Content of Annual Report

The City's Annual Report shall contain or incorporate by reference the following:

(a) The City's audited Annual Comprehensive Financial Report (ACFR) for the prior fiscal year.

The City's ACFR for the prior fiscal year was uploaded as a separate document to EMMA. The ACFR is also available on the City's website at:

www.cityofsacramento.org/Finance/Accounting/Reporting

(b) The Annual Budget of the City for the current fiscal year.

The City's Approved Budget for the current fiscal year was uploaded as a separate document to EMMA and is also available on the City's website at:

www.cityofsacramento.org/Finance/Budget

(c) An update of the information in Tables of Appendix A to the Limited Offering Memorandum that are titled "STATEMENT OF GENERAL FUND REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCE," "GROSS ASSESSED VALUES FOR ALL TAXABLE PROPERTY," "CITY OF SACRAMENTO LARGEST LOCAL SECURED TAXPAYERS", "GENERAL FUND OBLIGATION DEBT SERVICE," and "NOTICES OF DEFAULT AND FORECLOSURES OF PROPERTY WITHIN THE CITY." The updated information must reflect the most recently completed fiscal year and must be substantially in the form of the corresponding tables in Appendix A.

See Exhibit A - Statement of General Fund Revenues, Expenditures and Changes in Fund Balance

See Exhibit B – Gross Assessed Values for all Taxable Property

See Exhibit C – Largest Local Secured Taxpayers

See Exhibit D – General Fund Obligation Debt Service as of June 30, 2021

The information required by the Continuing Disclosure Certificate — "Notices of Default and Foreclosures of Property within the City of Sacramento" is no longer prepared by the County of Sacramento, Office of the Assessor. At this time the City of Sacramento is not aware of another reliable source to obtain notice of default and foreclosure information within the City of Sacramento in the same format as is presented on page 8 in Appendix A.

(d) The actuarial valuation report for the Miscellaneous Employees Plan and Safety Employees Plan most recently provided to the City by CalPERS as of the date the City files the Annual Report and the actuarial valuation report for SCERS most recently provided to the City by SCERS as of the date the City files the Annual Report.

See Exhibit E – GASB 68 Accounting Valuation Report – Miscellaneous Plan as of June 30, 2020

See Exhibit F - GASB 68 Accounting Valuation Report - Safety Plan as of June 30, 2020

See Exhibit G – SCERS Actuarial Valuation as of June 30, 2021

(e) Any or all of the items listed in Section 3(a) or 3(b) may be included by specific reference to other documents (including official statements of debt issues of the City or related public entities) that have been submitted to EMMA or the Securities and Exchange Commission. If the document included by reference is a final official statement, it must be available through EMMA.

Notes: (1) Article XIII A, added to California Constitution by Proposition 13 in 1978, fixed the base for valuation of property subject to taxes at the full cash value appeared on the Assessor's 1975-76 assessment roll. Therefore, full cash value can be increased to reflect:

- a) annual inflation up to 2%;
- b) current market value at time of ownership change;
- c) market value for new construction.

Estimated actual value of taxable property cannot be easily determined as the property in the City is not reassessed annually. Reassessment normally occurs when ownership changes.

⁽²⁾ The decrease in public utility assessed value is primarily due to the transfer of the downtown railyards from a railroad company to a private developer and the City.

⁽³⁾ This 1% is shared by all taxing agencies for which the subject property resides within.

Actuarial Certification

This report provides disclosure and reporting information as required under Governmental Accounting Standards Board Statement 68 (GASB 68) for the Miscellaneous Plan of the City of Sacramento (the "Plan"), an Agent Multiple-Employer Defined Benefit Pension Plan participating in the California Public Employees' Retirement System (CalPERS), for the measurement period ended June 30, 2020.

This report is to be viewed solely for the purpose of financial accounting requirements. Any usage of the contents provided in this report for purposes other than financial accounting requirements would be inappropriate.

This accounting report relies on liabilities and related validation work performed by the CalPERS Actuarial Office as part of the June 30, 2019 annual funding valuation for the Plan. The census data and benefit provisions underlying the liabilities were prepared as of June 30, 2019 and certified as part of the annual funding valuation by the CalPERS Actuarial Office. The June 30, 2019 liabilities, which were rolled forward to June 30, 2020 and used for this accounting report, are based on actuarial assumptions adopted by the CalPERS Board of Administration and consistent with the requirements of GASB 68. The assumptions and methods are internally consistent and reasonable for this Plan. The asset information used in this accounting report is provided by the CalPERS Financial Office.

With the provided liability and asset information, the total pension liability, net pension liability, deferred inflows and outflows and pension expense were developed for the measurement period using standard actuarial techniques.

The undersigned is an actuary for CalPERS, who is a member of the American Academy of Actuaries and the Society of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Introduction

This is the GASB 68 accounting report for the measurement date June 30, 2020. Notes to the Agent Multiple-Employer Defined Benefit Pension Plan GASB 68 accounting reports are in a separate document, which may be accessed on the CalPERS website at www.calpers.ca.gov.

GASB 68 requires that the reported results must pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used.

