# Message from the CIO

Darin Arcolino

Artificial intelligence is rapidly transforming the public sector, and in the City of Sacramento, we have already begun integrating it into our operations. This includes initiatives like our 311 virtual agent and early explorations of generative Al.

Over the past year, we have established a thoughtful foundation for future developments. We created a citywide Alpolicy to ensure the safe and ethical use of Al, launched an Al Working Group to enhance our internal capabilities, and joined the GovAl Coalition to align with best practices in the public sector.

Additionally, we have initiated a comprehensive Data Strategy, surveyed staff to assess organizational readiness, and conducted an Al Strategy Workshop with our IT Leadership Team and Gartner to shape our collective vision.

This Al Strategy and Roadmap for 2025-28 demonstrates our commitment to using Al thoughtfully, responsibly, and with purpose. It provides a clear and practical plan for integrating Al throughout our organization while prioritizing transparency, equity, and accountability. Our goal is not to utilize technology for its own sake, but to enhance the human impact of government, improve services, and empower both our workforce and our residents.

This strategy has been developed in close collaboration with departments across the City, as well as external partners. It recognizes that successful Al adoption requires more than just tools. It demands strong governance, ethical frameworks, data stewardship, and continuous learning.

The strategy marks the beginning of our journey. With effective governance, the right tools, and strong partnerships, we are prepared to guide our city toward an Al-enabled future that aligns with our values and addresses the changing needs of our community.

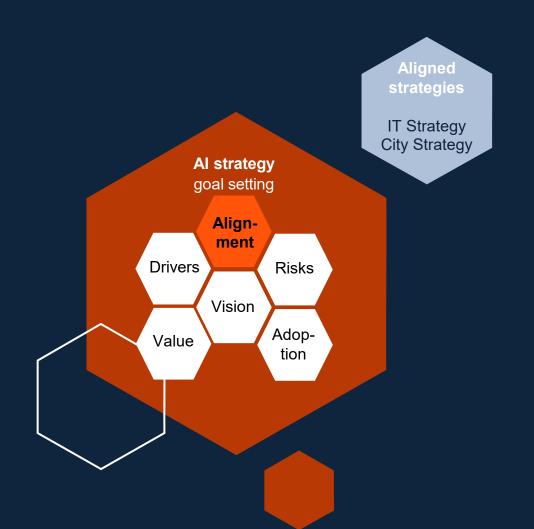

"Our AI Strategy lays the foundation for the next generation of public service, where innovation and accountability go hand in hand."

## Our Al Strategy Approach

Building an Al Strategy and Roadmap involves a structured approach to aligning Al initiatives with business goals, ensuring feasibility, and enabling sustainable implementation. Here are the five steps we used in our approach.

- 1 Develop the Al Foundation and Governance
  - Develop an Al Policy with defined roles and responsibilities.
  - Establish an Al Working Group in collaboration with City departments.
  - Join the GovAl Coalition to proactively shape the future of Al in government with peer cities.
- 2 Assess Current Capabilities and Data Readiness
  - Survey staff for AI readiness and prioritize quick wins.
  - Evaluate our data maturity with a Data Strategy and Governance Plan.
- Align Goals with Business Objectives
  - Create an Al Vision.
  - Align with the City's strategic goals and IT Vision.
- 4 Identify and Prioritize Al Use Cases
  - Plan Al Workshop with the IT Leadership Team.
  - Invite strategic partners to present their Al Roadmap.
- **5 Build** an Al Roadmap
  - Categorize initiatives by impact and feasibility.
  - Create a clear roadmap to ensure a phased, manageable implementation.

