PARTIAL IMPLEMENTATION		DENIED	

## SCPRC RECOMMENDATION

GO 410.06 Military Equipment Use

SPD policy does not catalog military-grade firearms and launchers separately from their military-grade munitions and projectiles.

Amend GO 410.06(H): Catalog SPD inventory of military-grade firearms and launchers separately from their respective munitions and projectiles.

## SCPRC RECOMMENDATION RATIONALE

The catalog of military equipment should be transparent enough for the public to accurately distinguish between firearms and launchers from the different types of ammunition they use. As currently written, SPD lists ammunition together with weapons in such a way that is not clearly distinguishable for members of the public or the Commission. The Commission recommends adding separate bullets and numbering under each type of military weapon and equipment category to clearly list firearms and launchers separately from their respective ammunition and projectiles.

## SPD RESPONSE

The proposed policy contains an appendix with details pertaining to all military equipment and their respective munitions, separately.