Valuation Date June 30, 2019

Measurement Date June 30, 2020

Measurement Period July 1, 2019 to June 30, 2020

Pension Plan Fiduciary Net Position

The plan fiduciary net position disclosed in your GASB 68 accounting report may differ from the plan assets reported in your funding actuarial valuation report due to several reasons. For example, for the accounting reports, CalPERS must keep items such as deficiency reserves and fiduciary self-insurance included as assets. These amounts are excluded for rate setting purposes in your funding actuarial valuation.

Changes in the Net Pension Liability

The following table shows the changes in net pension liability recognized over the measurement period.

Deferred Outflows and Deferred Inflows of Resources Related to Pensions

The following table presents deferred outflows and deferred inflows of resources related to pensions as of June 30, 2020. Note that no adjustments have been made for contributions subsequent to the measurement date. Appropriate treatment of any contributions made after the measurement date is the responsibility of the employer.

	Deferred Outflows of Resources	Deferred Inflows of Resources
Changes of Assumptions	\$0	\$0
Differences Between Expected and Actual Experience	5,728,928	0
Net Difference Between Projected and Actual Earnings on Pension Plan Investments	8,880,175	0
Total	\$14,609,103	\$0

Amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in future pension expense as follows:

Measurement Periods Ended June 30:	Deferred Outflows/(Inflows) of Resources
2021	\$1,169,748
2022	3,704,146
2023	5,382,961
2024	4,352,248
2025	0
Thereafter	0

Note: For employers with June 30 year-end, the fiscal year will be one year later than the measurement period. For example, the 2021 measurement period presented in the above table will be listed as year 2022 in the employer's fiscal year ending June 30, 2021 financial statements.

Expected Average Remaining Service Lifetime (EARSL)

The EARSL for the Plan for the measurement period ending June 30, 2020 is 2.9 years, which was obtained by dividing the total service years of 28,772 (the sum of remaining service lifetimes of the active employees) by 9,980 (the total number of participants: active, inactive, and retired). Inactive employees and retirees have remaining service lifetimes equal to 0. Total future service is based on the members' probability of decrementing due to an event other than receiving a cash refund.

¹ During Fiscal Year 2017-18, as a result of Governmental Accounting Standards Board Statement (GASB) No. 75, Accounting and Financial Reporting for Postemployment Benefit Plans Other than Pensions (GASB 75), CalPERS reported its proportionate share of activity related to postemployment benefits for participation in the State of California's agent OPEB plan. Accordingly, CalPERS recorded a one-time expense as a result of the adoption of GASB 75.

Additionally, CalPERS employees participate in various State of California agent pension plans and during Fiscal Year 2017-18, CalPERS recorded a correction to previously reported financial statements to properly reflect its proportionate share of activity related to pensions in accordance with GASB Statement No. 68, Accounting and Financial Reporting for Pensions (GASB 68).

² Includes any beginning of year adjustment.

³ Includes one year's payroll growth using 2.75 percent payroll growth assumption for fiscal years ended June 30, 2018-20; 3.00 percent payroll growth assumption for fiscal years ended June 30, 2014-17.

¹ During Fiscal Year 2017-18, as a result of Governmental Accounting Standards Board Statement (GASB) No. 75, Accounting and Financial Reporting for Postemployment Benefit Plans Other than Pensions (GASB 75), CalPERS reported its proportionate share of activity related to postemployment benefits for participation in the State of California's agent OPEB plan. Accordingly, CalPERS recorded a one-time expense as a result of the adoption of GASB 75.

Additionally, CalPERS employees participate in various State of California agent pension plans and during Fiscal Year 2017-18, CalPERS recorded a correction to previously reported financial statements to properly reflect its proportionate share of activity related to pensions in accordance with GASB Statement No. 68, Accounting and Financial Reporting for Pensions (GASB 68).

² Includes any beginning of year adjustment.

³ Includes one year's payroll growth using 2.75 percent payroll growth assumption for fiscal years ended June 30, 2018-20; 3.00 percent payroll growth assumption for fiscal years ended June 30, 2014-17.

Schedules of Required Supplementary Information (continued)

Notes to Schedule of Changes in Net Pension Liability and Related Ratios:

Benefit Changes: The figures above include any liability impact that may have resulted from voluntary benefit changes that occurred after the June 30, 2019 valuation. However, offers of Two Years Additional Service Credit (a.k.a. Golden Handshakes) that occurred after the June 30, 2019 valuation date are not included in the figures above, unless the liability impact is deemed to be material by the plan actuary.

Changes of Assumptions: None in 2019 or 2020. In 2018, demographic assumptions and inflation rate were changed in accordance to the CalPERS Experience Study and Review of Assumptions December 2017. There were no changes in the discount rate. In 2017, the discount rate was reduced from 7.65 percent to 7.15 percent. In 2016, there were no changes. In 2015, amounts reported reflect an adjustment of the discount rate from 7.5 percent (net of administrative expense) to 7.65 percent (without a reduction for pension plan administrative expense). In 2014, amounts reported were based on the 7.5 percent discount rate.

