

## DRIVEWAY PERMIT APPLICATION PROCESSING INSTRUCTIONS

### Preparation of Application Package

1. Type or neatly print all information in blanks on attached DRIVEWAY PERMIT APPLICATION form.
2. Prepare a site plan that is neat, legible, fully dimensioned and inclusive of all site conditions and nearby obstructions (Utility Poles, Fire Hydrants, Mailboxes, Fences, Gates, Speed Lumps, etc). See Site Plan Requirements page in this package.
3. Prepare a Traffic Control Plan showing the traffic control measures that will be put in place during construction. A sample/template is included which may be used if applicable, and if filled out for the specific site.
4. Provide proof of liability insurance as directed by attached "REQUIREMENTS FOR CERTIFICATES OF INSURANCE" or for more information contact the City of Sacramento, Risk Management Office at (916) 808-5556. Insurance requirements and a sample of insurance are available at the end of this document.

### Submittal Requirements

- Completed "Driveway Permit Application" form
- Site Plan - 8 1/2" x 11" Minimum Page Size. Full size plan sheets printed on letter sizes pages are not considered legible and must be printed on 11" x 17" pages at a minimum.
- Traffic Control Plan – 11" x 17" page size (minimum).
- Proof of insurance (ACCORD & ADDITIONAL INSURED ENDORSEMENT)
- Application Fee - Varies based on proposed driveway width. See our [Fee Schedule](#).

Note: If submitting via email, the fee will be invoiced once the application package has been intaken.

### Submittal Instructions

Electronic Submittal: Email the submittal documents to [DE@cityofsacramento.org](mailto:DE@cityofsacramento.org)

Physical application packages can be submitted at our Development Engineering Public Counter located at the following address. During COVID-19 the counter may have limited hours or be by appointment only. Please see: [Public Counter Hours and Contact Info](#) for more information.

**OWNER'S SIGNATURE:** \_\_\_\_\_ **DATE:** \_\_\_\_\_

By signing this application, Owner agrees to comply with the requirements of Sacramento City Code Chapter 12.12. The Code can be found at: <http://www.qcode.us/codes/sacramento/>.

**GRANT OF PERMIT:**

It is agreed that the driveway(s) shall be constructed in a expedient manner and in strict conformance with the City's driveway standards, Standard Construction Specifications, special instructions of the driveway inspector, and the plans approved by City Transportation Engineer. It is further agreed that the curb section will be restored to original condition by the property owner if and when a driveway becomes unnecessary due to land use changes or this permit is revoked for any reason.

In the event of failure by the property owner to abide by the terms of this agreement, the City may proceed with corrections or restoration of the curb section and the work done shall be charged against the owner and a lien shall be placed on the property.

This permit and all of its attachments shall be remain available at the job site until final driveway inspection.

