plan has been designed to provide on-site parking for up to 500 bicycles (see Chapter 5) as well as a bike valet.
- The MLS Stadium would include construction of a 100-foot wide Pedestrian Plaza that would extend between 7th and 8th Streets (opposite the easterly terminus of South Park Street). This plaza would be one of the primary pedestrian access points to the stadium.
- As shown on Figure 2, general admission entry points would be located in the southwest, northwest, and northeast corners of the stadium. Special entrances would be available for players, employees, and premium ticketholders. The stadium plaza would be a continuously open and traversable pedestrian space.

VEHICULAR ACCESS TO MLS STADIUM

Figure 1 shows the roadway system that would be in place under baseline (i.e., opening day) conditions. Due to properties located directly to the north and east of the MLS Stadium being under control by other property owners, Railyards Boulevard would initially terminate at 10th Street versus extending to 12th Street as is ultimately planned (with westbound-only travel being permitted from 12th Street to 10th Street). Similarly, 10th Street would terminate at the northern boundary of the stadium site versus extending to North B Street as is ultimately planned.

As the RSP Area develops, new roadways would be constructed and certain existing roadways would be widened. Refer to Figure 4.12-12 of the Draft EIR for the planned roadway network within the RSP Area. Refer to Chapters 4, 5, and 7 for detailed discussions of access to the MLS Stadium by transit, bicycle, and walking, respectively.

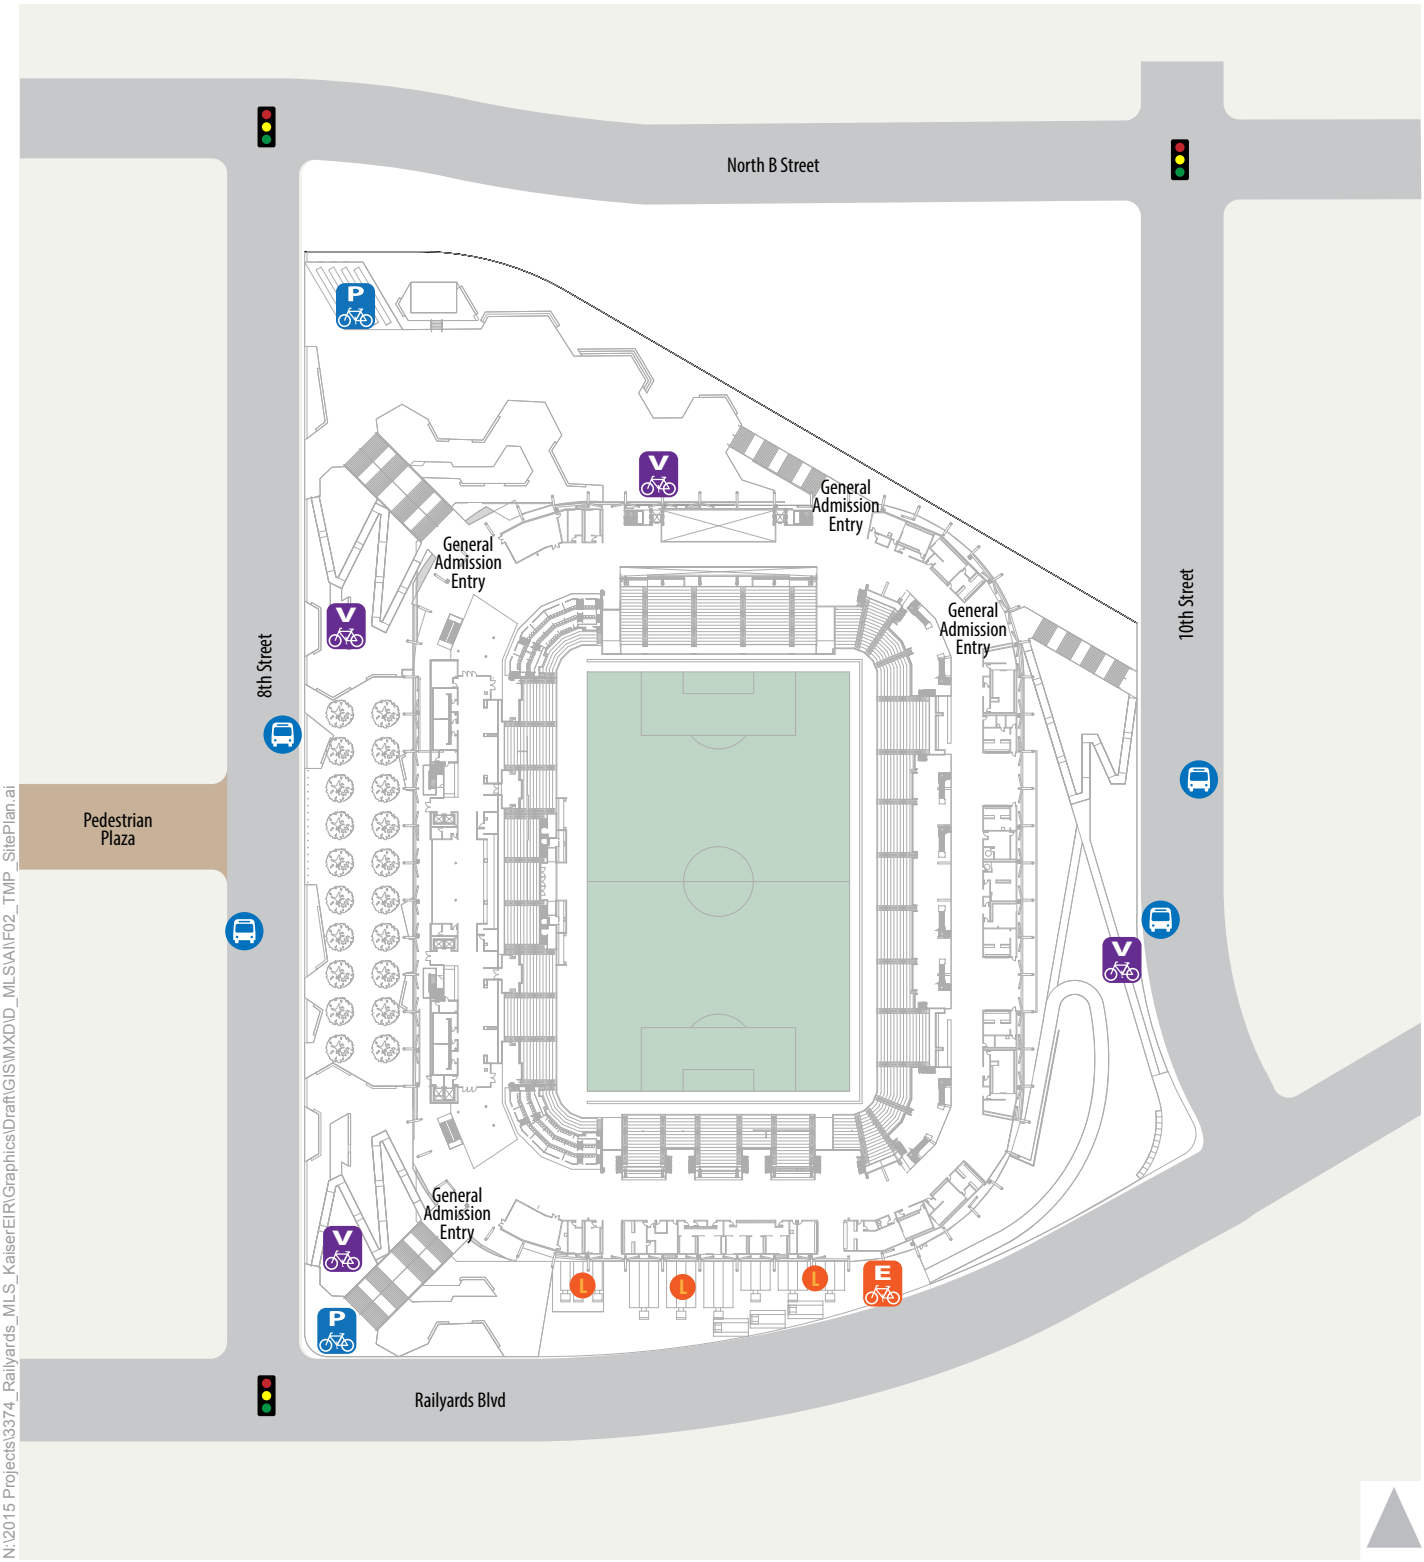

Figure 2

MLS Stadium Site Plan

STADIUM ACTIVITIES

Table 2 displays the anticipated number of annual events (and corresponding attendance) to be held at the MLS Stadium. In a given year, a total of 25 soccer matches (of various types) would be expected along with seven concerts, and five community events. An event would occur at the stadium during 10 percent of days over a typical year. The majority of events would occur on weekends. Weekday events would occur during the afternoon/evening.

TABLE 2: MLS STADIUM ESTIMATED ANNUAL EVENT ATTENDANCE

Event Type	Daily Attendance	Average Annual Events	Event Duration (days)	Total Days	Weekday 7:30 am – 5:00 pm	Weekday 5:30 pm-11:30 pm	Week-end	Annual Attendance
MLS Regular Season	25,000	17	1	17	0	2	15	425,000
MLS Special Game(s)	20,000	1	1	1	0	1	0	20,000
MLS Playoff Game(s)	25,000	1	1	1	0	0	1	25,000
CONCACAF/Cup Games	17,500	2	1	2	0	1	1	35,000
U.S. National Team Matches	25,000	1	1	1	0	0	1	25,000
Other Soccer Events	18,000	3	1	3	0	2	1	54,000
Concert/Cultural Event – Tier I	27,000[1]	2	1	2	0	0	2	54,000
Concert/Cultural Event – Tier II	18,000	5	1	5	0	0	5	90,000
Community Events	4,000	5	1	5	0	3	2	20,000
Total		**37**		**37**	**0**	**9**	**28**	**748,000**

Note:

1. A Tier 1 concert/cultural event involving highly popular touring act or other large event could attract a crowd of up to 27,000 attendees, including use of field standing or seating.

Source: Sacramento Soccer and Entertainment Holdings, Inc., 2016.

During weekday evening MLS matches, an estimated 460 employees would be present at the Stadium including police, medical, concessions, ticketing, ushers, security, and cleaning. The vast majority of these employees would arrive prior to the Pre-event peak hour.

ANALYSIS PERIODS

The Draft EIR analyzed the transportation effects of the proposed MLS Stadium for a weekday evening soccer MLS match that starts at 7:30 PM. This assumption is based on regular season 2014-2015 MLS season home game schedules for the San Jose, Los Angeles, Portland, and Seattle franchises. Of weekday games, 40 percent started at 7:30 PM, and 50 percent started at 8:00 PM. Although data from the west coast MLS teams indicated that 76 percent of all games were played on weekends, those periods were not studied because background traffic volumes within the RSP and surrounding areas were less than during the weekday Pre-event peak hour.