¹ As prescribed in GASB 68, paragraph 46, the information presented in the Schedule of Plan Contributions should also be presented as of the employer's most recent fiscal year-end. The employer is responsible for determining this information as prescribed by the standard as this data is not available to CalPERS.

² Employers are assumed to make contributions equal to the actuarially determined contributions. However, some employers may choose to make additional contributions towards their unfunded liability. Employer contributions for such plans exceed the actuarially determined contributions.

³ Includes one year's payroll growth using 2.75 percent payroll growth assumption for fiscal years ended June 30, 2018-20; 3.00 percent payroll growth assumption for fiscal years ended June 30, 2014-17.

Notes to Schedule of Plan Contributions:

The actuarial methods and assumptions used to set the actuarially determined contributions for Fiscal Year 2019-20 were derived from the June 30, 2017 funding valuation report.

Actuarial Cost Method	Entry Age Normal
Amortization Method/Period	For details, see June 30, 2017 Funding Valuation Report.
Asset Valuation Method	Fair Value of Assets. For details, see June 30, 2017 Funding Valuation Report.
Inflation	2.625%
Salary Increases	Varies by Entry Age and Service
Payroll Growth	2.875%
Investment Rate of Return	7.25% Net of Pension Plan Investment and Administrative Expenses; includes Inflation.
Retirement Age	The probabilities of Retirement are based on the 2017 CalPERS Experience Study for the period from 1997 to 2015.
Mortality	The probabilities of mortality are based on the 2017 CalPERS Experience Study for the period from 1997 to 2015. Pre-retirement and Post-retirement mortality rates include 15 years of projected mortality improvement using 90% of Scale MP-2016 published by the Society of Actuaries.

Actuarial Certification

This report provides disclosure and reporting information as required under Governmental Accounting Standards Board Statement 68 (GASB 68) for the Safety Plan of the City of Sacramento (the "Plan"), an Agent Multiple-Employer Defined Benefit Pension Plan participating in the California Public Employees' Retirement System (CalPERS), for the measurement period ended June 30, 2020.

This report is to be viewed solely for the purpose of financial accounting requirements. Any usage of the contents provided in this report for purposes other than financial accounting requirements would be inappropriate.

This accounting report relies on liabilities and related validation work performed by the CalPERS Actuarial Office as part of the June 30, 2019 annual funding valuation for the Plan. The census data and benefit provisions underlying the liabilities were prepared as of June 30, 2019 and certified as part of the annual funding valuation by the CalPERS Actuarial Office. The June 30, 2019 liabilities, which were rolled forward to June 30, 2020 and used for this accounting report, are based on actuarial assumptions adopted by the CalPERS Board of Administration and consistent with the requirements of GASB 68. The assumptions and methods are internally consistent and reasonable for this Plan. The asset information used in this accounting report is provided by the CalPERS Financial Office.

With the provided liability and asset information, the total pension liability, net pension liability, deferred inflows and outflows and pension expense were developed for the measurement period using standard actuarial techniques.

The undersigned is an actuary for CalPERS, who is a member of the American Academy of Actuaries and the Society of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Introduction

This is the GASB 68 accounting report for the measurement date June 30, 2020. Notes to the Agent Multiple-Employer Defined Benefit Pension Plan GASB 68 accounting reports are in a separate document, which may be accessed on the CalPERS website at www.calpers.ca.gov.

GASB 68 requires that the reported results must pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used.

Valuation Date June 30, 2019

Measurement Date June 30, 2020

Measurement Period July 1, 2019 to June 30, 2020

Pension Plan Fiduciary Net Position

The plan fiduciary net position disclosed in your GASB 68 accounting report may differ from the plan assets reported in your funding actuarial valuation report due to several reasons. For example, for the accounting reports, CalPERS must keep items such as deficiency reserves and fiduciary self-insurance included as assets. These amounts are excluded for rate setting purposes in your funding actuarial valuation.

Deferred Outflows and Deferred Inflows of Resources Related to Pensions

The following table presents deferred outflows and deferred inflows of resources related to pensions as of June 30, 2020. Note that no adjustments have been made for contributions subsequent to the measurement date. Appropriate treatment of any contributions made after the measurement date is the responsibility of the employer.

	Deferred Outflows of Resources	Deferred Inflows of Resources
Changes of Assumptions	\$26,256,582	(\$7,482,241)
Differences Between Expected and Actual Experience	40,693,525	(3,700,455)
Net Difference Between Projected and Actual Earnings on Pension Plan Investments	11,149,522	0
Total	\$78,099,629	(\$11,182,696)

Amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in future pension expense as follows:

Measurement Periods Ended June 30:	Deferred Outflows/(Inflows) of Resources
2021	\$20,809,504
2022	17,261,308
2023	17,304,421
2024	11,144,729
2025	396,971
Thereafter	0

Note: For employers with June 30 year-end, the fiscal year will be one year later than the measurement period. For example, the 2021 measurement period presented in the above table will be listed as year 2022 in the employer's fiscal year ending June 30, 2021 financial statements.