# Al Strategy – Alignment

Strategic Alignment of Al with Organizational Goals

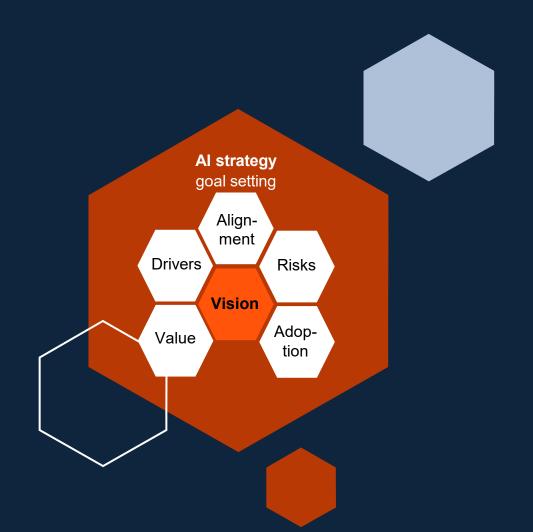

### Al Strategy Alignment

Al will play a pivotal role in engaging citizens, empowering both residents and city employees, and improving services across various sectors. By aligning with the City of Sacramento's IT Vision and the City's strategic goals, Al can drive greater business value through cost savings, efficiency improvements, and data-driven decision-making. In doing so, it will help Sacramento foster a sustainable, equitable, and prosperous future while enhancing the lives of all its residents.

IT Vision

Through the use of technology, we ENGAGE, EMPOWER, and IMPROVE the lives of the citizens of Sacramento.

City Goals Foster a sustainable, equitable, and prosperous city for all residents by focusing on economic development, inclusive housing, climate action, and community well-being.

# Al Strategy – Vision

Defining the Vision: What Al Means for Our Future

#### Al Vision

Our vision for the use of Al in the City of Sacramento is aligned with our overarching IT and city mission and vision statements, which inform our guiding principles for the use of Al.

We will responsibly and ethically leverage AI to optimize city services and drive economic growth, creating a more efficient, inclusive, and sustainable Sacramento for all.

To effectively advance this Al Vision, we created an Al strategy with the following goals:

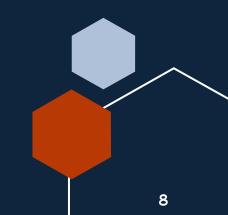

Communicate and champion the organization's Al Vision and ambition.

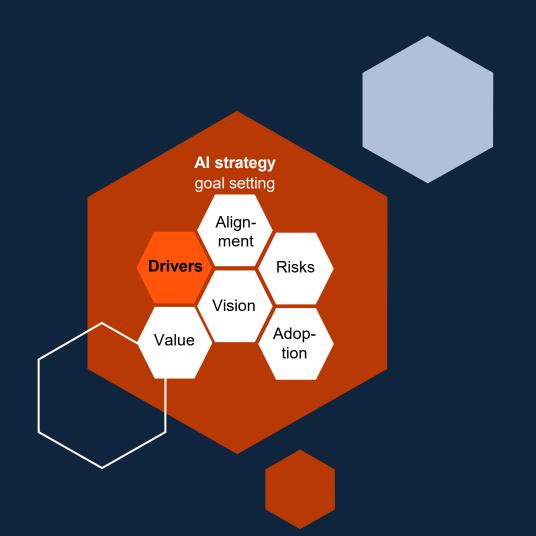

Build business and technical skills to increase the probability of success.

Implement the AI Strategy and prioritize actions to scale AI across the organization.

Govern Al in a responsible, transparent, and accountable manner.

Innovate by pursuing new technologies, use cases, and business models that Al can empower.

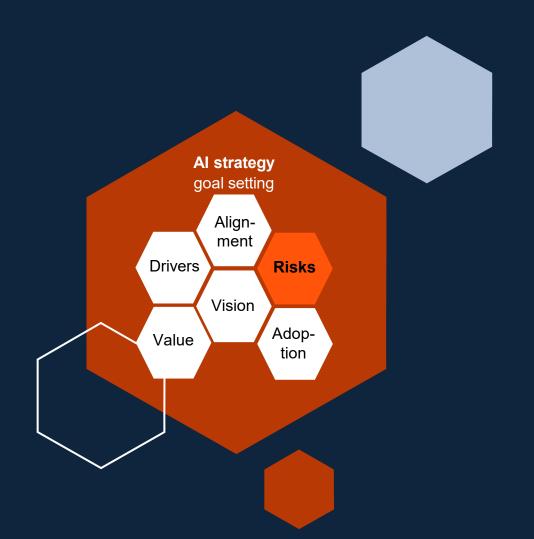

# Al Strategy – Drivers

Key Drivers of Al Adoption and Strategic Relevance

### Al Drivers

Al opportunities as identified in the Al Use Case Employee Survey and the Al Strategy Workshop. These are the forces enabling and accelerating Al development and adoption.