CONCURRENT EVENTS

An evaluation was conducted to determine the potential for soccer matches at the MLS Stadium to overlap with other sporting events in the Sacramento region. To understand the anticipated frequency of such occurrences, the 2014 and 2015 home schedules of the National Basketball Association (NBA) Sacramento Kings and AAA Sacramento Rivercats baseball team were compared against the schedule for the MLS San Jose Earthquakes. The Earthquakes' schedule was selected because a Sacramento MLS team would likely have a similar 'west coast' schedule of games and start times. Following are the key findings of this evaluation.

- In 2014, there were 12 'multi-game' days (7 Saturdays, 3 Wednesdays, 1 Friday, and 1 Sunday). Nine of the 12 days involved home games played by the San Jose Earthquakes and Sacramento Rivercats. There were four days involving home game played by the San Jose Earthquakes and Sacramento Kings (including one day that includes all three teams).

- The 2015 data were quite similar to 2014 with 11 'multi-game' days occurring most often on Saturdays and involving the San Jose Earthquakes and Sacramento Rivercats. There were three instances involving home games played by the San Jose Earthquakes and Sacramento Kings.

This data yields the following conclusion:

- A soccer match at the MLS Stadium would be most likely to overlap with a baseball game at Raley Field on a Saturday evening. Raley Field and the MLS Stadium are over one mile apart, and are not proposed to have much, if any, overlapping parking. However, they will rely on many of the same roadways, freeways, light rail/bus routes, etc. Therefore, advanced planning for such events, though rare, is necessary.

APPLICABILITY OF TMP FOR DIFFERENT EVENTS

According to Table 2, 32 of the 37 annual events are anticipated to have attendance levels of 17,500 or more persons. This TMP is recommended to be fully implemented for each of those 32 events. Implementation of the TMP is not necessary for the five (5) annual community events, provided that they attract no more than 4,000 persons per event.

The values in Table 2 represent best estimates of anticipated attendance for different event types. It is possible that some events could draw in the 5,000 to 17,000-attendee range. Should events of this size be expected to occur, implementation of certain portions of the TMP would be required. The degree to which certain TMP elements are needed would be a function of a number of factors including: type of event, anticipated attendance, weekday/weekend event, start/end time, mode split, and parking demand. For instance, while traffic control officers would likely need to be situated at some intersections, they may not be necessary at others (due to reduced parking and pedestrian demands). All events with anticipated attendance in the 5,000 to 17,000-person range will require a review of attendee travel characteristics, event start/end time, mode split, and parking demand to determine which elements of the TMP should be implemented.

3. TRAVEL CHARACTERISTICS OF MLS STADIUM

This chapter describes the anticipated travel modes to be used by MLS Stadium attendees under opening day and long-term conditions. It also discusses expected vehicular travel routes and the spatial distribution of parking utilization surrounding the stadium.

MODE SPLIT

Table 3 displays the projected travel modes for MLS Stadium attendees under opening day and year 2035 conditions. Refer to Chapter 4.12 of Draft EIR for supporting details.

TABLE 3: MLS STADIUM WEEKDAY EVENING SOCCER MATCH – TRAVEL MODE FOR ATTENDEES

Mode	Opening Day Share	Year 2035 Share
Auto	90.0%	83.0%
Light Rail	6.0%	10.0%
Bus	0.5%	1.0%
Walk	1.5%	3.0%
Bike	2%	3.0%

Source: Fehr & Peers, 2016.

VEHICULAR TRIPS AND DIRECTIONAL DISTRIBUTION

As is discussed in Chapter 4.12 of the Draft EIR, the MLS Stadium is estimated to generate approximately 7,060 inbound vehicle trips during the Weekday Pre-event peak hour (6:30 – 7:30 PM) under opening day conditions assuming a sold-out 25,000-seat soccer match.

Freeway access to the MLS Stadium site would be provided via Interstate 5 interchanges at Richards Boulevard and I Street/J Street as well as SR 160, which becomes 12th Street / 16th Street as it enters/exits Downtown Sacramento. A number of other City streets would also provide access the stadium. By comparing the Pre-event peak hour traffic volumes shown on Figure 4.12-15A and B versus 4.12-35A, B, and C, inbound vehicle trips generated by the MLS Stadium would be geographically distributed as follows (only primary routes are shown and consequently values do not sum to 100 percent):

- Southbound SR 160 at Richards Boulevard: 32 percent
- Eastbound Richards Boulevard directly east of I-5: 18 percent
- Eastbound J Street directly east of I-5: 14 percent
- Northbound 16th Street at N. B Street: 5 percent

- Southbound Jibboom Street west of I-5: 3 percent
- Eastbound I Street Bridge at Jibboom Street: 3 percent

These distribution patterns were derived based on travel behavior data collected in 2014 at Sacramento Republic FC matches played at Bonney Field at Cal Expo (including average vehicle occupancy, arrival period percentages, and cell phone data indicating trip origins/destinations. They also consider the anticipated locations of available parking located in the stadium vicinity.

Refer to Chapter 6 for specific use of parking lots/garages and on-street spaces and Chapter 7 for anticipated Pre-event peak hour pedestrian flows.

4. TRANSIT ELEMENT

EXISTING AND PROJECTED TRANSIT SERVICE

The MLS Stadium would be located less than ¼-mile from the existing LRT Green Line, which runs along 7th Street. The nearest station to the Stadium is the Richards/Township 9 station, which is the northern terminus of the Green line. The LRT Green line operates until the early evening on weekdays, not on weekends, and requires a transfer in downtown to ride the Blue or Gold lines to south, east, or northeast Sacramento.

Service to the area is also available via the LRT Blue line, which has a stop in the Alkali Flat neighborhood slightly greater than ½-mile from the MLS Stadium. Bus service in the area consists of four routes operated by Regional Transit that currently end their weekday service by 8 or 9 PM.

During a November 3, 2015 meeting with the applicant, RT, and City of Sacramento, RT officials expressed a willingness to work cooperatively with the City and the applicant to ensure that necessary light rail facilities and services would be in place by opening of the proposed MLS Stadium. Based on the outcome of that meeting, the following transit service improvements are assumed to occur:

- Under baseline conditions, a new light rail station would be constructed on the east side of 7th Street north of Railyards Boulevard. This station would be part of the Green Line service.
- Under cumulative conditions, the new light rail station on 7th Street north of Railyards Boulevard would include stops on both the east and west sides of 7th Street based on the planned double-tracking of the line. The green line service would extend northerly across the American River to serve the Natomas area and eventually Sacramento International Airport.

LRT STATION ACCESS

The RSPU roadway improvement drawings show a light rail platform to be located on the east side of 7th Street from north of Railyards Boulevard to the planned Pedestrian Plaza shown on Figure 2. As is discussed in Chapter 7, the Pedestrian Plaza would be 100 feet wide and serve as a primary ingress/egress to the MLS Stadium.

Details relating to light rail transit operations would be worked out as the MLS Stadium opening approaches. Decisions relating to number of additional trains, number of cars per train, train loading/unloading, fare payment, pedestrian wayfinding to transit, etc. would require detailed follow-up meetings with City, RT, and MLS Stadium operator staff.

Refer to Chapter 7 for a discussion of post-event bus stop locations/loading and bus staging.

5. BICYCLE ELEMENT

BICYCLE PARKING

Table 3 indicates that two percent of MLS game attendees are expected to initially ride a bike to the stadium under baseline conditions. This equates to 500 bicyclists. It is important to note that this mode split applies only to weekday evening soccer matches. During weekends, west coast MLS soccer matches often begin in the afternoon, meaning that pre- and post-event bicycle travel would occur during daylight hours, which could affect mode choice.

As shown on Figure 2, parking within the MLS Stadium plaza area would include short-term racks, long-term employee parking, and bike valet service. The current design drawings allow for on-site parking for up to 500 bicycles. The majority of bicycle parking would be located in the southwest or northwest corners of the stadium site. The southwest corner was chosen because it can be easily accessed from the Class I path located on the south side of Railyards Boulevard east of 7th Street. The northwest corner was selected to capture bicyclists as they enter from North B Street to discourage further bicycle travel into the plaza area. Overflow bike parking in adjacent, vacant lots is also being studied.

BICYCLE ACCESS

Under opening day conditions (assuming the remainder of the RSPU is not developed), bicyclists would be able to access the MLS Stadium as follows:

- From the south: A 10-foot sidewalk is present on 7th Street under the UPRR tracks and extending further south. The extensions and impending openings of 5th Street and 6th Street from H Street to Railyards Boulevard will include on-street bicycle lanes. For outbound bicycle trips returning to downtown Sacramento, a southbound-only Class II (on-street) bike lane is present on 12th Street south of North B Street.

- From the east: Class II (on-street) bike lanes are present on North B Street west of 12th Street.

- From the west: bicyclists may exit the American River Bike Trail at the Railyards Boulevard/Jibboom Street intersection, then ride on a Class II bike lane on Railyards Boulevard to the MLS Stadium.

- From the north: although class II bike lanes are present along portions of Richards Boulevard, direct north-south bicycle facilities (to access the MLS Stadium) are not present. The segment of North 7th Street north of North B Street features light rail tracks on both sides of the street, which may not be conductive to on-street bicycle travel. Bicyclists may instead wish to use the parallel segment of 10th Street between North B Street and Richards Boulevard, which has one lane in each direction and is lightly traveled or Sequoia Street to Bannon Street. However, there are no dedicated bicycle facilities on these streets except on Sequoia Street.

Under future conditions, the bicycle system within the RSP Area and on nearby streets will be much expanded and improved. Refer to Figure 2-14 of the Draft EIR for the RSPU bicycle system. Key enhancements would include:

- A Class IV protected bikeway (two-way cycle track) on 12th Street from south of Richards Boulevard into downtown Sacramento. A bike path connection between this cycle track and the Class I path along Railyards Boulevard (east of 7th Street).
- In the future, bicycling would be prohibited along 7th Street under the UPRR bridge due to the conversion of this facility to consist of a vehicle-only (inside) lane and a shared vehicle/LRT (outside) lane in each direction. The parallel segment of 6th Street would be upgraded to consist of a two-way cycle track from G Street to Camille Lane. This facility would provide a connection to the RSPU Class I system.

6. PARKING ELEMENT

EXPECTED NEAR-TERM PARKING DEMAND AND PROPOSED SUPPLY

Chapter 4.12 of the Draft EIR contained the opening day parking demand for the proposed MLS Stadium was estimated for a sold-out 25,000-person MLS match. As noted earlier, current plans for the MLS Stadium applicant team call for an opening day capacity of 19,621 persons, which equates to a 21.5 percent reduction in parking demand. The following estimates and assumptions were used to estimate that a 25,000-person MLS Stadium soccer match would have a parking demand of approximately 10,100 spaces:

- 90 percent of attendees travel by vehicle, with the remaining 10 percent traveling by light rail, bus, bicycle, or walking.
- An average vehicle occupancy of 2.23 based on Sacramento Republic FC observations.
- All employees are assumed to park in remote lots and be shuttled to the Stadium.