Expected Average Remaining Service Lifetime (EARSL)

The EARSL for the Plan for the measurement period ending June 30, 2020 is 5.1 years, which was obtained by dividing the total service years of 15,581 (the sum of remaining service lifetimes of the active employees) by 3,040 (the total number of participants: active, inactive, and retired). Inactive employees and retirees have remaining service lifetimes equal to 0. Total future service is based on the members' probability of decrementing due to an event other than receiving a cash refund.

¹ During Fiscal Year 2017-18, as a result of Governmental Accounting Standards Board Statement (GASB) No. 75, Accounting and Financial Reporting for Postemployment Benefit Plans Other than Pensions (GASB 75), CalPERS reported its proportionate share of activity related to postemployment benefits for participation in the State of California's agent OPEB plan. Accordingly, CalPERS recorded a one-time expense as a result of the adoption of GASB 75.

Additionally, CalPERS employees participate in various State of California agent pension plans and during Fiscal Year 2017-18, CalPERS recorded a correction to previously reported financial statements to properly reflect its proportionate share of activity related to pensions in accordance with GASB Statement No. 68, Accounting and Financial Reporting for Pensions (GASB 68).

² Includes any beginning of year adjustment.

³ Includes one year's payroll growth using 2.75 percent payroll growth assumption for fiscal years ended June 30, 2018-20; 3.00 percent payroll growth assumption for fiscal years ended June 30, 2014-17.

Notes to Schedule of Changes in Net Pension Liability and Related Ratios:

Benefit Changes: The figures above include any liability impact that may have resulted from voluntary benefit changes that occurred after the June 30, 2019 valuation. However, offers of Two Years Additional Service Credit (a.k.a. Golden Handshakes) that occurred after the June 30, 2019 valuation date are not included in the figures above, unless the liability impact is deemed to be material by the plan actuary.

Changes of Assumptions: None in 2019 or 2020. In 2018, demographic assumptions and inflation rate were changed in accordance to the CalPERS Experience Study and Review of Assumptions December 2017. There were no changes in the discount rate. In 2017, the discount rate was reduced from 7.65 percent to 7.15 percent. In 2016, there were no changes. In 2015, amounts reported reflect an adjustment of the discount rate from 7.5 percent (net of administrative expense) to 7.65 percent (without a reduction for pension plan administrative expense). In 2014, amounts reported were based on the 7.5 percent discount rate.

¹ As prescribed in GASB 68, paragraph 46, the information presented in the Schedule of Plan Contributions should also be presented as of the employer's most recent fiscal year-end. The employer is responsible for determining this information as prescribed by the standard as this data is not available to CalPERS.

² Employers are assumed to make contributions equal to the actuarially determined contributions. However, some employers may choose to make additional contributions towards their unfunded liability. Employer contributions for such plans exceed the actuarially determined contributions.

³ Includes one year's payroll growth using 2.75 percent payroll growth assumption for fiscal years ended June 30, 2018-20; 3.00 percent payroll growth assumption for fiscal years ended June 30, 2014-17.

Notes to Schedule of Plan Contributions:

The actuarial methods and assumptions used to set the actuarially determined contributions for Fiscal Year 2019-20 were derived from the June 30, 2017 funding valuation report.

Actuarial Cost Method	Entry Age Normal
Amortization Method/Period	For details, see June 30, 2017 Funding Valuation Report.
Asset Valuation Method	Fair Value of Assets. For details, see June 30, 2017 Funding Valuation Report.
Inflation	2.625%
Salary Increases	Varies by Entry Age and Service
Payroll Growth	2.875%
Investment Rate of Return	7.25% Net of Pension Plan Investment and Administrative Expenses; includes Inflation.
Retirement Age	The probabilities of Retirement are based on the 2017 CalPERS Experience Study for the period from 1997 to 2015.
Mortality	The probabilities of mortality are based on the 2017 CalPERS Experience Study for the period from 1997 to 2015. Pre-retirement and Post-retirement mortality rates include 15 years of projected mortality improvement using 90% of Scale MP-2016 published by the Society of Actuaries.

ACTUARIAL VALUATION

CITY OF SACRAMENTO SACRAMENTO CITY EMPLOYEES' RETIREMENT SYSTEM (SCERS) DEFINED BENEFIT PLAN

We are pleased to present the results of our June 30, 2021 actuarial valuation of the Sacramento City Employees' Retirement System (SCERS).

The purpose of this valuation is to:

- Determine the System's June 30, 2021 Funded Status, and
- Calculate the fiscal year 2022/23 Actuarially Determined Contribution (ADC).

The information in this report may not be appropriate for purposes other than System funding but may be useful to the City for the System's financial management. Future valuations may differ significantly if the System's experience differs from our assumptions or if there are changes in plan design, actuarial methods or actuarial assumptions. The project scope did not include an analysis of this potential variation.

The valuation is based on the System's benefit provisions summarized in Section 9, employee data, and on the System's financial information, all furnished by the City. We reviewed the financial and employee data for reasonableness, including comparing to prior year data, but did not perform an audit.

To the best of our knowledge, this report is complete and accurate and has been conducted using generally accepted actuarial principles and practices. As members of the American Academy of Actuaries, meeting Academy Qualification Standards, we certify the actuarial results and opinions herein.