Automate repetitive tasks	Enhance decision-making	Equitable access to services
Enhance data analysis	Improve response times	Enhance data visualization
Improve communications	Enhance time management	Filling in knowledge gaps
Predictive Analytics	Reduce call volume	Potential cost savings
Improve accuracy and quality of work	Improve productivity	Resource optimization
Enhance collaboration	Improve the customer experience	Enhance cybersecurity
Revenue generation	Increase digital literacy	Increase transparency

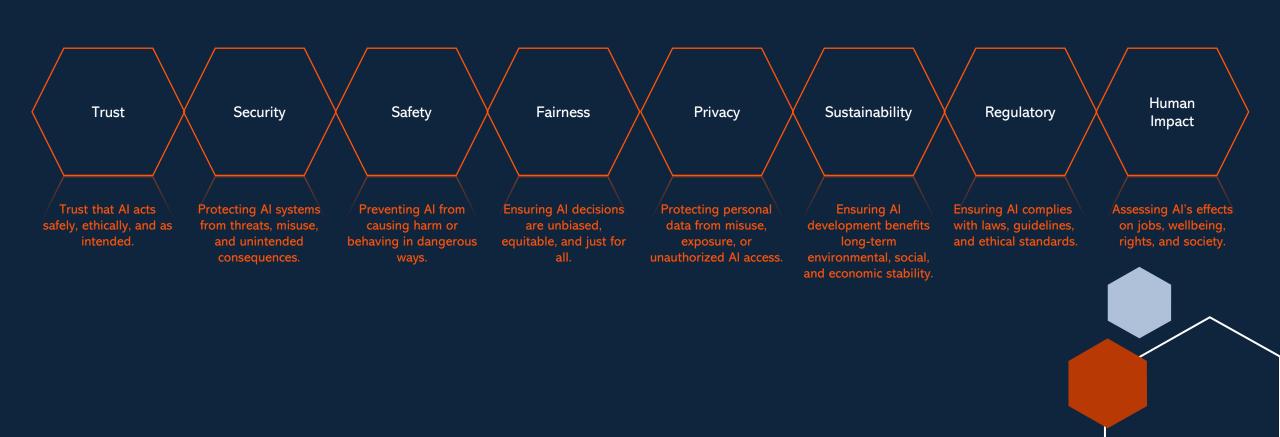

# Al Strategy – Risks

Understanding and Managing the Strategic Risks of Al

#### **AI Risks**

The value of Al can only be fully realized when its risks are effectively managed through clear, transparent, and comprehensive Al risk policies. The City is committed to applying Al in a responsible, human-centric, secure, and compliant manner that upholds the trust of all stakeholders.

# Mitigating Al Risks

transparency
disclosure
validation
user empowerment
human-in-the-loop
ethical review
Al governance
proper testing

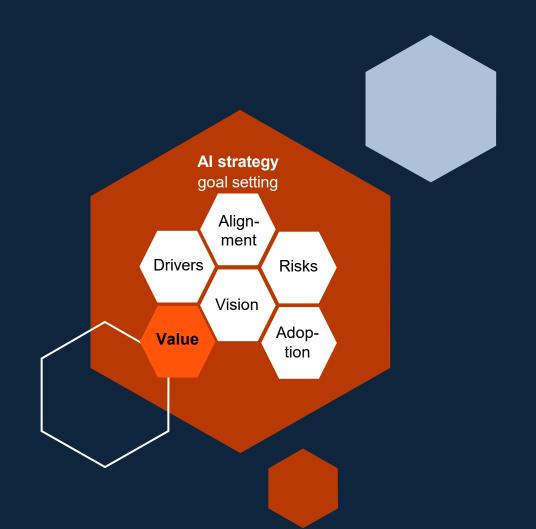

authentication
data protection
access control
model hardening
security monitoring
patch management
incident response
security training

redundancy
fault tolerance

policy enforcement
continuous monitor
oversight tools

human-centric
social responsibility
ethical foresight
stakeholderinvolvement
public input
user feedback
cultural sensitivity