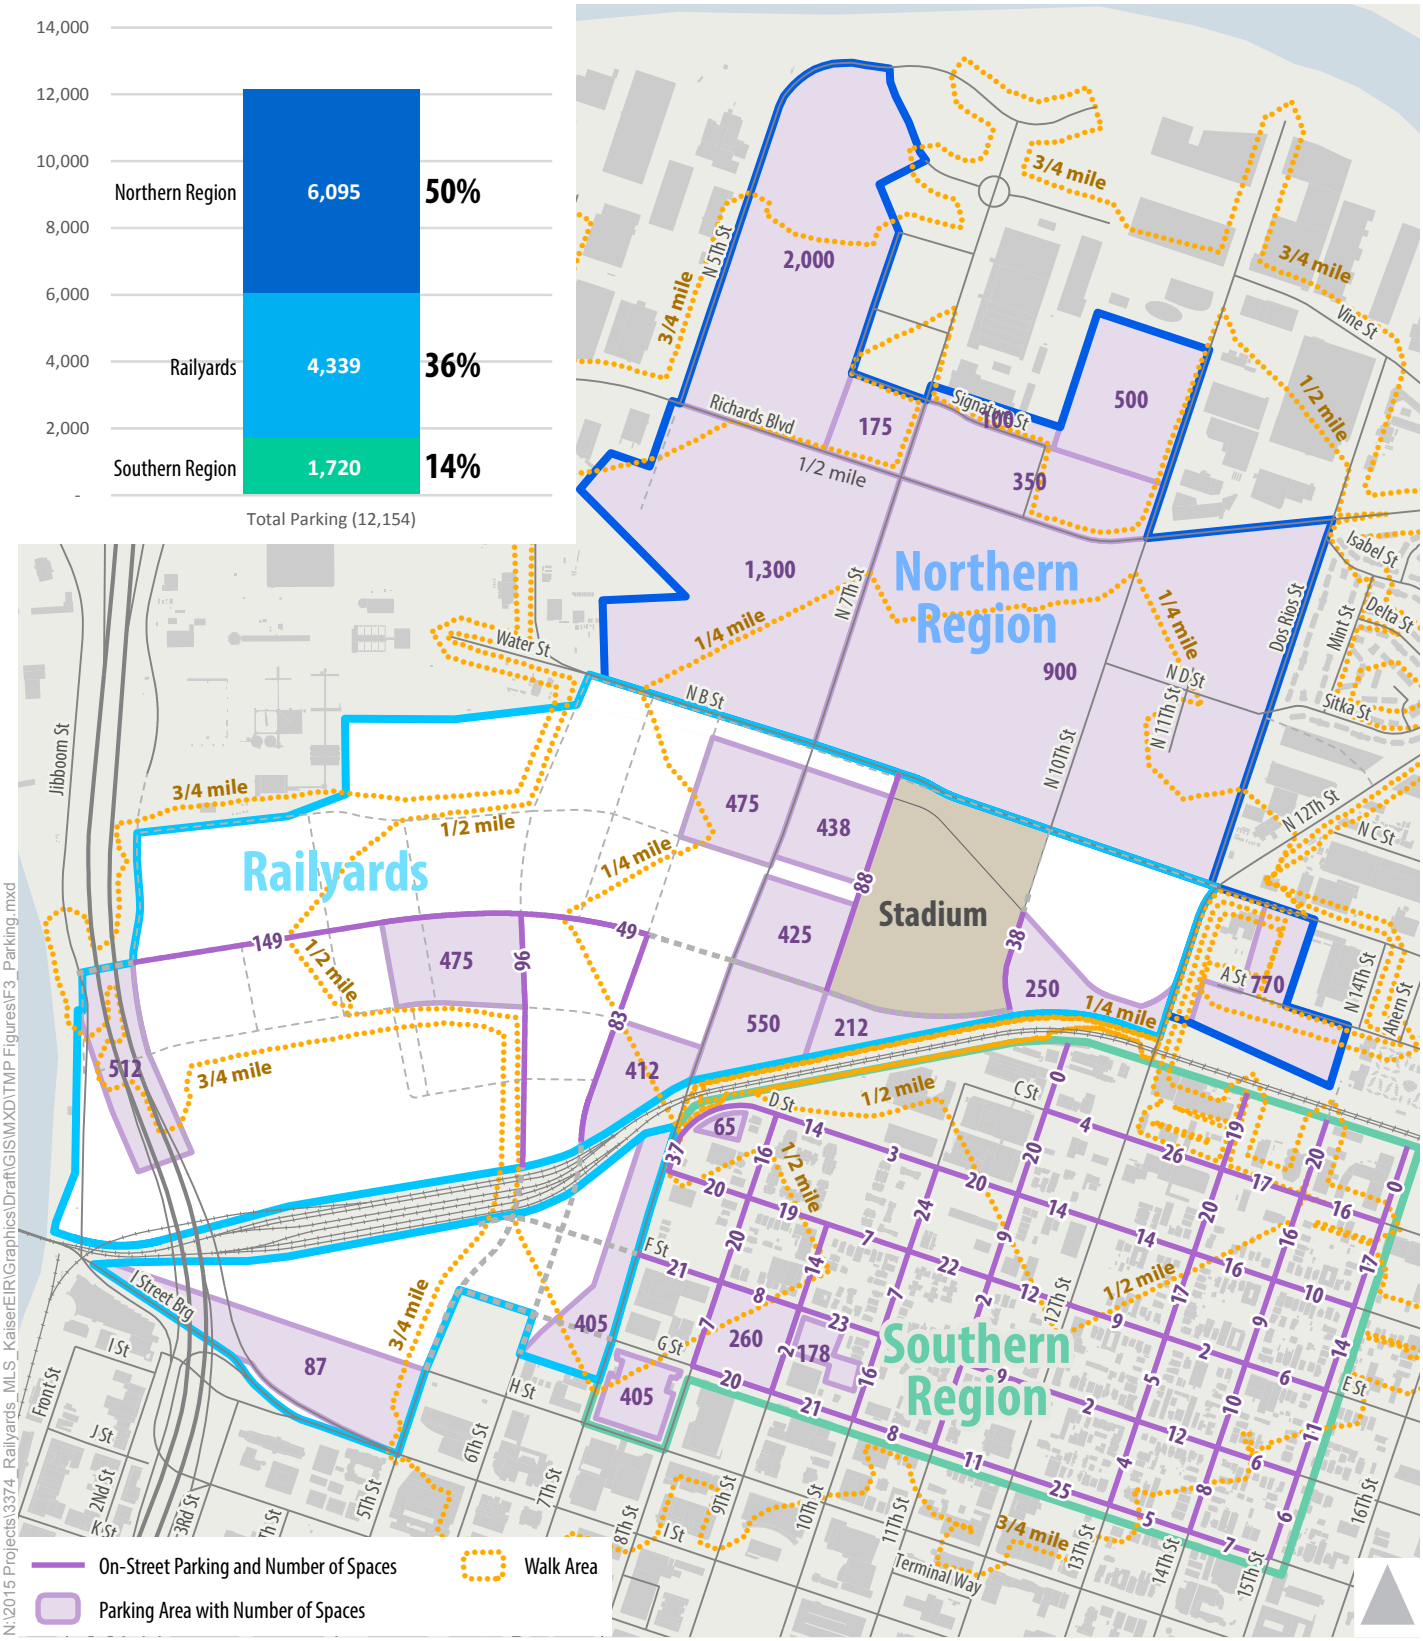
To assess available parking in the Stadium vicinity, the following evaluations were performed:

- Obtained the proposed supply of parking to be provided on vacant lots within the RSP Area (as proposed by the Stadium applicant).
- Conducted field observations to measure available public parking in garages and on-street south of the UPRR tracks.
- Estimated the amount of available parking on vacant and underutilized parcels located north of the RSP (as proposed by the Stadium applicant).

Figure 3 on the following page (reproduced from Figure 4.12-32 of the Draft EIR) shows that there are a total of more than 12,000 planned, available parking spaces in the vicinity of the proposed Stadium. Figure 4.12-33 of the Draft EIR shows that there would be over 10,875 parking spaces located within a ¾-mile or less walk of the proposed Stadium. In summary, an adequate supply of parking is proposed to accommodate a sold-out 25,000-person soccer match under baseline conditions.

During the Pre-event peak hour, MLS attendees arriving by vehicle are anticipated to park in the following geographic locations based on the proposed supply of parking and origin of trips. Note that these values sum to the project's Pre-Event peak hour trip generation, and not the total demand for parking.

- North of the RSP: 3,294 vehicles (47 percent)
- Within RSP: 2,775 vehicles (39 percent)
- South of RSP (south of UPRR tracks): 994 vehicles (14 percent)



1. Available parking in existing public/private lots/garages and on-street based on field observations conducted by Fehr & Peers between 6:30 and 7:30 PM on weekdays in December 2015.
2. Walk distances based on street network connectivity.
3. Available parking on designated vacant parcels in the RSPU based on acreage and assumption of 125 spaces per acre.
4. Available parking north of RSPU based on properties targeted for potential parking, and subjected to aerial imagery inspection of portion of property that is vacant. Unit value of 125 spaces per acre of vacant property assumed.

Figure 3

Available Parking in Vicinity of Proposed MLS Stadium

Although 4,000 parking spaces would be available within the RSP Area, the expected level of travel to those lots is less than this for two reasons. First, some of this parking would already be occupied by attendees arriving prior to the beginning of the Pre-event peak hour (any parking already occupied prior to the Pre-event peak hour is assumed to be attendees since this Baseline Plus MLS Stadium scenario assumed no retail or other development within the RSPU that would require parking). Second, some of the parking would be located more than one half mile from the proposed MLS Stadium. Other lots north of the RSP Area would have availability and be a shorter walk distance.

EXPECTED LONG-TERM PARKING DEMAND AND PROPOSED SUPPLY

According to Table 3, the non-auto mode split of MLS Stadium attendees is expected to increase in the future as a result of additional transit service expansions and construction of residential and non-residential projects in the MLS Stadium vicinity. As a result, the parking demand would be expected to decrease by about eight percent, thereby resulting in a peak parking demand of about 9,300 spaces.

Figure 4.12-34 of the Draft EIR displays the estimated amount of parking that is expected to be available within the RSP Area under RSPU buildout conditions for an MLS match. As the footnotes in this figure indicate, the available parking is based on vacant parking (during a weekend or weekday evening) that would otherwise be used by offices. It also includes six public parking garages. As shown, over 11,200 spaces are estimated to be available (excluding any spaces within the KP Medical Center). Therefore, an adequate supply of parking is expected to be available for a sold-out 25,000-person soccer match under future conditions.

PARKING MANAGEMENT STRATEGIES

Some parking lots within the RSP Area would be located in close proximity to the MLS Stadium and therefore would have unique ingress/egress challenges during events. Chapter 7 discusses how these parking lots would be accessed and managed.