Respectfully submitted,

SECTION 1 EXECUTIVE SUMMARY

Purpose of Actuarial Valuation

The actual costs of a defined benefit plan are determined entirely by the amount of the benefit promise, the actual salaries and service of the plan participants, and how long they and their beneficiaries live to receive payments. An actuarial valuation is a mathematical model which attempts to quantify this actual cost by setting assumptions that, it is hoped, duplicate reality as closely as possible. In addition, the actuarial methodology provides a reasonable plan, or method, towards funding the expected plan costs. This information assists the plan trustees so they can make informed decisions regarding plan investments and how much in contributions will be required from the employer to eventually fully pay the plan's costs.

Summary Information & Results

The Sacramento City Employees' Retirement System (SCERS) is a closed defined benefit pension plan. It has not accepted new members since January 28, 1977, and only 3 active members (out of a total plan membership of 876) remain.

Since the last valuation, the plan experienced overall gains on liabilities and market assets. Plan liabilities increased less than expected, by \$5.9 million. This was mostly due to retirees and beneficiaries not living as long as expected (\$3.9 million), and also due to a smaller COLA than expected² (\$2.0 million). Market value return on assets was greater than expected, about 29.2% for the year which resulted in a gain of \$17.7 million on the actuarial (smoothed) value of assets. Lower benefit payments than expected resulted in an additional \$0.5 million gain to the assets.

Several assumptions were changed since the prior valuation.

- The mortality improvement projection was updated to a more recent Society of Actuaries' table, MP-2020. This decreased liabilities by \$2.6 million.
- The inflation assumption was reduced from 2.75% to 2.50%. The resulting decreased discount rate increased plan liabilities, but the decrease in the future expected cost of living adjustments to retirees almost completely offset those increased liabilities. The net increase in plan liabilities was just \$0.2 million.
- In addition to the 0.25% reduction in the discount rate due to the inflation assumption change, the discount rate was further reduced based upon our expectation of a lower real rate of return in the long term. Bartel Associates completed a review of our capital market assumptions in 2021. Based on a stochastic analysis using those new assumptions and assumed future inflation of 2.50%, we calculated the expected rate of return after expenses to be 5.88%, at the 50th percentile confidence level. Based on this result, and current guidance recommending use of the 50th percentile confidence level, we recommend 6.00% as the discount rate. The prior valuation used 6.50% discount rate. The change in discount rate due to updated capital market assumptions increased plan liabilities \$5.1 million.

After these assumption changes, the July 1, 2021 total plan unfunded actuarial accrued liability (UAAL) is \$6.6 million, as compared to an expected UAAL of \$28.0 million.

² The CPI used for COLA increases was 1.7%. Although the full 3% COLA was paid for retirements prior to fiscal year 2017/18, COLA banks were decreased. The prior valuation assumed CPI of 2.75%. (Index used is CPI-U for San Francisco/Oakland/Hayward area.)

SACRAMENTO

EXECUTIVE SUMMARY

The plan's funded ratio on an actuarial value of assets basis is 97.7%, an increase from 89.9% in the prior valuation. The plan's funded ratio using market value of assets basis is 110.2%, an increase from 88.7% in the prior valuation.

The City's contribution was \$3.479 million for fiscal year 2021/22. The prior valuation projected a 2022/23 contribution of \$3.383 million. Due to the experience gains discussed above, the plan is projected to be overfunded on June 30, 2022 on an actuarial value of assets basis and the recommended City contribution is \$0 for fiscal year 2022/23.

The average life expectancy of the plan's retirees is now 11.1 years, down from 11.6 years as of June 30, 2020. Although it does not impact the results, we recommend dropping the amortization period from a rolling 12-year period to a rolling 11-year period for the 2022/23 recommended contribution.

EXECUTIVE SUMMARY

Discussion of Plan Risks

Actuarial Standard of Practice No. 51, Assessment and Disclosure of Risk Associated with Measuring Pension Obligations and Determining Pension Plan Contributions, requires the actuary to assess and disclose the risk that actual future measurements may differ significantly from expected future measurements.

This plan is considered a very mature pension plan since almost all of its liabilities are for retirees, and there are almost no remaining active employees with very little associated payroll. The following table presents various measures illustrating the plan's maturity:

	June 30, 2020	June 30, 2021
■ Maturity Ratios		
 Inactive AAL/total AAL 	99.4%	99.7%
• Inactive participant count/total count	99.5%	99.7%
• Benefit payments/market value of assets	11.2%	9.1%
• Benefit payments/employer contributions	834.6%	N/A

A very mature pension plan presents unique risks. The plan has negative cash flow (benefit payments exceed contributions), and benefit payments are relatively large compared to the asset value. The plan's investment manager must carefully manage the plan's liquidity needs as the plan "winds down" over the next 50 or more years. In addition to investment risk (investment returns being different than expected), asset/liability mismatch risk (changes in asset values not matched by changes in liabilities) could be significant for this plan. The plan is also subject to longevity risk (the potential that participants will live longer than projected) but we believe this risk is less significant than investment and asset/liability mismatch risk.