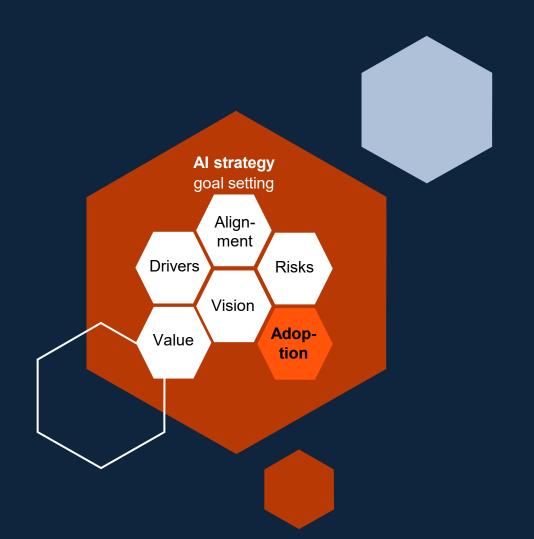

# Al Strategy – Value

Realizing Business Value Through Al-Driven Transformation

#### Al Value

Al creates value for the City of Sacramento by improving service delivery, enhancing operational efficiency, and enabling data-driven decision-making to better serve the community. Our strategy ensures that the technology is aligned with our goals and delivers measurable returns.

Strategic Goal	Key Metrics	Al Use Cases to Pursue
Improved Customer Experience	Customer satisfaction index and service request resolution time	Personalized recommendations, intelligent chatbots, and sentiment analysis
Enhancing Operational Efficiency	Cost savings, time saved, and service processing time	Automating workflows and common tasks, and predictive maintenance
Enabling Data-Driven Decisions	Data usage in decisions and staff adoption rates	Predictive analytics for resource allocation and real- time dashboards
Advance Equity and Accessibility	Equity index improvements and language access rates	Automatic language translation and bias detection in decision systems
Boost Public Safety and Resilience	Emergency response times and crime rate reduction	Al for disaster preparedness and early warning, and predictive policing with ethical safeguards
Promote Environmental Sustainability	Emissions reductions and energy savings	Smart traffic management and energy-optimized buildings

# Al Strategy – Adoption

Strategic Pathways to Scalable Al Adoption

## Al Adoption

Adoption will be guided by a phased, inclusive approach that prioritizes transparency, workforce readiness, and alignment with community values. By fostering collaboration and building internal capacity, the City will ensure Al tools are responsibly integrated to enhance public services and trust.

#### Inspiration

Show what is possible with proof of concepts and partnerships. Learn from the inside and out with feedback from employee surveys and peer city case studies.

SacGPT, Microsoft Copilot, Al Employee Readiness Survey, GovAl Coalition

#### Ideation

through workshops, interdepartmental meetings, and stakeholder groups.

Effective ideas are rooted in real problems or opportunities.

Al Strategy Workshop, IT Check-in Meetings, Al Working Group

#### **Prioritization**

Evaluate and rank initiatives across multiple criteria to focus resources on quick wins and high-impact ideas worth long-term investment.

