

Name: Illegal Dumping Camera PODS

Completed: Fiscal Year 2024/2025

Goal Alignment:

DIGITAL - Expand access to city services to anyone, at any time, from anywhere (responsive, touchless, accessible, and mobile).

Summary:

Solid Waste needed to replace their illegal dumping cameras, which had reached the end of their lifespan. The new system was designed by a local manufacturer in collaboration with the city and contains fewer components while adding functionality. Since there are fewer components, the system's uptime should increase, enabling better monitoring of illegal activities. The added features include license plate readers that will assist in prosecuting those responsible for illegal dumping.

Benefits:

- Increased uptime for the system
- Easier identification of illegal dumpers
- Better visibility of overall compliance efforts.