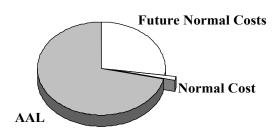

The scope of this valuation did not include a risk assessment - an evaluation of the potential impacts of these factors on the plan's funded status or projected employer contributions. However, we have included the following to assist in the plan's management:

- Table of expected benefit payments for the next 50 years
- Sensitivity analysis: Contributions calculated under different discount rates

Definitions

The Present Value of Projected Benefits (PVPB) is the present value of all future benefits for current plan participants. The Actuarial Accrued Liability (AAL) represents the portion of the PVPB attributable to past service. The AAL is recognized over service through the date a participant is expected to commence benefits. Therefore, the AAL is equal to the PVPB for current retirees. The Normal Cost is the portion of the PVPB allocated or earned during the year following the valuation date.

ASSET INFORMATION

Assets for SCERS are held in trust. Trust monies may be used to pay benefits to plan participants and their beneficiaries. The trust is managed under the direction of the Administration, Investment, and Fiscal Management Board. Asset information is provided by the City of Sacramento, and has not yet been audited.

Asset Reconciliation - Market Value of Assets

Following reconciles the June 30, 2019 through June 30, 2020 and the June 30, 2020 through June 30, 2021 market value of assets. Numbers may not add due to rounding.

Discount Rate Development

Bartel Associates modeled the nominal rate of return for the fund, based upon our 2021 capital market assumptions, which include mean returns, standard deviation of returns, and correlation coefficients, as well as our assumed inflation rate of 2.50%. Our modeling showed a 50% likelihood that returns would average (geometric average) at least 6.03% per year. After adjusting for expenses and rounding, we recommend a 6.00% discount rate for the valuation. The prior valuation used 6.50% based on our prior capital market assumptions and 2.75% inflation assumption.

Confidence Level	50%	55%	60%
■ Inflation Adjusted Return	6.03%	5.63%	5.32%
■ Investment Expenses ³	0.15%	<u>0.15%</u>	0.15%
■ Net Return after Expenses	5.88%	5.48%	5.17%
■ Discount Rate Assumption	6.00%		

Based on average investment expenses for a typical passive investment strategy. This is not plan specific.

ASSET INFORMATION

Development of Actuarial Value of Assets

The Actuarial Value of Assets is based upon a three year smoothing of market assets. This method reduces volatility in contribution rates, and also reduces volatility in the size of the actuarial gains and losses due to asset returns. Because the plan is frozen to new membership and the membership is primarily composed of retirees and beneficiaries, it is important from a cash flow perspective that asset values used in calculating contribution rates not stray too far from market value. For this reason, a corridor of 15% around the market value is imposed upon the actuarial value.

(amounts in \$000's)

The Unfunded Actuarial Accrued Liability (UAAL) as of the beginning of the contribution year is being amortized as a level dollar amount over a rolling 12-year period for 2021/22 and a rolling 11-year period for 2022/23. As the plan continues to mature, this amortization period will be monitored.

SECTION 5 SCHEDULE OF FUTURE CONTRIBUTIONS

Below are the historic and projected contributions and benefit payments. City contributions for years ending 6/30/2024 and later are estimated assuming 6/30/22 and subsequent market value of assets earn 6.00% and assuming the Actuarially Determined Contribution is contributed each year. These contributions are designed to achieve 100% funding of the system.

SECTION 9 PLAN PROVISIONS

A. Plan Effective Date

Originally established effective April 1, 1935.

B. Plan Year

July 1 to June 30.

C. Participation

The plan is closed with no new members since January 28, 1977.

D. Eligibility to Retire

Section 175: Age 70, or age 55 and 20 years of service.

Sections 302 and 399: Age 70, or age 50 and 5 years of service.

E. Vesting

100% vesting with five years of participation.

F. Average Monthly Compensation

Average monthly salary for the 36 months prior to termination.

G. Employee Contributions

Each participant contributes a certain percentage based on his or her age at entry into the plan.

H. Service Retirement Benefit

Section 175:

Average Monthly Compensation times years of service times Benefit Factor. For retirement after age 65 with 20 years of service, benefit is a minimum of \$60 per month.

Sections 302 and 399:

Average Monthly Compensation times years of service times Benefit Factor, but no larger than 75% of final average earnings.

Benefit Factors at sample ages:

Retirement Age	Section 175	Sections 302 and 399
50	n/a	1.10%
55	1.10%	1.75%
60	1.67%	2.40%
65	2.44%	2.40%

SECTION 9 PLAN PROVISIONS

I. Vested Termination Benefit

Return of employee contributions with interest, or if the value is greater than \$500, the member may choose to leave the contributions in the system. The member may become eligible in the future for retirement, disability or death benefits.

J. Non-Industrial (Ordinary) Disability Benefit

Eligibility is ten years of service.

Section 175:

With 16 2/3 years of service: 1½% of final average salary times years of service to disability.

<u>Less than 16 2/3 years of service</u>: Minimum of 1½% of final average salary times years of service would have earned to age 60, or 25% of final average earnings.