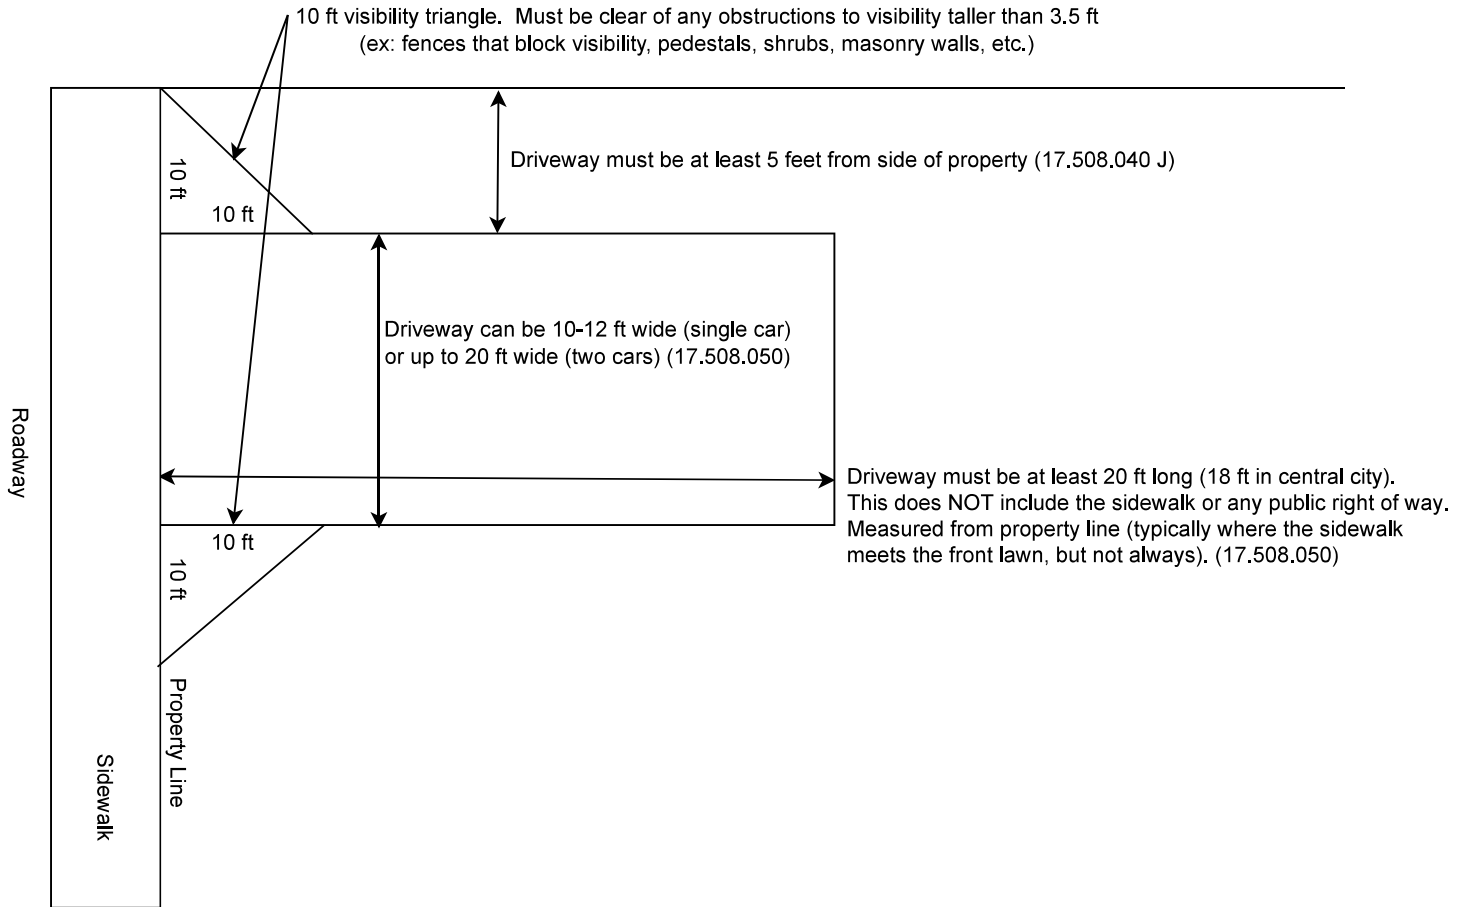

Removal or alteration of any part of this Permit renders the entire Permit null and void. Any errors and/or omissions on the plan or application are the responsibility of the applicant as are any and all costs incurred due to such omissions.

No deviations from or changes in the plans will be permitted without written permission from the City Transportation Engineer.

# RESIDENTIAL DRIVEWAYS - COMMON QUESTIONS

## When is a Permit Needed?

- No Permit - Driveway that abuts rolled (mountable) curb or an alleyway. However, the driveway must still meet Code Requirements.
- Driveway Permit - For a new or modified driveway that will need an inlet (does not abut rolled curb)
- Encroachment Permit - Reconstructing an existing driveway inlet but NOT changing its width (Ex: Repairing a cracked driveway)

## Other Prohibitions (Less Common)

- Cannot install a driveway to service a vacant lot - 17.508.040 A
- Cannot install a driveway within the radius of an intersection - 17.508.040 B
- Cannot install a driveway within 10 feet of a pedestrian ramp - 17.508.040 E
- Cannot install a driveway at a location where it would create a hazard - 17.508.040 M
- Cannot install a driveway that backs onto a non-local street (typically a street is non-local if it has stripe markings) - 17.508.070 A

## City Trees

If there are any city trees near the driveway, the plans must show how big the tree is (Trunk diameter or circumference) and how far away the tree is from the proposed driveway.

## Fire Hydrants, Utility Poles, and other obstructions

If there are any fire hydrants, utility poles, or other obstructions near the driveway, they typically need to be at least 5 ft away from the edge of the proposed driveway so that vehicles backing out do not accidentally hit them. Show them on the plans and show how far away they are from the proposed driveway.

## Secondary Driveways

Secondary driveways are typically only supported for lots that either:

1. Are of a substantial enough size to warrant a secondary driveway (Example: A 1/2 acre lot).
2. The driveway will service an additional dwelling unit (secondary residence) on the lot.