A parking reservation and wayfinding system should be developed as the MLS Stadium nears an opening date. Development of these types of detail (e.g., premium ticketholder parking, real-time parking availability, etc.) is premature at this time due to various uncertainties such as precise locations/amounts of parking to be provided north of the RSP Area. However, the general wayfinding premise is to encourage attendees who “live to the north to park to the north of the MLS Stadium, and so forth”. This avoids unnecessary mixing of traffic and high traffic flows on streets near the MLS Stadium prior to and after events. Refer to Chapter 7 for details.

7. TRAFFIC, PARKING, AND PEDESTRIAN MANAGEMENT

An integrated approach for managing vehicular traffic, pedestrians, transit, and parking is necessary within the MLS Stadium vicinity. However, prior to presenting the overall recommended strategy, some information relating to recommended roadway infrastructure upgrades (from the Draft EIR) and pedestrian flows are presented.

A series of meetings were held in April 2016 with the MLS Stadium operator and architect, Sacramento Fire and Police Departments, City of Sacramento Public Works, and the EIR consulting team to discuss strategies for leading with large volumes of pedestrians, parking in close proximity to the stadium, transit vehicles, and other special-event conditions. The recommendations contained in this chapter are derived from those meetings, and subsequent technical analysis.

OPENING DAY ROADWAY INFRASTRUCTURE REQUIREMENTS

Under baseline plus MLS Stadium conditions without any mitigation measures in place, severe traffic congestion and gridlock would occur during the Pre-event peak hour. To address these significant impacts, a series of mitigation measures were recommended in the Draft EIR (see Impact 4.12-1 and Mitigation Measures 4.12-1(d)).

Figure 4 on the following page (reproduced from Figure 4.12-45 of the Draft EIR) shows the recommended (roadway-related only) mitigation measures. They consist of extending 6th Street from North B Street to Railyards Boulevard, extending South Park Street from 6th Street to 7th Street, installing traffic signals at several intersections in the stadium vicinity, modifying the 7th Street/Railyards Boulevard, 7th Street/North B Street, and 12th Street/North B Street intersections to increase their capacity. However, to operate the entire system in an efficient manner, management of the heavy pedestrian flows and parking lot ingress/egress points are also necessary to complement the infrastructure improvements.

PEDESTRIAN FLOWS

Figure 4.12-36 of the Draft EIR showed the pedestrian flows for the Pre-event peak hour prior to a sold-out 25,000-person MLS soccer match along sidewalks within the RSP Area and streets to the north, east, and south. These estimates were based on the project's vehicular trip generation and expected use of parking. They also considered primary walk trips from origins outside of the RSP Area as well as walk trips after attendees exit the 7th/Railyards light rail station. These forecasts assumed free-flow pedestrian movement, and no proactive management of flows.

The pedestrian LOS results (shown in Tables 4.12-34 and 4.12-35 of the Draft EIR) for sidewalks and crosswalks that would be used to a significant degree by MLS Stadium attendees indicated the need for expanded pedestrian facilities and/or effective management of large pedestrian flows.

Surface Parking Lot within RSPU to be Available for Attendee Parking

Properties North of RSPU Anticipated to be Available for Attendee Parking

Signalized Intersection

Figure 4

Proposed Mitigation Measures (Roadway-Related Only) for MLS Stadium

To address the heavy pedestrian flows and minimize conflicts with vehicles, the following recommendations were devised for Pre-Event conditions:

- Direct pedestrian movements east of 7th Street either on Railyards Boulevard (north side) toward 8th Street or easterly along the Pedestrian Plaza.

- Place pedestrian barriers at strategic locations to prevent pedestrian movements that would otherwise occur on sidewalks of insufficient width or would create conflicts with vehicles entering parking lots.

- All new streets adjacent to the MLS Stadium would have sidewalk widths of 16 feet. The existing sidewalk on 7th Street would be widened to 16 feet.

- Widen all crosswalks at the 7th Street/Railyards Boulevard, 7th Street/South Park Street, and 7th Street/North B Street intersections to 20 feet.

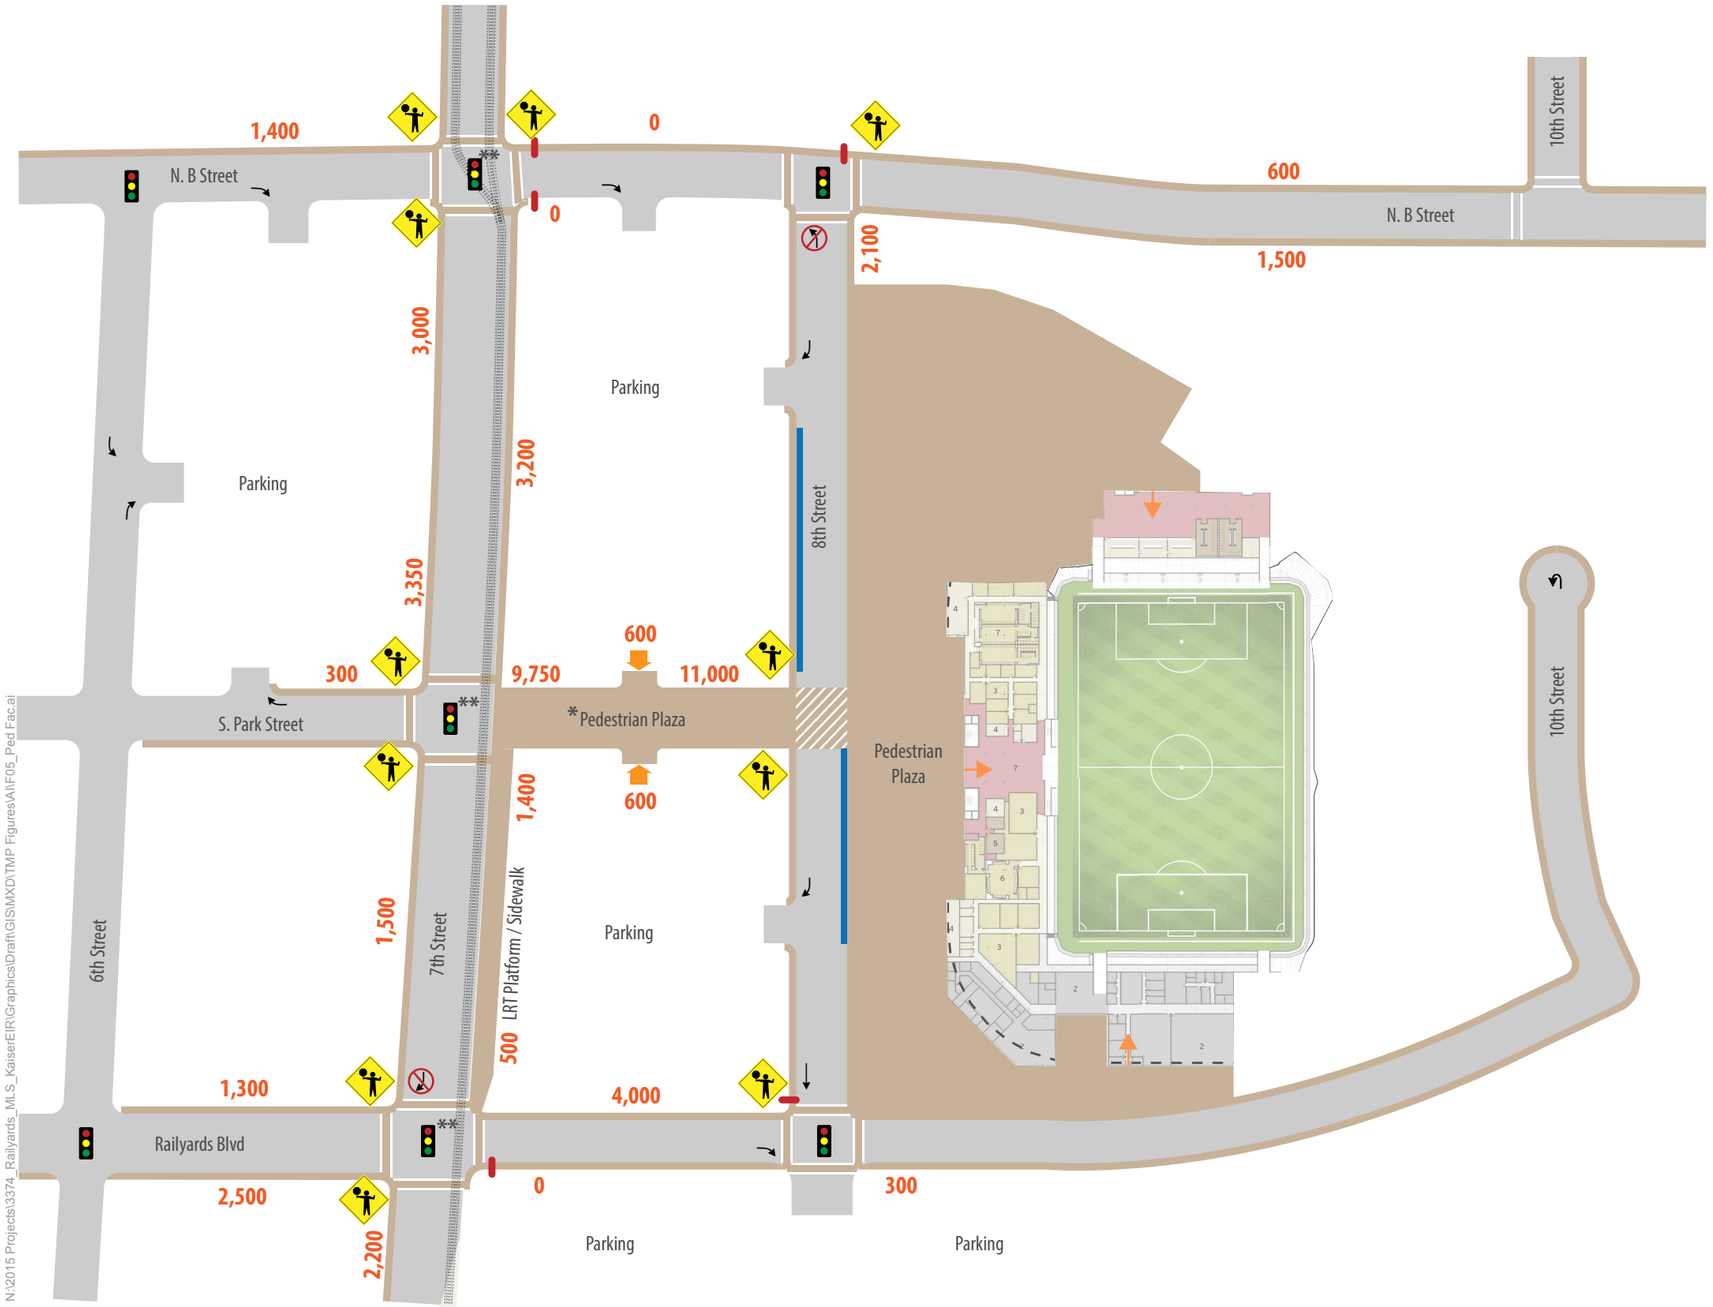
- Operate all crosswalks at the 7th Street/Railyards Boulevard, 7th Street/South Park Street, and 7th Street/North B Street intersections with a 30 second pedestrian WALK interval during the Pre-Event peak hour.