Sections 302 and 399:

Not Eligible for Retirement: Lesser of 1½% of Final Average Earnings times years of service or final average earnings times benefit factor at age 50 times years of service at age 50, minimum of 25% of final average earnings.

<u>Eligible for Retirement</u>: Maximum of retirement allowance or 25% of final average earnings.

K. Industrial Disability Benefit

Sections 302 and 399:

Not Eligible for Retirement: 50% of final average earnings.

<u>Eligible for retirement</u>: Maximum of retirement allowance or 50% of final average earnings.

L. Death Benefit – Pre Retirement Eligibility

Return of employee contributions with interest, plus 1/12 of salary in the year preceding death multiplied by the smaller of 6 or years of service.

M. Death Benefit – Post Retirement Eligibility

50% of the member's benefit as if the member retired at the time of death, paid as a lifetime benefit to the spouse.

N. Death Benefit - Post Retirement Death

\$500 paid to the member's estate upon death.

SECTION 9 PLAN PROVISIONS

O. Social Security Reduction at age 62

For members participating in Social Security, their benefit will be reduced at the later of age 62 or actual retirement age. The amount of the reduction is one half of the PIA from Social Security, multiplied by the ratio of the sum of salary earned from the City to the sum of salary from all sources used in the calculation of the Social Security amount. The member's benefit under the System plus the amount received from Social Security cannot be less than the member's benefit under the System calculated with no reductions as of his retirement age. The City applies this offset to service retirees, not to disabled retirees.

P. Reduction Account

A member can choose to reduce his normal contributions to the System by an amount equal to the taxes paid for Social Security coverage. At the time of retirement, the regular retirement benefit will be reduced by the actuarial equivalent of the accumulated value of the reduction of contributions.

Q. Cost of Living

Benefits will be increased each July 1 by the change in the CPI for the San Francisco/Oakland area for the preceding calendar year limited to 3% (with COLA bank).

R. Benefit Forms

Section 175:

Lifetime benefit to the member, which may be actuarially reduced to provide a continuance to a beneficiary.

Section 302 and 399:

Lifetime benefit to the member, with an automatic 50% continuance to the spouse.

Actuarial Methods

The actuarial cost method used for this valuation is the Entry Age Normal (EAN) method. The Present Value of Projected Benefits (PVPB) is the present value of all future benefits for current plan participants. The Actuarial Accrued Liability (AAL) represents the portion of the PVPB attributable to past service. The AAL is recognized over service through the date a participant is expected to commence benefits.

We recommend amortizing the current unfunded AAL over a 11-year rolling period as a level dollar amount. Because the plan is closed, the amortization period should be regularly reviewed. The Board has regularly reduced the amortization period in the recent past. Under current Board policy, when the average future life expectancy of the plan participants drops below 5 years, the amortization period will be reduced to no more than 5 years.

Plan funded status based on excess of

- 1) Value of Normal Retirement Benefit in excess of employee contributions over
- 2) Actuarial Value of Assets

The contribution generated by the current valuation will be payable for the City's fiscal year beginning one year later (2022/23). The June 30, 2020 valuation generated a contribution for fiscal year 2021/22.

The Actuarial Value of Assets is a 3-year smoothed market value. Gains and losses will be recognized over a three year period. For June 30, 2006, the first year of this method, the Actuarial Asset Value was set equal to the Market Value. The Actuarial Value of Assets will be limited by a 15% corridor. The Actuarial Value of Assets will be no greater than 115% of Market Value of Assets and no less than 85% of Market Value of Assets.

Data

The City provided participant data as of 7/1/2021. We reviewed the data for reasonableness and resolved any questions with the City. We believe the resulting data can be relied on for all purposes of this valuation without limitation.

Basis for Assumptions

Mortality assumptions are based on CalPERS 1997-2015 experience study, since that study is based on populations similar to this plan. Mortality improvement is the Society of Actuaries Scale MP-2020. Inflation is based on our estimate for the plan's very long time horizon. The salary merit assumption is based on our expectation of overall payroll growth, due to the current age of remaining employees.

Retirement and disablement rates are insignificant due to the age of the remaining participants and are based on rates used historically.

The Social Security offset, marriage, retirement age for deferred vesteds, and reciprocal assumptions are based in part on plan experience. Due to the small number and age of remaining employees and deferred vested, these assumptions are not significant.

Actuarial Assumptions

Assumptions used in the valuation are as follows:

■ Discount Rate

6.00% net of investment expenses⁸. See page 10 for derivation.

Prior valuation used 6.50% net of investment expenses.

Inflation

2.5%

Prior valuation used 2.75%

■ Salary Scale

2.5% CPI

0.50% Merit

Prior valuation used 2.75% CPI

■ Social Security Wage Base

2.75%

Prior valuation used 3.00%

■ Termination

None assumed. All active employees are retirement-eligible.