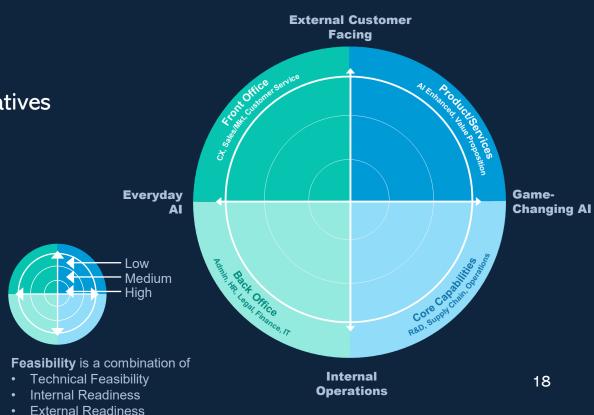

Public impact, Equity, Feasibility, Strategic Alignment, Ethical Integrity, Scalability, Resource Efficiency

### Al Roadmap

Our Al roadmap outlines a phased approach to integrating intelligent solutions across key business functions, driving efficiency and innovation. Each milestone is designed to align with strategic goals, ensuring scalable and responsible Al adoption.

- Current State Implemented or active projects
- Future State Our Al ambition with opportunities
- Using the Al Opportunity Radar to categorize initiatives with impact and feasibility

### Al Roadmap - Products and Services

New value propositions that lead to new offerings and business models. All has a game-changing impact and is externally facing.

1	Electronic Plan Check	Leveraging AI to streamline the electronic plan check process and reduce the review cycle, enabling faster, more accurate reviews by automating code
		compliance and design validation.

- Community Online Reporting

  Utilizing AI to enhance community online reporting in policing by intelligently categorizing reports, identifying patterns, and enabling faster response to public concerns.
- Automated Bus and Bike Lane Deploying Al-enabled cameras for automated bus and bike lane enforcement by detecting violations in real-time through camera systems, improving compliance, and ensuring safer, more efficient streets.

### Al Roadmap - Core Capabilities

Core capability innovation in key strategy and operations. All has a game-changing impact and is internally facing.

Waste Container Monitoring Leveraging Al-p

Leveraging Al-powered image recognition and sensor data to monitor waste container compliance, optimize collection schedules, and reduce overflow and illegal dumping.

2 Bin Not Out

Utilizing AI for "Bin Not Out" detection by analyzing street-level imagery to identify missed waste pickups, helping improve service efficiency and responsiveness.

Fleet Maintenance

Enhancing fleet maintenance by using Al to predict vehicle issues before they occur through real-time data analysis, reducing downtime and extending asset life.

4 Water Leak Detection

Applying AI to water leak detection by analyzing satellite imagery and radar to identify anomalies, enabling early intervention and reducing water loss.

Al Traffic Management

Leveraging Al for traffic management by analyzing real-time traffic data to optimize signal timing, reduce congestion, and improve emergency response routes, while also enhancing pedestrian safety through hazard detection.

### Al Roadmap - Back Office

Productivity and efficiency upgrades throughout the back office. Al has an everyday impact and is internally facing.

Microsoft Copilot

Integrating advanced language models into back office tools to enable users to generate text, automate tasks, and analyze data through natural language prompts.

2 AP Automation

Leveraging machine learning and natural language processing to streamline accounts payable processes by automatically extracting invoice data, matching purchase orders, and processing payments with minimal human intervention.

3 SacGPT

Utilizing an internal company GPT tool, designed to quickly provide accurate answers by leveraging City-specific data for streamlined information access and decision-making.

Body Worn Camera Report Generation

Utilizing advanced speech recognition and natural language processing to automatically generate accurate and detailed incident reports from body camera footage, reducing manual documentation time for officers.

Generative Al Redaction

Intelligently identify and redact sensitive or confidential information from documents using Al models, ensuring data privacy and compliance with regulatory standards.

6 Law File Document Review

Leveraging natural language processing to efficiently analyze, categorize, and summarize legal documents, helping legal teams quickly identify key information and streamline case preparation.

### Al Roadmap - Front Office

Excellence in citizen and customer experience. Al has an everyday impact and is externally facing.

1 311 Virtual Agent

Leveraging an Al conversational assistant that helps residents quickly access city services and information by handling common requests and inquiries through natural language interactions, 24/7.

Al Integrated Contact Center

Enhancing customer service by incorporating language translation for multilingual support and automating call wrap-up tasks, enabling agents to focus on complex issues while improving efficiency and reducing handling time.