- Place traffic control officers (TCOs) at the 'upstream' corners of key intersections along 7th Street, 8th Street, Railyards Boulevard, and North B Street. The TCOs would use a combination of techniques (barricades, stanchions with retractable belts/ropes) to manage pedestrian flows approaching and across crosswalks. The barricades may be positioned on approaches to the busiest intersection corners to 'queue pedestrians', thereby minimizing the likelihood that they spill onto the adjacent street.

Figure 5 on the following page (reproduced from Figure 4.12-46 of the Draft EIR) shows the recommended pedestrian barriers, and the resulting Pre-Event peak hour pedestrian flows.

The pedestrian demand at all crosswalks at the three intersections listed above would correspond to LOS D or better conditions (i.e., the design goal identified in the Draft EIR for pedestrian facilities) with the above recommendations in place.

The end of this chapter includes a focused discussion on the anticipated use of sidewalks and crosswalks along North 7th Street north of North B Street.



N:\2015 Projects\3374_Railyards_MLS_KaiserEIR\Graphics\Draft\GIS\MXD\TMP Figures\AIF05_Ped Fac.ai

Notes:
1. Based on 25,000-person MLS soccer match (70% arrive during pre-event peak hour).
2. Values rounded to nearest fifty persons.
3. Recommended sidewalk width considers future building (ie. need to account for shy distance) at back of sidewalk and no obstructions within sidewalk.
4. Map not to scale.

*
Minimum 30 feet of plaza recommended to remain clear and unobstructed for pedestrian travel.

**
Operate traffic signals with extended walk intervals on all approaches.

Figure 5

Pedestrian Volumes During Pre Event Peak Hour - Baseline Plus MLS Stadium Conditions

TRAFFIC, PARKING, AND PEDESTRIAN MANAGEMENT DURING PRE-EVENT PEAK HOUR

Figure 6 (reproduced from Figure 4.12-47 of the Draft EIR) shows the recommended opening day Pre-event peak hour management plan to accommodate traffic, parking, and pedestrians in the MLS Stadium vicinity. This figure shows recommended driveway openings (and permitted turn movements) to adjacent parking lots. As shown, direct parking lot access is not recommended along 7th Street so as to minimize traffic flows on this important roadway. This figure also shows the placement of fences along the boundaries of these parking lots to focus pedestrian ingress/egress from them to strategic locations. This helps avoid introducing conflicts between pedestrian movements and arriving traffic to parking lots.

Figure 7 (reproduced from Figure 4.12-48 of the Draft EIR) shows vehicular routing to parking lots within the RSP Area under opening day conditions. This figure indicates that right-turn movements from southbound 7th Street onto westbound Railyards Boulevard would be prohibited so as to minimize traffic flows using this roadway to access parking west of 7th Street. Instead, signage would be deployed on the 7th Street and North B Street approaches indicating that motorists should continue on North B Street to 6th Street.

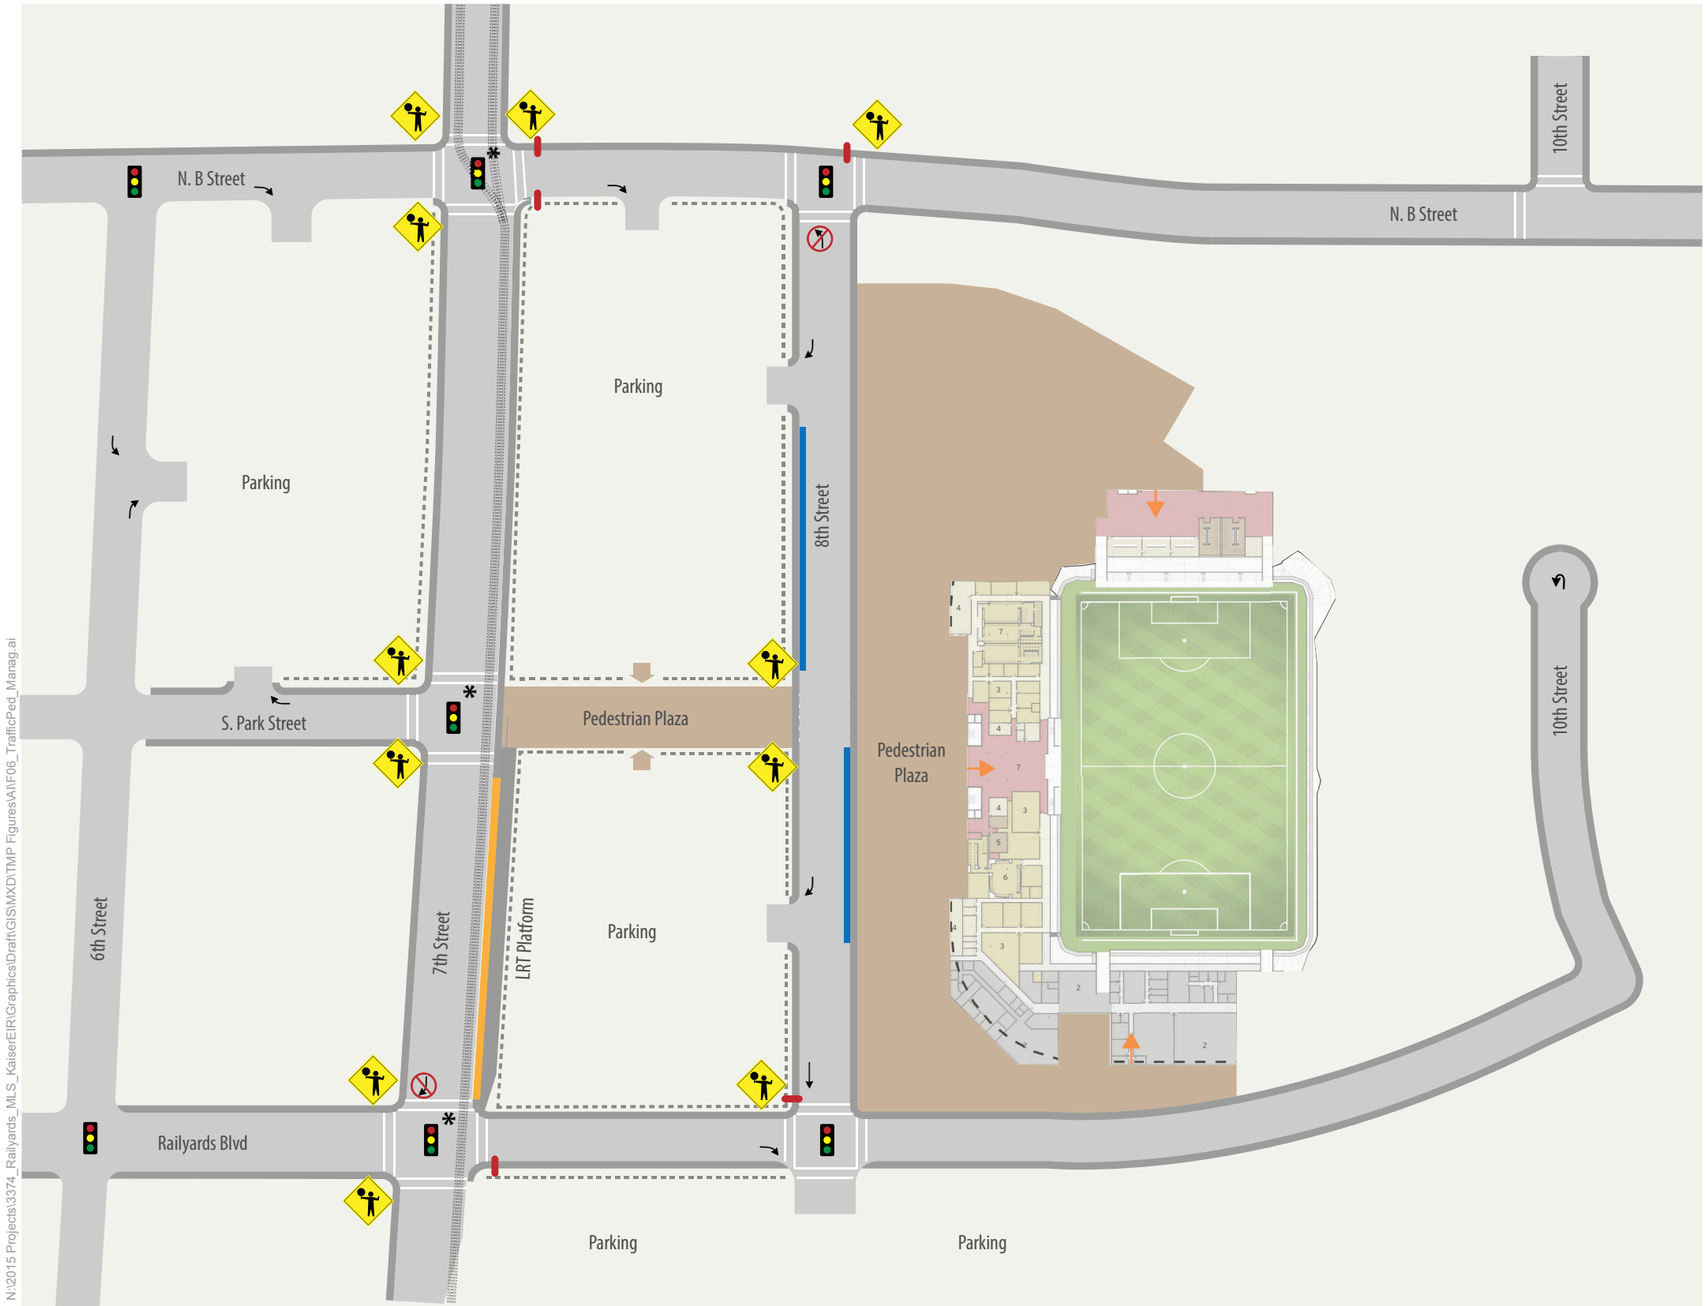
Figure 8 (reproduced from Figure 4.12-49 of the Draft EIR) shows vehicular routing for drop-offs to the MLS Stadium under opening day conditions. Buses, paratransit, limos, and ridesharing providers would be permitted to drop off passengers on 8th Street adjacent to the MLS Stadium. It is recommended that the project site plan incorporate the recommended pick-up/drop-off locations shown on 8th Street because their locations minimize conflicts with pedestrians and parking lot driveway access.

Opportunities for drop-off are also possible along 10th Street. However, northbound left-turns from 8th Street onto westbound North B Street would be prohibited so as to keep vehicles that just dropped off passengers from using 7th Street. They may instead use portions of 10th Street or 12th Street to reach their destinations.