■ Retirement

Rates vary based on age. Sample rates follow:

<u>Age</u>	Non Sec 175
55	6%
60	26%
65	40%
70	100%

Disability

Rates vary based on age, gender and if the disability is job-related or not. Sample rates follow:

	<u>Job R</u>	elated	<u>Ordinary</u>			
	Male	<u>Female</u>	Male	<u>Female</u>		
59	.00612	.00336	.01683	.00924

100	35.37%	35.05%	35.37%	30.62%

■ Mortality Improvement Projection

Post-retirement mortality projected fully generational with Society of Actuaries Scale MP-2020.

Prior valuation used mortality projected fully generational with Society of Actuaries Scale MP-2019.

■ Social Security Offset

Monthly benefits for current retirees and vested terminated assumed to decrease at the later of age 62 or actual retirement, based on the average expected offset of future retirees.

Marriage

85% of male employees and 60% of female employees are assumed to be married. Wives are assumed to be four years younger than husbands.

■ Retirement Age

Deferred vested members covered under Section 399 are assumed to retire at age 62; those covered under Section 175 are assumed to retire at age 65.

■ Reciprocal Members

All remaining deferred vested members are assumed to have reciprocity with other retirement systems, and their pay is assumed to increase with salary scale after separation from the City.

■ Actuarial Modeling

Our valuation was performed using and relying on ProVal, an actuarial model leased from WinTech. Our use of ProVal is consistent with its intended purpose. We have reviewed and understand ProVal and its operation, sensitivities and dependencies.

■ COVID-19

No adjustments to the assumptions have been made for COVID-19 since the future impacts are unknown.

ACTUARIAL CERTIFICATION

This report presents the City of Sacramento Retiree Healthcare Plan ("Plan") June 30, 2019 actuarial valuation. The purpose of this valuation is to:

- Determine the Plan's June 30, 2019 Funded Status and
- Calculate the 2020/21 and 2021/22 Actuarially Determined Contributions.

Information provided in this report may be useful to the City for the Plan's financial management. Future valuations may differ significantly if the Plan's experience differs from our assumptions or if there are changes in Plan design, actuarial methods, or actuarial assumptions. The project scope did not include an analysis of this potential variation.

The valuation is based on Plan provisions, participant data, and asset information provided by the City as summarized in this report, which we relied on and did not audit. We reviewed the participant data for reasonableness.

To the best of our knowledge, this report is complete and accurate and has been conducted using generally accepted actuarial principles and practices. As members of the American Academy of Actuaries meeting the Academy Qualification Standards, we certify the actuarial results and opinions herein.

Respectfully submitted,

DEFINITIONS

■ OPEB Actuarial	■ Project future employer-provided benefit cash flows for current active employees and current retirees
Valuation	 Discount projected cash flow to valuation date using discount rate (assumed return on assets used to pay benefits) and other actuarial assumptions to determine present value of projected future benefits (PVB) Allocate PVB to past, current, and future periods using the actuarial cost method
	■ Actuarial cost method used for this valuation is the Entry Age Normal Cost method which determines Normal Cost as a level percentage of payroll (same method used by CalPERS)
	 Normal Cost is amount allocated to current fiscal year Actuarial Accrued Liability (AAL) is amount allocated to prior service with employer
	 Unfunded AAL (UAAL) is AAL less plan assets pre-funded in a segregated and restricted trust
■ PayGo Cost	 Cash subsidy is the pay-as-you-go employer benefit payments for retirees Implied subsidy is the difference between the actual cost of retiree benefits and retiree premiums subsidized by active employee premiums

Actuarial Certification

This report presents the City of Sacramento Retiree Healthcare Plan 2020/21 disclosure under Governmental Accounting Standards Board Statement No. 75 (GASBS 75). This report may not be appropriate for other purposes, although it may be useful to the City for the Plan's financial management.

This report is based on information provided by the City which we relied on and did not audit. Additional information on the actuarial valuation can be found in the June 30, 2019 actuarial valuation report.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as: plan experience differing from that anticipated by the assumptions; changes in assumptions; changes expected as part of the natural progression of the plan; and changes in plan provisions or applicable law. Actuarial models necessarily rely on the use of estimates and are sensitive to changes. Small variations in estimates may lead to significant changes in actuarial measurements. Due to the limited scope of this assignment, we did not perform an analysis of the potential range of such measurements.

The Journal Entries in this report are provided for the City's convenience and are not an actuarial communication. Therefore, this actuarial certification does not apply to the Journal Entries.

To the best of our knowledge, this report is complete and accurate and has been conducted using generally accepted actuarial principles and practices and complies with applicable Actuarial Standards of Practice. Additionally, in our opinion, actuarial methods and assumptions comply with GASBS 75. As the actuary, we have recommended the assumptions used in this report, and we believe they are reasonable. As members of the American Academy of Actuaries meeting the Academy Qualification Standards, we certify the actuarial results and opinions herein.

Employer Contributions

(Amounts in 000's)

The entries below assume cash benefit payments, Trust contributions, and administrative expenses have been charged to OPEB Expense when paid, and that no accounting entries have been made for the current year implied subsidy payment, which is recorded as a reduction to active employee health care costs. See page 20 for details.

Following records the impact of employer contributions as deferred outflows of resources and as a reduction to Net OPEB Liability.