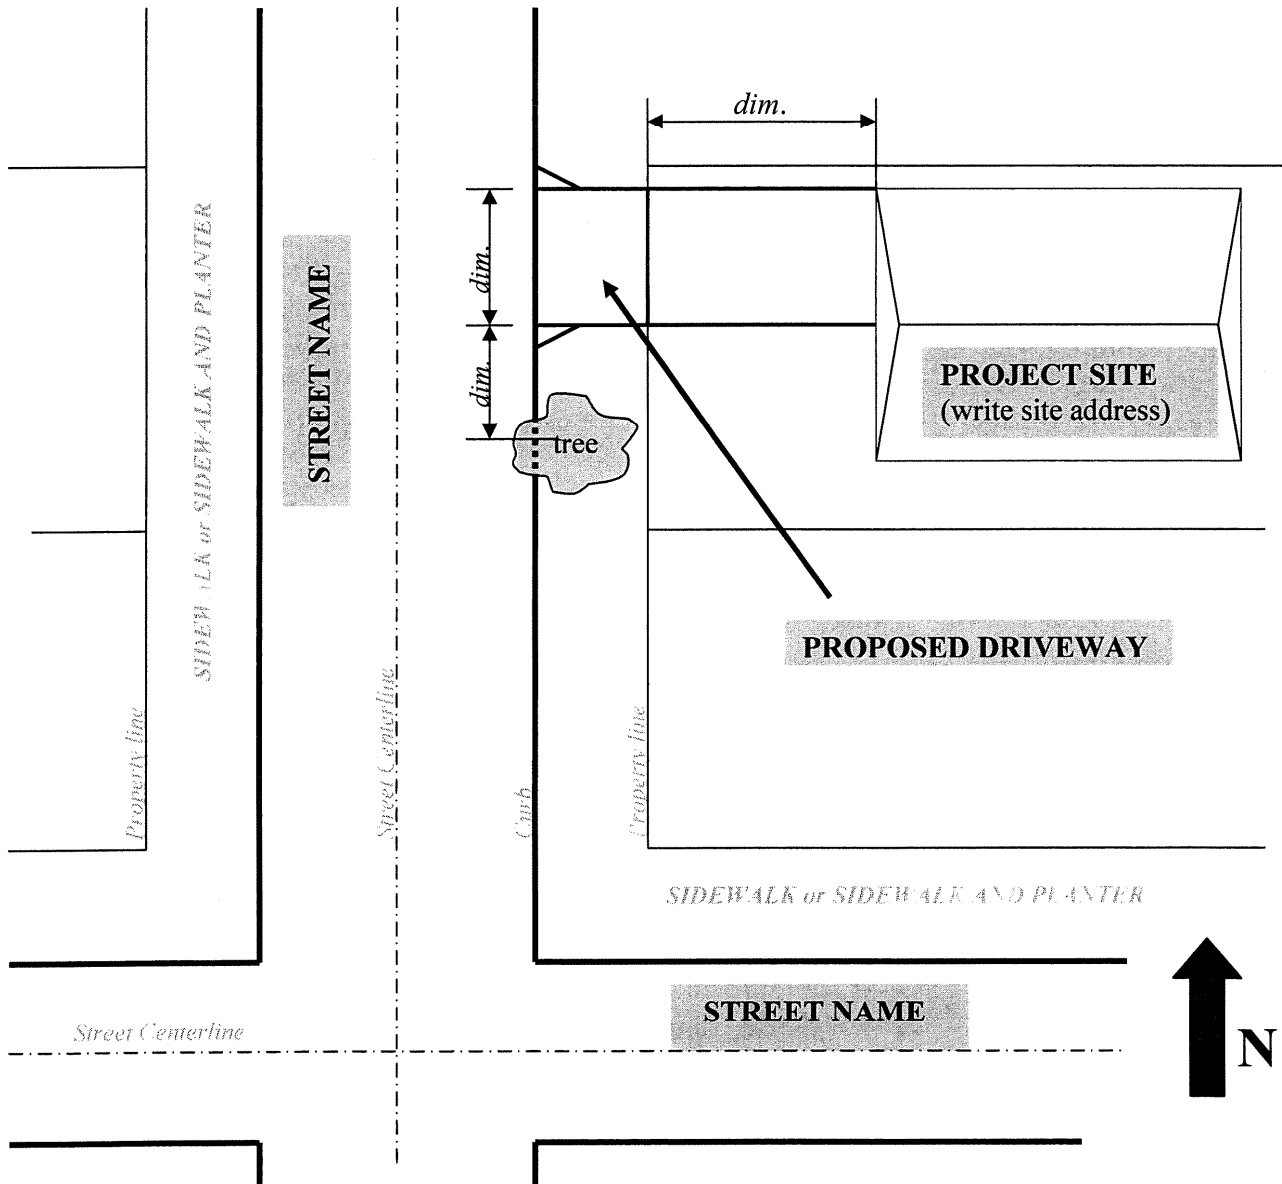

## Gated Driveways

Any gates must be set back 20' from the property line. This is to allow vehicles to pull into the driveway fully before the pedestrian exits the vehicle to manually operate the gate. - 17.508.070 D

If a gate is desired within the first 20' of the driveway (such as right at its entrance), then a Driveway Variance is required. However, the variance will require that the gate be fully automated and remote controlled.

**Site Plan Requirements (Driveway):**

- North Arrow
- Dimension (*dim.*) of work
- Street Name (nearest cross street)
- Show Project Site (indicate address)
- Show features that might be impacted by construction activities, such as operation of equipment, utility installation, material storage, excavation, etc. show distance from the work site:
  - Fire Hydrant
  - Gates/Fences
  - Driveway Location/ramps/curb&gutter/sidewalk/planter
  - Utility Pole
  - Street Light
  - Parking Meters
  - Street Trees (indicate if to be pruned or removed)
  - Other structures that may affect the proposed work