TRAFFIC, PARKING, AND PEDESTRIAN MANAGEMENT DURING POST-EVENT PEAK HOUR

Figure 9 (reproduced from Figure 4.12-50 of the Draft EIR) shows the recommended opening day Post-event peak hour management plan to accommodate traffic, parking, and pedestrians in the MLS Stadium vicinity. Key aspects of it include the following:

- Pedestrian Flows: At the conclusion of the soccer match, large numbers of pedestrians would travel in a primarily westerly direction from the stadium. Temporary barricades would be placed as shown on Figure 9 to direct these flows either toward the Pedestrian Plaza, Railyards Boulevard (north side), or North B Street. Similar to Pre-event conditions, TCOs would be placed in strategic locations at certain intersection to manage pedestrian flows. In addition, extended pedestrian WALK intervals would be in operation at signalized intersections as shown on Figure 9 to accommodate heavy pedestrian flows.



- Traffic Signal
- Parking Lot Ingress
- Prohibited Turn Movement
- Traffic Control Officer(s) in Quadrants/Areas Shown
- Barriers Prohibiting Pedestrians
- Drop-Off Area (Buses, Taxis, Uber, Paratransit, etc.)
- Fence Around Parking Lots

* Operate traffic signals with extended pedestrian walk times on all approaches

Figure 6

Recommended Traffic and Pedestrian Management During Pre-Event Peak Hour - Baseline Plus MLS Stadium Conditions

Figure 9

Recommended Traffic and Pedestrian Management During Post-Event Peak Hour - Baseline Plus MLS Stadium Conditions

- Traffic and Parking Management: Due to the volume of pedestrian traffic, it would be necessary to close 8th Street to inbound vehicular traffic for 15 to 30 minutes prior to the conclusion of the soccer match until such time that pedestrians flow subside. This means that any type of pick-up activity along 8th Street would need to occur outside of this time period. As noted on Figure 9, pick-up vehicles may stage along portions of 10th Street, though it is important for emergency response that 10th Street remain free-flow. This figure shows that the two parking lots situated directly west of 8th Street would be emptied onto 8th Street through a series of barricades and partial street closures. The type of barricades to be placed along 8th Street should be able to be removed quickly in the event an emergency vehicle needs to pass through.

USE OF PEDESTRIAN FACILITIES ON NORTH 7TH STREET NORTH OF NORTH B STREET

This section describes a particular area of focus with regard to adequacy of pedestrian facilities versus their projected level of use. Impact 4.12-6 of the Draft EIR identifies a pedestrian impact on the North 7th Street sidewalk north of North B Street and crosswalks at the Richards Boulevard/N 7th Street intersection during MLS soccer matches. The sidewalks located on both sides of North 7th Street from North B Street to Richards Boulevard would operate at LOS F based on their five-foot widths (less physical obstructions) and projected pedestrian demand (over 5,000 total pedestrians during the Pre-event peak hour).

As part of the Draft EIR technical analysis, several potential mitigation options were identified including widened sidewalks, a private shuttle to transport attendees, special-event LRT train service, a dedicated travel lane for pedestrians, and reduced parking supply north of the RSP Area. For a variety of reasons, none of these options were deemed feasible at this time. Therefore, Mitigation Measure 4.12-6 provides language (including reference to this part of the Event TMP) to ensure that solutions are identified and implemented to provide a safe flow of pedestrians on North 7th Street north of North B Street during the Pre-Event and Post-Event peak hours. As subsequent versions of the Event TMP are prepared, more detailed evaluation of this topic will be performed and documented.

So as to avoid causing pedestrians to walk within North 7th Street, a variety of measures were identified including, but may not be limited to: (1) crosswalk and sidewalk widening, (2) temporary signal timing modifications, (3) shuttle bus operations, (4) RT light rail train special event service, (5) use of traffic control officers, potentially combined with use of temporary safety barriers, to monitor and manage pedestrian flows, and (6) targeted and/or reduced parking supplies north of North B Street.

Details of the measures being considered are described below, though it is noted that additional options beyond these may also be identified over time.

- Additional Parking Within RSP Area – By increasing the supply of parking within the RSP Area under near-term conditions, it would be possible for greater numbers of attendees to use facilities such as Railyards Boulevard and 7th Street within the RSP Area, which are designed with wide sidewalks to carry substantial volumes of pedestrians. As a consequence of this additional parking and redistributed pedestrian flows, usage of the areas north of North B Street for parking may be reduced, which would help address issues along this corridor.

- Widen Sidewalks – Sidewalk widening, where feasible, would increase the available walk space for future pedestrians travelling from the Richards Boulevard corridor to North B Street. A lack of right-of-way and presence of numerous developed adjacent properties could require property acquisition(s), which would be difficult, bringing into question the feasibility of this potential mitigation in some locations. Nevertheless, the City has the authority to condition projects that request discretionary grading or building permits (to provide surface parking) to bring sidewalks into compliance with current City standards adjacent to the property.

- Operate Shuttle – A shuttle could transport MLS attendees from temporary stops on Richards Boulevard and along North 7th Street to the Stadium and back. Given the magnitude of the pedestrian volume decrease that would be necessary to achieve LOS D conditions, a substantial (i.e., likely over 25) number of shuttle buses would be necessary. They would also be required to stop in a travel lane that has a mixed-flow light rail line. Lastly, congestion during post-event conditions may result in few riders using the shuttles after learning that it may be quicker and cheaper to walk to their vehicles than wait for a shuttle bus.

- Coordinate with Regional Transit to Operate Special Event-Related LRT Service – During the pre-event and post-event periods, a light rail train could operate continuously between the Township 9/Richards Boulevard station and the proposed station on 7th Street north of Railyards Boulevard to transport passengers to/from the MLS Stadium. The ride would take two to three minutes in each direction. Coupled with the time to load and unload passengers, it is possible that a single train could operate on 10-minute headways.

- Reduce River District Parking Supply – Reducing the number of available parking spaces north of North B Street would reduce pedestrian volumes along North 7th Street. Most of the properties that could potentially provide off-street parking are eligible to obtain the required permits from the City and offer their properties for game day parking.

Each of the above options was discussed by the City's Fire, Police, and Public Works Departments, and the consulting team. It was concluded that further evaluations of these and other improvement options should continue and be documented in a subsequent update to the TMP. With respect to pedestrian facilities along North 7th Street north of North B Street, Mitigation Measure 4.12-1 states that the identified measures shall accomplish their intended purpose, subject to the review and approval of the City Traffic Engineer prior to the issuance of the Certificate of Occupancy for the proposed Stadium. Further, Chapter 8 includes a Performance Standard, whereby event-related pedestrian flows do not cause spillovers onto public streets that have moving vehicles, such as North 7th Street.

8. PERFORMANCE STANDARDS AND MONITORING

This chapter presents the Performance Standards, for which the project operations will be measured against. These Performance Standards are incorporated into Mitigation Measure 4.12-1. This chapter also describes the monitoring methods to be undertaken during the first year of stadium operations.

PERFORMANCE STANDARDS

This TMP includes various Performance Standards that must be met. Once the project is in operation and initial monitoring results are available, the results will be measured against these criteria. If not achieved, the MLS Stadium operator is required to work with the appropriate agency or stakeholder group to ensure that the standards are met. The following Performance Standards have been developed:

1. Vehicle Queuing on City Streets: Through added intersection capacity and/or traffic management, traffic does not queue back to upstream locations during the Pre-Event peak hour including (but not limited to):
    - Northbound 7th Street traffic does not spill back from Railyards Boulevard into the undercrossing of the UPRR tracks (i.e., queues do not extend any greater than 600 feet from Railyards Boulevard).
    - Westbound North B Street traffic does not spill back from 7th Street into the 8th Street intersection
    - Westbound North B Street traffic does not spill back from 8th Street into the 12th Street intersection
    - Southbound 7th Street traffic does not spill back to the LRT tracks at North B Street
2. Pedestrian Flows: Through pedestrian flow management, pedestrians do not spill out of sidewalks onto streets with moving vehicles, particularly along 7th Street between Richards Boulevard and G Street, Railyards Boulevard between 5th Street and 8th Street, and North B Street between 7th Street and 12th Street.
3. Vehicular Parking: A comprehensive parking plan is implemented that includes (but is not limited to) a reservation system, smartphone parking app, directional signage, real-time parking garage occupancy, etc. that minimizes unnecessary vehicular circulation (while looking for parking) within and adjacent to the RSP Area.
4. Bicycle Parking: Signage is clearly visible to direct bicyclists to MLS Stadium event bicycle parking, which has an adequate supply to accommodate a typical MLS Stadium event.
5. Light Rail Transit: A new light rail station/stop is constructed on 7th Street north of Railyards Boulevard and operational at the time the stadium opens, providing an adequate level of LRT service to meet the Pre- and Post-Event ridership demands.

6. Bus/Paratransit: Specific locations are provided to accommodate public buses and paratransit vehicle stops within one block of the MLS Stadium.
7. Ridesharing: Specific locations are provided for pick-up / drop-off areas such that taxi, uber, or similar ridesharing services do not impede overall vehicular or pedestrian flow (including maintaining uncongested conditions along 10th Street to enable emergency vehicle response).
8. Truck Staging: Delivery trucks associated with special events do not park or idle along 7th Street, 8th Street, North B Street, or Railyards Boulevard. Delivery trucks, buses, or other large vehicles should not be parked within the 10th Street cul-de-sac in a manner that blocks fire apparatus or other vehicles from being able to turn around.

MONITORING METHODS AND DOCUMENTATION

The following monitoring activities will occur during the first year of MLS Stadium operations.

Initial Event Monitoring Plan

- *The first two regular season games at the MLS Stadium.*

The purpose of the Initial Event Monitoring Plan is to identify the initial weaknesses in the TMP elements and implement improvements as soon as possible that enable a safer and more enjoyable experience at the MLS Stadium. The monitoring will identify deficiencies in the event planning / operations and recommend measures that can be quickly implemented to resolve these issues.

This effort will consist of collecting observational data to assess which elements of the TMP need to be immediately modified in advance of subsequent events. The following plan elements will be reviewed:

- Pre- and Post-Event Traffic Management
- Pedestrian Circulation
- Bicycle Parking and Access
- Transit Loading and Access
- Vehicular Pick-ups / Drop-offs
- Traffic Congestion and Queuing
- Wayfinding / Signage
- Parking
- Staffing
- General Safety/Security

Prior to each scheduled monitoring event, a meeting will be held with the City and MLS Stadium operator to identify the specific monitoring locations, durations, and staffing responsibilities. A follow-up meeting will occur during the week immediately following each event to discuss the monitoring observations and identify what modifications to the TMP should be implemented for subsequent events.

A written record of observations, and suggested improvements after each monitoring event will be prepared, and be available for public review at City offices.

First Year Typical Event Monitoring Plan:

- *Two typical mid-season soccer matches at the MLS Stadium.*

Matches that are anticipated to have at least 18,000 attendees should be selected. Unless precluded by scheduling conflicts, one monitored event should occur during a weekday evening, while the other monitored event should occur on a weekend afternoon. By waiting until mid-season, this approach enables travel patterns and behavior to "normalize" so that a representative sample is collected. It also allows for the benefits of the initial event monitoring and any associated TMP refinements to take effect.

