

Provide 2A10BC fire extinguishers every 75'

No open flame is permitted inside, near or under tent (fire pits, heaters, candles etc.)

Maintain a clearance of 3' from all membrane walls

All tents must have proof of flame-retardant treatment

**KEEP EXITS CLEAR AT ALL TIMES!**

*Look for this seal on your tent or canopy structure before purchasing or installing:*

Sacramento Fire Department Entertainment Team:

- Senior Fire Prevention Officer: Elizabeth McDowell
- Fire Prevention Officer II: Julie Gibbs 916-808-2227

# Safe Outdoor Dining

**Fire Safety Guidelines provided by the Sacramento Fire Department**

---

## All types of tents and membrane structures can burn!

---

- Smoking is prohibited in tents and in adjacent areas.
- “No Smoking” signs shall be conspicuously posted.
- Fireworks, open flames and devices capable of igniting combustible material shall not be used unless otherwise approved.

It's important to keep safety in the forefront of our minds as we navigate the multitude of challenges we all face during these times. The last thing any business needs is an unsafe fire-related incident or injuries on their property!

Do not use candles, fire pits, or other types of open flame under or near tents at any times!

A good alternative is to use battery operated candles which look similar to real ones

Reach out with questions and we can provide other types of alternatives to fit your needs

---

## How do I use a generator safely around tents?

---

Shall be separated from temporary membrane structures 20 feet.

Be isolated from the public by approved methods.

The refueling of hot generators or equipment is not permitted.

Electrical cords and connections shall be protected.

A dedicated fire extinguisher may be needed based on fuel tank size.

---

## Things to remember:

---

**\*In general patio heaters are not to be used inside tents, unless approved by the Fire Marshal. Not all patio heaters are the same. Refer to manufacturer's instructions for proper use.**

**\*Cooking appliances or devices that produce sparks or grease-laden vapors or flying embers (firebrands) shall not be used within 20 feet of a tent or temporary structure.**

**\*Hay, straw, shavings or similar combustible materials shall not be located within any tent or membrane structure containing an assembly occupancy (CFC 3107.2)**

---

## Flammable and Combustible Liquids

---

- • Flammable liquid filled equipment shall not be used in tents.
- • Flammable and combustible liquids shall be stored outside and in an approved manner.
- • Refueling shall be performed in an approved location not less than 20 feet from tents.