These events will provide a representative sample of operating conditions at the MLS Stadium, and will be measured against the above Performance Standards. Prior to monitoring these events, a meeting will be held with the City and MLS Stadium operator to identify the specific monitoring locations, durations, and staffing responsibilities. The monitoring effort will focus on the TMP elements and Performance Standards contained in this document. The monitoring effort will include both observational and empirical data collection.

Documentation: The results of the two monitored events will be documented into the "*MLS Stadium Year One Travel Monitoring Report*". This report will include photos, charts, and eyewitness accounts of site operations. It will include an assessment of the extent to which the established Performance Standards are met, exceeded, or are unmet. For those standards that are not met, specific recommendations will be provided which would enable the standard to be achieved. The report will be submitted to the City for review. Once finalized, the report will be made available to the public through the City and MLS Stadium operator websites.

Appendix J.3

Railyards Blvd. and 10th Street Access Feasibility Study Summary

ESA

Kimley»Horn

Memorandum

To: Hector Barron, P.E.
Samar Hajeer, P.E.

From: Thomas Coppin, P.E.

Re: **Railyards Blvd. and 10th Street Access Feasibility Study Summary**

Date: October 15, 2015

The purpose of this memorandum is to document the findings of feasibility studies performed to assess the viability of constructing vehicular and bicycle / pedestrian access points to serve the eastern half of the Railyards project (east of 7th and west of 12th Streets).

Project Understanding

Kimley-Horn was asked to study the feasibility of constructing additional access routes into and out of the Sacramento Railyards project in support of the 2015 land use plan revisions proposed for the project. Specifically this work included the evaluation of an inbound vehicular lane connecting 12th Street to the east end of Railyards Blvd., and a tunnel at 10th Street, to provide vehicular, pedestrian and bike connectivity from the Alkali Flats neighborhood to the Railyards.

In total, Kimley-Horn studied the following scenarios:

1. 10th Street vehicular and bike tunnel
2. 10th Street bike tunnel
3. 10th Street bike bridges
4. Railyards Blvd. connection to 12th Street at mid-block
5. Railyards Blvd. connection to 12th Street at UPRR tracks
6. Railyards Blvd. connection to 12th Street at intersection of North B
7. Railyards Blvd. connection to 12th with grade separated cycle track

Data Collection

Kimley-Horn assembled current topographic survey data of the project site as well as current base map files depicting the proposed onsite street network and lotting. We obtained a current CAD file from the City of Sacramento of the preferred 12th Street Cycle Track project improvements. These files were overlaid to form the basis of our studies.

Excerpts from The Creamery – Phase 1 & 2 improvement plans were provided by the City to assist with evaluation of impacts to the adjacent developments along 10th Street, south of the UPRR tracks.

The current published City of Sacramento Bikeway Mater Plan was obtained from the City's web site to provide guidance on existing and planned bike routes surrounding the Railyards site **Exhibit 1**.

DRAFT

Kimley»Horn

Alternatives Discussion

10th Street Vehicular and Bike Tunnel

The focal point of this alternative is a 100 ft vehicular tunnel connecting 10th Street beneath the UPRR tracks **Exhibit 2**. The 10th Street section consists of north and south travel lanes, a dual left turn lane, class 2 bike lanes in each direction and attached sidewalks. The intersection with Railyards Blvd. would be located immediately north of the tunnel, resulting in a depressed intersection approximately 14 ft below the elevation of the adjacent pads and tracks. The depressed intersection would require retaining walls at all four legs of the intersection to shore up the adjacent tracks and pads. The retaining walls would limit site visibility at the intersection unless pulled away from the back of walk. Moving gthe walls back or cutting the side slopes back at a rate of 3:1 to eliminate the need for retaining walls and improve site distances and aesthetics was deemed infeasible due to the impact this would have on available real estate for the adjacent lots. The proposed MLS stadium is to be located at the NW quadrant of the intersection and would not have sufficient acreage if additional right-of-way was provided.

At a slope of approximately 4.5%, 10th Street would require 350 ft to match grade to the north and south of the tunnel. This depressed roadway section would limit access to the lots to the north and would impact access to the driveway entrances to the Creamery project which is currently under construction to the south of the UPRR tracks.

10th Street Bike Tunnel

Kimley-Horn studied the feasibility of constructing a standalone bike/pedestrian tunnel at 10th Street **Exhibit 3** in place of the vehicular tunnel. The tunnel would consist of a minimum 12 ft high by 16 ft wide, 325 ft long tunnel for bicycle and pedestrian use. The tunnel would pass beneath the UPRR tracks and Railyards Blvd. extension. The tunnel would be located at a depth of approximately 21 ft. Ramps to the south would extend approximately 135 ft at a slope of 4% and 225 ft to the north to match a pad elevation of 50.0. The northern ramp would extend beyond limits of the adjacent pads and would precluded access to Lot 51a from 10th Street.

10th Street Bike Bridge

Two bike/pedestrian bridge alternatives were studied. The first included a bridge with straight approach ramps **Exhibit 4**. The second included circular ramps to the north and south **Exhibit 5**.

Both alternatives consisted of a 325 ft, elevated bridge located at a minimum height of 22 ft above the UPRR tracks. The southern ramp would project 700 ft to the south to match grade at a slope of 4.5%. Likewise the northern ramp would extend a similar distance reaching all the way to North B Street. The intersection with D Street is only 600 ft to the south and the northern ramp would preclude access to Lot 51a due to its length making this alternative infeasible.

A second ramp alternative included elevated switchbacks at both ends of the bridge. Based on the bridge deck height and grades of 10th Street and Lot 51a, the southern and northern ramp lengths were determined to be approximately 276 ft and 210 ft, respectively. The height and proximity of the southern ramps to the completed Creamery project would pose a significant impact to the completed units. The length of the southern ramps would still extend far enough to the south to impact the alignment of the anticipated driveway entrance. The bridge abutments and ramps to the north would extend over half the distance of the Lot 51a frontage, significantly limiting views to the west and access to the parcel.

DRAFT

Railyards Blvd. Connection to 12th Street at Mid-Block

In an effort to accommodate access from 12th Street into the Railyards several alternate access alignments were considered. The first was a mid-block connection of Railyards Blvd. to 12th Street **Exhibit 6**. This alternative included a single 20 ft wide extension of Railyards Blvd. with a sidewalk along the north edge and a 12 ft Class 1 bike trail along adjacent to the south edge. The bike trail would provide a direct connection from the 12th Street cycle track to protected bike lanes at 6th Street.

The mid-block connection would consist of a slip lane from south bound 12th Street onto Railyards Blvd. The connection point is located approximately ? ft south of the North B Street intersection. This point coincides with the high point of the 12th Street roadway profile, before it dips into the 12th Street track undercrossing.

This work would require extensive regrading and reconfiguration of the secondary levee on the west side of 12th Street and would include impacts to the Sims property located to the north of the Railyards property.

In addition, this alternative will require a dedicated bike phase at the North B Street intersection to protect cycle track users from right turning vehicles. Free right turn movements at the North B intersection would also be precluded to protect cyclists. The dedicated bike signal phase could cause unacceptable delays to the operation of the North B intersection. Likewise the distance between North B and the Railyards Blvd. intersection may result in unacceptable impacts to signal operations if the signals are not linked.

These signal operational issues will need to be studied further as part of the City's traffic circulation analysis currently underway.

Railyards Blvd. Connection to 12th Street at UPRR Tracks

In addition to the mid-block connection, a location north of the 12th Street track undercrossing was considered for the Railyards Blvd. intersection along 12th Street **Exhibit 7**. This connection would be located ? ft south of the North B intersection. The same street cross section, sidewalk and bike trail improvements were contemplated for this alternative.

As with the prior alternative, extensive grading and retaining wall construction would be required to preserve the flood protection currently afforded by the secondary levee. A dedicated signal or bicycle phase would also be required at this intersection to protect cycle track users from right turning vehicles. However, the increased distance between the two intersections may allow this signal to operate independently of the North B intersection. The greater distance may also afford the possibility of restriping the western-most lane as a dedicated right turn lane.

The signal timing and restriping alternatives will need to be further assessed as part of the City's current circulation study.

Railyards Blvd. Connection to 12th Street at Intersection of North B

In an effort to protect cyclist and reduce intersection operational issues, a connection at the North B intersection was also considered. This alternative places the slip lane entrance to Railyards Blvd. at the North B intersection **Exhibit 8**. This alternative would require a dedicated bike phase for the signal and would require free right turn to be prohibited. Placing the slip lane at the intersection would reduce the

time for bikes and peds to traverse the intersection, theoretically reducing waiting times and intersection delays. As with the prior alternatives, this options needs to be studied further as part of the City's traffic circulation study to assess its full impact on traffic patterns.

This scenario would also require extensive regarding of the secondary levee, but could potentially leave the existing flood gates intact at 12th Street. This alternative would require the removal of buildings on the Sims Metal site and the acquisition of additional right-of-way.

Railyards Blvd. Connection to 12th Street Grade Separation

In order to entirely eliminate conflicts between cyclists and right turning vehicles, Kiimley-Horn studied a final alternative. This alternative contemplates realignment of a portion of the 12th Street Cycle Track and directing the track beneath Railyards Blvd. through a short 35 ft undercrossing **Exhibit 9**.

While this alternative does achieve its desired goal, it results in the most extensive grading and revisions to the secondary levee. Modifications to both the east and west sides of 12th Street would be required. The regrading would also eliminate approximately half of the developable area of Lot 51b.

Conclusions

10th Street Vehicle Tunnel

As a result of our study, it was concluded that the 10th Street vehicular tunnel would not be practical to construct for the following reasons:

- Intersection immediately north of UPRR tracks would be depressed 12-15 feet from surrounding pads and track.
- A 100 foot tunnel would result in public safety concerns.
- The depressed intersection would result in need for dedicated storm drain pump station and perpetual operation and maintenance costs for the City.
- The depressed intersection would result in the need for significant retaining wall construction to support the adjacent pads on Lot 51 and 52. These walls would limit sight distance at all legs of the intersection. Moving the walls away from the intersection or replacing them with slopes would result in significant loss of developable property on Lot 51 and 52. The proposed MLS soccer stadium on Lot 51 cannot afford the loss of additional real estate.
- Depressed roadways would preclude accessibility and emergency access points for vehicle access to Lots 51 and 52.
- Depressed roadways would form aesthetic and physical barriers for bikes and pedestrians to access future development on Lots 51 and 52.
- Depressed intersection would preclude the ability to drain sanitary sewer from lots east of 10th Street by gravity resulting in the need for a permanent lift station and ongoing maintenance costs.
- The Creamery project located south of the UPRR tracks has dedicated right-of-way for the possible construction of the south legs of 10th Street. However, the project is currently under

DRAFT

construction and includes driveway access to 10th Street which would be eliminated should 10th Street be depressed to accommodate a tunnel.

- The 10th Street tunnel would provide traffic and parking concerns for the Alkali Flats neighborhood with development of the Railyards and accompanying MLS soccer stadium.

For these reasons it was determined that this alternative is not feasible.

DRAFT

Kimley»Horn

10th Street Bike Tunnel / Bridge

As an alternative to the vehicular tunnel, Kimley-Horn explored the possibility of maintaining bicycle and pedestrian access at 10th Street by constructing a tunnel or bridge. These alternatives were also deemed impractical for the following reasons:

- A 325 foot long tunnel results in public safety concerns.
- It would not be possible to achieve ADA accessibility from a bridge and still touch down within the project limits along north 10th Street. The tunnel option would pose similar constraints.
- The approach ramps would preclude vehicular and pedestrian points of access to Lot 51.
- Construction and permitting of a 325 foot tunnel beneath the UPRR tracks would be problematic given the need to maintain live rail traffic at all times.
- Equally, constructing and permitting a bridge over the UPRR tracks would be difficult without impacting rail traffic.

Railyards Blvd. Connection to 12th Street at Mid-Block

A mid-block connection of Railyards Blvd. to 12th Street was studied.

This alternative poses the following challenges to implementation:

- The west finger of the existing levee would need to be reconstructed.
- A minimum flood protection elevation of 35 feet can be maintained as part of the roadway construction.
- The slip lane from 12th Street to Railyards Blvd. exposes pedestrians and cyclists to potential right turning vehicle conflicts. An additional signal or some other form of stop control would be needed to protect bikes in the cycle track and pedestrians crossing Railyards Blvd. This would affect traffic flow and possibly signal timing at the North B and 12th Street intersection.
- Additional stop controls along the cycle track defeats the purpose of this facility.
- This alternative would also require the redevelopment of the Sims Metal operations north of the Railyards. This property is not controlled by the Railyards and would require significant lead time to remove and remediate the site prior to development of the Railyards Blvd. extension.

Railyards Blvd. Connection to 12th Street at UPRR Tracks

Kimley-Horn studied a connection of Railyards Blvd. to 12th Street immediately north of the UPRR tracks. This alternative is similar to the Mid-Block alternative in many ways, and poses similar challenges to implantation:

- The west finger of the existing levee would need to be reconstructed.
- Additional retaining walls would need to be constructed to support the existing tracks and levee / lots.
- A minimum flood protection elevation of 35 feet can be maintained as part of the roadway construction.
- The right turn from 12th Street to Railyards Blvd. exposes pedestrians and cyclist to potential right turning conflicts with vehicles. An additional sign or stop control would be needed to

DRAFT

protect bikes in the cycle track. This would affect traffic flow and possibly signal timing at the North B and 12th Street intersection.

Railyards Blvd. Connection to 12th Street at Intersection of North B

In light of the cycle track concerns stated with the prior two 12th Street alternatives described above, Kimley-Horn explored the alternative of moving the Railyards Blvd. connection to the intersection of North B and 12th Street.

This alternative alleviates some concerns but still poses some challenges to implementation:

- The west finger of the existing levee would need to be reconstructed.
- A minimum flood protection elevation of 35 feet can be maintained as part of the roadway construction.
- This alternative would also require the redevelopment of the Sims Metal operations, north of the Railyards. This property is not controlled by the Railyards and would require significant lead time to remove and remediate the site prior to development of the Railyards Blvd. extension.
- By combining the pedestrian and cycle track movements at the intersection an introducing a dedicated bicycle phase potential right turn conflicts between vehicles and cyclists could be reduced.
- The dedicated bicycle signal phase will potentially impact signal operations and traffic flow.

Railyards Blvd. Connection to 12th Street Grade Separation

The grade separated alternative completely eliminates bicycle and vehicle conflicts. While this alternative achieves it stated goals, it also results in significant cost implications which must be evaluated.

- Eliminates vehicle and cyclist conflicts.
- Eliminate the need for dedicated bike signal phase.
- Allows for free right turn movements at the North B and 12th Street intersection.
- Requires reconstruction of both east and west portions of secondary levee.
- Reduces developable area of Lot 51b by approximately one half.

Water Supply Assessment

ESA

City of Sacramento
SB 610/SB 221 Water Supply Assessment and Certification Form

This form may be used to complete water supply assessments for projects located in an area covered by the City's most recent Urban Water Management Plan.

Note: Please do not use this form if the projected water demand for your project area was not included in the City's latest Urban Water Management Plan. To review the City's Urban Water Management Plan, please visit: http://www.cityofsacramento.org/utilities/urbanwater/index.html

Project: **Railyards Specific Plan Update**

Date: **September 27, 2016**

Project Applicant (Name of Company): Downtown Railyard Venture, LLC

Applicant Contact (Name of Individual): Adrienne L. Graham on behalf of ESA for Jay Heckenlively, DRV

Phone Number: **916-206-0135**

E-mail: algraham@surewest.net

Address: ESA, 2600 Capitol Avenue, Sacramento, CA 95816

Project Applicant to fill in the following:

1. Does the project include:

Type of Development	Yes	No
A proposed residential development of 500 or more dwelling units	x	
A shopping Center employing more than 1,000 persons or having more than 500,000 square feet?		x
A Commercial Office building employing more than 1,000 persons or having more than 250,000 square feet?	x	
A proposed hotel or motel, or both, having more than 500 rooms	x	
A proposed industrial, manufacturing, or processing plant or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area		x
A mixed use project that includes one or more of the projects specified above	x	
A project that would demand an amount of water equivalent to, or greater than, the water required by a 500 dwelling unit project	x	

If the answer is no to all of the above, a water supply assessment is not required for the project.

2. Is the projected water demand for the project location included in the City's 2015 Urban Water Management Plan, adopted June 21, 2016?

Yes: x No: _____

If the answer is no, you cannot use this form. Please refer to the requirements of SB 610 for preparing a water supply assessment.

3. Please fill in the project demands below:

Type of Development	Land Use Category	Demand Factor		Proposed Development			Current Zoning		
		Residential Water Use Factor, afy/dwelling unit	Non-Residential Water Use Factor, afy/employee	Number Dwelling Units	Number Employees	Total Demand	Number Dwelling Units	Number Employees	Total Demand
Residential - Low	Rural Residential (RR)	.61	.09						
	Suburban Neighborhood Low Density (SNLD)								
	Traditional Neighborhood Low Density (TLDR)								
Residential - Medium	Suburban Neighborhood Medium Density (SMDR)	.39	.09						
	Urban Neighborhood Low Density (ULDR)								
Residential - High	Suburban Neighborhood High Density (SHDR)	.12	.04						
	Traditional Neighborhood Medium Density (TMDR)								
	Urban Neighborhood Medium Density (UMDR)								
	Traditional Neighborhood High Density (THDR)			6,000-10,000[11]		720-1,200	10,000-12,500		1,200-1500

[11] The RSPU proposes 6,000 to 10,000 dwelling units. If 6,000 du are developed, commercial office would be limited to 4.54 msf. If 10,000 du are developed, office would be limited to 3.44 msf. All other uses would be unchanged.

Type of Development	Land Use Category	Demand Factor		Proposed Development			Current Zoning		
		Residential Water Use Factor, afy/dwelling unit	Non-Residential Water Use Factor, afy/employee	Number Dwelling Units	Number Employees	Total Demand	Number Dwelling Units	Number Employees	Total Demand
Mixed Use	Employment Center Mid Rise (ECMR)	.19	.09						
	Suburban Center (SCnt)								
	Suburban Corridor (Scor)								
	Traditional Center (TCnt)								
Mixed Use - Higher Density	Urban Center High (UCntHigh)	.15	.04						
	Urban Center Low (UcntLow)								
	Urban Corridor High (UCorHigh)								
	Urban Corridor Low (UCorLow)								
Central Business District	Central Business District (CBD)	.15	.02		15,142-11,476[12]	303-230		10,894	218
	Urban Neighborhood High Density (UHDR)								
Commercial	Regional Commercial (RC)	.15	.09		2,263	204		4,045	364
	Employment Center Low Rise (ECLR)								
Industrial	Industrial (IND)		.14						
Public	Public/Quasi-Public (PUB)	.37	.17		120	20	125		21
Park	Parks and Recreation (PRK)	.37	2,678/acre (3 afy/acre)	30 acres		90	41.2 acres		123

[12] The RSPU proposes 6,000 to 10,000 dwelling units. If 6,000 du are developed, commercial office would be limited to 4.54 msf. If 10,000 du are developed, office would be limited to 3.44 msf. All other uses would be unchanged.

Type of Development	Land Use Category	Demand Factor		Proposed Development			Current Zoning		
		Residential Water Use Factor, afy/dwelling unit	Non-Residential Water Use Factor, afy/employee	Number Dwelling Units	Number Employees	Total Demand	Number Dwelling Units	Number Employees	Total Demand
Open Space	Open Space (OS)	0	0	0			0		
Other	Hotel		250 gpd/room (0.28 afy/room)	1,100 rooms		308	1,100 rooms		308
Other	Hospital		387.5 gpd/bed (0.43afy/bed)	420 beds		182	0		
Other	Medical Office		0.02	1,855 employees		37			
Other	MLS Stadium		3 gpd/seat (0.0034afy/seat)	25,000 seats		7	0		
Total Demand (AFY)						1,871-2,278			2,234-2,534

4. Required Elements of Water Supply Assessment (Water Code § 10910)

A. Water supply entitlements, water rights or water service contracts (Water Code § 10910(d)):

The City's water supply entitlements, water rights and water service contract are identified and discussed in the Urban Water Management Plan, Chapters 3, 6, and 7.

All infrastructure necessary to deliver a water supply to the project is in place, excepting any distribution facilities required to be constructed and financed by the project applicant: Yes: x No: ____

B. Identification of other sources of water supply if no water has been received under City's existing entitlements, water rights or water service contracts (Water Code § 10910(e)):

Not applicable.

C. Information and analysis pertaining to groundwater supply (Water Code § 10910(f)):

Addressed by Urban Water Management Plan, Chapters 3, 6, and 7.

Verification of Water Supply
(for residential development of more than 500 dwelling units)

Based on the City's most recent Urban Water Management Plan, are there sufficient water supplies for the project during normal, single dry and multiple dry years over a 20 year period?

Yes: X No: _____

1. Assumes 2.1 Individuals per household for Downtown Sacramento residents and retail spending per capita of $7,760 annually.
2. Assumes 1 employee per 300 feet of commercial space and 1 employee per 400 feet of retail space and retail spending per capita of $3,725 annually.
3. Assumes $60 in retail expenditures per visit.
4. Assumes $57 in retail expenditures per visit.
5. Based on proposed spending in ESC analysis, assumes retail expenditures of $20 per event attendee.
6. Assumes same rate of downtown, museum, and Entertainment visitors as proposed in the 2007 RSP analysis.
7. Assumes the same number of employees for the RSPU land use variant minimum and maximum housing scenarios.
8. ESC event attendees are substituted for MLS Stadium event attendees.
